Dear Mr. Young:

References:

a. Your Freedom of Information Act request for Soviet Intelligence Services Facilities, ZF400231W

of March 29, 2001, for information pertaining to the ZF400231W (#133F-06).

b. Our letter of December 20, 2005, informing you that we were unable to comply with your request.

g you we needed additional time to review the records, beyond the statutory 20-day time limit in processing your request.

c. Our letters of March 22, 2006 and March 29, 2007, informing you we were still reviewing the records you have requested and will respond to you once the review has been completed.

y 30, 2007, informing you we were still reviewing the records you have requested and will respond to you once the review has been completed.

We have conducted checks of the automatic and Defense Central Index of Investigations and a search of the Investigative Records Repository to determine the existence of Army intelligence investigative records responsive to your request. We have located records pertaining to your request on Soviet Intelligence Services Facilities, ZF400231W.

We have completed a mandatory declassification review in accordance with Executive Order (EO) 12958, as amended. As a result of our review, information has been sanitized and 44 pages of records are denied in their entirety as the information is currently and properly classified SECRET and CONFIDENTIAL according to Sections 1.2(a)(2), 1.2(a)(3), and 1.4(c) of EO 12958, as amended. This information is exempt from the public disclosure provisions of the FOIA pursuant to Title 5 U.S. Code 552(b)(1). On March 9, 1999, the President exempted the file series in which these records are maintained from the automatic declassification provisions of EO 12958, Section 3.4, as amended, pertaining to classified records more than 25 years old. It is not possible to reasonably segregate meaningful portions of the withheld pages for release. The records are enclosed for your use. A brief explanation of the applicable sections follows:

Section 1.2(a)(2) of EO 12958, as amended, provides that information shall be classified SECRET if its unauthorized disclosure reasonably could be expected to cause serious damage to the national security.

Section 1.2(a)(3) of EO 12958, as amended, provides that information shall be classified CONFIDENTIAL if its unauthorized disclosure reasonably could be expected to cause damage to the national security.

Section 1.4(c) of EO 12958, as amended, provides that information pertaining to intelligence activities, intelligence sources or methods, and cryptologic information shall be considered for classification protection.

Since the release of the information would result in an unwarranted invasion of the privacy rights of the individuals concerned, this information is exempt from the public disclosure provisions of the FOIA per Title 5 U.S. Code 552 (b)(6).

The withholding of the information described above is a partial denial of your request. This denial is made on behalf of Major General John Defreitas, III, the Commanding General, U.S. Army Intelligence and Security Command, who is the Initial Denial Authority for Army intelligence investigative and security records under the FOIA. You have the right to appeal this decision to the Secretary of the Army. If you wish to file an appeal, you should forward it to this office. Your appeal must be postmarked no later than 60 calendar days from the date of this letter. After the 60-day period, the case may be considered closed; however, such closure does not preclude you from filing litigation in the courts.

Coordination has been completed and we have been informed by the Central Intelligence Agency (CIA) that their information is exempt from public disclosure pursuant to Title 5 U.S. Code 552 (b)(1) and (b)(3) of the FOIA.

The withholding of the information by the CIA constitutes a partial denial of your request and you have the right to appeal this decision to the Agency Release Panel within 45 days from the date of this letter. If you decide to file an appeal, it should be forwarded to the following: Mr. Scott Koch, Information & Privacy Coordinator, Central Intelligence Agency, Washington, DC 20505. Cite CIA #F-2004-01074 assigned to your request so that it may be easily identified.

During the processing of your request, information was disclosed which is under the purview of other government agencies. This office has no authority to release these records and they are being referred, along with your request, for appropriate action under the FOIA, and direct reply to you.

Additionally, we are coordinating with another government agency concerning the releasability of their information contained in the records. We will inform you as to the releasability of the information upon completion of our coordination.

Fees for processing this request have been waived.

If you have any questions concerning this action, please feel free to contact this office at (301) 677-6410. Please refer to case #133F-06.

Sincerely,

A handwritten signature in black ink, reading "Susan J. Butterfield". The signature is written in a cursive, flowing style with a large initial "S".

Dear Mr. Young:

In the course of processing your 29 March 2001 Freedom of Information Act (FOIA) request to the Department of the Army for records regarding "*Soviet Intelligence Services Facilities*," the Department of the Army located CIA material and referred it to us for review and direct response to you.

We reviewed the material and determined that it is currently and properly classified and must be withheld in its entirety on the basis of FOIA exemptions (b)(1) and (b)(3). I have enclosed an explanation of these exemptions for your reference and retention.

CIA Information and Privacy Coordinator Scott Koch made this decision, which you may appeal to the Agency Release Panel, in my care, within 45 days from the date of this letter. You may include any additional information supporting your position or explaining why you think our initial decision is wrong.

Thank you for your patience while we processed this referral.

Sincerely,

A handwritten signature in black ink that reads "Scott Koch".

Explanation of Exemptions

Freedom of Information Act:

- (b)(1) applies to material which is properly classified pursuant to an Executive order in the interest of national defense or foreign policy;
- (b)(2) applies to information which pertains solely to the internal personnel rules and practices of the Agency;
- (b)(3) applies to information pertaining to the CIA Director's statutory obligations to protect from disclosure intelligence sources and methods, as well as the organization, functions, names, official titles, salaries or numbers of personnel employed by the Agency, in accordance with the National Security Act of 1947 and/or the CIA Act of 1949;
- (b)(4) applies to information such as trade secrets and commercial or financial information obtained from a person on a privileged or confidential basis;
- (b)(5) applies to inter- and intra-agency memoranda or letters which are predecisional and deliberative in nature, or consist of attorney work-product or attorney-client information;
- (b)(6) applies to information, the release of which would constitute an unwarranted invasion of the personal privacy of other individuals; and
- (b)(7) applies to investigatory records, the release of which could: (A) interfere with enforcement proceedings, (C) constitute an unwarranted invasion of the personal privacy of others, (D) disclose the identity of a confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of an individual.

Privacy Act:

- (d)(5) applies to information compiled in reasonable anticipation of a civil action or proceeding;
- (j)(1) applies to polygraph records; documents or segregable portions of documents, the release of which would disclose intelligence sources and methods, including names of certain Agency employees and organizational components; and documents or information provided by foreign governments;
- (k)(1) applies to material properly classified pursuant to an Executive order in the interest of national defense or foreign policy;
- (k)(2) applies to investigatory material compiled for law enforcement purposes;
- (k)(5) applies to investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, or access to classified information, the release of which would disclose a confidential source; and
- (k)(6) applies to testing or examination material used to determine individual qualifications for appointment or promotion in Federal Government service, the release of which would compromise the testing or examination process.

15. SUMMARY REPORT:

(U) From 1956 to 28 March 1973, Source was a resident of KIEV 5025N-3030E (UA 2390). In 1958, he met (fnu) b6 a former childhood friend. At that time, b6 told Source he was a KGB MAJ assigned to the N Soviet Union but had participated in a four month course conducted at an installation located in KIEV at 502530N-0303115E (UA 23608920). The facility occupied an approx 200 x 100 m area which was secured by a 3 m high brick wall and which was bordered by Proulok Ulica in the N, by Ulica Krasnaya Armeyskaya in the E, by Gorkova Ulica in the W, and by an unidentified street in the S. A 4-m wide gate and two 1-m wide pedestrian entrances were located on Proulok Ulica. A 4-story, approx 25 x 8 m, and three 3-story, approx 50 x 10 m apartment house type buildings were located on the premises. Considerable portions of most or all buildings contained what Source thought to be classrooms and bedrooms. In 1968, Source one met a former fellow student who told him that he was a KGB official assigned to this installation, and Source thought the man also received training there. The facility was referred to by the local populace as "Spy School" ("Spionska Skola"). Very often, when Source passed the installation, last in February 1973, he saw civilian male personnel enter or leave there. Personnel at the entrances who seemed to act as guards also wore civilian clothes. Source could not furnish more details on the installation.

15. SUMMARY REPORT:

(U) Source, a leading economist, had been in contact with the KGB (Soviet State Security Service) and the GRU (Soviet Military Intelligence Service) since 1954. He met COL b6 in this building. Information contained in this report is based on his own observations. There was a GRU guest house in Rheingold Street, BERLIN-KARLSHORST, just opposite the church (Item 11). COL b6 met his "connections" here. This was a villa type building, with two floors. It was covered with brown plaster and had a pointed roof. The building stood about 40 m from the road in a park type garden. 30 m right of the villa (located in front of it), there was a glass building resembling a sentry box, in which a member of the East German Peoples Police sat as guard. The house had wide drives leading to it. On the second floor, there were bedrooms. On the first floor, there was a large dining room, two living rooms, a billiard room, a kitchen, and toilets. The telephone connection did not lead outside. It was connected to the Colonel's GRU office. The first floor windows did not have bars. COL b6 drove a black Mercedes (1971 model).

REPORT:

1. Source

Source, a 39-year old ethnic German male, had seven years of schooling and is a carpenter by trade. He resided in KRZHAR, Uzbekistan, USSR, from 1963 until his resettlement to West Germany in February 1973. During this time, he was b1

In October 1972, he was reported to the KRZHAR KGB office for talking disrespectfully about the socialist system while drunk. He was arrested and spent 20 days in the confinement facility in Subject KGB office building. After his release, he was coerced by a KGB major into renovating the major's apartment during his spare time without pay.

2. KGB Office

The KGB office was in the police building on Militaya St, about 50 m E of Pozharnaya St, and 100 m NE of the trade school building on Lenin St (see IR No KA-028-73), in KRZHAR. The building measured 24 x 10 x 5.5 m and was of brick/stucco construction with a gabled, slated roof. There were 10 office rooms, five on either side of the center hallway, with the police chief, a LTC, occupying the two offices on the far left, and the KGB chief, a MAJ, occupying the third office on the right side of the hallway after entering the building. Source remembered the passport and the information offices as also being there as well as three cells for investigative custody of up to 20 days. The cells were in a structure added to the main building.

 (U) ~~(S)~~ 2. Offices and Members of the KGB

In December 1972, the leader of the KGB in YEREVAN, [b6] was replaced by the Russian, [b6]. The deputy director, [b6] remained. Sometime in August 1972, a member of the KGB from YEREVAN fled to Turkey with his wife and child. The deputy director was against employing the now fled applicant at the time and had written this in his personnel action: In the KGB there is no place for merchants. [b6] had ignored this and the applicant was found acceptable and hired. The office of the KGB of Armenia was in YEREVAN on Naldanyana Street. Next to the entrance door is a sign with the designation of the headquarters (i.e. KGB of Armenia, SSR). The building is about 50 m long and 15 m wide. It consists of gray volcanic limestone and has a red metal span-roof (ground floor and four stories). On the ground floor is the prison. Part of the KGB members used to live in the building; now there are only offices, a clubroom, film room, and sports rooms. On the front street is an entrance for visitors and vehicles. Guards stand at the gates. Camouflaging the KGB members is not successful. Whoever works in this headquarters is known to the populace. The militia office in which the passport department (OVIR) operates is directed by a KGB member and is also on Naldanyana Street; the offices are separated by Issakgane Street and a monument. The building is similar to that of the KGB in size and appearance. The KGB archives and mail censor for Armenia is on Gnuni 35 street. It is a villa consisting of a ground floor and two upper stories. The building is a red volcanic stone and has a red metal roof. Mail that comes from or goes to a foreign country is sorted at the post office and brought to this office to be checked, as is the mail of persons under suspicion. The first Special Department (Security) in the KIROV rubber project in YEREVAN is headed by the KGB member [b6] (DOB: 1933).

2. (U) (c) Location

(See Figure 1)

The office was 300 m S of the W end of the KLAIPEDA Main RR Station, on the E side of the former "Bahnhofstrasse" (present name unknown), at the NE corner of the intersection of the "Bahnhofstrasse" with the Simono Daukanto Gatve at 554309N-210815E) (EG08637505).

3. (U) (c) Description

The office was on the premises of a former home for aged persons. The building was 25 m long along the "Bahnhofstrasse" and 12 m wide towards the Simono Daukanto Gatve. It was masonry and had three stories. The windows towards the streets were comparatively high and were secured by iron gratings. The entrance was a doorway in the middle of the building on "Bahnhofstrasse". Except to let persons or vehicles in or out, the door was always closed. In the rear of the building was a courtyard of twice the size of the building. The courtyard was enclosed by a more than two m high masonry wall. The aforementioned corner of the two streets had a group of trees and a modern apartment house was situated between the SE corner of the building and the Simono Daukanto Gatve. A hospital was located across the Simono Daukanto Gatve, and opposite a group of trees.

4. (U) (c) Occupancy

The building was exclusively occupied by a State Security Office for at least 10 years. A sign on the right side of the doorway read "Klaipeda Miesto Saugumas". Source who had never been in the building, did not observe any guards from the outside. She observed civilians and civilian vehicles entering and leaving through the doorway. She did not notice any military personnel entering or leaving. Source's brother had been in the office three or four times for interrogation, but she did not know any details. Source heard from neighbors in late 1970, that a man who had copied religious pamphlets on his typewriter was interrogated in Subject office. She also heard that members of the office surveyed the attendants of celebrations of the local Roman Catholic Church.

COMMENTS:

(U) Source was cooperative and of average intelligence. Her powers of observation and her abilities to read maps, judge distances, and recollect details was satisfactory. The interview was conducted with the help of her mother who acted as interpreter.

2. Information

The KGB office is located on Enthusiast Str (Entuziastov) Nr 1, approx 500 m from the main RR station on the W side of the street. It is a pre-war plastered construction, 4-story high, 50-60 m long, no windows on the street side. It has one pedestrian entrance, an iron door, which has a receptionist

desk with an Army officer on duty. The building in which the KGB office is located also houses the city traffic police. Source was in subject building during May 1972, when he received approval of his resettlement application. A stairway leads upstairs from the entrance to the offices on the first floor, where the KGB office is located in room number 8. There are about five offices on the first floor, but Source does not know whether they all belong to the KGB. Source does not know what offices are located on the other floors. Next to the building on the N side is a garage for the KGB and traffic police vehicles.

2(U) (c) Location

(Figure 1)

a. CSSR State Security Service HQs

The CSSR State Security Headquarters, which are responsible for the HRADEC KRALOVE District, are located at (WR588625), the intersection of Manesova and Nerudova ulice and Manesova and Gotwaldova ulice. The HQs are unofficially referred to as "Manesova ulice 239".

b. Soviet KGB Headquarters

The Soviet KGB Headquarters, which are also responsible for the security of Soviet armed forces units stationed in the area of HRADEC KRALOVE and PARDUBICE (5002N-1546E) (WR5543) District, are located in a separate building at Manesova ulice 239 (1, Fig 2).

The living quarters of the KGB-members are located in the former artillery casern (Delostrelecka kasarna) (Fig 3), a portion of which (1, Fig 3) has been separated by a barbed wire fence for this purpose. These quarters are located at the Okruzni-Pouchovska ulice intersection at (WR602633). The other portion of the former casern houses quarters for students of the CSSR Military Medical Academy in HRADEC KRALOVE (6, Fig 3) and the headquarters of the CSSR HRADEC KRALOVE Garrison Command. (3, Fig 3).

3(U) (c) Description of Facilities

a. Installation "Manesova 239"

This installation consists of one 3-story reinforced concrete panel construction with a plain roof. This complex was built several years ago, but Source was not able to recall the date of completion.

About 300 persons are employed in the CSSR portion of the complex. Source was not able to furnish any information on the manpower strength of the State Security Service itself.

The Soviet KGB HQs employs about 60 persons in this complex. Other members of the KGB are stationed in the casern (2, Fig 3) where the KGB motor park is located.

Militia and state security posts are also scattered throughout the city. These posts are responsible for the city districts. Source knew of only two, one of which is located in Leninovo namesti near the City Cathedral. It is responsible for the inner city center. The other was built in 1969, and it is responsible for the city district "Orlicka kotlina". This new militia post is on the back side of the former artillery casern (5, Fig 3), and consists of a large office building and a garage.

Source was not able to furnish any information on personalities and officers of the State Security Service (STB) in HRADEC KRALOVE.

DECLASSIFICATION SCHEDULE

b1

b1 to resettle in the FRG in Dec 70. He entered the FRG legally on 1 Jan 71. The following information is based on observations made in connection with his resettlement. He was in FRUNZE (4254N-7436E) (DM6847) in the area in question about ten times from May to Dec 70.

(U) Location and Area Description

(See Figure 1)

The intelligence & security and police installations are located in the central part of FRUNZE. Lack of a map reference prevented Source from indicating a more precise location. The installations form a compound bordered by 22 Parteyast Ulitsa to the S, Kirghizkaya Ulitsa to the W, and Pervomaiskaya Ulitsa to the E. Source did not know the north boundary. The compound is bisected from W to E by an unidentified street. The area is about 80m from W to E, and the N-S distance is over 160m.

(U) Physical Security

There is no physical security for the compound. The northern part is enclosed by a brick wall on the S, W and E about 2.20m high, but a pedestrian gate to the W (Kirghizkaya Ulitsa) is open.

(U) Building Description

(See Figure 1)

The compound consists of seven buildings. Numbers in parentheses correspond to those on Figure 1.

a. MVD building (6)

This is presumably the MVD building for the Kirghiz SSR. The address may be Kirghizkaya Ulitsa 70. A large sign with the letters "MVD" (in Cyrillic) is above the entrance. The building is not guarded on the outside.

b. MVD building (7)

This second MVD building is located on Pervomaiskaya St. and appears to be the one for the Oblast (region) of FRUNZE. The building is not identified or guarded on the outside. A city policeman is on duty at a high desk on the right side of the entrance. Personnel on duty in the building show him a permanent building pass; others tell him in the office they want to visit. The one time Source was in the building he did not need a pass. The passport office has at least one room in this building located on the ground floor.

c. Reception building (5)

It appears that the reception building serves as an information office for the entire compound, but admission slips are required only for the building housing the passport office and unidentified police offices. These admission slips with two identical halves are called "propusk". They are issued by a female official in a cage behind a glass

partition of the type bank tellers have. Before issuing an admission slip to passport office visitors, she telephones this office to make certain the visitor will be received. If so, she issues the admission slip to the visitor, and enters his name, personal identity card number and the time in a logbook.

d. Guardhouse (3)

A uniformed city policeman is on duty at the guardhouse.

e. Passport office, (4)

This building houses the passport office and a number of unidentified police offices. The policeman on duty checks the identity cards of visitors and takes one half of their admission slips. They then proceed unescorted. Resettlement processing for ethnic Germans is handled in room 14. The supervisor is a male official who is assisted by up to five females. All personnel in room 14 wear civilian clothing. Before processing, clients have their identity cards and admission slips checked. The policeman on duty takes the second half of the admission slip from visitors leaving the building.

f. Traffic Police Building (2)

This building appears to be exclusively used by the traffic police.

g. Multi-purpose building (8)

The entrance to this building is not guarded. The Passport office occupies room 111 and perhaps other rooms of this building. Occasionally, one of the female officials of the passport office takes care of resettlement processing in room 111.

COMMENTS:

Source, though only of average intelligence and with little education, is knowledgeable in several areas because of his alertness and inquisitiveness. He is a good map reader. Source cooperated fully.

Streets: The four streets indicated are all approximately 5.5m wide (two lanes), have asphalt surfaces in very good condition, narrow (about 1m) sidewalks on either side, and are tree-lined.

1. Approximately 2.20m high brick wall. The entrance on Kirghizkaya Ulitsa is an iron picket gate for pedestrians.
2. Traffic police building. This building is white stucco, has one story, is about 40m x 12m, and has a gabled black-shingle roof.
3. Guardhouse. This building is white stucco and about 3m x 3m.
4. This building located at Kirghizkaya Ulitsa 72, is externally identical to the traffic police building. It houses the passport office and other unidentified police offices. Only the entrance indicated as "a" is in use. The building is divided by a 1.5m wide corridor.
5. Reception building. This is a white stucco, one story, about 8m x 8m building.
6. MVD building at Kirghizkaya Ulitsa. This is a three story, white stucco, building about 50m x 20m.
7. MVD building at Pervomaiskaya Ulitsa 82. The building is identical externally to the other MVD building.
8. Multi-purpose two story white stucco building about 12m x 10m. The passport office occupies one room on the ground floor (room 111) and possibly other rooms. A governmental construction agency and other unidentified agencies also have space in this building.

Background.

(Leave Blank)

a. Family History.

Source's family, who lived in LITHUANIA as ethnic Germans, moved to Germany in 1940 where they lived in ZIELENZIG, OST STERNBERG county. Source became a German citizen. The family was returned by the Soviets to Lithuania as "displaced persons" in 1945. They chose KLAIPEDA as their home because there were many Germans there in 1945 and the children spoke only German. Source's father was killed in World War II. Source himself married a woman of Lithuanian origin in LITHUANIA. They had 2 children. Source's family who had voluntarily moved to Germany in 1940, lost their former real estate holdings. Source spoke neither Lithuanian nor Russian. He had to get used to the foreign environment; therefore he did not show his German origin or his German citizenship in Soviet-occupied Lithuania.

b. Source's Hiring by the KGB.

b1

b1

b1 which was a well-paid position. In the questionnaire for his application he only had to give the place of his birth and his residence; both places were in the area of KLAIPEDA. The question of German citizenship did not arise in the questionnaire and the Source kept this fact to himself. b1

d. Attempt at Re-settlement.

In 1962 Source's mother and in 1966 his brother moved to the German Federal Republic under the provisions for re-unification of families. A request by the Source to the same effect was disapproved on the grounds that his wife and children were Soviet citizens, for whom resettlement is not possible. Source was still in possession of his German passport from 1945. He fought with all possible means against every effort to make him a Soviet citizen; he requested repatriation 30-30 times, contacted the German Red Cross in HAMBURG and the Soviet Red Cross and went to MOSCOW several times in order to state his reasons for his repatriation request at the Soviet Ministry of Interior and to contact the German Embassy in MOSCOW. According to Source he was not told to maintain secrecy, nor was an attempt made to recruit him for work for the KGB.

KGB Offices and Personnel in the USSR.

a. The highest KGB office in MOSCOW is in the building of the Ministry of Interior, Ogareva 6. Source corresponded with this office concerning his repatriation.

b. The KGB office for the Soviet Republic LITHUANIA is located in VILNIUS, Janoniu 2, near the castle. Source was summoned to that office

concerning his repatriation. Head of the KGB office in b6 was COL b6 fnu. The latter wore civilian clothes, but was addressed by other people by his rank. b6 fnu, rank and duty unknown, worked with b6

4. (NO FOREIGN DISSEM EXCEPT b1) KGB Offices in KLAIPEDA.
a. The Harbor and Shipping KGB was located in KLAIPEDA at Priestoties G. 8 in a building, half of which was used by the KGB and half by the Railroad Militia (See Figure 1).

b. The KGB office for General Agenda for the Region of KLAIPEDA was located at Solonajos Nieries 22, on the East side of the street, opposite the General Hospital (See Figure 1). The Harbor and Shipping KGB was closed in Sep 59 and its business transferred to the KGB office for General Agenda for the Region of KLAIPEDA. Help that was not required was discharged.

5. (NO FOREIGN DISSEM EXCEPT b1) Personnel of KGB.
a. Harbor and Shipping KGB.
Head of this office until its deactivation in Sep 59 was COL b6 fnu. He was then transferred to the Regional Office Solonajos Nieries 22. His deputy, MAJ b6 fnu, was also transferred to the Regional Office. b6 fnu, was an employee of the KGB. CPT b6 fnu, was building administrator. The wife of the building administrator, b6 fnu, worked either as a doctor or a nurse for the KGB. The harbor KGB office employed a total of 55 - 58 persons. Source does not know, how many of these were transferred to the other KGB office.

b. KGB office for the region of KLAIPEDA.
The following persons worked in this office: STRUDPAS, fnu, rank and duties unknown. b6 (phonetically), rank and first name unknown. Source was summoned by letter to this office in 1965 in order to be informed that his repatriation request had been disapproved.

6. (NO FOREIGN DISSEM EXCEPT b1) Duties of the KGB KLAIPEDA.

a. Source of Information.
Source's knowledge is based on outside observation of the office building, on observations made in the harbor area, on the experience he had b1 on his observations during his trips to restaurants which were under constant surveillance, and on hearsay from acquaintances.

b. Incoming ships.
The captains of all Soviet ships stopping in KLAIPEDA must report to the KGB office immediately. They carry papers, but Source does not know the subject of their conversation with the KGB office. Before a Soviet ship leaves the harbor, the captain or the 1st mate submits the papers of all personnel employed on the ship to the KGB. Seamen who appear suspicious to the captain are taken off the ship by the KGB.

c. Outgoing ships.
Outgoing fishing boats have to dock at the north tip of the Kurische Nehrung; the ship's crew is assembled in a cabin and KGB border guards (who wore green hats) enter the ship. With the papers on hand, every seaman is called separately and taken to a closed cabin until all persons have been checked. During the processing the border guards check the outgoing ship very thoroughly. Only when this procedure has been completed can the seamen return to their stations.

d. Foreign ships.
Source has not seen any members of foreign ships visiting the KGB harbor office. KGB members enter foreign ships in the harbor in the performance of "certain missions" disguised as harbor officials, laborers or in other disguise. b1

e. Interrogation Incident.

In 1957 a student of the Naval Fishing school who had taken part in a trip abroad was taken off the ship by the KGB. The captain of the ship (whose name the Source does not remember) had locked the student up because he attempted to escape. The student was interrogated 3 - 4 days in the basement of the old harbor office of the KGB and then turned over to his father, who lived approximately 25 km from KLAIPEDA. Source has not heard what happened to the naval student.

f. Restaurant Surveillance.

A restaurant for foreign seamen in KLAIPEDA was regularly visited by KGB officials in civilian clothes (whom Source drove to the place). Source is of the opinion that the restaurant was a place of surveillance of the foreign seamen by the KGB, and that possibly meetings also took place there. After dropping the KGB official at the restaurant, Source was regularly ordered to return to his place of duty.

7. (c) (NO FOREIGN DISSEM EXCEPT b1) Description of the KGB building at the Solomejos Nieries 22.

This building at the corner of Sirano Daukanto is a 3-story building with small windows and a low gabled roof with an antenna. Adjacent to the building is an entrance for passengers and next to it an entrance for vehicles. The gates are spanned by a wall which connects the main building with the annex and does not permit observation. The annex, a red brick building (the only one of this type in the street) is probably a polyclinic of the KGB; it contains a power generator and accumulators (Source's own observation). A large diameter cable leads from this building to the antenna on the roof of the KGB main building. Source knows also from the fact that photocopies and photographs were prepared that a facility of this type is located in the KGB building.

8. (c) (NO FOREIGN DISSEM EXCEPT b1) The legend to figure 1, a map overlay of KLAIPEDA, is as follows: 1. Railway station KLAIPEDA; 2. Former KGB Office for harbor and shipping agenda; in the same building is the Railway Militia; 3. Priestoties G. Street; 4. Solomejos Nieries Street; 5. Boarding School; 6. Hospital; 7. KGB Office in the building Solomejos Nieries Street 22.

9. (c) (NO FOREIGN DISSEM EXCEPT b1) The NO FOREIGN DISSEM EXCEPT b1 marking is necessary to prevent the release of this information to a third country without the permission of the originator.

SUMMARY OF INFORMATION

1. SIS Office, Kreis Rathenow (Exhibit " "):

a. This office is the middle building of three, villa-type structures located in the Soviet Military Compound on Stalin Allee. This three-story, red roofed structure is of light gray stucco except for approximately five feet of red brick from ground to first floor. A low, dark gray, picket fence separates the front yard from the street, and there is a narrow path between the house and the fence. There are no signs or guards outside the SIS building, although there is a guard at the corner of Stalin Allee and Bahnhofstrasse. There is a small gate on the northeast corner of the house and a path which leads to a rear door of the building.

b. The one room to which Source had access is on the north side of the first floor, where two unbarred windows face Stalin Allee and lead to a small balcony. The furnishing are normal living room furniture, a desk, cabinet, a few straight chairs, and a ceiling lamp.

c. The buildings on both sides of the SIS quarters are billets for Soviet officers and their families, and Source believes that a portion of the SIS building is also used for living quarters.

2. SIS Operational House at RATHENOW, Ebert Ring, number unknown (Exhibit " "):

a. A two-story, villa-type house, situated on Ebert Ring one block north of Stalin Allee, is used as a cover house for SIS interviews. It is made of stucco that is painted light yellow or ivory. It has a red-tiled roof and a large balcony on the second floor facing Ebert Ring. The house is surrounded by a white picket fence approximately four and one-half feet high, inside of which a garden is maintained. A gate on the northeast side of the house opens to a path which leads to the rear entrance and basement of the building. There are no guards or any signs identifying the occupants. The closed shutters on all windows of the first floor lead the townspeople to believe it is unoccupied. The windows and doors are void of obvious security factors such as bars or grillwork.

b. The basement, where Source was interviewed, is furnished with a couch, desk, round table, and several chairs.

3. The Soviet Officers' Club, RATHENOW, Puschkinstrasse and Ernst-Thaelmannstrasse, East Germany (Exhibits " " and " "):

compound is referred to by the names "Haus der Offiziere" and "Schuetzenhaus." It houses a restaurant, snack bar, and a hall which is used for meetings, dances, and movies. The compound in which the club is located also has a volleyball field, truck shed, gasoline storage shed, workshop, garage, guard billet, and a park complete with bandshell. Eight Soviet enlisted men are assigned as permanent guards.

b. The administration of the club is handled by an organization called HQ Special Handel, RATHENOW, which was formerly headed by a Major, Pnn b6 a Soviet Army officer who was returned to the USSR in 1959 due to repeated drunkenness and misconduct. Prior to 15 April 1959, an SIS lieutenant, Pnn LNU, male, was responsible for personnel security; however, on that date all German employees were discharged and replaced with Soviet nationals except for two charwomen and a caretaker. The addition of a library to the club is still in the planning stage. If a German librarian is hired, it will be a female who is willing to undertake missions for the SIS lieutenant.

c. In January 1959, the restriction of German nationals from the club was lifted, and they may now enter as guests between the hours of 1800 and 2330. Under no circumstances are enlisted military or low ranking civilian personnel permitted entry. Normally the Soviet personnel pay for purchases with coupons; however, when in the company of Germans, they may spend DME (and it is believed they may receive up to 50 percent of their salaries in DME). The Germans pay for purchases in DME and are restricted from the use of coupons. The spending of rubles is forbidden.

d. Important meetings and conferences take place in the club on an average of twice a week, during which time no German is allowed on the compound and additional Soviet guards are brought in.

4. The proximity of Soviet military installations to one another and to RATHENOW civil organizations is depicted in an additional sketch furnished by Source (Exhibit "K").

(P-6)

5. The files of Region VIII, 66th CIC Group, APO 742, US Forces, were examined and revealed that information on SIS facilities in RATHENOW was submitted in SOI, dated 18 November 1955, Subject: East German Intelligence Service, Re: Installations, file: D-567253/s.

SUMMARY OF INFORMATION

1. SIS Office Building, CHEMNITZ 885433, East Germany: A former apartment building, located at CHEMNITZ, Gauss Strasse 12, is the operational center of SIS in that city. The structure is three stories high, stucco-covered, has a steep red tiled roof, and entirely surrounded by a seven-foot dark green wooden fence. There is a guard at the gate, one inside the first floor entrance, and one at the landing of the second floor (See Exhibit " / ").

2. Soviet Military Kommandatura, CHEMNITZ (See Exhibit " 77 ");

a. The Soviet Military Kommandatura, also referred to as the Stadt Kommandatura, is located in a former large office building on Hohestrasse, number not known. This building with two or three annex buildings, which are used for officer billets, is surrounded by a dark gray-green wooden fence approximately seven feet high. The main gate is on Hohestrasse, but a second gate, which is normally kept locked, is on Henriettenstrasse.

b. Except for about six cleaning and kitchen helpers, all employees of this compound are Soviet citizens. Special type passes are issued to persons having access to the compound, and they are exchanged for normal identity documents at the beginning and end of each work day.

c. The present Kommandatura has only been used by the Soviets since early 1957, prior to which it was located on Bahnhofstrasse.

3. Soviet Army Officers' Club, CHEMNITZ (See Exhibit " ");

a. The Soviet Army Officers' Club, also called "The Casino," is a two story villa-type building located at the corner of Galileistrasse and Kaufmannstrasse. The building has gray stucco walls and a steep red-tiled roof. Rather than having the usual facilities of a club, i.e. lounge, recreation room, reading material, etc., it is strictly an eating establishment operated by the HO WISMUTH Mining Company. In addition to its utilization by military personnel, Soviet civilians and top German officials of the mining company have access-- the latter by means of a specially issued pass. However, the issuance of the pass is of little consequence because the club is not guarded and anyone may enter, but control over patrons lies in the use of coupons rather than monetary payment for purchases.

b. The manager of the club is a Soviet female civilian, b6 born in 1927-1928, place unknown. She has a staff of 12 German employees, among whom Source remembers the following:

SUMMARY OF INFORMATION

1. Location and Description of SIS Operational Apartments.

a. An SIS operational apartment is located at Grosse Weinmeisterstrasse 1 in Potsdam UU6808, East Germany. The apartment is located on the ground floor to the right as one enters the apartment building. The room used for meetings is situated on the left at the end of the corridor in the apartment. (See Exhibit " ".)

b. An SIS operational apartment is located at Hassestrasse, near the corner of Hassestrasse and Kleine Weinmeisterstrasse, in POTSDAM. The apartment is on the ground floor at the right as one enters the apartment. On the one occasion that Source visited the apartment, he heard a woman speak in Russian to Source's SIS handling agent. (See Exhibit " ".)

2. Location and Description of a Soviet Military Installation: A Soviet military installation is located on Langhanstrasse in POTSDAM. The installation is a two-story house, slightly recessed from Langhanstrasse, and located among bushes and trees. The installation houses Soviet military personnel and is reached through a narrow passage, entered by passing through a double-winged iron gate on Am Neuen Garten. A wooden guard tower, approximately 20 feet high, with a Soviet guard on top is situated near the installation. (See Exhibit " ".)

(P-6)

3. Region VIII File Examination: Information on file, this Region, indicates the following:

a. An SIS operational apartment is located at Grosse Weinmeisterstrasse 57 in POTSDAM. The apartment is occupied by a Soviet family and has one room reserved for SIS use. This information is contained in an undated, unevaluated trace. Since the Exhibit which accompanies the trace locates the operational apartment on the corner of Kleine Weinmeisterstrasse and Grosse Weinmeisterstrasse (which compares with Hassestrasse - the extension of Grosse Weinmeisterstrasse), it is probable that this operational apartment is identical to the operational apartment mentioned above which is located on Hassestrasse.

b. Langhanstrasse is located within the Soviet restricted area in POTSDAM. This area is fenced in and used by high-ranking Soviet officials and army personnel. This information is contained in a trace, dated 15 January 1959, and evaluated F-6.

SUMMARY OF INFORMATION

On 3 and 4 November 1959, Source A-III was interrogated at Resident Agency Giessen, Region III, 66th CIC Group, APO 169, and revealed the following information concerning a Kreis Luebben Soviet Intelligence Service (SIS), installation in Luebben VT2455, East Germany (EG):

The installation is an operational house used for the purpose of covert meetings with informants. The house is located in Luebben on Berg Strasse, number unknown, and to the best of Source's knowledge it is used exclusively by the SIS. Berg Strasse is one city block east and parallel to Bahnhof Strasse, which serves the railroad station of the community. (See EXHIBIT I)

The house is a small dwelling owned by [b6] a widow. [b6] permits the SIS to use one room located on the first floor. The front of the house faces west and it is square in shape. Between the house proper, and Berg Strasse, is a small garden which contains two (2) fruit trees. The border of the yard is surrounded on the north, south and west by lilac bushes. There is a planting of lilacs extending along the south wall of the house which also extends beyond the wall and forms the garden of the Cafe Schulz which is to the rear or east of the house. There is no connection between [b6] and the Cafe Schulz. (See EXHIBIT II and III)

The outside dimensions of the house form an approximate 45 foot square. There are two (2) stories and the walls are covered with gray stucco. Entrance is gained by way of a door located in the west or front wall of the house. (See EXHIBIT II)

The interior of the house was not known to Source, except for the room which was used by SIS. As one entered the building from the front door, the SIS room was to the immediate left. The room was simply furnished with worn furniture. (See EXHIBIT III)

Source came to know the room, mentioned above, in 1951 when she was recruited as an informant by SIS. From that date until January 1959 she had been in the room approximately 15 times. Source could furnish no further pertinent information relative to the above installation. (F-6)

SUMMARY OF INFORMATION

1. KECH (Kvartirno Eksploatsionaya Chast - Billeting Administrative Unit) organization building in the Soviet Compound in WUENSDORF UT9850, East Germany:

a. KECH, the Soviet billeting and billet repair and maintenance unit, has its headquarters in WUENSDORF. The unit performs its repair services through the SBB (Sonderbau Buero - Special Construction Bureau) of the German Building Construction Ministry. The SBB has an office in the Soviet compound at WUENSDORF on the north side of an unnamed street running from the Soviet railroad station to Highway 96. The building is "L"-shaped and is located across the street from the building numbered 615. The Soviet administrator of this office is a Captain [b6]. The building is one story high with a half cellar. The cellar contains a pantry, kitchen, and dining hall for employees. The rest of the building contains offices for the German employees of SBB.

b. The German employees of SBB are as follows:

(1) [b6] born about 1911, who resides in POTSDAM UU6707, East Germany, is the chief of the SBB in WUENSDORF. He speaks fluent Russian and travels to work in a unit automobile although he owns his own car. [b6] is a member of the SED and a building engineer by profession.

(2) [b6] male, born about 1931, a building engineer by profession, is the Deputy Chief of the SBB in WUENSDORF.

(3) [b6] female, born about 1932 in QUEDLINBURG PC4840, East Germany, is the secretary for [b6] and [b6] allegedly has relatives in the FRG and frequently makes purchases in West BERLIN. She is politically disinterested.

(4) The administrative office also contains two interpreters. One of the interpreters, Frau LEU, male, born about 1910, has a Slavic name preceded by a "Von." The other is Frau GROENTHALER, female, born about 1904, who resides near the WUENSDORF area.

(5) The chief of the finance and bookkeeping section is [b6] [b6] born about 1924, who lives near WUENSDORF. He has three female employees working in his section. They are: [b6] born about 1919, who is single and lives in WUENSDORF; [b6] born about 1919, who is married and lives in NEUHOF UT9577, East Germany; Frau CUDA, born about 1904, who lives in the WUENSDORF area and is married.

(6) The supply department is headed by Willi BERGEMANN, born about 1907, who resides in SPERENBERG UT8878, East Germany. His assistant is [b6] female, born about 1929. An unknown female secretary also works in the supply office.

(7) The chief of the transportation department is [b6] [b6] male, born about 1909, who resides in ZOSSEN UT9487, East Germany. He also acts as dispatcher for the vehicles allocated to the SBB.

(8) [b6] born about 1914, who resides in ZOSSEN, is the chief of the Maintenance Department. This department employs painters, carpenters, and other skilled workers. [b6] owns a BMW automobile.

(9) The SBB also contains four or five construction managers, each with his own office. [b6] male, born about 1913, who owns a Skoda 450 automobile, is one of the construction managers. The others are: [b6] born about 1933; Pnu JAECKEL, born about 1899; [b6] born about 1912; and Pnu LNU, male, born about 1919.

c. The KECH office in WUENSDORF is staffed by three Soviet officers, [b6], [b6], and [b6]. [b6] The KECH organization is governed by KEO (Kvartirno Eksploitationaya Organizatsiya - Billeting Administrative Organization). This parent organization provides technical and financial aid to KECH. The KEO organization in WUENSDORF is headed by [b6] (phonetic). (P-6)

2. Region VIII File Examination:

a. An examination of the Region VIII files revealed no information concerning [b6] Pnu GROENTHALER, [b6] Pnu GUDA, Willi BERGEMANN, [b6] [b6] [b6] [b6] and [b6] in the WUENSDORF area.

b. The Sonderbaubureau building was reported in SOI, Region VIII, dated 18 March 1959, file: EE-567195/e, Subject: SIS Kreis Zossen, Re: Installations. The location of this building, north of the street running from the Soviet Bahnhof to Highway 96, across the street and slightly west of the building marked 615, has been reported several times.

1. Pass System at the Soviet complex, WUEHSDORF UT9850, East Germany:

a. Access to the semi-restricted area located between the railroad tracks and Highway 96, east of WUEHSDORF, is granted to holders of a special Propusk (Pass) issued by the Soviet Military Kommandatura in WUEHSDORF. The pass is blue in color, 2 1/2" x 7", and folded in the center. The front of the pass contains the word "Propusk" in cyrillic letters. The inside left page contains the words Postoyanniy Propusk (Permanent Pass) and a number. The pass holder's name and Ausweis (Identity Document) number are written in ink. There is a space for an automobile license number. A picture of the pass holder is affixed to the lower left corner of the page. At the bottom of the page, the date of issuance is filled in in ink and the pass is signed by the Soviet Military Kommandant. On the inside right page of the pass are spaces for validating the pass. The pass must be dated, signed by the Military Kommandant, and stamped quarterly. New passes are issued each year. The passes differ in color from those used the previous year. The last page of the pass contains a statement in the Russian language that the pass is invalid without a photograph.

b. The pass must be shown to the guards located at either end of Highway 96 running through the Soviet Military complex, or to the guard located on Bahnhofstrasse near the railroad terminal. The pass is only valid for the Highway and the semi-restricted area between the highway and the railway tracks. (Source's pass is attached as Exhibit "A"). Access to the military areas located East of Highway 96 is granted only to holders of a different type pass. The second pass is kept in the guardhouse located at the entrance to the area where the holder is employed. This pass is a red card, approximately 3" x 4". A picture of the holder is affixed to the front of the card. This pass must be validated quarterly. A new second pass is also issued every year. In order to gain access to the military areas, the highway pass must be surrendered. In order to leave the area, the second pass must be returned and the highway pass picked up. No one is allowed to take their second pass outside of the area.

c. Access to the area is granted to non-holders of passes only if the person surrenders his identity document at the entrance to the area. The guard then telephones the office where the visitor is expected. If the visitor is approved, a Soviet soldier is called to accompany the visitor to his destination, and the soldier also brings the visitor back again.

SUMMARY OF INFORMATION

1. Location of SIS Cover Apartment at Stadtkreis Jueterbog 65662, East Germany:

There is an SIS cover apartment on the first floor in the third building of the Soviet Compound, located southwest of the main JUETERBOG railroad station on the west side of the former Kaiser-Wilhelm Strasse, present street name unknown, which runs north of Highway Number 102. There is a barrier across this street leading into the Soviet Compound and a uniformed Soviet guard is stationed at this barrier. Each building in the Soviet Compound has only one entrance. Each is approximately 30 x 15 meters in size, is constructed of red bricks, has a red tile roof, and is two stories high. Stone steps lead to the entrances of these buildings which are located approximately 10 meters from the sidewalk.

Source contributed a sketch showing the location of the Soviet cover apartment and the Soviet Compound. (See Exhibit "I.")

1. General Information

The Justerbog Military Post, with headquarters in JUSTERBOG-FUCHSBERG (569) and known before Soviet occupation as the Justerbog Troop Training Area, has four subposts (see annex). These posts cover an area of approximately 8 x 7 km. They are listed below with all available information concerning commanding officers.

<u>Post</u>	<u>Commanding Officer</u>	<u>Other Duties</u>
Justerbog	Maj Gen KUZNETSOV	(CO of the post since 1946) CG of the 14th Guards Mech Div
Justerbog-Altes Lager Subpost	Col 7	CO of an air force unit stationed at an Altes Lager air field and subordinated to the Sixteenth Air Army in BERLIN (253)
Justerbog-Neues Lager Subpost	Col 7	CO of the 4th AT Artillery Brig
Justerbog-2 Subpost	Col KUCHEN	CO of the 49th Guards Mech Regt
Justerbog-Damm Subpost	Lt Col BASHKIN	CO of the 47th Guards Mech Regt

The commanding officer of the Justerbog-Altes Lager Subpost was appointed by Headquarters, GOFD, in NEUBABENBERG (263) and the other subpost commanders were appointed by Maj Gen KUZNETSOV.

The above-named posts are divided into military communities as follows:

<u>Post</u>	<u>Military Communities</u>
Justerbog	(a) Headquarters, 14th Guards Mech Div (b) All other garrison units
Justerbog-Altes Lager	(a) Town area of ALTES LAGER (b) Section known as "Avic City" (c) Ammunition dump (d) Artillery firing range
Justerbog-Neues Lager	(a) Town area of NEUES LAGER (b) Storage area, Third Guards Mech Army (c) General Hospital, Third Gds Mech Army
Justerbog-2	Not divided into military communities
Justerbog-Damm	Not divided into military communities

The following units are stationed in the Justerbog Military Post area:

4th AT Artillery Brig, GOFD; since 1945
14th Guards Mecc Div, Third Guards Mecc Army; since 1948
General Hospital, Third Guards Mecc Army; since 1948
Three regiments of the 8th Tank Div, Third Gds Mecc Army;
since February 1949

An artillery firing range under the administration of GOFD extends from the north outskirts of JUSTERBOG-NEUBS LAGER to LUCKENWALDE (370).

There is an ammunition dump, formerly German, which covers approximately 8 square kms, 500 m northwest of JUSTERBOG-ALTES LAGER and extending in a northwest direction to TIEFENBURNEN (X58). The entire dump area is not shown on the annex; however, numbers 43 and 44 on the annex show part of the dump. Large quantities (exact amount unknown) of German artillery ammunition of various calibers, mortar shells, mines, and torpedoes are stored at this dump. The area is guarded by German police who are billeted in JUSTERBOG-NEUBS LAGER (see number 43, annex).

An air field, formerly German, is located southwest of JUSTERBOG-ALTES LAGER where a large Soviet fighter unit of the I Air Corps, Sixteenth Air Army is stationed.

There is a former German air field located south of JUSTERBOG-DAMM which is not being used at the present time.

2. Security Measures of Military Posts and Communities

As a rule each military community is surrounded by a closely boarded fence 2 1/2 m high. Usually only one entrance is provided in the fence and it is guarded by an armed sentry.

Officers are not subjected to check when entering or leaving the community inasmuch as the sentries normally know personally all officers belonging to the community. Enlisted men are not allowed to leave the area of the military community. Passes are never issued to enlisted men, even for the shortest period of time or for any occasion.

Only about fifteen per cent of the married officers have their dependents with them. Such officers and their families live outside of a military community. Dependents are issued special green passes which authorize them to enter the community and to move freely within the territory of the Third Mechanized Army.

German personnel employed within military communities are issued special green passes which are half the size of the passes issued to dependents and which authorize them to enter the area of employment within the military community. Upon entering the community, German personnel must leave their personal identification cards, passports or any other identification at the check point.

Day and night, Soviet military and German police patrol the streets of the sections located outside of the fenced communities of the Jueterbog Military Post area. A small number of German people, all formerly connected in some way with the German artillery school, still live in the Jueterbog Military Post area. The movements of these people are controlled by special regulations. They are not allowed to enter fenced areas of military communities at any time. The German police know personally each inhabitant. Newcomers to this area are thoroughly investigated as to the purpose of their visit and anticipated length of stay. The slightest suspicion is sufficient reason for turning such a person over to the CXR-MGB (counter-intelligence) Detachment in JUETERBOK-2. In the Jueterbog-2 Subpost, German civilian inhabitants are authorized to be outside of the post area only until sunset.

SUMMARY OF INFORMATION

1. SIS room in Soviet transient hotel at BEELITZ-Heilstaetten UT6289,
East Germany:

(a) This installation is located in the Soviet hospital compound at BEELITZ-Heilstaetten just behind the BEELITZ-Heilstaetten railroad station. The Soviet transient hotel is a three-story red brick building with a red tile roof. The first floor houses various shops for the Soviet military and civilian personnel of the hospital compound, and it also contains a gymnasium for Soviet members of the hospital staff. There is no connection between the parts of the building housing the gymnasium and hospital staff quarters, and the shops and transient hotel. Each section has separate entrances. The third floor has two transient hotel rooms. Each transient hotel room has five beds, and thus the hotel can sleep 35 persons. There is no billeting office in the transient hotel, and the guests must register at a billeting office somewhere else in the hospital compound, location unknown. Guests of the transient hotel are principally Soviet military personnel and their dependents who are returning from East Germany to the USSR or vice versa. They arrive and leave at the BEELITZ-Heilstaetten railroad station.

SUMMARY OF INFORMATION

On 2 July 1959, Source A-III was interrogated at Resident Agency Giessen, Region III, 66th CIC Group, APO 169, and revealed the following information concerning a Kreis Altenburg Soviet Intelligence Service (SIS) installation in Altenburg US2051, East Germany (EG):

The alleged SIS installation in Altenburg is located on Parkstrasse, near the intersection with Leipzigerstrasse. Immediately behind the installation is the Reichsbahn (East German Railway) right-of-way. The installation is situated in the vicinity of a museum, which faces Leipzigerstrasse. Source was unable to provide directions, although it can be assumed that the installation is situated on the north side of Altenburg. (See EXHIBIT I)

Source did not feel himself competent and declined to provide a drawing of the installation's buildings. There is an office building and a four-car garage in the enclosed area. Source recalls seeing two (2) Soviet guards in uniform, armed with machine pistols, at the main gate to the grounds. Source had met what he believed to be a Soviet Captain and a 1st Lieutenant in civilian clothes in a nearby tavern, names not recalled, and accompanied them back to the vicinity of the installation after considerable drinking. Both spoke very poor German. They informed Source that they were members of the "NKVD", formerly the "GPU", and that the Captain was in charge of operations at this particular SIS installation. The Captain allegedly lived in a villa immediately adjacent to the installation.

Source saw the buildings on one (1) or two (2) occasions but was never on the grounds. Source was unable to provide any further pertinent information concerning this installation.

SUMMARY OF INFORMATION

1. Soviet installations located in WUENSDORF UT9580, East Germany, between Highway 96 and the railroad tracks:

a. Buildings 195 through 204 are Soviet officer's billets. Source states that several of these buildings are apartment buildings and the others one-family villas. Source cannot remember which are which, however, Soviet generals live in this area.

(F-6)

b. The Sonderbaubureau (German Construction agency) is located in an "L" shaped building across the street from building 615, between that unnamed street and a railway siding leading to the WUENSDORF Tank Repair Shop. Source states that the Sonderbaubureau is located in a four story building and does all the construction work for the Soviets through various contract firms.

(F-3)

c. Building 635 is a HQ (Handelsorganization - State Retail Trade Agency) kiosk selling cigarettes and tobacco. South of this building is an SIS installation (called the GPU by Source). Source states that the building is three stories high. Source has never been in this building. Source also states that a shed for motorcycles is located south of the SIS building. These motorcycles are used by a trick motorcycle team of Soviet soldiers.

(F-6)

X 2. Pass Procedures at the Soviet WUENSDORF compound: On WUENSDORF, Bahnhofstrasse, west of the railroad tracks, is a guard post. Persons entering the area must show a Propusk (Pass) to the guard. The pass allows the bearer to enter the area between the highway and the railroad tracks and gives access to Highway 96. A second control point is located on Chausseestrasse east of Highway 96. German nationals, wishing to enter the Soviet restricted area east of Highway 96, must leave their passes for the highway at this control point. A red card, approximately two by four inches in size, is kept in the guard booth. This card contains the picture of the person to whom it was issued. When a person leaves this highway pass with the guard, he is given his pass for the military area. The fence along Chausseestrasse from Highway 96 eastward is eight feet tall and constructed of two strands of barbed wire backed by boards to make observation impossible. At the entrance to the old Sports School area, another guard booth is located. This guard must be shown the red pass.

3. Soviet installations in the Sport School area:

- a. Building 104, 105, and 106 are garages for the entire area.
- b. Buildings 107 and 108 are offices for the garage administration.
- c. The building located west of building 106, unnumbered on the map, is the main building in the area. It is four stories high, 150 feet long and 40 feet wide. Source states that many high ranking Soviet officers are seen in this building.

(F-6)

d. The small unnumbered building north of the building mentioned above and located at the Chaussee Strasse entrance to this portion of the compound is a guard shack. Directly west of this building are two buildings, drawn in dotted lines. These buildings and the two buildings shown by dotted lines on the western edge of the area are officers' billets, three-stories high and housing four families per floor. Source believes these buildings to be the same size.

(F-6)

e. East of the buildings described in d. above are a series of four buildings shown by dotted lines on the map. From west to east, these buildings are as follows:

- (1) A small building used as a theatre.
- (2) A one-story workshop for repair of military automobiles.
- (3) A heating installation.
- (4) A guard house.

(F-6)

4. Soviet installations in Cambria Caserne are of the WUENSDORF complex:

- a. Building 185 is the administrative office for this caserne.
- b. Buildings 171, 183, and 184 are barracks for enlisted men.
- c. Buildings 168, 169, and 172 through 179 are garages for Soviet automobiles.

d. Building 186 is separated in three parts. The northern portion is used as a movie theatre for Soviet enlisted men. The central portion holds a Soviet enlisted men's club. The southern portion holds a workshop for the heating equipment in the Cambria caserne.

e. Building 182 is a two-story building with a kitchen on the first floor and four large rooms used as officers' billets on the second.

f. Building 180 is a large enlisted men's mess hall.

g. Building 181 is the storage room for the kitchen.

h. Building 170 is a shed approximately 210 feet long, 35 feet wide and 12 feet high. The front portion, facing Highway 96, is open. The building is guarded and houses armored personnel carriers and armored vehicles mounted with light machine guns. Source can give no further information concerning the ZOSSEN/Wuensdorf military complex.

(F-6)

5. Region VIII File Examination:

a. Buildings 195 to 204 were reported as Soviet officers' billets in SOI, Region VIII, File: EE-567195/e, Subject: SIS-Kreis Zossen, Re: Installations (C), dated 3 April 1959.

b. The Sonderbauburo building was reported in SOI, Region VIII, File: EE-567196/e, dated 10 December 1958, as an "L" shaped building.

c. Building 635 was reported as a HO kiosk in SOI, Region VIII, File: EE-567195/e, dated 18 March 1959. No SIS installations has ever been reported directly south of this building. It is possible that Source was thinking of the Soviet Kommandatura, Building 644, as he described the SIS building as being near a crossroad. Source was unable to clarify his identification.

d. The building east of building 106 in the Sport's Schule area was reported as a theatre for stage performances. Traces dated 1956 identify the Main headquarters building as being four stories high and approximately 150 feet long. It is not known whether this report dealt with building 106 or the building east of 106.

1. SIS installations located in WERNEUCHEN VU1432, East Germany:

a. The SIS headquarters (called GPU by Source) was located in WERNEUCHEN between Wegendorfer Strasse and Werendahlerstrasse on an unidentified street until 1947. This building is shown on Exhibit "I". The building is located in a compound surrounded by an eight foot high fence. The compound also contains the Soviet Kommandatura in WERNEUCHEN. In 1947, the SIS headquarters was moved to a house in a small woods in an area called the Kessel Pfuhl. This is shown on the Exhibit mentioned above with a "II".

b. A building near the corner of Wegendorferstrasse and the unnamed street mentioned above was temporarily used by the SIS for a meeting room. This is also shown on Exhibit "I". The room used in the temporary building is marked with an "X".

c. In 1959, Source was taken to an SIS building located somewhere on Werendahler Strasse near the WERNEUCHEN Airport. This building also is in a compound surrounded by an eight foot fence. The house has two entrances and a garage. Exhibit "I" shows the location of this house. The interior of the house is shown on the two insert sketches on this Exhibit.

SIS Cover Apartments located in POTSDAM 006807, East Germany:

a. A Soviet cover apartment is located in POTSDAM, Hesse Strasse 2, a three-story apartment house. The SIS apartment is located on the left side of the first floor of the building. Source believes that the house is used by the Soviet Section of the Soviet Commandatura in POTSDAM. The apartment has a door with a door handle. Source had the impression that one of the rooms was a meeting or interrogation room and the other was a living room.

b. A Soviet cover apartment is located in POTSDAM, Hesse Strasse 5, a three-story apartment house with a red tile roof. The cover apartment is located on the first floor. Source believes that this cover apartment is used by the Soviet Section in the Soviet Sector of BERLIN. Soviets are seen entering and leaving the apartment in civilian clothes or uniforms of high ranking officers. Source has seen the apartment with two LHM, a German driver and a Soviet driver with an IB license number. The German driver is a Soviet agent from BERLIN-Karlshof (Soviet Sector), Soviet agent who is the apartment. The apartment had no name plate on the door.

c. A Soviet cover apartment is located at POTSDAM, Hesse Strasse 19, a three-story, gray stone apartment house with a red tile roof. This apartment is located on the right side of the first floor of the building. The apartment is used by the Soviet Commandatura in POTSDAM. An Austrian family with two children are now living in this apartment building. The Soviets, allegedly, brought this family to East Germany when the peace treaty was signed with Austria. The family, according to rumor, had collaborated with the Soviets in Austria. The husband is now working for the People's Police in POTSDAM, and the wife is working with the SED Party committee in POTSDAM. Source believes that the apartments mentioned in a, b, and c are all used by the Political Section of the Soviet Commandatura.

d. A Soviet cover apartment, use and management unknown, is located in POTSDAM, Kleine Weinmeister Strasse 19. The four above cover apartments are shown on Exhibit "A". Other apartments shown on this Exhibit are identified as follows:

(1) Beyer Strasse 7 was previously used by the MfS in POTSDAM. Since mid-1958, the house has been used as an SED Party school.

(2) Beyer Strasse 1, 2, 3, and 4 and Kleine Weinmeister Strasse 6 and 17 are Volkspolizei (People's Police) billets.

(3) Kleine Weinmeister Strasse 14 is an MfS garage for the BV Potsdam.

(4) A block of four Soviet quarters extend north from Kleine Weinmeister Strasse between Hesse Strasse and Puschkin Allee. These billets are numbered 9, 10, 11 and 12 and are occupied by Soviet families. The block of billets is surrounded by a wooden fence. The occupants of these billets are unknown.

(5) Kleine Weinmeister Strasse 15 is an MfS building.

e. The building at POTSDAM, Lenin Allee 116, is occupied by the SIS. The building is two stories high, painted white, and has a red tile roof. The entire building is surrounded by a wooden fence. The building is part of an installation formed by Lenin Allee 116 and 119. Source states that Lenin Allee 117 and 119 are occupied by the MfS. The entire installation is quiet during the day. At night, however, there is frequent traffic. A sketch of this area is attached as Exhibit "II." Quarters for Soviet soldiers are located on the southern side of Lenin Allee at the foot of ImBogen.

f. An SIS cover house is located in POTSDAM-Babelsberg, Ernst Thaelmann Strasse, number unknown. The cover house is located on the southern side of the street before Mozart Strasse. Source believes that this house was utilized by an SIS unit from the Soviet Sector of BERLIN. The cover house is located near the Babelsberg S-Bahn station, the first S-Bahn stop outside of BERLIN. The first floor of this two-story house was used for office space and interrogation rooms while the second story served as billets for members of this unit. Directly across the street from this house, on the northern side of Ernst Thaelmann Strasse, are two houses utilized by a Soviet telephone unit. There are quarters for about 50 Soviet personnel and one or two office rooms in these houses. Source does not know under whose command the telephone unit operates. A sketch of this area is attached as Exhibit "III."

g. An SIS organization occupied the house at POTSDAM, Helene Lange Strasse 2. This is a two-story, gray stucco building with a red tile roof. Source saw large crates containing propaganda material aimed toward the FRG elections packed in one of the rooms of this house. The location of this apartment is shown on Exhibit "IV." An index to that Exhibit is as follows:

- (1) 1- a German family occupies this house.
- (2) 2- The above mentioned SIS house.
- (3) 3- Soviet family quarters occupied by officers of an aircraft barracks in POTSDAM-Nedlitz.

i. An SIS cover apartment is located in POTSDAM, Weinberg Strasse, a three story apartment house, having one apartment on each floor. The SIS has a room on the first floor which has a separate entrance. The other apartments in this building are occupied by German nationals. The building is shown on Exhibits "VI" and "VII."

j. An SIS cover apartment, which is being reconditioned, is located on the corner of POTSDAM, Fleck Strasse and Breiten Weg. The Political Department of the POTSDAM Soviet Commandant will use the first floor of the apartment. Source states that the apartment was not yet in use in December 1954. A sketch of the location of this building can be found in Exhibit "VIII."

2. Soviet Mail and Censorship Office located in POTSDAM, Jaeger Allee 25. The Soviets maintain a mail, newspaper, and magazine censorship office at Jaeger Allee 25, a two-story building with a red tile roof. A smaller building is located to the rear of Jaeger Allee 25. The two buildings are surrounded by a wooden fence. The front building is used for offices, except for two small

attic apartments. These attic apartments serve as a billet for drivers of the censorship office. The smaller building in the rear serves as a billet for the remaining members of the censorship office. Source states that about 75 percent of the staff are military personnel. The typists are Soviet female civilian personnel. The remaining portion of the staff reside in POTSDAM, Behlert Strasse 7, 8 and 9. A sketch of the area is shown on Exhibit "V."

3. Soviet School and Stockade located in POTSDAM, Jaeger Allee 23:

a. The Soviet stockade and school, also shown on Exhibit "V," are located at Jaeger Allee 23, a three-story, gray brick building with a red tile roof. The building is about 300 feet long and 90 feet wide. The entire installation fronted by Jaeger Strasse 23 was formerly a German Army Kaserne. The Soviet school at Jaeger Allee 23 is used by Soviet children from six to fourteen years of age. Source does not believe that a high school is located in this building. A part of Jaeger Allee is separated from the school and has a private entrance. This portion of the building is used as a billet for Soviet enlisted personnel of a Soviet motorized unit. To the north of the school and billet is an entrance to the Soviet officers' and enlisted men's stockade. There are approximately 50 cells in the building. Each cell holds two or three prisoners. A portion of the prison is used as a supply depot and work shop by a Soviet motorized unit. A large gasoline depot, surrounded by a double wire fence, is located south of the prison guard room. To the north of the prison, bordering Voltaire Weg, and to the west of the prison are several garages used by the motorized unit. The entire compound is surrounded by a stone wall on the south and a wooden fence to the west. In POTSDAM, Voltaire Weg, directly across the street from the garages and fenced in by a barbed wire fence, is a Soviet car washing establishment for all military vehicles in the POTSDAM district. Jaeger Allee 24, next to the Soviet school, is a two-story villa used as a billet by officers of the Soviet motorized unit.

b. The Jaeger Allee area is also shown on Exhibit "VI." An index to that sketch is as follows:

- (1) Jaeger Allee a and b are German houses.
- (2) Jaeger Allee c and d are Soviet quarters.
- (3) Jaeger Allee e is a German dancing school.
- (4) Jaeger Allee f, formerly the Soviet Post Office, is now vacant.
- (5) Jaeger Allee g is a German barber shop.
- (6) Jaeger Allee h is a German photo shop.

working for the "Sonderbaubureau." b6 told Source that this building is a five story building, each floor fitted out as a block of cells. The corridors, formerly inside rows of rooms facing an open center hall, have been blocked with barbed wire to prevent people from throwing themselves from the upper landings. Across from the prison on Glume Strasse is a two story villa which is occupied by the alleged chief of the SIS in POTSDAM. On Am Neuen Garten, there are four one family, two-story villas used as administrative offices for the prison. The prison and the SIS chief's villa are shown on Exhibit "IX."

b. At the end of POTSDAM, Hesse Strasse, numbered Hesse Strasse 9, is a series of eight housing blocks, each block having three entrances. Each block is three stories high and has a red tile roof. There are approximately six apartments per entrance or 18 apartments per building. The apartments serve as quarters for officials of the Soviet Prison on Am Neuen Garten. The area is shown on Exhibit "X." An index to that exhibit is as follows:

(1) Hesse Strasse 9D, E, H, I, J, and K are occupied by Soviet civilians and officers and their families. These officers and civilians are employed in the Political Department of the Soviet Kommandatura in POTSDAM and in the Soviet Prison at Am Neuen Garten.

(2) Hesse Strasse 9E contains a telephone center in the basement. An underground cable is laid from 9E to a telephone pole at the corner of block 9D. This telephone center carries the overground cable from POTSDAM-Wildpark to the Soviet prison at Am Neuen Garten. The installation at POTSDAM-Wildpark will be further explained in this SOI.

(3) Hesse Strasse 9B is allegedly occupied by MfS personnel. Source also states that there is an MfS installation directly behind this compound on Puschkin Allee 15 or 16. A small sign, approximately eight by ten inches, states that the building is occupied by the Ministry of the Interior, State Security Service. The building is white stucco and has a red tile roof. All windows facing the street are barred as well as all doors leading to the balconies. Source has personally seen MfS guards outside.

6. Soviet Kommandatura, POTSDAM, Stalin Allee 79:

a. The Soviet Kommandatura is located at POTSDAM, Stalin Allee 79, a two-story, gray stucco building with a basement and a red tile roof. The front facing Stalin Allee is approximately 100 feet long. The building is about 120 feet wide. The building is not guarded during the day; however, from 1800 to 0600 hours, a guard is stationed in front of the building or just inside the front entrance. at the wooden fence separating the Kommandatura from the German automobile repair shops. To the west of the Kommandatura is a small compound closed in by a wire fence. This building, also guarded at night, houses Soviet high ranking offices. The Kommandatura is built around an air shaft, approximately 60 by 60 feet in size. A sketch showing the location of the Soviet Kommandatura is attached as Exhibit "XI." Source knows two personalities connected with the Soviet Kommandatura:

(1) [redacted] b6 Soviet male, born about 1910, who is 5'7" tall, weighs 160 to 165 pounds, and has black straight hair, is the Administrative Officer of the Soviet Kommandatura. [redacted] b6 is married and resides in POTSDAM at the Soviet hotel on Duerer Strasse or at [redacted] b6 originates from LENINGRAD, USSR. He was a partisan leader during World War II.

(2) [redacted] b6 Soviet female, born about 1923, who is 5'9" tall, weighs 140 to 145 pounds, and has short light blond hair, is the Chief Secretary in the Soviet Kommandatura. She is married, has one three year old son, and resides at the Soviet hotel on Duerer Strasse. [redacted] b6 speaks German, French, and Russian. She was the secretary for the POTSDAM KECH unit in 1958. She is allegedly in charge of some sort of secret department in the Kommandatura. [redacted] b6 husband is associated with the editorial office of the Soviet Military Newspaper, Red Army. [redacted] b6 husband wears a beard. Both [redacted] b6 and her husband have subscriptions to the French newspaper L'Humanite.

b. The basement of the Soviet Kommandatura contains the water and gas meters, arrest cells, a telephone center, food stores, supply rooms, a kitchen, electricians and plumbers shops, and a storage room for propaganda material. An interior sketch of the basement is attached as Exhibit "XII."

c. The first floor of the Soviet Kommandatura is entered from Stalin Allee. To the left of the entrance is a guard room where passes must be shown. The pass has a picture of the bearer and a red stripe across the front. A stamp, changing in size and form every month, will be affixed to the pass. [redacted] b1

[redacted] b1 [redacted] b1 During the daytime, the control is very lax. New passes, as described above, are soon to be or have just been issued. A Soviet soldier is constantly on guard in a small booth in the Soviet barracks area of the building. The right and rear wings of the first floor are occupied by the Soviet troops, their mess hall and their kitchen. This area is blocked off by wooden walls. Source believes that the mail center, located to the right of this entrance, is also guarded by a Soviet soldier. The left wing of the building is occupied by the officers of the Soviet Consulate and the bookkeeping department. A sketch of this floor is attached as Exhibit

d. The second floor of the Soviet Kommandatura is occupied by the Soviet Kommandant, the file rooms, the Finance Department, the Political Department, and an SIS Air Force officer and his interpreter. The Political Department is allegedly involved in intelligence activity. Soviet enlisted men's billets are located along the back wall of the floor. A wooden wall on the right and a guard desk at the left separate these quarters from the rest of the floor. All windows of the left wing are barred. The nine offices in the right wing are occupied by KECH. A sketch of this floor is attached as Exhibit "XIV".

7. Soviet Hotels in POTSDAM, East Germany:

a. A Soviet hotel is located in POTSDAM, Duerer Strasse, between Rubens and Ludwig Richter Strasse. This hotel accommodates personnel from the Soviet Kommandatura and HECK, Raion POTSDAM. The hotel consists of five individual apartment buildings, three stories in height, and erected in 1938. The five buildings have been occupied by Soviet Kommandatura and KECH personnel since November 1958. From 1950 to 1958, the buildings were used by Soviet Kommandatura personnel only. Most of the apartments are two and one half rooms plus a kitchen and a bathroom. The area is not fenced in and there are no guards around the hotel buildings. Building 1 is occupied by KECH personnel. There are approximately 12 apartments in this building. Building 2, consisting of nine apartments, is occupied by KECH personnel. Building 3, consisting of six apartments, is occupied by Soviet Kommandatura personnel. Building 4, nine apartments, is occupied by Soviet Kommandatura personnel. Building 5, seven apartments, three on the first floor and two on the second and third floors, is occupied by Kommandatura personnel. The hotel is located near the British Military Mission in POTSDAM. A sketch of this hotel is attached as Exhibit "XV".

b. A Soviet transient hotel is located at POTSDAM, Behlert Strasse 27/29. The hotel is primarily used by Soviet officers attending the political courses at the Officers' Club on Hegel Allee. The hotel is a four story building, consisting of the former Hegel Allee 27, 27a, 28 and 29. The main entrance is through building 28. The original separating walls were broken through and the building now stands as one installation. The hotel has approximately 100 rooms. There are no washing facilities in the rooms. A large shower room and two bathrooms are located in House 27. House 27 also has one aptment containing a living room, a bathroom and a kitchen. This apartment is used by Soviet generals only. Room 58, in the side wing of House 29 is occupied by the Political Department of the Soviet Kommandatura. The hotel is used by personnel due to leave for the USSR and by those attending the political course. The political courses are given approximately every two weeks and are attended by 100 or more persons. The course apparently lasts for three days. In House 28, the first floor houses a NO sales point, snack bar, and Spezialhandel.

8. Soviet radio stations in POTSDAM, East Germany:

a. In POTSDAM-Wildpark, at the street which formerly led to the former Nazi Leader, GOERING's headquarters, Strasse nach KUPFERT, the Soviet central telephone office is located. This office was formerly the center for all telephone cables in Germany and from Germany to foreign countries. Source has seen Soviets digging around the telephone center where the cables coming from West BERLIN leading through East Germany are located. It is possible, according to Source, that these cables could be tapped at this location. Source knows that the old

cables are partially used by the Soviets and partially by the West BERLIN postal authorities. Another cable from this center leads through POTSDAM-Wildpart, POTSDAM itself, and through Soviet installations on Jaeger Allee to Kapellen Berg. This is an underground cable. From Kapellenberg, the cable leads overground through Hesse Strasse (mentioned above) to the compound at Am Neuen Garten. A second building of this telephone center is occupied partially by East German postal authorities. Behind the Soviet telephone center are located three radio towers, two of wooden construction with a metal antenna on top, the third of steel construction. The grounds of this telephone center are not fenced in. Guards can be seen in the front entrance of the telephone center itself. Both of the buildings are painted white, are two-stories high, and have red tile roofs. The buildings are approximately 100 feet long. The location of this building is shown on the sketch of the KECH Coal Yard attached as Exhibit "XIV".

b. A Soviet radio and radar station is located in POTSDAM on Bornstedter Feld fronted by Pappel Allee. The compound was vacant until 1956. New sheds and buildings have been continuously constructed since that date. Source has never entered this compound. Source has looked into the compound, however, and provided a description of the buildings and antennae. This description is attached as Exhibit "XV".

c. A Soviet radio station is located at WERDER UU6005, East Germany, in the former "Millionen Villa," occupied by a wealthy German banker until 1945. Source states that in the Spring 1958, there were signs of moving at this installation; however, it is possible that this movement was a normal rotation of troops. The basement of the building contains boiler rooms, storage rooms, kitchen and showers. The first floor contains office rooms and radio sending and receiving equipment. The second floor contains the living quarters of the radio teams. The houses on Bruenhilde Strasse in WERDER behind the radio station are occupied by Soviet Air Force officers and their families. These officers are assigned at the WERDER/Havel airfield which is used as a training field for Soviet pilots. A sketch of this installation is attached as Exhibit "XVI".

d. A Soviet radio station is located in POTSDAM, Menzel Strasse 7, a three-story, gray stucco building with a red tile roof. The front is fenced in by an iron rail. The entrance is in the center of the building and is guarded by a uniformed soldier who carries a key to the entrance. The soldier unlocks the door for each entrant. The Soviet Army "Volga" station is located in this building. Source has heard that only tape recorded broadcasts are replayed through this station. POTSDAM, Menzel Strasse 18 and 19, are the office rooms for the Volga station and the living quarters for their personnel. Menzel

Strasse 18 is a villa occupied by civilians and Soviet officers and their dependents. Menzel Strasse 19 is a three-story villa. The first and second floors are utilized for office rooms and administration for the radio station. The third floor contains some small apartments occupied by single employees of the radio station. A sketch of these installations is attached as Exhibit "XX".

e. The antennae for the above Soviet Army "Volga" radio station are located between Lenin Allee and Lenne Strasse near Feuerbach Strasse in POTSDAM. The Soviet installation located at Lenin Allee 18 is used as the editorial office of the Soviet Army newspaper Red Army. Three antennae, two on the top of the newspaper office building and one a large steel tower constructed on the ground are located near these buildings. The radio station broadcasts on long wave. The newspaper office buildings are approximately 100 feet long and have three floors. The windows of two of the buildings, marked B and C on Exhibit "X", are barred. A Soviet guard is stationed at the main entrance and several more Soviet soldiers guard the grounds. The personnel employed at the newspaper are billeted at Feuerbach Strasse 36 or 37, a three story apartment building with two side wings. A sketch of this entire area is attached as Exhibit "XX".

9. Other Soviet Installations in POTSDAM, East Germany:

a. On Stalin Allee, shortly before the check point at Glienicker Bruecke, a bridge connecting West BERLIN with POTSDAM, is a building used as a kitchen, mess hall and club by Soviet officers employed within the political department of the Soviet Kommandatura on Stalin Allee 79. In front of this building, toward West BERLIN, is a building used as quarters for Soviet soldiers on duty at the Glienicker Bruecke check point. An Exhibit of this area is attached as Exhibit "XI".

b. The Soviet hospital is located in POTSDAM, Schlegel Strasse. The hospital contains a small maternity ward, a surgery, out-patient clinic, and a morgue. This hospital was a former German Army hospital. On Park Strasse in POTSDAM are two Soviet laboratories working with the Soviet hospital on Schlegel Strasse. Park Strasse 4 contains laboratories and Park Strasse 5 the office rooms. Both are two story, gray stucco buildings. On Schlegel Strasse 1 to 14, on both sides of the street, are two-story houses occupied by Soviet personnel employed at the hospital. The installation is shown on Exhibit "XIII". Number 1 of that sketch shows the tank barracks of the National People's Army. Number 2 shows the administrative department of the Soviet hospital. Number 3 is an unknown building belonging to the Soviet hospital. Number 4 is a German dog trainer's school. Number 5 are the two laboratories belonging to the Soviet hospital. Number 6 are billets for Soviet personnel employed at the hospital and laboratories. Number 7 is an SIS cover apartment and Number 8 is the KECH garage and furniture storage shop.

(1) [b6] born about 1910, who is 5'9" tall, weighs 140 to 145 pounds, and has dark blond wavy hair, is an electrician at the Soviet laboratory in POTSDAM, Park Strasse 5. He is married and resides at [b6] number unknown. He has been employed at the Soviet laboratory since 1957. From 1946 to 1957, [b6] was employed at the Soviet prison at POTSDAM, Am Neuen Garten. He was discharged from this position because of Western relatives and unreliable political attitude.

c. A Soviet tank barracks is located at POTSDAM, Pappel Allee, bordered by Bornstedter field, Am Schragen Strasse and Jaeger Allee. The area is surrounded by an iron fence covered with wooden boards. There are five barracks buildings for Soviet soldiers, kitchens and mess halls, seven or eight tank garages, a tank repair shop, and a spare part supply building. Another portion of this installation is occupied by a Soviet transportation unit or motorized unit. This area contains three administrative buildings, a large garage, and barracks. A third portion of this compound contains 14 or 15 two-story apartment buildings with 32 entrances. These are billets for Soviet officers assigned to the tank and transportation units. Source states that approximately 300 families live in these apartments. The tank barracks are shown on Exhibit "XXII".

10. KECH Installations in POTSDAM, East Germany:

a. KECH has the function of supervision and maintenance of all Soviet installations in East Germany. The KECH units are under the supervision of KEO (Kvartirno-Exploitationoye Otdelyeniye - Billeting Administration Department), the headquarters of which is located at WUENSDORF UT9580, East Germany. The Sub-offices, such as the POTSDAM KECH, are known as Raion (District) offices. These raion offices draw money for salaries from KEO. Each Monday, Soviet chiefs from all KECH raions travel to WUENSDORF to receive their weekly orders. The KEO offices, the Soviet Supreme Court, and the Main Cashier of the Soviet Forces in Germany, located in POTSDAM until 1955, moved to the Soviet ZOSEN/WUENSDORF complex in the Summer of 1955.

b. KECH POTSDAM has its main offices in the Soviet Kommandatura, Stalin Allee 79, second floor right wing. Offices for the chief, deputy chief, technical department, personnel department, bookkeeping office, club rooms, coal office and furniture storage office are located in the Kommandatura. Exhibit "XXII" shows the location of these various offices.

(1) The chief of KECH in POTSDAM is Lieutenant Colonel BOLDRIOV, born about 1903, who is 5'9" tall, weighs 175 pounds, and has dark brown hair. BOLDRIOV is married, has one daughter born about 1943 who is presently in the USSR, and resides in POTSDAM, Helene Lang Strasse 4.

BOLDRIOV wears a Soviet uniform with black collar patches and the insignia of the Engineers. He wears a gold wedding ring and a gold wrist watch with an expansion band. BOLDRIOV served as a technical engineer with KECH in POTSDAM from 1953 to 1954. He has been chief of KECH since 1954. BOLDRIOV is respected by his colleagues for his knowledge of the engineering profession. BOLDRIOV may be relieved of his post in 1959 because he has served his duty time in East Germany. BOLDRIOV has a Luissa LNU, Soviet female, as a secretary.

(2) The primary department of KECH POTSDAM is the Technisches Kabinett (Technical Cabinet). This department is responsible for the planning, drawing, and supervising of construction of Soviet installations in East Germany. The actual construction of installations planned and supervised by the Technical Cabinet is performed by the Sonderbaubureau of the East German Ministry of Construction. Source believes the Technical Cabinet is the only portion of KECH having direct contact with the Sonderbaubureau. The chief of the Technical Cabinet is Soviet First Lieutenant

b6 b6 has been the head of the Technical Cabinet since 1954. He is chief of the unit whenever BOLDRIOV is on leave. b6 likes fishing. The foreman or manager of the technical department is b6, a Soviet civilian, born about 1913, who is 5'7 1/2" tall, weighs 165 pounds, and has dark brown hair.

b6 wears a gold signet ring on his right hand and a steel wrist watch with a brown leather band. He is married and resides in POTSDAM, Duerer Strasse, Soviet hotel. b6 speaks poor German and broken French. He has been with KECH in POTSDAM since mid-1958. b6 is in charge of six employees of the Technical Cabinet. Source believes that each of these employees is in charge of a Sub-department, but Source does not know the names of the Sub-departments. Other employees of the technical department are five Soviet female civilians assigned to do drafting work. These five civilian personnel were brought to POTSDAM in November or December 1958. Five personnel, four male and one female, were transferred from POTSDAM to other areas of East Germany. One of those transferred was b6.

b6 Soviet female civilian, born about 1918, who is 5'8" tall, weighs 100 pounds, and has dark brown hair. b6 was divorced, has a son born about 1953 residing in the USSR, and resided until December 1958 in POTSDAM; Helene Lange Strasse 4. b6 told Source that she was being transferred to either SCHENKELSDORF or WUENSCHEF.

(3) Another of the Departments of KECH POTSDAM is the Kohlenstelle (Coal Office), which is responsible for the coal supply needed by the Soviet Forces in POTSDAM, the furniture storage and the garages and supply department of POTSDAM KECH. The Chief of the Coal Office and the Assistant Chief of KECH is Soviet Air Force Major Iru

JEGEREV wears the Soviet Air Force uniform with blue collar patches, with crossed propeller insignia and blue shoulder boards with a large silver star. On JEGEREV's dress uniform, he wore shoulder boards with a blue stripe, two crossed golden wings and propellers in the center. JEGEREV is married, has one son born about 1944, and resides in the Soviet hotel on Duerer Strasse. He came from the USSR in December 1958. JEGEREV gives the impression of having no knowledge of his job. The Assistant Chief of the Coal Office is Soviet civilian [b6] born about 1920, who is 5'8" tall, weighs 140 pounds, and has black hair. [b6] is married, has one son born about 1954, and resides at the Soviet hotel on Duerer Strasse. He came to POTSDAM in mid-1957. [b6]'s wife is employed with KECH in the bookkeeping department. [b6] is responsible for the administrative work of the Coal Office. He orders the coal, distributes the coal, and is in charge of coal storage.

(a) One of the POTSDAM KECH Coal Depots is located in POTSDAM-Wildpark UB6005, East Germany, near the Wildpark Railroad station. The Sonderbaubureau also maintains a warehouse for construction material 1 at this site. The installation is shown on Exhibit "XIV". The coal depot in Wildpark is supervised by Samuel MIETZ, born about 1900, who is 5'7" tall, weighs 150 to 155 pounds, and resides in POTSDAM, Hesse Strasse 5. He is married and has two sons. MIETZ is a member of the FDGB and is a glass filter by profession. MIETZ has been with KECH since 1946. He emigrated from Poland. Rudolf MATZ, German male, born about 1898, is 5'7" tall, weighs 180 pounds, has dark hair and is the assistant supervisor. MATZ is divorced and resides as a sub-tenant in POTSDAM, Lenin Allee, opposite the powerstation. MATZ resided in POTSDAM-Eiche until 1957. He frequently comes to West BERLIN to see movies. The fire protection of the coal yard is entrusted to [b6] a German national. There are two German male yard workers and two female cleaning women employed at the coal yard. Approximately 1000 tons of coal are kept at this depot. It is guarded by four German watchmen.

(b) The other POTSDAM KECH coal storage depot is located in ELSTAL UB6323, East Germany. A special railroad station was built in 1950 for this coal depot. The trains stop only for Soviets. The coal yard is located west of the Soviet ELSTAL airfield. Jet fighters are based at this field. The ELSTAL Coal depot is managed by a Soviet, name unknown. He is assisted by a Soviet bookkeeper and a German male, [b6] born about 1910, who is 5'9" tall, weighs 130 to 135 pounds, and has brown hair. FUDE is married, has two sons, and resides in [b6]. SUMMARY OF INFORMATION

1. Installation used as a cover house by the SIS in STAUNSDORF UU7806, East Germany: The cover house is located on the east side of Gueterfeldedamm at the corner of Schillerstrasse. The house is located approximately 160 feet from Gueterfeldedamm and 30 feet from Schillerstrasse. A barbed wire fence surrounds the home except for a driveway entrance from Schillerstrasse. There is no gate at this entrance. The home is a two story home. A Soviet family is believed to reside on the second floor.

2. Soviet radio installation located in STAUNSDORF, East Germany: North of the above installation on Gueterfeldedamm is a Soviet installation and barracks. A radio truck with extended antennae is located in a field to the north of the installation. A small forest is located behind the installation. In a field on the eastern side of the forest are seven or eight wooden radio towers approximately 120 feet high. These towers are unguarded. Source does not know the purpose of these towers, only that they are used by the installation described above. The location of the above cover house and the radio towers are shown on Exhibit " " ."

SUMMARY OF INFORMATION

1. Soviet Installations in the ZOSSEN/WUENSDORF UT9850, East Germany, restricted area:

a. Buildings 19, 20, and 21 are apartment houses occupied by the Soviets. These houses were built in 1930.

b. Buildings 18, 18a, and 24 are storage buildings used by VEAB (Volkseigener Erfassungs und Aufkaufbetrieb - Nationalized Enterprise for Stocktaking and Procurement). The VEAB is an East German agency dealing in the purchase and storage of grain, corn, and other rations. All personnel of this office are East German citizens.

c. Building 24 is a Soviet bakery.

d. Building 616 is a small flat guard building near the gate to the restricted area.

e. Building 617 is a hotel and restaurant, two stories high, 60 by 25 feet in size, with a dark green awning forming an entrance.

f. Building 618 is a large, two story building, 75 by 30 feet in size. On the first floor are two stores located side by side. The western part sells sports articles, bicycles, leatherware, and photographic equipment. The store on the eastern side sells children's clothing and textiles. The shops are manned by German salesgirls who speak Russian fluently. The upper floor is occupied by Soviet dependants.

g. Building 619 is a small house containing a radio repair shop. This shop is managed by a German national, name unknown.

h. Building 620 is a two story apartment house occupied by Soviet families.

i. Building 621 is a two story house with an empty shop on the first floor.

j. Building 623 is a Soviet bookstore, two stories high, with Soviet apartments on the second floor.

k. Source states that there is only a single track leading from the railroad south of Bahnhofstrasse. At the end of this track is a ramp for unloading freight cars. This is marked 642 on the map. A large silo or storage building for fuel and grain is marked 641. Source does not remember a Building 640 in the area.

l. Building 626 does not belong to the restricted area. The first floor of this two story building contains German shops. A [b6] has an automobile repair shop in the rear of the house. [b6] has an underwear and textile shop in the front of the house. A hairdresser's shop and a small produce store are also in the building. The second floor is used for apartments and residences by the owners of the stores on the first floor.

m. Building 627 is a movie theatre for German nationals.

n. Building 628 is a Konsumgenossenschaft (Consumer's Cooperative) shop selling shoes and hardware.

o. Building 628a is an old shed used as a storage shop by [b6] who owns the automobile repair shop in Building 626.

p. The fence of the Soviet restricted area leads between Buildings 628 and 629. Building 629 seems to house a Soviet shop selling fishing and hunting equipment.

q. Building 630 is a two-story building. The first floor is used by a watchmaker's shop and a photo shop. The Soviets occupy the apartments on the second floor.

r. A flat wooden building used as a chinaware shop by the Soviets. Source states that there are no German personnel in this shop.

s. Source believes that Buildings 633 and 634 are two-story, Soviet apartment houses.

t. A beverage stand having some tables in a small garden surrounded by a green wooden fence.

u. Building 637 is a Soviet apartment house with a tailor shop on the first floor.

v. Building 643 is a Soviet department store called the "Gastronom." German saleswomen are employed in the store.

w. Building 644 is the Soviet Kommandatura in WUENSDORF. It has a volley ball field and a movie house in the area.

x. Villas occupied by Soviets from the Kommandatura.

y. A flat wooden building used as a garage by the Soviet Kommandatura.

z. Building 649 is a small transformer station. The station is actually a small booth.

aa. The buildings marked 647 are small villas occupied by Soviet officers. The area behind these buildings is used as a drill field by the Soviets and as pistol ranges.

ab. A small guard booth and boom closing the street.

ac. A sketch of the area of Source's knowledgability has been attached as Exhibit " ". On that sketch are several buildings which do not appear on the prepared map of the ZOSSEN/WUENSDORF area. These buildings are identified as follows:

(1) "A" are six apartment houses built in 1956 and 1957 all of the same design. They are 60 feet long and three stories high. Each apartment has three entrances with one apartment on each floor. These apartments were to be occupied by Soviet officers and their families.

(2) "B" is a power plant built in 1956 and 1957 by the LEBAHN firm in WUENSDORF and the Sonderbauburo (German Construction Agency). The compound is surrounded by a wooden picket fence approximately five feet high. Source stated that Building 615 must represent this transformer station since there is no other building in the area; however, the transformer station is located more in the center of the area.

(F-3)

(3) "C" is a Soviet transient hotel with a textile store in the basement. This building also contains railroad ticket windows and a waiting room for Soviet personnel only. The building may be located closer to the railroad tracks than Source has shown on the Exhibit.

(4) "D" are coal and fuel sheds belonging to the Sonderbauburo.

(5) "E" located on Bahnhofstrasse is a small fruit stand.

(6) "F" are three small flat buildings belonging to the Sonderbauburo. The entire Sonderbauburo compound is surrounded by a brown picket fence, five feet high.

(7) "G" is an abandoned gas station. The small office building of the gas station is used by the administration office for the Tank Repair Plant in the Panzer Schule (Tank School) area of the WUENSDORF complex.

(8) "H" is a Soviet occupied apartment house.

a. The Soviet railroad station was reported in SOI, Region VIII, dated 18 March 1959, Subject: SIS Kreis Zossen, Re: Installations (C), file: EE-567195/e. No hotel or textile shop has previously been reported in this building.

b. Buildings 20 and 21 were reported as Soviet apartment houses in SOI, Region VIII, File: EE-567195/e, dated 18 March 1959. Building 19, however, was reported in that SOI as an SIS employee screening office. No confirmation of this information has been received.

c. The Soviet power plant, marked "B" on the Exhibit to this SOI, was reported in SOI, Region VIII, dated 10 June 1959, File: EE-567195/e. This report also stated that the construction was done by LEBAHN.

d. All other buildings mentioned in this report are identified in SOI, Region VIII, dated 10 December 1958 and 18 March 1959 and 14 October 1958, File: EE-567195/e, Subject: SIS Kreis Zossen, Re: Installations (C)

SUMMARY OF INFORMATION

1. Cover apartments used by SIS in POTSDAM UU6808, East Germany:

a. The SIS used a cover apartment on Grosse Weinmeister Strasse 57 from [b1] in order to meet Source. (See Exhibit "I.") The apartment was inhabited by a Soviet family and one room was reserved for the SIS. (See Exhibit "II.") The apartment, according to Source, was "given up" in early 1957.

b. The SIS used a cover apartment located at Tieckstrasse 3, first floor on the right, [b1] in order to meet Source. (See Exhibits "III" and "IV.") [b1]

[b1] During the time that this apartment was used by SIS it was uninhabited.

4. REPORT OF FINDINGS

On 9 June 1959, V-447-BER reported the following information:

The area in POTSDAM UU6808, East Germany, bordering on the park known as Neuer Garten, appears to be a sealed-off area occupied by Soviet officers, Soviet civilians, and their families. (See Exhibit "I.")

A wood, palisade-type fence (Brettersaun), two meters high (6'6"), surrounds the area (Exhibit "I"), running along the street Am Neuen Garten, cutting across Langhaus Strasse just before that street ends, thence across Grosse Weinmeister Strasse to a point shown on the map as Belvedere, thence to Pfing Strasse, around the end of Hasse Strasse, widening out to touch Puschkin Allee, thence back to Hasse Strasse to Kleine Weinmeister Strasse along, but not including, Kleine Weinmeister Strasse, thence back to the wide promenade, Am Neuen Garten (Strasse). On Am Neuen Garten Strasse, just across from the Marmor Palais (Marble Palace - See Exhibit "I"), is the main entrance to the fenced-in area. A Soviet soldier guards this entrance, which is for vehicles as well as pedestrians. A wooden barrier can be raised or lowered for vehicles. Each pedestrian and each occupant of each vehicle must show a pass (identification) before the guard will permit passage. Another entrance for pedestrians, but which can also be used for vehicles (SUBJECT saw no vehicles using this entrance) is located at a point near the area called Belvedere. A uniformed Soviet soldier is on guard at this entrance also.

SUBJECT observed the entire perimeter on alternate days between 28 May and 9 June 1959. He saw many women, pushing baby carriages or accompanied by children, entering and leaving the area, mostly from the Am Neuen Garten Strasse entrance. SUBJECT also observed many Soviet officers entering or leaving the area in chauffeur-driven ZIS sedans. The chauffeurs, in all instances, were Soviet enlisted men. The officers invariably wore high boots, dark grey-green uniforms with red "scrambled eggs" on the cap visors and red shoulder boards. The enlisted soldiers also wore dark grey-green uniforms with red shoulder boards. SUBJECT saw a civilian from time to time in the cars with the Soviet officers.

The fenced-in Soviet dependant housing area is approximately 1 1/2 kilometers long. The street of Am Neuen Garten is included entirely in the fenced-in area. However, the area Marmor Palais/Neuer Garten/Schloss Cecilienhof is open to the public. Anyone can walk around outside the entire fenced-in area without hindrance of any kind.

The houses within the fenced-in area appear to be large, villa type structures, with well tended lawns and gardens. Little can be seen of the houses themselves because of the shrubbery and growth which obscures the view. Most of the houses have television aeriels on the roofs.

4. REPORT OF FINDINGS

People's Police patrol cars (Volkswagens) circle the area outside the fence every hour or so. The area is quiet, movement of persons and/or vehicles into and from the fenced-in portion is leisurely, and the vehicles travel at reduced speeds.

On alternate days during the period 28 May to 9 June 1959, the following Soviet vehicles were observed either entering or leaving the area known as Am Neuen Garten, the Soviet officers and Soviet civilian dependents' housing area:

- 4-wheel truck, "Molotov" type, license number A 9-63-06
- 4-wheel truck, "Molotov" type, license number H 5-32-89
- 4-wheel truck, "Molotov" type, license number P 5-50-10
- Black "ZIS," sedan, chauffeur-driven, license number A 8-81-13
- Black "ZIS," sedan, chauffeur-driven, license number K 3-14-20
- Gray "ZIS," sedan, chauffeur-driven, license number Y 5-82-74

The trucks were driven by Soviet enlisted men wearing dark grey-green uniforms with red piping. The chauffeurs driving the sedans were Soviet enlisted men with the same uniform as those in the trucks.

During the period 10 June to 22 June 1959, SUBJECT observed the following Soviet vehicles entering or leaving the Soviet Housing Area known as Am Neuen Garten:

- Soviet "jeep" type vehicle, license number Y 5-58-65
- Soviet "jeep" type vehicle, license number K 3-14-16
- Soviet "jeep" type vehicle, license number O 5-12-19
- Soviet "jeep" type vehicle, license number K 4-82-68
- Soviet "jeep" type vehicle, 6 person, license number A 9-35-54
- Soviet "jeep" type vehicle, license number Y 5-84-70
- Soviet "jeep" type vehicle, license number P 1-69-45

With the exception of the one "6-person" vehicle, all the others were "4-person" jeep-type carriers. All the above license numbers were the regular Soviet type license plates in size and color. The color is yellow background with black numbers and letters. The "Molotov" trucks, although empty at the time of observation, have a capacity of carrying approximately 24-30 soldiers.

Between 28 May and 9 June 1959, the following vehicles were observed either entering or leaving the MfS BV Headquarters, POTSDAM, East Germany:

- Green Wartburg, sedan, license number DK 89-54
- Gray EMW, sedan, license number DK 57-68
- Dark red EMW, sedan, license number DK 41-55
- Black EMW, sedan, license number IB 45-15

SUMMARY OF INFORMATION

1. Soviet Installations in the ZOSSEN/WUENSDORF UT9580, East Germany, Bahnhof Strasse area:

a. Building 615 is a Soviet Transformer Station in WUENSDORF. The transformer station is approximately 90 feet square and 60 feet high. It is a three story building. The ground floor has concrete walls, and the upper floors have brick walls. The building has a flat roof and a rough grey plaster finish. The brick work and installation of electrical equipment was nearly completed in February 1959. A sketch of this building is attached as Exhibit "I." A concrete foundation about 12 by 12 feet was laid in February 1959 at point "B" on that sketch. Point "C" is a brick wall approximately 25 feet high. A concrete foundation, 10 by 12 feet in size, was laid at point "D", allegedly as a foundation for a transformer. Point "E" is a large round cast-iron apparatus, about 6 feet high and 12 feet in diameter. The apparatus has vertical cooling ribs and is allegedly filled with oil. The transformer station is surrounded by a wooden fence. KOENIG, Christof, German male, born about 1906, who resides in ZOSSEN, East Germany, is working as a bricklayer at the Soviet transformer station. He is married and originates from the FRG. KOENIG is employed by the LEBAHN construction firm at ZOSSEN, Bahnhofstrasse.

b. Exhibit "II" is a sketch of the entire area surrounding the transformer station. The area marked 6, located to the west of the transformer station is a parking lot. Directly across the street from the transformer station, marked 5 on the Exhibit, is the Sonderbaubureau (East German Construction Bureau), WUENSDORF, which handles Soviet construction projects. The area marked 4, west of the Sonderbaubureau office, is a coal dump. Source identified buildings 25 to 30 as the Soviet supply depot. He could give no other information. Building 2 on the Exhibit, possibly identified as 24, is a grain elevator approximately 120 feet square and 75 feet high. Source identified the buildings 19, 20, 21 and the building marked 3 on the Exhibit as Soviet billets. Source was able to give no further information concerning the WUENSDORF Soviet installations.

(F-3)

c. Source knew the following employees of the Soviet Tank Repair Shop:

2. Region VIII File Examination:

a. Building 615 was reported as a transformer station in Summary of Information, Region VIII, dated 10 December 1958, File: EE-567195/e, Subject: SIS Kreis Zossen, Re: Installations (C).

b. The building across the street from the Transformer Station, the Bauburo WUENSDORF, was reported as the Bauburo POTSDAM UU6708, East Germany, in Summary of Information, Region VIII, dated 18 March 1959, File: EE-567195/e. This report also contained a sketch which showed the approximate location of the transformer station, the Bauburo building, and the buildings listed in this report as Soviet housing.

SUMMARY OF INFORMATION

1. Installation at HALLE QCO707, East Germany, Luisenstrasse: HALLE, Luisenstrasse, number unknown, was formerly an SIS installation which cooperated closely with the MfS Main Department I/3, Sub-Department HALLE. The office was dissolved in October 1958. The building is now used as quarters for officers of the National People's Army.

2. SIS Advisors to the MfS BV Halle: The MfS BV Halle, Robert Franz Ring, formerly maintained four offices for from six to eight Soviet advisors. All of the Soviet advisors wore civilian clothes. Source last saw Soviets in the MfS BV building in January 1959. Source does not know whether the Soviet advisors are still assigned to the MfS BV Halle.

3. SIS office located in HALLE, East Germany: A Soviet military security group is presently located at the Headquarters building of the HEIDE-Kaserne, a Soviet kaserne in HALLE. The barracks are located in the triangle formed by Heideallee and Heidenhauserstrasse in HALLE. The southern end of the Heide Barracks is bordered by an airfield. Source does not know any of the personalities associated with this SIS security group; however, any information arising concerning the Heide installation is handled by this Soviet office.

(F-3)

4. Region VIII File Examinations:

a. The installation at HALLE, Luisenstrasse, was previously reported in Summary of Information, Region VIII, dated May 1950, File: D-567132/e, Subject: SIS HALLE, Re: Installations (C). A sketch of the installation was attached to that report.

b. Several cover houses located near the Heide Barracks have been reported in Summary of Information, Region VIII, dated 14 March 1957, File: D-567132/e, Subject: SIS HALLE, Re: Installations (C). No information could be found concerning a Security Unit having its offices in the Soviet Army Headquarters Building in the Heide Barracks.

SUMMARY OF INFORMATION

1. Telephone number used by an SIS office in EBERSWALDE VU2055, East Germany: 32 11 was the telephone number by which Source could contact her SIS handling agent. Source would call the number, give her cover name, and ask [b1] who would take Source's message for her handling agent.

(F-3)

2. SIS Compound located at EBERSWALDE between Schiller Strasse and Bismarck Strasse: This compound is surrounded by a board fence about eight feet high which is topped with several strands of barbed wire. All gates to the compound are normally closed except the main gate on Pfeil Strasse which is guarded by a Soviet soldier armed with a sub-machine gun. The SIS office in the compound is located in a former court building at the corner of Gerichts Strasse and Pfeil Strasse. Exhibit "I" illustrates location and details of this installation.

(F-3)

3. Region VIII file examination:

a. Region VIII files reveal that telephone number 32 11, EBERSWALDE, was the number at which [b1] could contact his SIS handling agent, [b1]. This information was reported in March 1959 and evaluated F-6. 32 11 was also the number at which a Source could contact SIS agent [b1]. This information is undated and unevaluated.

b. Region VIII files further reveal that an MVD office is located at EBERSWALDE, Pfeilstrasse, near Gerichtstrasse. This information is undated and unevaluated. Information from [b1] dated March 1959 and evaluated F-6, reveals that an SIS compound generally resembling the one described in this SOI is located in EBERSWALDE.

SUMMARY OF INFORMATION

1. Location and description of SIS offices within a Soviet military installation in WEIMAR-Nohra-Sued PB5648, East Germany:

a. Prior to World War II, this installation was the location of the German Air Force Training Regiment XIII. This installation is now a Soviet staff headquarters. This installation is located about six kilometers west of WEIMAR PB6350, near highway number 7. It is completely surrounded by woods. The entire compound is fenced in by wire mesh fencing, surrounded by woods. The entire compound is fenced in by wire mesh fencing, wooden board fencing, and iron rail fencing set in concrete. On Exhibit " " the type of fencing is indicated by the following symbols:

XXXX : Wire mesh

- - - : Wooden board

||||| : Iron rails set in a concrete foundation.

b. The following entrances or gates are shown on Exhibit " " : Entrances A, B, and C are the only entrances to the compound. Entrance A, which has a 24 hours guard, is the entrance to the quarters of the Soviet generals who are stationed at this installation. Entrance B is primarily used as an exit, since the street running south from this entrance is a one way street. Only staff vehicles and vehicles carrying general officers are allowed to drive in the wrong direction on this street. There are guarded barriers at this entrance and at entrance C which is used for incoming traffic. Within the compound, sub-entrance B1 must be used to drive into the area where buildings 2 through 6 are located, sub-entrance B2 to drive into the area where buildings 45, 46, 47, and 49 are located, sub-entrance B3 to drive into the area where buildings 7 through 11 are located, and sub-entrance B4 to drive into the area where buildings 35 through 44 are located. Gates D and E have barriers which are guarded 24 hours a day. The area into which these gates lead is enclosed by a six foot seven inch high fence, part of which is wooden boards and part of which is wire mesh. A special permit is required for entrance into this area which contains the buildings of the General Staff.

c. The following buildings are designated on Exhibit " " : Building 19 is a two storied, grey-stuccoed, slate-roofed building, measuring about 177 feet by 50 feet. It was remodeled in the Spring of 1958. The western wing of the first floor of this building contains SIS offices. There is a special entrance to these offices, and it is guarded 24 hours

a day. There are five or six SIS officers on duty. On the one occasion that Source worked in these rooms, all the furniture had been removed, and he worked under constant guard. Buildings 21, 22, 23, 28, 29, and 30 are two storied, grey-stuccoed, slate-roofed office buildings, measuring about 177 by 50 feet. These buildings are occupied by the General Staff. In the basement of one of these buildings is a radio and telephone exchange. Building 24 is a large incinerator where classified waste is destroyed. Buildings 1 and 48 are guardhouses. Buildings 2, 3, and 4 are one-storied, flat-roofed garages for trucks and cars. Building 5 is a vehicle repair shop. Building 6 was formerly a garage for tanks, but its present use is unknown. Building 7 is a two-storied, grey-stuccoed, slate-roofed building measuring about 170 by 50 feet. On the first floor of this building is an elementary school for Soviet children; on the second floor are Soviet officers' quarters. Buildings 8, 9, and 10 are two-storied, grey-stuccoed, slate-roofed buildings in which Soviet soldiers are quartered. Buildings 8 and 9 measure about 170 by 50 feet, and building 10 about 177 by 50 feet. Building 11, which is small and one-storied, is a field post office which handles the mail for all the Soviet Army personnel on post. Area number 12 designates two permanently stationed trucks on which a mobile wireless station is installed. Building 13 is a firing range for small calibre weapons. Building 14 is a large gymnasium for Soviet military personnel. Building 15 is a motion picture theatre for Soviet soldiers. Building 16 is a large boiler house, one wing of which contains showers for Soviet soldiers. Building 17 houses a dental clinic, out-patient clinic, first aid station, and a small ward used only for light cases. Severe cases are sent to the hospital at WEIMAR Luetzendorf barracks. Buildings 18, 32, 33, 37, 40, 41, 43, and 45 are two-storied, grey-stuccoed apartment buildings for Soviet officers and their dependents. All these buildings except 37 and 45 are slate-roofed, measuring about 177 by 50 feet. Building 37 has a slate roof and measures about 217 by 50 feet. The south wing houses shower and bath facilities for officers and their dependents on the first floor. In the basement of this building is a large furnace which furnishes the eastern side of the compound with heat and warm water. Building 45 has a roof of red tile and measures about 177 by 50 feet. One wing of this building contains the Soviet PX and Commissary. Building 25 is an empty hut, formerly a pigsty. Building 26 is a two-storied, grey-stuccoed, slate-roofed building. The first floor is occupied by kitchen facilities, a mess hall for generals, and a mess hall for officers and civilians. The second floor contains quarters for female Soviet office employees, teachers, and nurses. Building 27 is a three-storied, grey-stuccoed, slate-roofed building containing quarters for female Soviet menial employees. Part of the first floor is occupied by a kindergarten for Soviet children. Building 31 is of wood and has one story. Erected in the Spring of 1958, it contains a Soviet restaurant. Building 34 is a two-storied, grey-stuccoed, slate-roofed building used as a hotel for visiting top officials. Nikita KHRUSHCHEV

a prominent Soviet official, is believed to have stayed at this hotel. Building 35 is the Soviet Officers' Club, containing a motion picture room, conference room, music rooms, reading rooms with library, billiard rooms, and bar. Number 36 designates a small underground construction housing the water works for the post. Opposite it is a water tank, also underground. Buildings 38, 42, 44, and 46 are "Villa" type buildings occupied by Soviet generals. Building 38 is a single family dwelling occupied by the Commanding General of the post. The other three buildings are duplexes. Number 39 designates an old concrete bunker about 10 feet high and about 50 feet in diameter. Building 47 contains a large boiler in the basement and part of the first floor, a steam bath for Soviet generals on the rest of the first floor, and apartments for three Soviet officers and their dependents on the second floor. Number 49 designates garages, divided into at least 10 separate stalls, some of which are always kept locked. Source believes that there are two trucks with mobile wireless stations mounted on them kept behind these locked doors. Building 50 has one story and contains a barber shop and beauty parlor.

1. (U) Reference is made to the following:

a. Your 1st Indorsement dated 22 April 1959 to our letter dated 28 March 1959, subject and file as above.

b. Your letter, subject and file as above, dated 18 March 1959.

2. (U)(C) Forwarded herewith are ten (10) copies of the WUENSDORF/ZOSSEN map which you requested. This map was prepared from an air survey dated 1 June 1955, and does not reflect changes reported since that date.

3. (U)(e) With regard to paragraph 3 of reference 1a above, confusion still exists as to the identity of building 653. The WUENSDORF/ZOSSEN map shows building 653 to be on the southwest corner of Highway #96 and Chausseestrasse. In your Summary of Information dated 14 October 1958, subject and file as above, Exhibit III labels this building as: "A Soviet grocery store operated by Soviet personnel." Building 657 and 657a appear both in Exhibit III, as numbers 5 and 6, and in Exhibit IV, as 1 and 2: in both cases this building is labeled a Soviet hotel. Is the referenced paragraph in error?

4. (U)(e) With regard to reference 1b above, the current numbering of installations between Chausseestrasse and the unnamed street south of Chausseestrasse on Highway #96 running between Highway #96 and the railroad tracks is as follows:

a. 653 - A Soviet grocery store operated by Soviet personnel.

b. 654 - A vacant lot.

c. 655 - A two story building with a German barber shop and a Soviet snack bar on the first floor, and Soviet billets on the upper floor.

1. (U) (S) The WUENSDORF/ZOSSEN map was received by this Region on 20 November 1958. In order to integrate our report dated 14 October 1958 into a working file using the Headquarters assigned building designations, analysis was necessary since our report lists 13 buildings between the trapezoidal shaped building at the corner of "Rampe" and Highway 96 and Chaussee Strasse. There were seven buildings between the trapezoidal shaped building and the building set back from Highway 96, numbered by Headquarters 655. Headquarters map lists two buildings between this building and Chaussee Strasse while our report dated 14 October 1958 lists five buildings and an empty lot. In the opinion of this Region, substantiated by the Source of our report dated 18 March 1959, the buildings south of Chaussee Strasse to "Rampe" Strasse are identified as follows:

- a. Not shown on Hq map - A Soviet Grocery Store operated by Soviet personnel. There is a vacant lot south of this building.
- b. Not shown on Hq map - A two story building with a German Barber Shop and a Soviet snack bar on the first floor and Soviet billets on the upper floor.
- c. Not shown on Hq map - The Spaet Magazine or late store for Soviet personnel.
- d. Bldg 653 - A Soviet hotel operated by Soviet personnel or billets for Soviet officer personnel.
- e. Bldg 654 - A small two story building believed to be an annex of Building 653.
- f. Bldg 655 - A three story grey stucco building occupied by a Soviet officer and his family.

SUMMARY OF INFORMATION

1. Installations in the Old Panzer School Area of the Soviet Compound at WUENSDORF UT9580, East Germany. (The buildings are stucco with red tile roofs unless otherwise indicated.) (See Exhibit "1".)

a. Building 94a is the so-called "Millionenbau". It is a three or four story building, white stucco with a red tile roof. It houses administration offices for the Soviet General Staff. It is also the place where visitors from other satellite countries and military missions are received. When such visitors arrive the street is closed to all normal traffic of vehicles and employees. There are two entrances to this building, both on Zehrendorfer Strasse. This building is completely off limits to all German employees; repair work is not done by the repairmen from WUENSDORF Compound.

b. Buildings 82, 83, and 84 - These are all three story office buildings.

c. Building 85 - An office building where Source believes the office of the Polit officer is located.

d. Building 86 - A one story, gray stucco building with a flat, tarpaper roof. It was the mess hall of the Panzerschule during German Army times. It is not now used as a mess, and is possibly a boxing school for Red Army officers.

e. Buildings 87, 88 and 89 - Three story administration buildings containing offices.

f. Buildings 43 to 67 - Source has never entered these buildings which are part of the tank repair shop.

g. Building 94b - An office building.

BEST COPY AVAILABLE

h. Buildings 95a, 42 and 41 - These are apartment houses for officers with dependents. Source designated 42 and 41 as 100 and 101, respectively.

i. Building 97 - This is a two story building with mess halls for certain civilians and officers, including generals. Source designated this building as 40.

j. Buildings 99 and 98 - These are apartment buildings for officers and dependents. Source designated these buildings as 102 and 103, respectively.

q. Building 69 - The stockade.

r. Buildings 74 and 73 (designated 77 and 74, respectively, by Source) - Occupied by officers' families.

s. Building 75 (designated 76 by Source) - The school for all Soviet children in this area. Children from other bases come by busses to attend this school. It probably is a high school because children of all ages attend.

t. Building 77 - This is a transient billet for higher ranking officers coming from other bases. It is also used as quarters for visiting artists (dancers, singers).

2. Installations in the Old Sportschool Area of the Soviet Compound at WUENSDORF: [redacted] b1

[redacted] b1

[redacted] b1 The personnel occupying this area are unknown to Source. However, Source has occasionally been in this area to attend sports events when Germans were permitted to come as spectators. Source's only knowledge of this area is that the building located in the area east and behind building 106 houses a theater for stage performances and movies.

3. Installations in the Hindenburg and Cambrai Kaserne Area of the Soviet Compound at WUENSDORF: This area is unknown to Source with the exception of the following:

a. Building 118-119 - This building was enlarged during 1956-1957. It is the clinic for enlisted men, officers, dependents, and civilian employees. It is also the first aid station, but does not serve as a hospital.

b. Buildings 128a, 129a, 129b, 132, 132a and 126 are apartment buildings for officers and dependents.

c. Building 133 is for guards of the Marshall building.

d. Building 134 is a laundry. It also houses living quarters for all household personnel including the laundry personnel. All these employees work exclusively for the Marshall.

e. Building 135 is the Marshall building. Source does not know if it is presently occupied. The last Marshall occupying this building was Marshall GRETSCHKO (phonetic) who was transferred about mid-1957.

4. The WUENSDORF Ration Depot Area is completely unknown to Source.

5. Artillery Kaserne (Lutz Kaserne) Area: This area is unfamiliar to Source. He has been in this area about three or four times and has no knowledge of the individual buildings. Source believes that the ACHO (Administrativno-Chozyastvenaya Organizatia - Organization for Administration and Economics) has its offices here, b1

b1

6. ZOSSEN Stammlager Area is completely unknown to Source.

7. Family Quarters (see Exhibit "I"):

a. Building 1 is a guard house, unoccupied.

b. 2 is a sales stand, Soviet operated, open in summer only.

c. 3 is a guard house, unoccupied.

d. 4 is ash can area.

e. Buildings 189, 191, 192, 193, 194, 196, 197, 201, 202 and 204 are Soviet family quarters.

f. Building 203 is a Soviet cover house.

Besides that they are occupied with cleaning the boilers, painting the pipes, white-washing the furnaces, etc. The coal supply comes from the KECH (local office of the Soviet Military Construction Agency), located next to the Soviet railroad station.

c. All crew members are in permanent possession of a "Strassen Ausweis" (road pass) which entitles them to pass through the barrier at the railroad station WUENSDORF leading to highway 96. They continue on Bahnhof Strasse, turn onto highway 96 and after about 165 yards they turn onto another street which is again protected by a barrier, located about 50 yards off highway 96. This barrier is for cars only. Pedestrians have to go through a small gate in the wooden fence before the barrier and walk around the guard house at the barrier. In the rear of this guard house is a counter where workers have to turn in their DPA (Deutscher Personalausweis - East German Identification Document) and in return receive a pass which is good for about one or two years. The colors of these passes change periodically. This pass is made out in the name of the individual bearer. Inside the DPA is a number written in ink which corresponds with the number of the pass. The pass has a picture of the bearer which is stamped half over by a stamp in the Russian language. The entire inscription of the pass is in Russian lettering. The pass receives a validity stamp every three months. Upon leaving after duty hours, workers turn in their passes and receive their DPA in exchange. The passes remain in the guard house in each individual's designated slot. Wages are paid at the German Personnel office, located on highway 96, half-way between Lutz Barracks and Bahnhof Strasse at a former German gasoline station.

1. Soviet apartments at POTSDAM UU6807, East Germany, Stormstrasse 5, 7, 8, and 9: The apartments are three and four story buildings with gray stucco facing and red tile roofs. Each building is divided into six or seven family housing units. There are no names on the doors, just numbers. Until September 1958 the following apartments are occupied by Soviet families:

Stormstrasse 5, second floor, right

Stormstrasse 7, second floor, left

Stormstrasse 8, second floor, left and right

Stormstrasse 9, second floor, left and right

Source has not been in the building since September 1958, but has heard that the apartments occupied by Soviet nationals had been repaired and were to be re-occupied in November 1958. The other apartments on the street were occupied by German families. Some of these were the families of members of the NVA (Nationale Volksarmee - National People's Army). Source has also heard that members of the MfS resided in the apartments on Stormstrasse. (Exhibit " " illustrates the location of these apartments).

station is shown on Exhibit "I" by a (D). The station is a one story building with a cellar. It is made of brick. The southern side of the building has an entrance into the cellar leading to a baggage room. This entrance is shown on Exhibit "I". The northern side of the cellar contains a store. The first floor is entered by means of two large doors placed in the center of the building. The entrance leads to a waiting room. On the left or south side of this waiting room is a dining room. To the left of this room are a kitchen, snack bar, and baggage room, from back to front respectively. Interior and exterior sketches of this railroad station are shown on Exhibit "I". The snack bar is called the HO Buffet and services only Soviet nationals. The following are employees of the HO Buffet:

b6 born approximately 1911, is a cook.

b6 born approximately 1927, is a cook.

b6 born approximately 1929, is a waitress. She has a boy-friend, name unknown, in West BERLIN.

4. REPORT OF FINDINGS

On 11 March 59, an examination of the Research and Analysis files, CE Division, 66th CIC Group, APO 154, US Forces, disclosed the following:

There is an MGB cover house on the ground floor of the left hand side at Lenin Allee 19. A sign on the door reads "Kuestrin". (Date of information: 24 May 51)

There is a cover house located on the left side of Lenin Allee one station before the terminus of tramway line number 1. (Date of information: Aug 1952)

The MVD Headquarters on Lenin Allee covers an area of about 200 by 100 by 50 meters and is enclosed by a two and one half (2.5) meter closed wooden fence which is topped with two (2) strands of barbed wire. One building, located in the Western portion of the area is a single story 25 by six (6) by four (4) meter gray stuccoed building with a tarpaper-covered shed roof. East of this building is a two (2) story gray stuccoed brick building of about 18 by 18 by three (3) meters with a tiled gabled roof. (Date of information: September 1953)

SUMMARY OF INFORMATION

1. Location and Description: An SIS compound is located at POTSDAM UU6808, East Germany, on Lenin Allee, along the Havel River. The entrance to this compound is on Lenin Allee near Stadt Heide Strasse. The compound comprises a two story villa, approximately 30 feet long and 45 feet wide, with dark grey stucco walls and a steep red tiled roof. Source is unable to provide an interior description of the villa because he only entered this villa once during his initial SIS recruitment. Attached as Exhibit "I" is a sketch illustrating the location of the SIS compound in POTSDAM, Lenin Allee.

SUMMARY OF INFORMATION

On 16 February 1959, Source A-W was interviewed at the Gelchsheim Refugee Camp, Gelchsheim NV7491, West Germany, and revealed the following information concerning a KGB (Committee for State Security), Memel (nca), Lithuania, installation:

EES67003/e

Description:

The KGB Headquarters in Memel is located on Salomeo Neries (Bahnhofstrasse) opposite the hospital. It is a three-story structure, dirty gold in color, with a red, pointed roof. It is 45 to 50 meters long and 15 meters wide (estimated). The entrance is on the left side of the building as you face it from the street. There are 10 to 12 windows on the front side of the building, and one on each side of the main entrance. To the right of the headquarters is a driveway, leading to a courtyard in the rear. To the right of the driveway is a small house, previously a widows' asylum, which has been taken over by the KGB. To the left of the headquarters is a small stone shed, commonly believed to be a torture room. This shed has no windows. To the rear of this shed lies the garage. The entire installation, including courtyard, is surrounded by a 5' 6" wooden fence (estimated).

Security:

4. REPORT OF FINDINGS

On 28 Jan 59, an examination of the Research and Analysis files, CE Div, 66th CIC Group, APO 154, US Forces, disclosed substantially the following information:

The Am Neuen Garten Compound is the location of the headquarters of the OO (KGB Third Directorate). This address was formerly known as the Kaiserin Augusta Stiftung. The mission of the OO is to ensure the security of the Soviet Armed Forces in Germany. This involves the running of informant networks against Soviet military personnel, and active counter espionage against Allied or other western organizations working against Soviet forces, particularly those organizations interested in subverting or defecting Soviets. SUMMARY OF INFORMATION

1. The Soviet Kommandantura in PARCHIM PE8923, East Germany: This installation is located on Floerkestrasse, number unknown. The Duty Officer's room is located in the first room to the left inside the main entrance. Details other than those indicated on Exhibit "Y" were unknown to Source.

2. Soviet Personnel at the Soviet Kommandantura in PARCHIM: A certain b6 born about 1914, a Captain in the Soviet Infantry, works in the Soviet Kommandatura in PARCHIM and resides in PARCHIM, Dammerweg, near the PARCHIM railroad station. b6 is about 5'5" tall, weighs about 164 pounds, has straight, blond hair, brown eyes, a round face, a broad nose, a high, vertical forehead and pock-marks on both cheeks. b6 wears a Soviet infantry officer's uniform, a gold "Popjeda" wrist watch with a gold band and has a gold tooth on the upper right side of his mouth. b6 speaks only a few words of German, is married and has two children--a boy and a girl, ages unknown. His wife and children are residing in LENINGRAD, USSR. b6 is of average intelligence, has poor manners, smokes approximately 30 cigarettes daily and drinks vodka excessively. b6 has been stationed in Germany since 1955, is interested in the Western way of life and likes to run around with German girls who associate primarily with Soviet soldiers.

SUMMARY OF INFORMATION

1. In POTSDAM UU6807 just west of the Heiliger See and just south of the Jungfern See there is a Soviet installation, allegedly a restricted area for military personnel and probably for Soviet staff personnel. This installation is bordered by a 2 meter, 2 centimeter high wooden board fence which is solid and cannot be seen through, and by a 2 meter, 2 centimeter high solid stone wall. The stone wall runs along the eastern side of the 'Am Neuen Garten' in a north-south direction. It starts at a point somewhere between where Am Neuen Garten joins Weinmeister Strasse, and where Am Neuen Garten joins Glume Strasse. It then runs along Am Neuen Garten in a northerly direction to a point just south of where Weinmeister Strasse again joins Am Neuen Garten. At the point where the wall starts at the southern part of Am Neuen Garten, there is a 'Bretterzaun' or palisade-type wooden barrier across Am Neuen Garten. Source did not know if this barrier could be easily removed to enable vehicles to pass through Am Neuen Garten. At the north end of the stone wall there is a 'Schlagbaum' or barrier that can be raised across Am Neuen Garten. There is a Soviet guard in uniform by this barrier. The barrier is raised and lowered by this guard to permit vehicles to enter. From this barrier on the northern part of Am Neuen Garten the wooden board fence begins. It is connected to the barrier and runs in a south west direction from the barrier across Weinmeister Strasse to the point where Puschkin Allee makes a right angle turn in the area of Pfingstberg and Belvedere. The fence then follows the eastern side of Puschkin Allee in a southerly direction to the point where a small unnamed street joins Puschkin Allee with Am Schragen Strasse, which is west of and parallel to Puschkin Allee. At this point, which is also directly west of the northern most end of Hesse Strasse, the fence makes a right angle turn to the east. At this point on Puschkin Allee and outside of the fence and therefore the Soviet Restricted Area, there is a house, which Source was unable to describe but upon which was the sign 'Staatssicherheitsdienst'. The fence runs in a west-east direction from Puschkin Allee, passing just north of the northern-most part of Hesse Strasse, to the Pfingstberg Church. At the Pfingstberg Church the fence runs north around the church, so that the church is not included in the restricted area. The fence then runs directly south-west to Hesse Strasse and follows Hesse Strasse in a southerly direction on the eastern side of Hesse Strasse about three quarters of the length of Hesse Strasse. At this point, which is about one quarter of the length of Hesse Strasse north of where Hesse Strasse joins Weinmeister Strasse, the fence leaves the side of Hesse Strasse and runs in south-easterly direction directly to the stone wall and 'Bretterzaun' on Am Neuen Garten. In so doing the fence cuts across the southern part of Weinmeister Strasse, and at this point of Weinmeister Strasse there is a barrier or 'Schlagbaum' with a uniformed Russian guard similar to the barrier on the northern part of Am Neuen Garten. Directly south of the fence, where it cuts across Weinmeister Strasse and meets the 'Bretterzaun' and the stone wall on Am Neuen Garten, there are houses for Russian officers.

These houses are located between Am Neuen Garten and Weinmeister Strasse.

2. Apparently this installation is used primarily by fairly high ranking Soviet officials and army personnel, judging by the personnel and official cars seen entering the compound. German nationals are forbidden entrance to the compound.

3. Attached as Exhibit "I" is a diagram of the Soviet Restricted Area.

Section II - Name

Interrogation

of Confidential Informant 2045, February 4, 1958

Subject: Case "S I S N E".

Informant 2045 reported the following, February 4, 1958:

On May 1, 1957, informant was commended for particularly efficient work as activist. A few days later, he was approached in his office, and requested to appear at room 8, Main Administration of Wiscot AO, at Apt/Hanway. In this room, there was a Russian whose name was not mentioned. The conversation was conducted in Russian. The Russian started in by asking general questions on economic and political subjects, and informant was also questioned regarding friends and relatives. Informant also stated that his father was in the Benton prison. Further, the informant was questioned about his place of work. The conversation lasted 2 to 3 hours. The informant was instructed to allow no one to see him entering room 8. The Russian imposed secrecy upon the informant regarding this conversation.

A few weeks later, informant does not remember the exact date, he was again requested to go to room 8 of the main administration of Wiscot AO. This time, he was questioned about his daughter [b6] about 35 years of age, who had close connections with Russian officers. The Russian interrogator wished to learn from the informant with which officers [b6] had connection and whether she was active for the West. Informant was instructed to write a sketch on [b6] and to identify the Russian officers with whom she was acquainted. The Russian wanted to pick up the informant's report later on.

The third meeting took place a few weeks later in the reception room of the chief of the main administration, FID/OC. On this occasion, the informant delivered the report on [b6]

The Russian then presented a Russian-language document with about the following contents:

"I (true name) have met a comrade of MGB (Ministry of State Security, Soviet Union). I am obliged to keep silent on everything that has been discussed today and will be discussed in future, otherwise I can expect penal prosecution through governmental institutions."

The informant at first refused to sign the declaration. The Russian argued that he had already placed himself in the hands of MGB by making the report on [b6] and that the informant's father at Benton could expect retaliations. Thereupon the informant gave in and signed the declaration with his true name.

Early in 1953, the informant was again requested to go to room 8, where he was introduced to a second Russian. The second Russian likewise did not mention his name. The informant was now requested to first of all give oral reports on the situation at the plant.

From the spring of 1953 on, the meetings took place in a safe apartment at Ang. [redacted]. The building is located on the left of the present SAD district administration. The buildings were seized for SAD (Soviet Cooperation) Wismar at the time.

The meetings in the apartment were comparatively short, since the second Russian wanted information only on mining regarding the mining conditions and on the supply at the plant. The informant could not say much, since he had only little contact with colleagues.

About the middle of 1953, a Russian guard was shot in front of the administration building, which caused great alarm among the leading Russians at the SAD Wismar. The informant was also interrogated in this connection; he was asked for the names of those German employees who had private connections with Russians. The informant was also requested to make statements about the pistol hits in the administration building.

Late in 1953, the informant was severely blamed by his contact man, for delivering insufficient information on the mining and on his colleagues.

During this period, various persons who had relatives in the Federal Republic were dismissed without notice, in the scope of a retraining program. The informant was among them. Since he had accumulated annual leave which had to be taken prior to the date of discharge, he travelled to Schwerbide for 5 days, to join a family named [redacted] b6. He was called back from there and taken to room 8 of the main administration of Wismar AD Ang, where he was asked about the reasons for his dismissal. In compliance with an order by the Russian agency (probably KGB), the dismissal was cancelled. Thereafter, the informant was hardly bothered by the Russians.

In 1954, the informant made the acquaintance of a certain [redacted] b6, who had been in the Torgau prison, together with his father.

During the following time up until Oct 1954, no further meetings took place with the Russians.

In August 1954, the informant travelled to Berlin, in order to meet [redacted] b6 and on this occasion informed [redacted] b6 of his connection with KGB.

In October/November 1954, the informant was requested by the Russians, to go to room 8 at the main administration of SAD Wismar, where he was interrogated about his new acquaintances. He admitted that he had become acquainted with [redacted] b6 and, through him, with one [redacted] b6 from Cherpfennigsdorf. The Russians were particularly interested in [redacted] b6 who was a worker in object 100. Moreover, the informant was asked whether [redacted] b6 had had intimate relations with [redacted] b6.

Between the end of 1954 and the fall of 1955, there were only few meetings between the informant and the Russians, since the informant was expecting a baby.

In the fall of 1955, the informant was badly run down by a cyclist and sustained a severe brain concussion, which rendered him ill for six weeks. The accident was never cleared up.

In winter 1955/56, the informant was approached by a Russian emigrant named b6 who worked at the Soviet AM. He showed the informant a cardlet written in Russian and German. The address read: b6

b6 wanted to know, in order to establish connection with his father who had been in German war captivity and allegedly lived in West Germany. b6 requested the informant to travel to Berlin in order to establish connection with b6. The informant himself was also interested in a trip to Berlin, in order to speak to b6 who reportedly was already in West Berlin at that time.

In January/February 1956, the informant travelled to Berlin and inquired at b6 regarding b6 father. In b6 home, the informant spoke to a woman with the cover name b6. The conversation was conducted in Russian. b6 assured the informant that she would write to him as soon as she had received information about b6 father. At the same time, he tried to locate b6 in Berlin, but was unsuccessful. He wrote a letter to b6 and also requested b6 to inquire about b6. The informant travelled back to Ann the same day. He informed b6 that b6 would take steps regarding his father. Early in April 1956, when the informant had a day's leave for household work, he again travelled to Berlin to see b6 but did not meet b6 there. He spoke to an unknown Russian emigrant. He also tried to locate b6 and again was unsuccessful. At the time the informant made the second trip to Berlin, b6 was no longer employed in the AM object.

Late in April, 1956, the informant was again requested to go to room 8 of the main administration of the AM. Six Russians sat there. As the informant entered the room, a postcard was thrown before his feet, which had been written by b6 and concerned b6. The Russians were well-informed. The informant suspects that b6 communicated everything to the Russians, probably AM members. He was seriously reproached and subjected to a cross-examination for hours, regarding b6, and was instructed to always stay at home after duty hours. Furthermore, he was to report every Tuesday and Friday, either at the main administration AM, object No. 7, or at the safe apartment at Ave, Hinder-Schlesingerweg (the house numbers and door plates could be seen on the raised house).

From this time on, until about the middle of 1957, a Russian named b6 was in charge of the training of the informant. b6 never looked out during a conversation with object leaders. b6 had not introduced himself.

b6 now took over the informant's training in secret intelligence communication (Russian: Informatsiya).

1. Informant was trained in the use of secret paper and received the following instructions:

Write on one side of an ordinary letter sheet with ink, pencil or typewriting; never use a ball pen. Fold the sheet so that it fits into the envelope, and place it on a hard surface (glass or plastic), place chemical paper over it (the latter would be made available to informant at a later date), and another white sheet on top, and write the secret information with pencil (2 B) on this, not the long way but crosswise. Push the sheet in the left upper corner; then write the secret information (figures, addresses, names etc. to be repeated). The letter should be concluded with the word "end", or, "continued". The informant must use printed characters, either in Russian, German or English. The chemical paper could be used for an unlimited period.

2. Microfilm

b6 advised that his or his agency's information (replies) would be sent to the informant by means of "Shtetshitskiy" (Russian). The letters would bear as sender either the name of his former landlady, b6

b6 or also a fictitious name. The secret information b6 would be located in the sealed strip of the envelope, 3 cm off from the left lower corner. The envelope must be examined from the back. The informant received the following further instructions from b6

The glued strip should be carefully loosened by means of a point brush and water. The opening must be done very carefully in order to prevent the microfilm from being washed away. Since the microfilm point is rectangular, about 8 x 3 mm, it can hardly be discovered among the glue. While still wet, it should be placed on an object-plate, and any remaining glue should be removed by water. When it is more or less dry, apply a few drops of same-developer to it, and hold the object-plate under a lamp. The lamp is absolutely necessary for developing. The object-plate will then be held under a 100-fold-enlarging hand microscope, so that the informant can read the information. The informant should purchase an object-plate and 100-fold-enlarging hand microscope in the Federal Republic. The readable information would contain assignments, instructions for conduct, etc.

3. Secluded location or dead letterdrop (Russian: Isolirovannoye mesto):

The informant should seek an unfrequented place near his domicile (cemetery, quarry, or park) where documents, etc. can be hidden. The informant received no precise instructions concerning warning signals, etc. When a suitable place had been discovered, it should be communicated to the cover address by means of a sketch in secret writing.

4. Transmission of money or information in other ways:

a. The informant will receive books, under the usual service, in which the front cover will have money or information glued in. The informant received instructions to open the front cover of all books he received.

b. Couriers:

The informant had to commit to memory the following passwords:

Courier: I came from Aus.

Informant's reply: Have you been away from there for a long time?

Courier: No, I came to the Federal Republic only recently. I am to bring you greetings.

Informant's reply: From whom have you greetings?

Courier: I am to greet you from your landlady

b6

This makes it clear to informant that the courier has been sent by
b6 or his agency.

5. Stipulation regarding meetings in East Berlin:

a. First meeting place: Berlin, East Railroad Station (Ostbahnhof), on the square in front of the entry to the station hall.

b. Second meeting place: Entrance to Treptower Park. Two statues stand in front of the entrance, where informant should wait at the indicated time.

The meeting hours should be communicated to the informant by courier or mail, in the way indicated (microfilm, book).

6. Regarding the informant's employment, b6 stated that he should try to find industrial employment, or employment with the Federal Government in Bonn, or with an American agency.

At a meeting in September 1957, b6 introduced the informant to another Russian whose name was neither previously known nor communicated to the informant. b6 informed the informant that he was now going on leave and could not be reached for some time. Therefore, the informant would have to rely on the new colleague. The new Russian repeated systematically what the informant had learned from b6. The informant was given the telephone number Aus, public network No. 390, or object 9 switchboard No. 75. The new Russian visited several apartments together with the informant, at Aus, Nieten-Schlosspark (see sketches).

On Dec 21, 1957, the Russian introduced the informant to the Chief. The latter spoke to the informant about his tasks in the Federal Republic, repeating what b6 had taught him, and stating that he had to contribute to the world's democratic reconstruction on the side of the peaceful powers. He also engaged the informant in a political conversation.

The next meeting was scheduled to take place on Dec 27, 1957, one day before the informant's departure.

On Dec 27, 1957, the meeting took place, on a street at Am. Since the street was well-frequented, the Russian handed the informant the following objects in a corridor:

- a. RM 12
- b. a note with the following cover address, to which the informant should write:
b6
- c. a Faber pencil 2 M
- d. the chemical paper
- e. RM worth \$500.--, in 10 notes of RM 50.-- each, without receipt.

The informant was to tell his landlady that he wished to travel to the Federal Republic to visit his father. The departure from Am took place at 05:10, Dec 28, 1957. The passengers' luggage was thoroughly searched at Wartin. Informant spent one night at the Hotel Ratschewitz, and arrived at his place of destination in the Federal Republic on Dec 29, 1957. After his arrival, he was to send information as to his address, employment, and any acquaintances made in the meantime. No date was set for the first meeting. The informant has dispatched no letter up to the present time.

SUMMARY OF INFORMATION

1. The Soviet Kreis Kommandantura Compound located on Luisenstrasse in HALLE QCO609, GDR, is believed to have been given up by the Soviets in early 1958 in connection with the reduction of Soviet troops in the GDR. It is now being used by civilians as apartment dwellings.

2. In 1951, a villa, located near Reilstrasse, a northern suburban street in HALLE, was used as a cover house. It is unknown whether this villa has since been abandoned by the Soviets.

(F-6)

3. Region VIII file examination was negative pertaining to SIS installations on Luisenstrasse; however, five houses used by MfS advisors and one MfS residence located on Luisenstrasse have previously been reported.

b1

b1

b1

b6

explained that the purpose of deviating from his established pattern of waiting for Source at the building where they usually met was to accompany Source to another building in Weimar. (See EXHIBIT II). b6 stated that he had recently acquired possession of the building. b1

b1

b1

b6

then requested Source to contact him at this new building on the occasion of all future meetings.

An overlay of a city plan of Weimar, scale 1:10,000, is attached hereto indicating this second building as building 2. (See EXHIBIT III.)

This building is described as either two or three stories high, painted a light color and surrounded by a wire fence of normal construction. Source observed no form of guard system on the occasion of her visit there. On this occasion, b6 had in his possession keys for both the gate facing on Abraham Lincoln Strasse and the main house door facing on Mozart Strasse. No further information available. (F-6)

SUMMARY OF INFORMATION

On 16 May 1958, Source A-W was interviewed at Field Office Wuerzburg, Wuerzburg NA6816, Germany, and revealed the following information concerning an SIS (Soviet Intelligence Service), Kreis Weimar, Bezirk Erfurt installation:

On the occasion of all interviews between Source and [b6] during the period from [b1] their discussions were conducted in a room in a building located at the intersection of Schubert Strasse and Mozart Strasse, Weimar PB6351, Germany. (See EXHIBIT 1).

On each occasion of visiting this house, Source was neverable to enter any room other than that used for the interviews. Source believes, however, that the building is used for housing Russian families. Source bases this opinion on the fact that the building is located in that area of Weimar referred to by the German residents as the "Russian quarter" and that she had heard Russian spoken by both sexes on the occasions of her visits there. When Source visited the building, she was always preceded by [b6] and could give no opinion as to whether [b6] had possession of a key to the building or was admitted by the residents therein. Source never saw any form of guard system employed at or around the building.

Source describes the building as being of concrete type construction, three floors high and painted either light cream or off-white. The building is inclosed in front by a wood fence of such height and construction as to render a view of the building from the street impossible. Viewing the building from Schubertstrasse, this wood fence is joined at the right corner of the building by an equally high fence of wire construction. The closest building on the right side of the building in question is approximately twenty five feet distant. On the left of the building are located other residential-type buildings which Source is unable to describe.

An overlay of a city plan of Weimar, scale 1: 10,000, is attached here to indicating the building in question as building 1. (See EXHIBIT 1.)

The interview room utilized by [b6] and Source appeared to be used only infrequently in that it smelled stale and usually was in need of a light cleaning. The room contained only a bare minimum of furniture, i.e., a couch, two upholstered chairs, a writing desk and a small stand which held various stationery supplies. No further information is available. (P-6)

1. ~~(CONFIDENTIAL)~~(U) Reference is made to Operations Memorandum 12/55 and previous correspondence highlighting the importance of SUBJECT, both as the headquarters for Soviet Military Intelligence in Germany and its relationship to Headquarters, GSFG.
2. ~~(SECRET)~~(U) Previous correspondence has also pointed out the importance of the ZOSSEN-WUENSdorf area because of information gained from monitoring Soviet W/T operations that the parent station is located in that vicinity.
3. ~~(SECRET)~~(U) Previous correspondence and verbal briefings to representatives of your Region have stressed the following:
 - a. The necessity to recruit resident sources within the ZOSSEN-WUENSdorf complex.
 - b. Should such sources prove unsuitable from the point of view of developing information on SUBJECT or lack the ability to produce peripheral, substantive information on residences of Soviets officers, dependent areas, accessibility to same, leads to German employees employed within GSFG, etc., such sources would still be of considerable value to US intelligence from an Order of Battle viewpoint to report imminence of hostilities data.
 - c. Inquiries made of USAREUR have disclosed that relatively little information is held in files concerning WUENSdorf and RU headquarters, particularly. It would appear that the MI collection effort on this vital area has not been singularly productive.

and this Headquarters was permitted to photostat the complete file on the area. Inclosed herewith is a photostat copy of the file. Attention is particularly invited to the Photo Intelligence report contained therein.

5. ~~(U)(CONFIDENTIAL)~~ It is suggested that the inclosed file be reproduced by your Region for your future use in debriefing sources on the area. The inclosed file will be returned to this Headquarters as soon as practicable, since no other copy exists and the material must be analyzed and collated for inclusion in the forthcoming SIS workbook.

6. ~~(U)(CONFIDENTIAL)~~ As far as is known, no standard system has been created to refer to individual buildings in the area. This Headquarters is proposing to USAREUR that such a system be placed in effect so that all agencies can report uniformly on the area and that such a system can serve as a basis for a specific building target list such as is currently maintained by this Headquarters and DAD on the Karlshorst Compound.

7. ~~(U)(CONFIDENTIAL)~~ Your attention is invited to the fact that material is contained in the inclosed file on caserne areas other than the Panzer Schule, within which GSGG Headquarters lies. It is not yet clear whether RU officers and enlisted men are billeted in one area or are scattered. Also, it is not known which clubs, schools, shops, motor pools, etc., are utilized by RU personnel. Accordingly, it is necessary that material on the entire area be available until further information clarifies these points.

8. ~~(U)(SECRET)~~ It will be noted that material concerning SPERENBERG is contained within the inclosed file. It has been learned that the base of Soviet W/T operations is probably located there. This information is to be considered more accurate than that contained in paragraph 2 above. Information has also been gained to the effect that two Signal Regiments, namely, the 24th and 37th, serve to support RU operations. It is not yet clear if one or both, or elements of each are located at SPERENBERG.

9. ~~(U)(SECRET)~~ Coverage of RU Headquarters from which staff level intelligence information can be gained concerning the entire RU effort (targeted primarily against USAREUR forces and the Bundeswehr) has been described by the present USAREUR Chief of Staff as the most important CE offensive target of this Group. Accordingly, proportionate operational effort by your Region must be devoted to coverage and penetration of this target. This target cannot be treated as a "target of opportunity," nor can reports on this target be based solely on the occasional debriefing of a refugee stemming from the area. This Group will be subject to USAREUR inspection concerning exact operational steps taken to obtain penetration and coverage of the target.

10. (U) ~~(SECRET)~~ Some information has been received from a sensitive non-CIC operation concerning the structure of RU Headquarters and its relationship to its operational bases at ERFURT, MAGDEBURG, SCHWERIN and LEIPZIG. Three detachments are located in BERLIN (within KARLSHORST) and a fourth is considered to operate a Defector Reception Center. Also, RU detachments are attached to each of the seven GSPG armies. This material will be furnished your Region soon, incorporated with other known information.

11. (U) ~~(SECRET)~~ A revision to Operations Memorandum 12/55 will be published upon receipt of an expected ICM from USAREUR. It appears fairly certain that coverage of SUBJECT and the RU operational bases outlined in the previous paragraph will probably be of equal or higher priority than general coverage of the KOB, with the exceptions of UKR Headquarters at POTSDAM and the UKR detachments located within KARLSHORST. Accordingly, the build-up of resident sources in these areas will be accelerated and stressed.

12. ~~(SECRET)~~ Effective upon receipt of this letter, each refugee screened by your Region who is knowledgeable of any relatives, friends, acquaintances residing in the areas of KARLSHORST, POTSDAM, WUENSDORF, ZOSSEN, SPERNBERG, ERFURT, MAGDEBURG, SCHWERIN and LEIPZIG will be debriefed on such individuals in detail. Standards are outlined in paragraph 6d of Operations Memorandum 12/55 as to suggested categories of individuals who should be considered as resident source possibilities. (With respect to KARLSHORST, WUENSDORF and ZOSSEN, any person employed in any capacity whatever by the Soviets or having entry to the restricted areas, or contact with persons having such entry, will be considered as a potential source lead.) Accordingly, your Region will no longer use the expression on letters of transmittal that b1

For each person listed, your Region will indicate the action undertaken to develop contact with the person to determine his potential as a possible source. If action is not taken, a statement will be made giving your reasons. Your Region will maintain a control system to insure that all leads developed are periodically followed up and reviewed.

SUMMARY OF INFORMATION

1. Source reported that as of January 1958 the SIS Kreis Office, ORANIENBURG UU8146, was moved from Schuetzenstrasse 18 to Erzbergstrasse 7. This new building is a villa type construction with a low gabled, slate shingled roof. The outside walls are of grey, sprayed stucco. The building is reportedly the former property of a former GDR businessman, Fnu b6 who reportedly fled to West BERLIN. The administration of this building is the responsibility of the VEB (Volkseigene Betriebe - People's Owned Industries) Real Estate Department, ORANIENBURG. There are no cells in this building, as these are located in another building belonging to the SIS, located directly across the street in the "Heinkel Settlement", which is the Soviet Compound in ORANIENBURG.

SUMMARY OF INFORMATION

1. SIS cover house located at POTSDAM-Bornstedt UU6808, GDR, Papelallee, street address unknown, on the north side of the street approximately four hundred meters southeast of Kirschallee. The house was supposedly the office of a Soviet military physician and was being used by agents of the SIS in POTSDAM as late as September 1952. The building is a one-story villa with red brick walls and is approximately eight by ten meters in size. It has a slightly steep roof with very small triangular-shaped windows in what is apparently the attic. There is one entrance located on the west side of the building. The site is on a portion of a Soviet military barracks compound, but Source does not know the unit designation or the type of troops stationed there. A continuation of the two-meter high board fence which surrounds the entire Soviet military compound bounds the north, east, and west sides of the property. The south side of the property which faces Papelallee, is bordered by a wire mesh fence two meters in height, in which there is a "worn out" wooden gate. This gate bears a cardboard sign showing a red cross. There is no other evidence to indicate that the house is a "doctor's office". There is no guard at the gate. Source is familiar only with the waiting room, located on the ground floor on the south side of the entrance hall near the door. The room contained regular "parlor" furniture; small tables, easy chairs, and ash trays. (A sketch showing the location of this house is attached as Exhibit "I").

2. SIS cover house located at POTSDAM, Papelallee, street address unknown: The house is on the north side of Papelallee, the first house west of the corner of Jaegarallee, and is the only one-story, one-family style house in the block. On the west side of Jaegeralle north of the cover house lies a row of apartment houses. The building has gray, stuccoed walls, a rather flat roof, and a red brick foundation which extends approximately seventy-five centimeters above ground level. Heavy, rubber-clad telephone (?) cables hang around the house and lead away from it through the rear garden. On its north, east, and west sides the house is bounded by a wooden board fence two meters high. On the south side is a wire mesh fence one and one-half meters high and it has one gate with a bell on the gate post. There are no signs or outside guards and the gate is usually locked. The house has two entrances, both of which face Papelallee and there are stone steps leading to the doors. Source is familiar with only one interior room, located in the northeast corner of the house, adjacent to the hall. This room was furnished with only an office-type

SUMMARY OF INFORMATION

1. The SIS installation in HALLE QC0707, GDR uses a cover house located in HALLE on Strassburger Weg near the Soviet barracks formerly called the Heide-Kasernen. The cover house, a two-story, grey stucco building with a red tile roof, is the center house of three houses surrounded by a wooden fence approximately four feet high. A gate in the fence, large enough to allow the passage of an automobile, serves as the entrance to the enclosed area. A Soviet soldier is on guard inside. SUMMARY OF INFORMATION

1. The SIS office at HERZBERG UT7828, Uferstrasse, was vacated in 1949, and currently houses the SED Kreisleitung (District Management). The office building contained three stories, had red brick walls and a steep red tiled roof. When the SIS utilized the building, the entire area was considered restricted and uniformed Soviet guards were stationed on Gartenstrasse and Uferstrasse, near the vicinity of the building. Source, when reporting to the SIS office, would present his GDR Identity Document to the guard stationed at the main entrance to the SIS office on Gartenstrasse. The guard would allow Source to proceed to a waiting room on the first floor of the building, where Source met another soldier who would lead Source to the handling agent's office. Source always conducted his business in the offices located on the first floor of the building, and he never had the opportunity to see the second and third floors. The SIS unit at HERZBERG transferred to TORGAU UT6214, in late 1949; however, Source never had visited the TORGAU office and he was unable to give any information regarding this installation. Exhibit "1" illustrates the location of the former HERZBERG SIS office.

2. The restaurant, Gruener Hain, is located on the outskirts of HERZBERG, on the road leading from HERZBERG to TORGAU. It includes a large dance hall, two rooms for private parties and one guest room. The proprietor, name unknown, and his family occupy mansards located in the steep red tiled roof. The SIS meetings always took place in the guest room which had all the glass panes in the door covered with wrapping paper so that it was impossible for anyone to look into the room. Source is unable to state whether SIS personnel still utilize the Gruener Hain restaurant. Exhibit "2" illustrates the location of the Gruener Hain restaurant near HERZBERG.

SUMMARY OF INFORMATION

1. Location and description of the Soviet Kommandatura in CHEMNITZ US5433. The Soviet Kommandatura in CHEMNITZ is located on Hohe Strasse, corner of Henriettenstrasse. The building is a three-story, grey stucco villa with a red tile roof. A garage is located in the garden behind the villa. The compound is surrounded by a six-foot fence. Two entrances, one for vehicles and one for pedestrians, are located on Hohe Strasse. The gates are usually open, and there are no guards. The main entrance to the villa is located on the northern side of the building. A uniformed Soviet guard is on duty in a small room to the left of the entrance. All visitors must report to this guard and produce their credentials. Source always met his handling agent in a room located on the second floor. This room was furnished with a sofa, a writing table, two armchairs, and a wall locker. Pictures of communist leaders were on the walls. There was no telephone in the room. Exhibit "I" illustrates the location of this installation.

SUMMARY OF INFORMATION

1. Location and description of an SIS installation in STENDAL PD9532: The SIS STENDAL occupies two villas in the Soviet compound located at STENDAL, Friedrich Engels Strasse, number unknown. This compound is about 500 meters from the Uenglinger Tor (Uenglinger Gate), on a side street leading from the main road from UENGLINGEN PD9033 to STENDAL. Both SIS buildings are two story, yellowish-grey stucco villas, about 10 by 15 meters in size, with steep red roofs. The entrances to these villas are on side streets within the compound. The entire compound is surrounded by a two meter high wooden board fence. The main entrance, guarded by Soviet soldiers, is located north of the SIS villas; the SIS villas have a separate entrance to the compound, also guarded by Soviet soldiers. A guard shack is located beside the main entrance; a building used by the guards is located beside the entrance to the SIS villas. The south SIS villa has cells in the basement. To enter this compound, Source gave her name to the guard at the gate. The guard called the SIS villa, and Source's handling agent came and escorted her to one of the villas. Exhibit "I" illustrates the location of this installation; Exhibits "II" and "III" are diagrams of the floor plans of the SIS villas; Exhibit "IV" is a diagram of the floor plan of the building used by the guards.

SUMMARY OF INFORMATION

On 30 July 1957, Source A-III was interrogated at Resident Agency Giessen, Region III, 66th CIC Group, APO 169, and revealed the following information concerning a Soviet Intelligence Service (SIS) Kreis Suhl installation:

There is an SIS installation about one block northeast of the main railroad station on Bahnhof Strasse in Suhl PB2008, East Germany. The installation is a two-story house, and it is located on the south side of the street. Source has never been inside the house, and does not recall the type of construction. The house does not appear to be guarded. There are believed to be four Soviet Intelligence officers in the house. None of these persons have been seen by Source in uniform, and their names are not known. There is a very large tree directly in front of the house which is not shown in the attached sketches because it almost completely blocks the view of the house from the front. Source can recall nothing further concerning this installation. (SEE EXHIBITS I and II.)

SUMMARY OF INFORMATION

1. Location and description of an SIS office in DRESDEN VS1257: An SIS office is located in a Soviet Compound at DRESDEN, Bautzener Strasse, number unknown, between Angelikastrasse and Fischhausstrasse. The compound is enclosed by a six and one half foot high green wooden board fence and is bordered on the north by Judeich Strasse. The SIS office is a two-story white stucco villa with a red tile roof. The roof of the rounded front porch is supported by stone pillars. Source met her handling agents in the vestibule, off the porch. The vestibule was furnished with a long table, eight or ten chairs, several easy chairs, and a sofa. The table was covered with a green tablecloth. Pictures of Soviet leaders were hanging on the walls, and the windows were shaded by pink curtains. The entrance to the compound, a narrow gate for pedestrians, is located in front of the house, on Bautzener Strasse. A wooden guard shack, usually occupied by a Soviet soldier, is located beside the entrance inside the fence. Source believes that a vehicle gate is located on the north side, on Judeich Strasse, but is unable to describe its exact location. The compound also includes a vacant two-story building in the west corner, and another two-story building used as troop billets. (Exhibit "I" illustrates the location of this installation).

(F-3)

2. Location and description of an SIS cover apartment in DRESDEN: An SIS cover apartment is located on the first floor of an apartment building at DRESDEN, Dr. Kurt Fischer Allee 12, entrance number 5. The remainder of the building, as well as the adjoining apartment houses, are occupied by Germans. The cover apartment consists of three rooms; two rooms are empty, and the third is furnished with a table and two chairs. A telephone, number unknown, is located in the bathroom.

3. The telephone numbers DRESDEN 55101 and 55105 were used by a Soviet Major b6 and a Soviet civilian b6. According to Source, these numbers belonged to an SIS office located at DRESDEN, Bautzener Strasse, number unknown.

4. The telephone number DRESDEN 58015 was used by a Soviet Major b6. According to Source, this number belonged to the Headquarters of the 11th Tank Division located at DRESDEN-Klotzsche.

(F-6)

5. Region VIII file examination:

a. The information concerning the location of the SIS office at DRESDEN, Bautzener Strasse, number unknown, is generally verified.

SUMMARY OF INFORMATION

1. The following report concerns an SIS (Soviet Intelligence Service) installation in Gera (TS 9540), East Germany:

a. Name: "Villa Hirsch". This villa belonged to the Hirsch family prior to and during World War II. In 1945, Frau Hirsch died and the rest of the Hirsch family fled to the West Zone of Germany, where they are allegedly at the present time established with an automobile firm (believed to be BMW) and also have an automobile tire dealership "Metzeler" in Munich, West Germany.

b. Location: Between Promenadenstrasse and Parkstrasse, Gera-Untermhaus.

c. Size and Description: The entire villa, which consists of four (4) or five (5) houses, occupying an area of approximately one (1) block, is enclosed on two sides by a wooden fence, approximately seven (7) feet high, on one side with a wrought iron fence approximately four (4) feet high, and on one side by a stone fence approximately four (4) to five (5) feet high.

d. Buildings:

(1) One building, which is located on the Promenadenstrasse side, visited by Source in May or June 1945, is a large stone building, built during the 19th century, the base of which is approximately 65 feet square and three (3) or four (4) stories high. On the edge of the roof there are small, pointed "watch towers", giving the house the appearance of a small castle. Directly in front of the house, on Promenadenstrasse, is a large stone archway, measuring approximately 11 feet wide and eight (8) feet high. Closing this entrance is a large steel gate.

(2) Another building located in the Villa Hirsch, visited by Source on 1 August 1956, is approximately 65 feet wide and 65 feet long at the base, and three (3) stories in height. It is a cement-type structure with the entrance in the front. Access to this building is made by entering a barricaded street, and then passing through a gate in the iron fence and following the driveway which passes in front of the house.

e. Guard System: There are guard posts at both ends of a barricaded street. This street is believed to be the only entrance to the general area.

There are also guards on walking patrol day and night within the compound. All of the guards are Soviet military personnel and are armed with rifles with fixed bayonets. Allegedly, there is also a guard posted on the inside of the stone archway on Promenadenstrasse.

f. Source of Electrical Power: It is believed that this area does not have its own power source, but receives electrical power from the Gera city power works located on Neue Strasse, Gera.

g. Messing Facilities: Source believes, from conversations overheard, that every house within the compound has its own cooking and messing facilities.

h. Use and Names of Foreigners: Allegedly there are no foreign house-keeping personnel employed in any Soviet installation in Gera. The Soviets are not permitted to hire indigenous personnel.

i. Local Agencies Servicing Installation: Allegedly all servicing within the installation is done by local agencies, with the exception of telephone service which is administered by Soviet personnel.

j. Other: This compound is inhabited by Soviet military personnel and their families. It is not uncommon to see six (6) or seven (7) Soviet wives with their children, standing around within the area talking. Attached hereto as EXHIBIT 1 is a sketch showing a floor plan of building visited by Source in 1956. Also attached as EXHIBIT 2 and EXHIBIT 3 are two (2) sketches showing top view of Villa Hirsch and the surrounding area, with the building Source visited in 1945 marked as Building "a" and the building visited in 1956 as Building "b".

SUMMARY OF INFORMATION

Source revealed the following information concerning a Soviet Intelligence Service installation located on Bahnhof Platz, Gera TS9540, GDR.

Name: Viktoria (former hotel).

Size of Structure: Approximately 75 feet frontage and approximately 30 feet deep. It is three stories high and in addition has a basement.

Security Devices: No security devices visible, and all windows unbarred.

Guard System: In Viktoria only one guard was apparent, located at a standing post at the entrance. This guard was a Russian soldier armed with a rifle without fixed bayonet. One other guard was seen in the motor pool, walking the perimeter of the area. The motor pool guard post is a 24-hour post, and the guard is armed with a rifle with fixed bayonet.

Possibility of Surreptitious Entry: Entry could easily be gained through windows of the basement; however, there is evidence of people working in the building on a 24-hour basis.

Motor Pools: There is an adjoining area, approximately 30 feet wide and 50 feet deep, surrounded by a stone wall approximately seven (7) feet high with one entrance. Contained within this area is a large garage, which could contain three (3) or four (4) trucks. This motor pool holds only Soviet military vehicles. Civilian type vehicles, most of which were BMW models, are parked on the street directly across from the front of the Viktoria. There is no evidence of vehicle repair within the motor pool.

POL Stocks: The military vehicles receive POL support from a Russian military barracks which is located on the street to the Autobahn, approximately 200 yards from the entrance to the Autobahn. The

civilian vehicles purchase gasoline and oil from the local civilian filling stations, and payment for such is made by gasoline coupons. There are no POL stocks situated within the motor pool.

Source of Electrical Power:

The Viktoria has no independent power source, but receives its electrical power from the Gera City Power Company located on Neustrasse.

Messing Facilities or Arrangements:

Food can be obtained in the basement of the Viktoria; however, some of the people eat in German restaurants.

Other:

Two sketches showing top view and a partial floor plan are attached, as EXHIBITS IV and V.

SUMMARY OF INFORMATION

1. Location of a Soviet intelligence installation in the restricted area in POTSDAM-Ingenheim UU6808 along the Havel River: The entrance to this restricted area was on Lenin Allee approximately twenty meters northeast of Storm Strasse. At the northern end of this approximately 500 meter long area was a single villa which was occupied by a special Investigation, Surveillance and Arrest unit, similar to the Department VIII units in the MfS. This villa was approximately 10x15 meters in size, was a two story building, and had dark grey stucco walls and a steep red roof. This villa had a separate entrance on Lenin Allee and visitors gained admittance by pressing a buzzer at the locked gate, summoning a civilian guard to escort them to the office or person they wished to see. There was no special garage and vehicles of this special surveillance team were kept in the main garage of the compound. The villa was enclosed by a five foot wooden board fence. Exhibit "VI" illustrates the location of this Soviet restricted area and the villa used by this specific SIS agency.

2. Security procedures in force at this restricted area: The entire restricted area in POTSDAM-Ingenheim was guarded by uniformed Soviet guards and was surrounded by a wooden fence. A small guard house was located at the main gate on Lenin Allee and one guard was on duty at all times at a desk and telephone inside the building while another guard was on duty 24 hours a day at the gate checking passes. No civilian was allowed to proceed past the gate without an escort to where he was going, and if no guard was available at the time to escort the visitor the person whom the civilian visitor wished to see was contacted and escorted the visitor in himself.

3. Personnel and equipment of SIS Surveillance unit located in the villa at the northern end of the restricted area: A constant force of approximately 15 agents was maintained and two late model EMW sedans with both Soviet military and GDR license plates were at the disposal of this agency. Telephone communications were limited to an internal military line to the switchboard of the local Ingenheim telephone office. There were no mess facilities and agents dined at a Soviet mess hall across the street on Lenin Allee next to a gasoline station. Agents of this special unit usually wore civilian clothing and carried large army style pistols, usually in their briefcases. They were billeted together in an unknown house and alternated serving as duty agent at night to watch the villa and answer urgent phone calls which came in after working hours.

4. Region VIII file examination: The location and description of this Soviet installation on the Havel River is at variance with previous information to the extent that the information in this report cannot be said to be even generally verified.

SUMMARY OF INFORMATION

1. A Soviet installation used as a meeting place with informants in ROSTOCK UVI297: A two story, grey stucco villa, about 15 by 20 meters in size with a steep red roof, is located at ROSTOCK, Eichendorff Strasse 7. There is no sign or guard outside the house, but a wooden picket fence with concrete posts at the gate encloses the front of the villa. The entrance to the villa is in the center on the street side. Source was always taken to the same room on the first floor on the left side of the hall. This room was furnished with a desk and four or five chairs. There are no bars or grates on the windows. (Exhibit "1" illustrates the location of this installation.)

2. Vehicles used by the SIS in ROSTOCK: All the automobiles used by the Soviets to transport Source to and from meetings at the above villa were dark brown or red BMW sedans with civilian license plates, numbers unknown.

SUMMARY OF INFORMATION

1. Location of an SIS installation in HALLE QCO707: An SIS installation is located at HALLE, Saarbruecker Strasse, number unknown, near the Heide Kaserne (Soviet Barracks). The installation consists of three light grey stucco villas, one three stories high, the others two stories high. Two additional two-story buildings are located at the rear but Source does not know if they belong to the installation. The compound is enclosed along Saarbruecker Strasse by a 7-foot wooden plank fence, but the location of any other fences are unknown. Saarbruecker Strasse is open to civilian traffic and there are no Soviet guards on this street. Exhibit "I" illustrates the location of this installation.

2. Location of SIS installation used as meeting place: A two-story grey stucco building used by the SIS for meetings with informants is located at Ginsterweg, number unknown, behind the SIS installation on Saarbruecker Strasse. There is no fence or guards around the building. Source met his handling agent once in a first floor room of this building which was bare except for three chairs and a desk covered with red cloth. The building seemed otherwise unoccupied. Exhibit "I" illustrates the location of this installation.

SUMMARY OF INFORMATION

1. Location of a Soviet intelligence installation in a restricted area in POTSDAM-Ingenheim (UU6808) along the Havel River: The entrance to this restricted area is on Lenin Allee approximately twenty meters northeast of Storm Strasse. At the northern end of this approximately 500 meter long area is a single villa which is occupied by a special Investigation, Surveillance and Arrest unit, similar to the Department VIII units in the MfS. This villa is approximately 10x15 meters in size, is a two story building, and has dark grey stucco walls and a steep red roof. This villa has a separate entrance on Lenin Allee and visitors gain admittance by pressing a buzzer at the locked gate, summoning a civilian guard to escort them to the office or person they wish to see. There is no special garage and vehicles of this special surveillance team are kept in the main garage of the compound. The villa is enclosed by a five foot wooden board fence. Exhibit "I" illustrates the location of this Soviet restricted area and the villa used by this specific SIS agency.

2. Security procedures in force at this restricted area: The entire restricted area in POTSDAM-Ingenheim is guarded by uniformed Soviet guards and is surrounded by a wooden fence. A small guard house is located at the main gate on Lenin Allee and one guard is on duty at all times at a desk and telephone inside the building while another guard is on duty 24 hours a day at the gate checking passes. No civilian is allowed to proceed past the gate without an escort to where he is going and if no guard is available at the time to escort the visitor the person whom the civilian visitor wishes to see is contacted and escorts the visitor in himself.

3. Personnel and equipment of special SIS agency located in the villa at the northern end of the restricted area: A constant force of approximately 15 agents is maintained and two late model EMV sedans with both Soviet military and GDR license plates are at the disposal of this agency. Telephone communications are limited to an internal military line to the switchboard of the local Ingenheim telephone office. There are no mess facilities and agents eat at a Soviet mess hall across the street on Lenin Allee next to a gasoline station. Agents of this special unit usually wear civilian clothing and carry large army style pistols, usually in their briefcases. They are billeted together in an unknown house and alternate serving as duty agent at night to watch the villa and answer urgent phone calls which come in after working hours.

SUMMARY OF INFORMATION

On 28 and 30 December 1956, Source A-III was interrogated at Field Office Kassel, 66th CIC Group, APO 171, US Army, and gave the following information concerning SIS Kreis Erfurt Installation:

Name:

SIS Headquarters, Erfurt

Location:

Intersection of Strasse der Einheit and
Bachweg in Erfurt PB4249, East Germany

Description:

The headquarters of the Soviet Intelligence Service in Erfurt is located in a large four (4) or five (5) story building at the intersection of Strasse der Einheit and Bachweg. This building was known as the "Klinglerbau" prior to its occupation by the Soviets. The building which has a siding of reddish brown slate, is believed to have a flat roof. The windows are casement type and are not barred. Confinement cells are located in the basement. The building is enclosed by a green wooden fence approximately nine (9) feet high. Private residences of high ranking SIS officers are also within the enclosed area. Entrance to the area is gained through a single gate located on Strasse der Einheit. This gate is guarded by Soviet soldiers. The main entrance to the headquarters building is located on the Strasse der Einheit side with a secondary entrance located on the north side of the building. These entrances are not guarded. (Exhibit KW)

SUMMARY OF INFORMATION

On 28 and 30 December 1956, Source A-III was interrogated at Field Office Kassel, 66th CIC Group, APO 171, US Army, and gave the following information concerning SIS Weimar Installations:

Place Name:

Informant Meeting House, Weimar (PB6351)

Location:

House on Gutenbergstrasse, number unknown, Weimar. (See Exhibit IX).

Description:

A Two (2) story house with attic. The house is located within a large SIS restricted area; however, it is isolated by an unpainted wooden fence approximately ten (10) feet in height. The portion of this fence bordering on Gutenbergstrasse, is a section of the outer boundary of the large restricted area. Concealed within this portion of the fence is a secret gate apparently used only by agents of the SIS. A key must be used to open this gate. This entrance is never used if pedestrians or vehicles are present on Gutenbergstrasse. The remainder of the fence surrounding the house serves to isolate it from the rest of the large restricted area. There is a second entrance to the house located in this section of the fence. (See Exhibit XV)

The large restricted area contains the living quarters of high ranking Soviet officers and a Soviet motion picture theater. The one entrance to this area is located approximately two (2) blocks from the Informant Meeting House, and is guarded by Soviet soldiers. German nationals are employed in the restricted area for house keeping duties.

The house itself is of a dirty white color. The windows are at all times draped with a dark green fabric. The furniture in the house is extremely dirty indicating that the house is not in daily use. On one occasion the voices of a female and of a child were heard emanating from the first floor of the house. It is believed that these persons were placed in the house to protect source, a female, from the male Soviet guards. Source has never been on the first floor of this house. For a floor plan of the second floor of the house see Exhibit XVI.

The image shows the front cover of a book. The cover is primarily a dark, heavily textured material, possibly leather or a similar synthetic material, with a mottled appearance. A vertical strip of a lighter, possibly white or light-colored, material runs along the left edge, likely representing the spine or a hinge area. The overall lighting is somewhat uneven, with the left side appearing slightly brighter than the right. There are no visible titles, logos, or other markings on the cover.

SUMMARY OF INFORMATION

1. Soviet cover house in BERNAU (VU0438) used by SIS for meetings with informants: A Soviet cover house is located between Waldrieden Chaussee and Rehpfad in a wooded area in BERNAU. The building is a one (1) story, wooden, cottage-type structure and consists of only one (1) room about six (6) by five (5) meters. The room contains a writing table with a telephone on it, a desk chair, three (3) wooden chairs, and a cooking compartment with a range. There are no toilet facilities within the building. The cover house is located near a fenced-in Soviet compound on Waldrieden Chaussee which includes about seven (7) two-story houses occupied by Soviet officers and which is enclosed by a wooden fence. Exhibit "I" illustrates the location of the cover house and Exhibit "II" illustrates the house description. (F-6)

SUMMARY OF INFORMATION

On 24 July 1956 Source was interrogated in the offices of Resident Agency Giessen and furnished the following information concerning SIS, Bezirk Frankfurt/Oder, Kreis Eberswalde, Installations.

Field Offices: The office is located on Brunnenstrasse. It is surrounded by a five foot wooden fence topped by barbed wire. There is a gate in the fence used as the entrance. A uniformed guard is stationed at the gate. Only half the building is used by the SIS since the upper story was nearly demolished by bombing during World War II. There are four rooms on the floor used by the SIS. Source was in only one office, but he saw that there were three others, and heard the tapping of typewriters in them. The office where he met Krukhoff had two large world maps on the walls with no unusual markings. There was a conference table in the room besides his desk. There were seven (?) Russians in the building, four (4) of whom wore civilian clothes. One small safe sits against the wall. Behind the Field Office located on Brunnenstrasse is a garage and motor pool. The garage is large enough to house three foreign-make passenger cars. In the motor pool were two trucks and three passenger cars. (Exhibits I and II)

An office is located in the headquarters of the Soviet Army stationed in Eberswalde. The headquarters is of approximate battalion or regimental size, located on Triftstrasse. There is a parking lot large enough for nine or ten foreign automobiles to be parked there. The SIS agents are in one office with two desks and one conference table. (Exhibit III)

2. (SECRET) All current CB information pertaining to the Intelligence Directorate, GSG, located at Wunsdorf, has been derived from the debriefings of 1. 1. 1. 1. unit, the 21st Special Radio Regt, located at WUNSCHOW, and located at WUNSCHOW, and a neighboring unit, the 19th Special Radio Regt, located at GSG, were subordinate directly to the Directorate at WUNSCHOW. These units functioned in a radio intercept capacity, and transmitted their intercepted information on a regular basis to the Intelligence Directorate.

3. (SECRET) The personalities from the Intelligence Directorate known to us, are:

General Major b6 Chief, Intelligence, GSG
Col b6 Deputy Chief of Intelligence, GSG
Lt Col b6 Deputy Chief of Radio Intelligence

4. (SECRET) In attempting to determine the exact location of the Directorate it would seem logical to place it within the Hqs Compound, the PANZER SCHULE, where it undoubtedly serves as an adjunct to the Operational and Administrative Hqs of GSG. Photographs or floor plans are currently out of date or merely do not exist. A sketch of the Hqs Compound in its relation to the surrounding kasernes is supplied.

5. (SECRET) In addition to the GSG Hqs elements, the PANZER SCHULE also contains a GSG Tank Repair Shop and tactical elements of the 69th Meez Regt.

6. (SECRET) The entire ZOSEN-WUNSCHOW kaserne area is considered as a "Restricted Area". We have no information as to the peculiarities of security within the Hqs compound itself, but reports indicate that Soviet guard troops are spaced at kilometer intervals along the Reichstrasse 96, the main route which passes the kaserne area.

7. (SECRET) Other units in the ZOSEN-WUNSCHOW complex are:

a. 2nd GSG AA Div -- located at STALLACKER and WEIBACH Kasernes, ZOSEN (North of the Artillery Kaserne).

b. Hqs 24th Air Army -- located at STALLACKER Kaserne, ZOSEN.

SUMMARY OF INFORMATION

1. Location and description of the Soviet Kommandatura at WUENSDORF (WT9580): The Soviet Kommandatura at WUENSDORF is located on the west side of Highway # 96 (Reichsstrasse), opposite a large military installation occupied mainly by tank troops and which includes a large tank-repair plant. The building is a three-story, dark grey stucco, villa-type structure and is situated between a warehouse and Soviet billets. The building is enclosed by a low wooden fence, about four (4) feet high. Exhibit " I " illustrates the location of the installation.

2. Location and description of a Soviet cover house near ZOSSEN (UT9487): A building used as an informant meeting place is located on the eastern side of Highway # 96, 1.5 to 2.0 kilometers south of the town of ZOSSEN and about 100 yards north of a road block guarding the entrance to a large Soviet military installation located along the west side of Highway # 96. The building is located on the corner of Highway # 96 and a street, the name of which is not known. The building is a two-story, red stucco, villa-type structure enclosed by a wooden fence about five (5) feet high. The entrance is from the side street. The meetings between Source and his handling agent took place at night in a second-floor room. Soviets apparently occupy the building, because Source repeatedly saw Soviet civilian women in the building. Exhibit " II " illustrates the location of the installation. (P-6)

SUMMARY OF INFORMATION

1. SIS Stadtkreis Dresden maintains an operative installation on the north side of Bautzenerstrasse in DRESDEN (VS1257), approximately 100 yards west of the intersection of Fischhausstrasse, and opposite the headquarters of MfS District Dresden. The building stands approximately 30 yards from the street and has a small parking space in front. During May 1956 a black EMW (Eisenacher Motoren Werke - Eisenach Motor Works) passenger vehicle with the license number 1A 43 91 was seen parked in front of the building on numerous occasions.

2. Another black EMW vehicle carrying the license number 1A 98 92 was seen frequently during May 1956 parked in front of a new apartment building used by Soviet personnel on the south side of Radebergerstrasse approximately midway between Saengerstrasse and Waldschloesschenstrasse. (Exhibit "1", attached, shows the locations of buildings mentioned in paragraph 1 and 2).

3. Major [b6] covername [b6] SIS operative in DRESDEN, uses a black EMW bearing the license number RA 80 56, and has a driver [b6] Lnu at his disposal.

4. SIS maintains the following cover meeting rooms in DRESDEN:

a. A small rear room on the ground floor of a building at Judeichstrasse 5, immediately behind an SIS installation which faces Bautzenerstrasse. A Soviet male, [b6] Lnu, driver for Major [b6] lives elsewhere in the building. (See Exhibit "1", attached, which indicates the location of this cover room and the others listed in this report).

b. Klara Strasse 9, one room in a fourth floor apartment.

c. Radebergerstrasse 47, utilized only in warm weather because of a lack of heating facilities in the room.

SUMMARY OF INFORMATION

1. Location and description of a Soviet compound in HALLE (QC0707): The compound is located near Grosse-Stein-Strasse and incorporates portions of Margaretenstrasse, Luisenstrasse and a street which is probably named Hedwigstrasse. It is surrounded by a seven (7) foot wire fence with the main gate located at the corner of Hedwigstrasse and Margaretenstrasse. The compound includes eight (8) villas, the former Luisenschule ("Luisen" School), and one-half of an apartment house. Source was recruited as a Soviet informant in a basement room of the former school building which appeared to be used for driver training. This building is a three (3) story, red-brick structure. Exhibit "I" illustrates the location of the installation.

SUMMARY OF INFORMATION

The MVD (Ministerstvo Vnutrennikh Del - Ministry of Internal Affairs) office in GERA TS 9540 is allegedly situated in a two story gray villa, located on the southeast corner at the intersection of Alexanderstrasse and Bahnhofstrasse. The building is surrounded by a two meter high metal wire fence. There is one roving guard who patrols the fence area and one guard located inside the entrance of the building. Nothing more was known concerning Soviet installations in GERA. A situation sketch is attached hereto as EXHIBIT I.

SUMMARY OF INFORMATION

A Soviet intelligence agency known as the GPU (State Political Directorate) has its headquarters building on the north side of Koeppladorfer Strasse in KOEPPELSDORF PA 5681, the fourth building west of the intersection of Koeppladorfer Strasse and Steinacher Strasse. The building is occupied by an unknown number of Soviet personnel, all of whom wear the Soviet Army uniform with a red arm band. The mission of the agency is believed to include military counter espionage functions. The headquarters building is a three (3) story villa-type structure of yellow building stone, the third story consisting of a roof with dormer windows. The building is located about 50 yards back from the street. In front of the building on Koeppladorfer Strasse is a wooden fence about six (6) feet high. Whether the fence extends entirely around the building is unknown to Source. On the left side of the fence is a gate and a guard house, in which a uniformed guard armed with a machine pistol is stationed. On top of the guard house is a self-illuminated Red Star of the Soviet Army about 15 inches in diameter. The star usually shines day and night. The headquarters building has no other known exterior illumination. On the right side of the fence facing Koeppladorfer Strasse is a wooden gate through which automobiles are admitted to the interior area.

SUMMARY OF INFORMATION

Location and description of a Soviet installation in HALLE (QC0707):
A Soviet installation which, according to Source, is an office of the Kontrrazvedke (counter intelligence) is located on Strassburger Weg in HALLE, near the Heide Kaserne which is presently occupied by Soviet troops. The building is a two (2) story, villa-type, light grey stucco structure with a garage attached to it. It has a back entrance. The first floor of the building (see attached sketch, Exhibit "II") includes a large hall, one (1) office room, one (1) guard room, one (1) bedroom, a kitchen, and a bath. The second floor (see attached sketch, Exhibit "III") includes a large living-room divided by a sliding door, a bedroom, bathroom, and two (2) rooms the use of which is not known. The building is enclosed by ordinary mesh wire fences. There are two (2) entrances from Strassburger Weg, one for vehicles and one for pedestrians. The other buildings located along Strassburger Weg are private houses which Source believes are occupied by German civilians. Exhibit "I" illustrates the location of the Soviet installation. (F-6)

Location and description of a Soviet installation in WEIMAR (PB6350). A Soviet installation, referred to by Source as an NVD office, is located on Koernerstrasse, in a residential section which is occupied mainly by the Soviets and which may be entered only with a special pass (propusk). A roadblock consisting of a wooden board fence is located on the corner of Koernerstrasse and Cranachstrasse. The roadblock, which has a gate in it, is guarded by a Soviet soldier whose guard shack is located right at the corner. The building is a three (3) story, red brick structure about 60 yards long. The basement of the building contains an unknown number of prison cells. A Soviet kindergarten is located adjacent to the installation. SUMMARY OF INFORMATION

From 4 November 1955 to 10 November 1955, SOURCE was interrogated at Field Office Giessen and gave the following information concerning Soviet Intelligence, Kreis CHEMNITZ, Installations:

a. The main office or bezirk (CHEMNITZ US5436, Germany) headquarters of the Soviet Intelligence is located in SIEGMAR SCHOENAU (Section of CHEMNITZ) on Rosemarienstrasse 32. This has been the headquarters since 1950 and was last seen by SOURCE in July 1955.

b. The installation consists of a walled-in area bounded on the north by Rosemarienstrasse; on the east by Winklerstrasse; on the south by Jagdschaenkenstrasse and on the west by Rabensteinerstrasse. The wall is of gray-green brick and is about twelve feet (12) in height. (EXHIBIT II)

c. Inside this quadrangle are four buildings. These are: a lockup for Russian prisoners; a lockup for German prisoners; a garage; and a building used for interrogations. Quarters for enlisted Russian personnel are in the building used for interrogations. Not included in the quadrangle and across the street from the north section of the wall are five dwelling houses for the Russian officers of the installation. These buildings are in a line, running from West to East and the third building from the corner of Rosemarienstrasse and Rabensteinerstrasse is the location of a wireless sender and receiver. Directly to the rear of this same building is a power plant (diesel) that supplies electricity for the wireless and the installation. Entrance to the quadrangle is gained by a gate located on the northwest corner. That section of Rosemarienstrasse that separates the quadrangle from the dwelling is closed to vehicular and pedestrian traffic.

SUMMARY OF INFORMATION

1. Location and description of Soviet installation in NAUMBURG (PB9771): The Soviet installation is located at NAUMBURG, Lepsiusstrasse 7 and 8. It consists of two (2), two (2) story, grey stucco structures with red tile roofs. The grounds are enclosed by a five (5) foot wire fence. Between the houses and at the left of Number 7 is a six (6) foot wooden fence. The garage is located between the two (2) buildings. Source is unable to submit sufficient information on the interior of the installation since he entered just one room and was too enraged to note anything of his surroundings. Exhibit "I" illustrates the location of the installation.

4. REPORT OF FINDINGS

On 2 August 1955, b1

b1 Refugee Lager, was interviewed at the Field Office, GIESSEN, and gave the following information concerning Soviet Intelligence Service, Bezirk Chemnitz:

a.

b1

b. In November 1949, while b1 was being interrogated by a Soviet Intelligence Service agent, he spent an eight (8) day period in the office of the NKVD AUE. This was the first and only time that b1 was in the office, however, the Soviet Intelligence Service office is still in the same building. The office is located on Bismarkstrasse near Schneeberger Strasse. EXHIBIT b1 It is a two (2) story dark gray stucco building, containing approximately sixteen (16) rooms. To the sides and in back of the building is a five (5) foot iron fence. Both night and day there are two (2) Russian soldiers assigned to the office to act as guards, one (1) to guard the front gate and one (1) to roam the yard. These soldiers never have access to the building proper. The vehicles of the office are kept in the town Kommandantur and are serviced by the local motor pool but are kept separate from the other vehicles. These vehicles are two (2) EMWs, one (1) Paddy-wagon (make unknown) and one (1) Molotov car. The colors and registration numbers of these vehicles are unknown.

c. Entry to the office is gained from the street side of the building. Directly inside is a rather large vestibule, on the right side of which is the door to the cellar and to the various cells. Ahead and to the right on the ground floor is a large reception room which has a large bay window and very little furniture. To the right of the reception room are the stairs leading

upstairs. Directly ahead on the second floor is the one interrogation room known to [b1]. It is the one in which he was interrogated. It is rather bare, containing only a small desk and two or three (2 or 3) chairs. The strength of the Soviet Intelligence Service AUE is estimated at eight or nine (8 or 9) men in civilian clothes as well as two (2) officers who wear a military uniform with green color tabs and who act as chiefs of the guard. In addition there are two (2) SCHLAEGER (thugs) who are used to soften prisoners in an attempt to persuade them to give information. [b1] does not know the names of these men but they look Mongolian and they never leave the office possible in fear of mass retaliation from the townspeople. SUMMARY OF INFORMATION

1. Soviet installation in POTSDAM (UH6808):

a. Part-time informant:

b6 in b6 is 5'4" tall, weighs 145 to 150 pounds and has a stocky build. She has blond hair, blue eyes, narrow lips and an oval face. She divorced her husband in the spring of 1955, and resides at b6. She is employed as a charwoman by the Town Council of POTSDAM. She changes her place of work very often, in Source's opinion by orders of the Russians. Until about 1946, she attended elementary schools in BERLIN and SPREMBERG (VF5614), District Cottbus. After 1946 she had several jobs as a charwoman, housekeeper and streetcar conductor. She reports to the Soviet restaurant on Tuesday and Friday at POTSDAM, Leninstrasse, number unknown, opposite the Sfs prison. Her cover name is "CHRISTA". Sometimes she calls the Soviet Kommandatura, telephone number unknown, from a VP (Volkspolizei - People's Police) station, and asks for extension 442.

b. Soviet recruitment of Source:

On b1 Source was asked whether he would agree to work for the Soviets. He was to go to OBERAMMERGAU (PT5574) and collect information concerning a CIC Agents' School which, according to the Soviets, is located in the former Jaegerkaserne. Furthermore, he would have to find out what use if made of the tunnels of the former Messerschmidt Factory at OBERAMMERGAU. The Russian, whose name Source does not know, showed him several maps and sketches on which the location of the school and the tunnels were shown. The details of the mission were to be given at a later date. The actual recruitment was to have taken place at the Soviet Kommandatura at POTSDAM, Stalinallee, number unknown, on b1 the date on which Source defected to West BERLIN.

2. MVD installation in WERDER (UU6005):

a. Agent: Fnu b6 or b6 Captain, is about 45 years of age, 5'5" tall, weighs 120 to 125 pounds and has a slender build. He has red hair which is combed straight back, a high forehead, blue eyes, an oval face with a tanned complexion and broad shoulders. He is married, has one (1) child and resides at WERDER-Zernsee, exact address unknown.

A. The following are known or suspected Sabotage Schools, located as below indicated during the specified time periods. The sources of the information are listed at the end of the report.

1. USSR - In 1944, the Soviet services had established an intelligence and sabotage school in SHITOMIR (probably JITOMIR) to provide agents for the Ukrainian front. The candidates were sent on missions towards or into German lines. (Mar 1948, C-2)
2. USSR - Sabotage training schools supposedly under MVD leadership are located at:
 - a. KRAKAU, an EM school with about 800 men;
 - b. MAEHRISCH-OSTRAU, an EM school with about 671 men;
 - c. LENINGRAD, an Officer's school with about 212 men.Teachers and instructors are furnished by the MVD and are Russian agents of the first class with years of field experience in sabotage and espionage. Trainees are instructed in 3 or 4 vocations, such as those of barbers, railroad employees, farmers, technical and civil service employees. They are further instructed in the planning and execution of acts of sabotage, including the exact size of objects to be sabotaged. Allegedly the training is completed in about 3 months. (21 Nov 1947, C-6)
- 3.. USSR - General sabotage training (no location specified in the USSR) is expected to take $3\frac{1}{2}$ - 4 months, i.e., 572 hours, and is divided into 7 courses:
 - a. Course A (138 hours)
 - (1) Briefing on actual situation in the region;
 - (2) Study of the political current events in the country;
 - (3) Study of local ordinances and laws;
 - (4) Study of local living conditions and customs;
 - (5) Study of specific characteristics of the agent's region of future activity.
 - b. Course B (86 hours)
 - (1) Study of parachutes;
 - (2) Theory of parachute jumping;
 - (3) Parachute packing;
 - (4) Practice on the hanging parachute;
 - (5) Handling of chute during landing, collecting it after landing, destruction of chute;
 - (6) Practice jumping (400-600 m), 3 jumps;
 - (7) Practice jumping (delayed drop 3.5-3,000 m), one of each;
 - (8) Practice jumping with pack, 5,000-500 and 8,000-300 m, 2 jumps;
 - (9) Practice jumping low level pull off (100-150 m), 2 jumps.
 - c. Course C (78 hours)
 - (1) Study of enemy's general vulnerable points and those of plants and factories;

- (2) Sabotage of power stations, pumping stations, transformer stations, electric power lines;
 - (3) Sabotage of turbines, steam engines, locomotives, and other similar machines;
 - (4) Destruction of railway lines, railway points, dispatchers' installations;
 - (5) Destruction of bridges (stone, metal, and wood).
- d. Course D (36 hours)
 - (1) General study of the use of explosives;
 - (2) Use of explosives and high explosives;
 - (3) Fuses, explosions by slow fuses (Bickford fuse), time-fuse, electric battery (plunger), automatic time-fuse, infernal machine;
 - (4) Practice demolitions.
 - e. Course E (48 hours)
 - (1) Study of maps of the region;
 - (2) Use of compass, its construction, application of compass for finding one's location.
 - f. Course F (148 hours)
 - (1) General information on functioning of wireless transmitter and wireless receiving sets;
 - (2) Study of radio-transmitting sets RR-3 and PR-5 and other special sets;
 - (3) Study of ciphers, codes and their practical application;
 - (4) Practice.
 - g. Course G (33 hours)
 - (1) Organization of liaison, by chain, couriers, carrier pigeon, ordinary mail with use of codes and ciphers;
 - (2) Carrier pigeon, care of the bird, maintenance of the carrier pigeon station;
 - (3) Signalling to aircraft by flashlight, bonfire, cloth. (13 August 1951, Unevaluated)

4. USSR - Functioning at present in the USSR are two large and several smaller espionage-intelligence schools. Each school is assigned a specific country, to wit: United States, England, Canada, West Germany, France, Japan, Greece, Turkey, Italy, Spain, Argentina, Sweden, and Yugoslavia. Trained in these schools are intelligence agents for work in peace and war time. The training program of the various schools is similar in everything, except the difference in time and specific peculiarities of countries assigned to them. One of the larger schools is in LENINGRAD, not far from the building formerly occupied by Navy Cadet Corps, now used by the First LENINGRAD Medicinal Institute. This school was set up in 1941, and began courses the same year, but in another building. This school was allegedly moved here from MOSCOW. It is called "American" in teacher circles, because its graduates are sent for intelligence

activities in the United States. The LENINGRAD intelligence school is considered to be going on a year-round basis. Actually, the studies last little over 10½ months, because twice during the year cadet-trainees are given leave, 7 days in February and 30 in July, that is, at the end of the academic year. The school year begins 1 August. There are 6 school days per week, 7 class hours each day, with Sundays off. Courses follow:

- a. Special Studies, 260 hours
- b. Radio Matters, 225 hours
- c. English language, 220 hours
- d. Political Studies, 177 hours
- e. Military Matters, 130 hours
- f. Topography, 125 hours
- g. Mathematics, 70 hours
- h. Drawing, 65 hours
- i. Development of Memory, 57 hours
- j. Physics, 55 hours
- k. Chemistry, 55 hours
- l. State Organization of USA, 50 hours
- m. Geography of USA, 50 hours
- n. Physical Training, 46 hours
- o. History of USA, 45 hours
- p. Demolition tactics and techniques, 45 hours
- q. Geometry, 44 hours
- r. Trigonometry, 36 hours
- s. Photography, 35 hours
- t. Target Practice, 35 hours
- u. Sanitary Matters, Medical Aid, 35 hours
- v. Auto Matters, 33 hours
- w. Psychology, 31 hours
- x. American and West-European Culture, 25 hours
- y. Parachute Matters, 25 hours

The Demolition Tactics and Techniques course consisted of instruction in the following:

- a. Explosive implements; bombs, explosive mines, grenades, cartridges, capsules, and detonation cords; including rules on preparations of explosive devices - instant and delayed actions, also clock-timing explosive mechanisms - rules guiding insertion of capsules and wiring of detonating cords and rules guiding the setup for an explosion, and laying of explosive contrivances;
- b. Demolition implements; blasting dynamo, accumulators, pocket search light batteries;
- c. Blasting methods of various objects such as telegraph poles, railroads, bridges, locomotives, steamships, factories, plants, storehouses; vulnerable places in objects for blasting; and necessary quantity of explosives;
- d. Storing and camouflaging of blasting devices and explosives. (2, April 1954, Unevaluated)

5. USSR - A sabotage school is located "somewhere on the border of Slovakia and sub-Carpathan Russia (i.e., the territory recently ceded by CSR to USSR). It purports to train French Communists to pinpoint and destroy, in event of war, all US military and supply installations in France. It has the responsibility of parachuting large quantities of Soviet arms and supplies to Communist organizations in southern and south-western France. (Undated, Unevaluated)
6. EAST GERMANY - The following Soviet sabotage and/or subversive schools are known to exist:
- a. Organization of MVD school at TORGAU/Elbe for training of former Wehrmacht officers as agents;
 - b. Organization of MVD school at DRESDEN for training of ex-Wehrmacht officers as agents;
 - c. Organizations of MVD political re-education center for ex-Wehrmacht officers at LIEV.
- The following Soviet sabotage schools are thought (sic) to exist:
- a. A school in the Soviet Sector of BERLIN for subversive underground agents. The school is apparently controlled by Soviet authorities with the purpose of controlling Communistic penetration of the US and French Zones of Germany.
 - b. A sabotage school "somewhere on the border of Slovakia and sub-Carpathan Russia (i.e., the territory recently ceded by CSR to the USSR)". It purports to train French Communists to pinpoint and destroy, in the event of war, all US military and supply installations in France. Marshall KONEV is said to have been the instigator of the program. It has the responsibility of parachuting large quantities of Soviet arms and supplies to Communist organizations in southern and south-western France. (15 June 1946, Unevaluated).
7. EAST GERMANY - In April 1946, Ernst WOLLWEBER established sabotage schools in LEIN-MACHNOW and LADELOW. The Institute for Popular Science, which restricted its science to sabotage and espionage, was established by WOLLWEBER in April 1952. Following creation of the SFS in 1953, a school for ship sabotage was set up in ROSTOCK with WOLLWEBER directly responsible for its operations. Here, German and Scandinavian Communists profited by WOLLWEBER's vast experiences as one of the ablest SIS saboteurs. (6 December 1955, B-2)
8. EAST GERMANY - A training school for sabotage and other related activity was established in the vicinity of SCHWERIN. Fritz STEINKE allegedly is the director of the school, called the Institute for Popular Science. The "institute"

without reporting their departure to the police in their home towns. Subjects of instruction follow:

- a. Political training; propaganda aiming at the SPD-SED merger into the SED is stressed;
- b. Sabotage training; proclamation and leading of strikes, instigation of demonstrations and leading of such demonstrations;
- c. Reports concerning conditions in the Western Zones. Every participant has to make either a written exposition or a speech on this subject.
(Undated, Unevaluated)

14. EAST BERLIN - Potential leaders of sabotage groups are being trained at an East BERLIN school and plans for the organization of such groups in West Germany have been made by Communist officials. (15 January 1955, Unevaluated)

15. CSR - The training courses of the Czech sabotage unit (Zboritovi Oddil -- ZO) are conducted with the First Genie Regiment only. The exclusive training place is Camp MILOVICE. The number of attendants ranges from 15 to 20 men and is never less than that. The course lasts about 4 - 6 months, sometimes longer, and are conducted during the period of active military service.
(27 September 1938, Unevaluated)

16. CSR - A school is held in a special building at the Czech Intelligence School, DOXY U Machova Jezera (Moravia). Students are instructed in the following subjects during the First Course:

- a. Photography
- b. Cartography
- c. Explosives and their use
- d. Poisons and their use
- e. Intelligence
- f. Politics
- g. Jui-jitsu
- h. Psychology

The courses are given by instructors who have received special training in the USSR. After completing this First Course, the students are assigned to a StB unit. If their StB work is satisfactory, students are admitted to the Second Course. The courses of the Second Grade are under the supervision of the Communist Party and are held at the Party Headquarters, directed by Dr. ARAMER, Section Chief at the Interior Ministry. These courses include the following subjects:

- a. Military espionage
- b. Political espionage
- c. Industrial and political sabotage

After completion of the courses, the agents are given a number and are sent to a foreign country with special missions.

17. CSR - Eight (8) agents of Lithuanian nationality reportedly graduated from the Bolshevik Provocation and Sabotage School in PRAGUE, CSR. (13 December 1947, Unevaluated)
 18. CSR - The Foreign Institute in PRAGUE, CSR, has as its mission the training of Soviet agents. The stress in schooling and training is on subjects relative to political and materiel sabotage. In selecting students, native fanatical Communist youth are favored. Also, foreigners who are known reliable Communists allegedly are invited to attend. The institution has connections and communications with BERLIN, VIENNA, and LINZ. For the period of training, the students are paid approximately 6,000 crowns per month. (27 January 1953, F-6)
 19. BULGARIA - A school for spies and saboteurs at 16 Albinska Street, SOFIA, Bulgaria, has 60 Bulgarian partisans and Communists in attendance. Upon completion of this course, students are sent abroad for the purpose of espionage and sabotage. The faculty consists of 4 Bulgarian professors. A similar school is in operation in BANKE, on the outskirts of SOFIA, where 60 military men are undergoing training. These men will later be employed in Bulgarian units near the frontier in the organization of an espionage network. The school director is a Russian officer assisted by 2 Bulgarian officers. (7 February 1947, C-2)
 20. SWITZERLAND - An American soldier on a furlough to Switzerland overheard the following information while on a train: There is a committee of 3 Russians in the BRISTOL Hotel in BERNE, Switzerland, who are organizing sabotage schools aimed to operate against US Army installations in the Occupied Zone. One school is in BERNE, while the other is in BASEL, Switzerland. Graduates will enter the US Zone of Germany with Swiss passports, and they have instructions to contact the Nazi underground in Germany. (17 February 1947, F-6)

B. The following are NAZI Sabotage Schools in operation during or prior to 1945 at the indicated locations:

1. WEST GERMANY - The WALDECK Sabotage School was first formed at HEINRICHSBURG (Yugoslavia) in early 1944. In Autumn 1944, it was moved to LANGENWANG, and was dissolved in early April 1945 when most instructors and students joined fighting units. A small group which remained to organize sabotage was broken up in May 1945. The object of the school was to train saboteurs mainly for employment by SS Jagdverband Suedost. Students were drawn from the Army

and SS; in the last few weeks about 50 local Werewolves were trained. The duration of the course was at first 3 weeks, but later reduced to a fortnight. The principal subject taught was demolition technique. Other subjects: sabotage tactics, map reading, and weapon training. (27 May 1946, Unevaluated)

2. WEST GERMANY - A sabotage school was established in BADENWEILER on about the first week of October 1944. The school was in the SCHEFFELT Pension at 10 Blauenstrasse, on the outskirts of BADENWEILER. Students resided on the first floor of this villa; instruction was given on the ground floor. Practical work was carried out in a field a few kilometers away. Discipline was strict. Students could get permission to visit their families only with considerable difficulty. The course lasted a fortnight, each day's program being:

- a. 0800 - 1000, Sabotage and Use of Explosives (Theoretical);
- b. 1030 - 1200, Politics and Economics lectures;
- c. Afternoon, Shooting and Practical Sabotage.

Before leaving on a mission, many of the saboteurs were sent to NEUSTRELITZ for 2 days. There they were given a "pep talk" and were issued civilian clothes and sabotage equipment. Their false papers were supplied at BADENWEILER. (2 November 1944, Unevaluated)

3. WEST GERMANY - The school, GUT BENNINGHOFEN, was divided into 3 sections:
- a. Section 1 was training for political leaders;
 - b. Section 2 was pre-military training;
 - c. Section 3 was sabotage-espionage training for Hitler Youth boys between the ages of 15 and 17.

Instruction, which lasted 14 hours, covered the following:

- a. Use of incendiaries;
- b. Demolition of RR tracks and telephone or telegraph poles;
- c. Cutting of communication lines;
- d. General harrassing tactics, such as pouring sugar into gasoline and throwing nails across highways.

On 2 April 1945, the school was evacuated from METTMANN to LANGENEERG. (29 May 1945, Unevaluated)

4. WEST GERMANY - A 3 week sabotage course was held at the SPRENDGLHRCANG Sabotage School at ELTVILLE (Wiesbaden). Courses:

- a. Explosives;
- b. Reconnaissance of targets;
- c. Guerrilla warfare;
- d. French, Soviet, and English weapons;
- e. Training with 7.65 pistol;
- f. Physical Training. (24 May 1945, Unevaluated)

5. WEST GERMANY - Schloss FRIEDENTHAL harbored the staff of a most dangerous sabotage unit of the German Intelligence Service, headed by SS Lt. Colonel SKORZENY. (March 1945, Unevaluated)

6. WEST GERMANY - A special sabotage course was started at IDAR in February 1945. Different Wehrmacht units sent selected personnel to this school for a 5-week course. About 30 men were chosen after a strict physical examination. Lt. PUTZ was commander of the group. The group started its training about 15 February 1945. It was completely isolated from the other elements of the school. The instruction, which was difficult, began with an intensive course in armament. Allied mines and different sabotage methods were subsequently studied. However, emphasis was on sabotage to destroy or delay transports and supplies, both by road and railroad. Final instructions were to deal with measures against enemy attacks and escape after sabotage. (9 April 1945, Unevaluated)

7. WEST GERMANY - The sabotage course at Gebietsfuehrerschule, METTMAN, started a few days after the candidates had reported, and lasted 3 days. Instruction was in two parts:

- a. Message Procedure and American Army Identification;
- b. Demolitions.

Message Procedure and American Army Identification consisted of 4 hours of instruction and does not appear to have been well handled. The instruction in Demolitions was divided into theoretical and practical, approximately half and half, and covered use of:

- a. 200 gram charges;
- b. 1 kilogram charge;
- c. 3 kilogram charge;
- d. Time and pull-type fuses;
- e. Incendiary charge;
- f. Use of silencer for Army rifle 98K.

On 2 or 3 April 1945, the school was moved to LANGENBERG. (25 June 1945, Unevaluated)

8. EAST GERMANY - Recruits were sent to Lokstadter Lager bei STZEHVE, at the Western outskirts of BRANDENBURG, ostensibly to attend a small arms course to study new weapons. Training was given in:

- a. Weapons with silencers; both automatic pistols and snipers rifles with telescopic sights;
- b. Preparation of all types of homemade explosives and various sorts of incendiaries;
- c. Traffic sabotage. (22 June 1945, Unevaluated)

9. EAST GERMANY - The NEUSTRELITZ Sabotage School was 500 meters north of NEUSTRELITZ on the side of the road about 10 meters wide. Lessons were conducted each day, except Sunday. Courses were given in the use of high explosives, models of sabotage targets, and attacks on sentries. The course in use of high explosives was divided as follows:

a. Theoretical - included a description of the properties and methods of using the following initiating devices:

- (1) Safety fuse;
- (2) Safety fuse friction igniters;
- (3) Pull switches;
- (4) Pressure switches;
- (5) Fog signal relays;
- (6) Delay mechanisms;
- (7) Electric detonators;
- (8) Detonating fuse;
- (9) Detonators.

The following explosives or H.E. bombs were described:

- (1) Nipolit;
- (2) Melinite;
- (3) P. E. No. 2
- (4) Nobel 803;
- (5) Altimeter switch;
- (6) Gunpowder.

b. Practical - conducted 5 kilometers from the barracks on the other side of NEUSTRELITZ; this included the following exercises:

- (1) A night attack on a factory, during which high explosive charges were placed on turbines, special machine tools, and control board;
- (2) Destruction of a railway line with plastic explosive and Melinite, initiated electrically;
- (3) Pull-switch booby trap placed across a footpath;
- (4) An attack by force, which included the following:
 - (a) Need for maximum information on the target - location, study of the surrounding country, security measures, and times at which they are relaxed, defense spots, possible reinforcements, weakest point in the defenses, most favorable time, and means of communication;
 - (b) Preparation of the attack - calculation of personnel needed for the attack and the sabotage, choice of method of attack, preparation of

material, arms and explosives, plan of campaign, action to be taken in case of difficulty, and place of retreat;

- (c) Execution of the attack, emphasizing importance of not deviating from the original plan.

The following models of sabotage targets were studied from a tactical viewpoint:

- a. Unloading quay with cranes;
- b. Vessels at a quayside;
- c. Petrol storage depot;
- d. Marshalling yard;
- e. Canal;
- f. Electricity generating station.

The course on attacks on sentries included the following:

- a. Attack with a strangling device;
- b. Attack with a silenced Walther revolver;
- c. Hand to hand attack;
- d. Boxing.

(13 March 1945, Unevaluated)

10. NETHERLANDS - In August 1943, the A/Schule-West was operating between The HAGUE and SCHEVENINGEN in the Jan Goekoplaan. This school was founded early 1943 by SS Lt. Colonel KNOLLE. The school chief was Waffen-SS Captain SPREY. There were courses in sabotage and radio. The length of instruction varied. If one grasped the instruction quickly, the instruction was ended sooner than for others. The average period of instruction was 9 - 10 weeks. Instruction was given in:

- a. General Sabotage;
- b. Special Sabotage;
- c. Marksmanship;
- d. Automobile Driving;
- e. Motorcycle Driving;
- f. Horsemanship;
- g. Self-defense;
- h. Sports.

(2 November 1944, Unevaluated)

11. BELGIUM - An "S" training school was at 81A Rue de la Loi, BRUSSELS, Belgium, in a fourth floor flat until August 1942. The school consisted of one month of sabotage chemistry of various materials used for "S" and preparation of homemade "S" materials. Outdoor practice consisted mostly of tree demolition near BRUSSELS. (Undated, Unevaluated)

A sabotage school was at 74 Rue Veydt, BRUSSELS, Belgium in a white 2-storied house. The school had no set course. In November 1941, Dr. KUNTZEL gave 10 lessons in manufacture of homemade incendiaries, explosive mixtures, and initiating mechanisms. (Undated, Unevaluated)

12. YUGOSLAVIA - A sabotage course was held in BELGRADE, Yugoslavia, from 18 April to 30 May 1944. The course began 18 April in a school in a German Headquarters in CROATIA on the Sava, 14 kilometers from NOVISAD, Hungary. On the second day instruction started. After 0600 reveille, the program (identical every day) was as follows:

a. 0700 - 0900 hours

(1) Theory of Explosives, including:

- (a) Various explosives - composition, form, power characteristics;
- (b) Various fuses - characteristics, lighting;
- (c) Various igniters;
- (d) Various detonators;
- (e) Attachment of fuses;
- (f) Electric firing;
- (g) Calculation of explosives and their application;
- (h) Various incendiaries;
- (i) Bridges - types, destruction calculations;
- (j) Railways - vulnerable points, rails, methods of laying explosive.

(2) Practice with Explosives, including:

- (a) Individual handling of explosives to give self-confidence;
- (b) Attaching fuses to the explosives;
- (c) Laying explosive against rails to insure demolition;
- (d) Quantities and method of laying explosives according to types of railway sleeper;
- (e) Mining walls;
- (f) Electric firing of mines and other charges;
- (g) Different ways of using incendiary devices;
- (h) Demolition of sleepers;
- (i) Hand-making and use of grenades.

b. 0900 - 1100 hours

- (1) Small-arms practice including use of Mauser rifles;
- (2) Characteristics and use of German and Allied S.M.G.'s and pistols;
- (3) Counter espionage in different countries;
- (4) Types of sabotage and enemy counter espionage measures;
- (5) Behaviour of the saboteur before, during, and after an operation;
- (6) Saboteur's behaviour in enemy territory;
- (7) Memory, perception and observation exercises;
- (8) Surprise situations and how to handle them.

4. REMARKS:

a. Observation of the buildings located at Puschkin Strasse 10 to 14 was easier for Source because of the good observation point in the German restaurant "Studenten-Klausen" on the opposite street side. There are no such observation points opposite the buildings from Puschkin Strasse 20 to 24, and prolonged presence of an observer in front of these buildings is compromising because of the lack of pedestrian and vehicular traffic in that area.

b. Source covered the MVD compound as his first trial mission.

c. The city map, a section of which was photographed as Exhibit "I", was procured by Source as part of the trial mission.

SUMMARY OF INFORMATION																		
<p>1. Location of Installation: The compound of the MVD (Ministry of Internal Affairs) District Office of FRANKFURT/Oder is located in the section of Beresinchen, on Puschkin Strasse (formerly called Gelbe Presse). The compound consists of offices, billets, supply facilities, mess and club, located in single buildings and apartment houses along the northern and southern sides and toward the northwestern end of Puschkin Strasse. The compound is bordered on the northwest by Markendorfer Strasse, on the northeast by Brandenburger Strasse and Thaelmann Platz, and is located south of Beeskower Strasse. Inclosed as Exhibit " I " is a copy of FRANKFURT/Oder city plan, scale 1:10,000, showing the city section containing the MVD compound. The following buildings were identified within the compound:</p> <p>a. Two (2) buildings, located along north side of street at Puschkin Strasse 10-14, contain offices.</p> <p>b. One (1) large apartment building, located at Puschkin Strasse 20-22, contains billets of Soviet bachelor officers and Soviet officers with dependents.</p> <p>c. Single building at Puschkin Strasse 23 contains offices.</p> <p>d. Single building at Puschkin Strasse 24 contains supply facilities, and is believed to also contain a mess and club facilities.</p> <p>e. Other buildings, along the south side and toward the southern end of the street, starting at about Puschkin Strasse 27 (some street number had to be estimated because the number signs had been removed) and extending to number 34, include the villa of the Soviet city Commandant of FRANKFURT/Oder, two (2) buildings containing billets of Soviet officers and Soviet dependents assigned to the Kommandatura staff, and the large building containing the Kommandatura offices. Attached as Exhibit " " is a sketch of the area.</p> <p>2. Description of Installation: The compound was formerly restricted to German pedestrian and vehicular traffic, but these restrictions were removed in 1951. A number of the apartment buildings and single houses along Puschkin Strasse contain German homes and business establishments. Except for wooden fences located between buildings occupied by the Soviets, those wooden fences or road blocks which were located across the street and in front of Soviet occupied buildings have been removed.</p> <p>a. Puschkin Strasse 10-14: Two (2) large three (3) floor light grey buildings with dark red slate roofs which were formerly used as apartment houses. The buildings are connected by a high wooden gate or fence, estimated at ten (10) to fourteen (14) feet in height, and containing a small door. A small guard shack is located to the left and in front of the wooden gate. The buildings are set back</p>

from the street approximately fifteen (15) to sixteen (16) yards. A dirt path leads from the street to the rear of the buildings where the entrances are located. The building fronts are parallel with the street. The buildings are approximately eighty (80) feet long and twenty-four (24) feet wide. Each house front has thirteen (13) windows, six (6) windows for each floor and one (1) window for the attic. The distance between the two (2) buildings is approximately twelve (12) feet. Two (2) Soviet soldiers, armed with machine pistols and wearing red epaulets, are stationed in front of the buildings as guards. A fruit orchard is located between the buildings and the street, making observation of the buildings very difficult during summer time. Because of the distance the buildings are located from Beeskower Strasse in the north and to Markendorfer Strasse in the northwest, observation to the rear of the building is very difficult without the use of field glasses. The houses along Beeskower and Markendorfer Strasse contain residences. The opposite side of the street, from Puschkin Strasse 16-19 to the building located at Puschkin Strasse 20, contains German residential houses and a private restaurant with garden, called the "Studenten Klausen". Attached as Exhibit " " is a sketch of the exterior view of the MVD office buildings at Puschkin Strasse 10-14.

b. Puschkin Strasse 20-22: A large grey apartment building with three (3) separate entrances on the street side, three (3) stories in height, having a dark red slate roof. The building is not set back. It is estimated to facilitate approximately thirty-two (32) Soviet officers and their families. Adjoining the building on the north end is a private plot containing a single small building which is set back on the property. A high wooden fence connects the Soviet billet building with the slightly smaller grey two (2) story building at Puschkin Strasse 23. The apartment building is not guarded.

c. Puschkin Strasse 23 and 24: Two (2) large apartment buildings, slightly smaller than the one to the north, are separated by a high wooden fence. The buildings are of dark grey color, having dark red slate roofs and one (1) entrance each on the street front. These buildings are not guarded. The buildings are believed to contain administrative offices and supply facilities, because trucks have been observed in the past arriving there and unloading food stores, clothing items and other types of equipment. Officers, wearing silver epaulets, ranging in rank from company to field grade, have also been seen entering and leaving the buildings in the past. The building at number 24 is believed to contain a mess and club rooms, because officers and dependents enter and leave the building frequently, especially at meal time and during the evenings. A private vacant lot is located south of and adjoining the building at Puschkin Strasse 24. Opposite the buildings is Thaelmann Platz and Brandenburger Strasse, which leads off Puschkin Strasse to the north.

3. Activities: The MVD in FRANKFURT/Oder was very active until three (3) or four (4) years ago. At that time the MVD carried out large scale arrests, interrogations and recruitments. Currently however, very little activity is apparent at the MVD headquarters. For the most part, MVD activities appear to be limited to a few arrests and interrogations of espionage suspects or Germans associating too closely with Soviet personnel. Security of Soviet military installations and Soviet rail movements is still handled by the MVD. Although the Soviet military and

SUMMARY OF INFORMATION

1. On 27 September 1954, Source "A" was interviewed and revealed the following information concerning the MVD FRANKFURT/Oder (VT6999):

a. Location and descriptions of installations:

(1) The offices of the MVD in FRANKFURT/Oder are located in the area of Beresinchen on Puschkin Strasse (formerly called Gelbe Presse), exact number unknown. They are located east of Markendorfer Strasse, south of Beeskower Strasse and the railroad line running from DEHLIN (UN9220) to FRANKFURT/Oder. The offices occupy several large two (2) to three (3) floor buildings, with a light grey stucco surface and dark red tile roofs. The buildings are set back from the street approximately ten (10) yards and a small driveway leads from the street to the buildings. Attached as Exhibit "1" is a sketch showing the location of these buildings.

(2) Administrative offices, billets for married officers and their dependents as well as for bachelor officers, supply offices and mess and club facilities are located along the south side of Puschkin Strasse, starting at or near street number 23 and occupying several two (2) and three (3) story light grey apartment buildings and several single villas connected by wooden fences.

(3) The FRANKFURT/Oder MVD office also utilizes rooms, for interviews, in the Soviet Kommandatura building, which is located along the south side of Puschkin Strasse near street number 34 in a large two (2) story building with a white smooth finish and a dark red tile roof. A large wooden fence with a wide wooden gate is located to the left of the building.

(4) Puschkin Strasse is not restricted for German pedestrian or vehicular traffic and a considerable number of the single villas and apartment buildings on the street are currently occupied by German residents. Soviet soldiers are stationed in front of the MVD office buildings on the north side of Puschkin Strasse near the corner of Markendorfer Strasse. Usually, one (1) Soviet enlisted man, usually wearing red epaulets and armed with a machine pistol, is on guard in the small wooden guard shelter in front of the building. It is believed that the Kommandatura and the other administration buildings of the MVD on the south side of Puschkin Strasse are also guarded by Soviet soldiers but these guards are stationed within the buildings.

b. Activities:

(1) The MVD FRANKFURT/Oder, which had carried out numerous arrests and had been interrogating many German residents suspected of espionage or subversive activities until approximately three (3) years ago, had apparently turned

over almost all security work in the FRANKFURT/Oder area to the local district headquarters of the Sfs (Staatssekretariat fuer Staatssicherheit - State Secretariat for State Security). Most arrests and interrogations have been handled by the Sfs since approximately 1951. German nationals, employed by Soviet offices or military units in FRANKFURT/Oder, who are suspected of possible espionage or subversive activities or who are considered potential sources among their fellow workers or employees, are occasionally still interrogated, interviewed or recruited by MVD officers. These MVD officers usually pose as officers of other military units or members of the local Soviet Kommandatura.

(2) One of the most important functions of the FRANKFURT/Oder MVD office is the controlling of all Soviet military duty and leave trains and freight traffic. They search for wanted persons, illegal border crossers using Soviet rail facilities, contraband and possible security violations. MVD officers supervising such controls on Soviet passenger trains have been seen wearing uniforms and occasionally are seen in civilian clothes. When performing their duties, they have absolute authority over all Soviet military as well as civilian personnel, even those passengers holding higher ranks than the inspecting personnel. (F-3)

2. On 26 October 1954, an examination of the files of Region VIII, 66th CIC Group, BERLIN, Germany, revealed that the office of the MVD in FRANKFURT/Oder was reported in the MGB Work Book, Headquarters, 66th CIC Detachment, as being located at Puschkin Strasse 23 and 31. (E-2)

SUMMARY OF INFORMATION

1. On 20 May 1954, Source "A" was interviewed and revealed the following information pertaining to the MVD POTSDAM (UU6907):

a. Location and description of installations:

(1) The MVD POTSDAM has an office on Hegelallee between Jaegerallee and Friedrich Ebertstrasse. It is on the left side of Hegelallee as one comes from Jaegerallee. The building is a four (4) story, family type building which is located next to the Russian Officers Club on Hegelallee. The building is painted yellow and it has a green iron fence in the front. Exhibit " " illustrates the location of the installation.

(2) The MVD POTSDAM has another office at the intersection of Pappelallee and Am Schragenstrasse. The building is a two (2) story, villa type building which is covered with ivy. The grounds are enclosed by a wooden fence. Exhibit " " illustrates the location of the installation.

b. Essential elements of information: Source was employed as b1

b1

b1 Source was approached by an MVD agent and taken to the MVD office on Hegelallee. She was told that her job with the Russian Army obligated her to cooperate with Russian officials in every respect. She was assigned the cover name b1 and she was ordered to observe the activities of Russian officers and report any of them who had connections in West BERLIN (UU9220). Her meetings took place at the MVD office on Pappelallee. She was given a second mission which entailed the rendering of reports on German people who have made remarks against the Russian Army. Source admitted only negative reports. On b1 Source was told to have a positive report in the hands of her handling agent by b1 b1 or she would have to suffer the consequences which come to people who do not cooperate with the Russian authorities. Source fled to West BERLIN on b1 and declared herself a refugee at the Marienfelde Refugee Camp. Source was unable to describe her handling agent. (F-6)

2. On 29 July 1954, an examination of the files of Region VIII, 66th CIC Group, BERLIN, Germany, revealed no positive identifying information pertaining to personalities mentioned in this report.

4. REMARKS:

a. SUBJECT was held in MID custody after his defection to West BERLIN on b1. He was then flown to Western Germany on b1. Region VIII was granted the privilege of interviewing SUBJECT concerning his knowledge of the Soviet army, however, it is pointed out that due to the very limited amount of time, it was impossible to debrief or exploit SUBJECT. Specifically, SUBJECT was questioned at length concerning his knowledge of the Administration for Counter Intelligence of the Army Group in Germany and the MVD. His knowlegibility concerning the organizational structure, operational procedures, or personalities, of these organizations appeared nil. The time element involved prevented further questioning concerning SUBJECT's general knowledge of the Soviet army.

b. The interview with SUBJECT was conducted in the Russian language with Special Agent b6 and Special Agent b6 acting as interpreters. Special Agent b6 and Special Agent b6 conducted the questioning of SUBJECT.

b. The compound designated as the 7th Army Installation is located near the Central Park in POTSDAM. The compound is completely surrounded by a stone and wooden fence. This fence is approximately six (6) feet high and is topped with barbed wire strands. (A sketch depicting this compound and the building therein is attached hereto as Exhibit "I".) The compound is bordered on the East

and West by Grosse Weinmeisterstrasse and Albrechtstrasse. Grosse Weinmeisterstrasse is also located to the south of the compound. (A sketch depicting this location is attached hereto as Exhibit "II".) [The 7th Army Installation is composed of two (2) Soviet elements; the Administration for Counter Intelligence of the Army Group in Germany and the 10th Guard Battalion.] The commanding officer of this installation is currently General-Major (fnu) b6. He was described as being approximately 35 to 40 years of age, 5'7" tall, weighs about 160 pounds, is of a stocky build, and has dark blond hair. He is married, has one (1) boy approximately fourteen (14) years of age, and resides with his family within the compound of the 7th Army Installation. b6 has been the commanding officer since about July or August 1953. He was preceded as commanding officer by General-Major (fnu) b6. According to SUBJECT, he believes that b6 returned to Russia after his replacement by b6. However, SUBJECT could not provide any further definite information concerning either b6 or b6. Additionally, SUBJECT could not provide an accurate description of b6 inasmuch as he had only seen him a limited number of times. [The Administration for Counter Intelligence of the Army Group in Germany is composed of approximately five hundred (500) personnel, the majority of which are Soviet officers.] Many of these officers have been seen entering and leaving the compound in either civilian or military dress. To the best of SUBJECT's knowledge, no German personnel are employed by the Administration and its drivers are usually Soviet soldiers attired in the uniform of the KVP (Kasernierte Volkspolizei - Garrisoned People's Police). [According to SUBJECT, the organization is a definite branch of the Russian intelligence services and is subordinate to the MVD.] It conducts investigations and interrogations, performs arrests, and maintains security within the Soviet Army. [The offices of the Administration for Counter Intelligence of the Army Group in Germany are situated in a very large four (4) story red brick building, which also has an attic and basement.] SUBJECT could not provide a floorplan of these offices

b1

b1 The Administration maintains a motor pool in POTSDAM, on Stalinallee, number unknown, which is located near the compound of the 7th Army Installation. (This location is depicted in Exhibit "II".) SUBJECT could not elaborate on any aspect of the Administration for Counter Intelligence of the Army Group in Germany and his knowledge concerning organization structure, operational procedures, or personalities, appeared nil. Relative to the 10th Separate Guard Battalion, it was established that this unit is composed of approximately three hundred eighty (380) officers and enlisted personnel. According to SUBJECT, this unit is responsible for guarding the 7th Army Installation and all buildings therein, guarding the motor pool maintained by the Administration for Counter Intelligence of the Army Group in Germany, and occasionally escorting prisoners of the Administration for Counter Intelligence. These prisoners include Soviet officers, enlisted personnel, and German nationals. To the best of SUBJECT's knowledge, the 10th Separate Guard Battalion has no specific duties or connections with the Administration for Counter Intelligence other than the normal house-keeping responsibilities. However, the Guard Battalion is directly subordinate to the Administration for Counter Intelligence and receives its instructions from that organization.

c. According to SUBJECT, he anticipated defection to the West immediately following his arrival in Germany. His immediate escape was delayed during his service at LIEBEROSE, due to the distance involved, and because of travel restrictions on Soviet military personnel. SUBJECT's transfer to POTSDAM renewed his ambition to escape and also afforded an excellent opportunity because of its nearness to West BERLIN. However, his immediate defection at POTSDAM was again impossible because of stringent restrictions and regulations governing Soviet military personnel. It was established that enlisted personnel on their first enlistment receive no leave time whatsoever and are allowed only one (1) pass per week. This privilege is extended between the hours of 1000 and 1800 on Sundays only. However, re-enlistees receive more lenient privileges and are permitted to go on pass almost any night, not on duty, between the hours of 1800 and 2300. Further, it was determined that Soviet enlisted personnel are never allowed to remain on pass overnight and a roll call is taken every evening to insure the presence of all personnel. Soviet military personnel are required to wear the uniform at all times and when on pass they are restricted to the town or immediate vicinity of assignment. SUBJECT re-enlisted to better his chances of escape through the more lenient privileges afforded re-enlistees. SUBJECT had no specific reason for his escape to the West, other than his general dissatisfaction with the Soviet government and its way of life. Poor living conditions in his homeland, limited wages of the working class people, and the constant flow of propaganda, added to SUBJECT's desire to gain freedom. Further, SUBJECT saw many foreign films, mostly of Italian production, during his military service in Germany and these films were also a deciding factor leading to his escape. According to SUBJECT, these films were not of the propaganda variety as are all Soviet films. SUBJECT also read leaflets distributed by Western agencies depicting life in the West. Utilizing this information on a comparative basis with the knowledge of conditions in his homeland, SUBJECT was certain that his desire for escape was the only course of action. Therefore, on

SUMMARY OF INFORMATION

1. On 14 May 1954, Source "A" was interviewed and revealed the following information pertaining to the MVD Sub-office WILDPARK (n.c.a.), near POTSDAM (UU 6907):

a. Location and description of installation: The MVD Sub-office WILDPARK is located within the Soviet Military Compound in WILDPARK. The compound is located on Wildparkstrasse, number unknown. The compound formerly was the location of the German Wehrmacht in WILDPARK. The entire area is fenced in. The fence along Wildparkstrasse is a wooden board structure, and the fence on the other three (3) sides is of an iron picket variety with barbed wire on the top. Only persons with passes may enter the installation. The MVD Office is located on Wildparkstrasse, inside the compound. Exhibit "I" illustrates the location of the installation.

b. Location and description of covert meeting-place used by MVD WILDPARK: The MVD WILDPARK maintains a small wooden shed just outside of WILDPARK which they use for meetings with informants. This shed is located on the road which leads to WILDPARK as one turns off Am Wasserweg. The farm of a person by the name of (fnu) AUGENNADEL is located at the intersection of these two roads. Exhibit "II" illustrates the location of the covert meeting place.

c. Source received the following essential elements of information from a Russian MVD officer whom she was not able to identify:

(1) To make reports on the political reliability of German workers of the Soviet Officers Mess in WILDPARK.

(2) To submit reports on the political attitude of the population. (F-6)

2. On 17 June 1954, an examination of the files of Region VIII, 66th CIC Group, BERLIN (UU 9220), Germany, revealed no information pertaining to the material mentioned in this report.

SUMMARY OF INFORMATION

1. On 4 May 1954, Source "A" was interviewed and revealed the following information pertaining to the MVD Sub-office WERDER (UU 6005):

a. Location and description of installation: The MVD Sub-office WERDER is located just to the west of the railroad line which leads from MAGDEBURG (PC 8080) to POTSDAM (UU 6907). The office is bordered by Eisenbahnstrasse and Phoebeinstrasse. Exhibit "I" illustrates the location of the installation. The offices consist of two (2) buildings. The two (2) buildings are enclosed by a fence. The main building is a three story, gray structure.

b. Agents:

(1) Name unknown, Colonel, Commander in Chief of MVD WERDER, is about 45 years of age, 6'1" tall, weighs 180 to 185 pounds, and is of a heavy build. He has a small face, gray hair, a vertical forehead, blue eyes, and a very erect posture. He works in either civilian clothes or the military uniform.

(2) (Fnu) b6 cover name, Captain, is about 38 years of age, 5'3" tall, weighs 140 to 145 pounds, and is of a stocky build. He has gray hair, a receding forehead, brown eyes, and a normal mouth. He bends slightly forward as he walks. He works in either civilian clothes or the military uniform.

(3) (Fnu) b6 cover name, Captain, is about 30 years of age, 6'1" tall, weighs 180 to 185 pounds, and is of a heavy build. He has dark blond hair, a receding forehead, a wide nose, grey-green eyes, and protruding ears. His face is covered with pock marks. He works in either civilian clothes or the military uniform.

(4) (Fnu) b6 cover name, 1st Lieutenant, is about 35 years of age, 5'7" tall, weighs 145 to 150 pounds, and is of a slender build. He has dark brown hair, a pug nose, a receding forehead, blue eyes, and he has a scowling type of expression. He works in either civilian clothes or the military uniform. This is a different person from the (fnu) BERLOFF mentioned in paragraph 2b. Both men use the same cover name.

(5) (Fnu) b6 cover name, Lieutenant Colonel, is about 45 years of age, 5'4" tall, weighs 200 to 205 pounds, and is of an obese build. He has a round, full face, mixed gray hair, grey eyes, and he has a very erect posture. He works in either civilian clothes or the military uniform. This

is a different person from the (fnu) [b6] mentioned in paragraph 3b.
Both men use the same cover name.

(6) (Fnu) [b6] cover name, Colonel, is about 45 years of age, 5'2" tall, weighs 165 to 170 pounds, and is of a very heavy build. He has dark brown hair, a vertical forehead, blue eyes, a large red nose, a wide mouth, and a protruding chin. He works in either civilian clothes or the military uniform. This man is a different person from the previously mentioned (fnu) KISSELOFF. All the men use the same cover name.

c. Cover houses:

(1) The MVD WERDER maintains a cover house on Kesselgrundstrasse, number unknown. It is a yellow, two story building. The house is near the intersection of Kesselgrundstrasse and Phoeбенstrasse. The room used for meetings is on the main floor. As one enters this room, there is a stove on the left. A large table with three (3) chairs stands in the middle of the room. An easy chair, a flower board, and a small table stand next to the far wall. Two (2) windows overlook Kesselgrundstrasse. Exhibit "II" illustrates the location of the building and gives the floor plan of the room used for meetings with informants. MVD agents live in this cover house.

(2) The MVD WERDER maintains a cover house which is located at the corner of Kesselgrundstrasse and Phoeбенstrasse. It is a three story, gray colored building. The house has shutters on every window. These shutters are always pulled down. The room used for meetings with informants is on the right as one enters the house. This room is furnished with a large table which stands in the middle of the room and two (2) chairs next to the table. Another small table stands in the far corner. Exhibit "III" illustrates the floorplan of this room.

SUMMARY OF INFORMATION

1. From 27 January 1954 until 3 February 1954, [b1] born [b1]

[b1]

[b1]

was interviewed and revealed the following:

a. The MVD office BERNAU is within the Russian "Territorium" (compound) as located on the sketch attached hereto as Exhibit X. Source was in the building only twice, for short periods of time, and cannot give any details other than that it is a two story building with cells in the basement. Everyone within the office was in uniform. There were five officers, five enlisted personnel, and several females and children, dependents of the above personnel, seen by Source. Only two of the personnel can be described by Source.

(1) (Fnu) [b6] a lieutenant colonel, Chief of the MVD in BERNAU, is approximately 45 years old, 5'10" tall, has a slender build with broad shoulders, crew-cut curly brown hair, a high forehead, small and light colored eyes, pock marks on his face, and high cheekbones giving a tartar or mongolian impression.

(2) (Fnu) [b6] first lieutenant, is approximately 28 years old, 5'9" tall, has a slender build, short cut blond hair parted on one side, a high, vertical forehead, small and light colored deep-set eyes, high cheekbones, visible white metal crowns on teeth, a long thin face, and erect posture with a fast, military gait. He is a quiet and friendly person. His targets were the Bekleidungs Amt (Clothing Warehouse) BERNAU, Schoenfelde Weg, APO number 24317, and the Auto Werk "Torpedo" (Automobile Company) in BERNAU, which made repairs on Army sedan vehicles, and in which place of business he also had an office.

2. Persons believed by Source to be MVD informants are:

a. (Fnu) [b6] residing in ORANIENBERG (U08147), is approximately 52 years old, approximately 5'8" tall, has a medium build, thinning blond hair with grey streaks and balding on top, grey-blue eyes, and a broad, square face with a broad chin. He speaks out of one side of his mouth. He speaks with an East Prussian accent. He is a widower and lives with his common-law wife and five (5) children in an exceedingly crowded apartment in ORANIENBERG. He is believed by Source to have previously been the mayor of NEU HOLLAND (n.c.a.), and was an agent of the Sfs ORANIENBERG and BERNAU from December 1952 until January 1953. He was released after it was discovered that he had been imprisoned in a prison (Zucht-haus) in KOENIGSBERG (VU6268), which fact he had not reported on his personal history statement. Some time after his discharge, he reported to the Sfs BERNAU office, and there was met by two Russians in civilian clothes whom Source had not seen previously nor since. They had arrived in a chauffeur driven car. The chauffeur, a Russian, was also in civilian clothes. They spoke to [b6] in the office of the Russian Instructeur for approximately three (3) hours. The Russian Instructeur was with them for part of the time. The office next to the one being

used by them was cleared of German personnel. The Russians brought their own translator, a Russian female, with them.

b. Paul BOHM, residing in BERNAU, is approximately 47 years old, approximately 5'3" tall, has a heavy figure, has straight black hair which is balding both over the temples and occipitally, dark and deep-set eyes, broad and straight eyebrows, hollow cheeks, and a broad face with high cheekbones. He worked for the HO TAN (Techniker Arbeits Normen - Technical Work Norms)/Bearbeitung, BERNAU. From there he obtained a position with the VPKA BERNAU, but was discharged after failing to report for duty on two consecutive days due to continued drunkenness. He then obtained a position as Party Secretary at the Auto Werk "Torpedo", BERNAU, but was fired on the spot due to drunkenness, about which he had been warned several times. He was seen by Source in BERLIN (UU9220) during June 1953, and was last seen by Source in BERNAU during September 1953, at which time he was again working for the HO TAN/Bearbeitung in an unknown position outside of the office. He is married but is separated from his wife and living with another woman, name unknown, who is a Hauptsachbearbeiterin (high grade of operational agent) for an unknown ministry, possibly the Aussen Ministerium. Source has no concrete evidence to support her belief that BOHM is an MVD informant, but bases her opinion on the statements and tone used by BOHM, who told her several times that he would be in trouble if his "friends" had not taken care of him after his several dismissals for drunkenness. The term "friends" is often used by East German party members in referring to Russian persons.

3. The following are the only MVD cases known to Source:

a. b6 a teacher in a town in the vicinity of WANDLITZ (UU9546), was observed by two fellow teachers while taking pictures of Russian tanks a short time after the 17 June 1953 riots. He was denounced to the Director of the school in which he taught, who questioned b6 replied to the denunciation by explaining that photography was his hobby, by throwing the prints of his pictures which he had with him into the fire and offering to burn the negatives that evening. He was, however, arrested and interrogated by the MVD. Unable to get any information, the MVD requested the Sfs Kreis Amt BERNAU to take over the case, and b6 was interrogated by the Chief of the BERNAU Sfs office, b6 who obtained the information that b6 had forged his teaching certificates at the end of World War II when records were in a state of flux, and obtained a position as a teacher somewhere in Schleswig-Holstein. The head of the Land Rat (Land Council) was suspicious of b6 certificates because of unexplained errors in time contained in b6 story of studying for and obtaining his teaching certificate. b6 resigned and fled to Eastern Germany, where he again used the fraudulent papers to obtain a position as a teacher. b6 was remanded to the Sfs Bezirksverwaltung FRANKFURT/Oder.

b. b6 an Evangelic minister in BERNAU, was wanted as an informant by the Chief of the Sfs office BERNAU, b6 A son of b6 had been arrested by the MVD, charge unknown, and b6 arranged to have the son released in order to have his father obligated to him.

c. b6 first lieutenant in the MVD, once visited the Sfs BERNAU office to request that they make a name check for him on an unknown name in the files of the VPKA (Volks Polizei Kreis Amt - County Office of the People's Police). (F-6)

4. REPORT OF FINDINGS

✓ The MVD/MGB offices in MEININGEN are situated in a three story building located directly across Utendorferstrasse from the Barbara Kaserne, Target # 1. This building was previously occupied by the German Nikolaus Firm, which manufactured signal pistols. Presently the first floor of this building is occupied by a Soviet Sales Store. This building, which houses the MVD/MGB offices and the sales store has a single entrance. This entrance is used by all personnel entering or leaving any portion of the building. The second and third floors of this building are used as the MVD/MGB offices, and also for living quarters for the MVD/MGB officers. The interrogation room of the MVD/MGB unit is located on the third floor of this building and consists of: one large round table surrounded by several large chairs; another chair, singly placed with a large lamp over it; and a Soviet flag hanging on the wall. The MVD/MGB offices have three telephone connections: one direct line to EISENACH (NB9249); one direct line to the Barbara Kaserne; and one city line, dial telephone number MEININGEN 2 3 6. (F-3)

The MGB unit has several assigned BMW sedans with Soviet license plates, however, the MGB primarily uses MSS automobiles, each of which is furnished with an MSS driver for MGB use. (F-3)

The MEININGEN MGB unit, as well as the units located in HILDBURGHAUSEN (PA2388), EISFELD (PA3588), and SONNEBERG (PA5582), are controlled by their headquarters, which is located in Block # 5, Truppen Lager, Target # 4, OHRDRUF (PB2232). Although the above mentioned cities are controlled by the Headquarters at Truppen Lager, it is thought that this is not the full extent of its real jurisdiction. Colonel [b6] (fnu) was in command of this headquarters during the late months of 1951. Previous to [b6] being in command of the headquarters, he was Chief of the MEININGEN MGB unit during 1948 and the first few months of 1949. In the latter months of 1949 [b6] was promoted to the rank of Lt. Colonel and transferred to the EISENACH (NB9242) unit, where he assumed command. (F-3)

Nothing more was known of [b6] until the spring of 1951, when he was observed in MEININGEN conducting an inspection of the MEININGEN unit. (F-6)

In the latter months of 1951 [b6] was promoted to the rank of full colonel and made commanding officer of the OHRDRUF Area Headquarters. He was observed wearing either civilian clothing or the uniform of an infantry colonel during the last mentioned period of time. (F-3)

The following description was given of Colonel [b6]

4. REPORT OF FINDINGS

c. HAIR: Brown in color.

d. COMMENTS: Speaks four languages: Russian, English, German and French. (F-3)

Presently commanding the OHRDRUF Area Headquarters is Lt. Colonel (fnu) b6 whose description follows, and is not to be confused with the description of Colonel b6 mentioned in paragraph 7a (1), Devotion Report 5401, Target # 1, MEININGEN:

a. HEIGHT: Approximately five (5) feet eight (8) inches.

b. WEIGHT: Approximately one hundred sixty (160) to one hundred seventy (170) pounds.

c. HAIR: Black in color.

d. DISTINGUISHING CHARACTERISTICS: Small black mustache. (F-3)

The area specialist for counter espionage cases of external nature is Major (fnu) b6 who has his office in EISENACH. When a case of counter espionage nature occurs within the area controlled by Headquarters, Truppen Lager, OHRDRUF, for example, in MEININGEN, Major b6 is notified. b6 speaks little or no German and apparently uses his wife as an interpreter, as she is usually with him. (F-3)

The MEININGEN MGB unit consists of the following three MGB officers: Major (fnu) b6 Captain b6 and Junior Lieutenant (fnu) b6 whose descriptions are given in Devotion Report Number 5401, Target # 1, MEININGEN. These three officers have been observed in uniform as well as in civilian clothing. These officers act only on cases involving disaffection, sabotage, and espionage by civilian or Soviet personnel within their areal realm of jurisdiction. The officers, make daily contact with MSS personnel, who are thought to act as their informants. (F-3)

Living with the above three officers in the same quarters is Captain (fnu) b6 whose duty is that of troop security within the Barbara Kaserne, operation of the Barbara Kaserne Guard House, and general security duties. b6 who is believed to be an MVD officer, is usually observed wearing a uniform with gold epaulets with red stripes and artillery insignia. Apparently there is ill feeling between b6 and the other three officers. b6 description was previously forwarded in Devotion Report Number 5401 Target # 1, MEININGEN. (F-3)

4. REPORT OF FINDINGS

- (6) Soviet Col. (Fnu) b6 believed to be political officer at the MGB headquarters in DRESDEN, forty-eight (48) years of age, 5'10" tall, 175 lbs, brown hair, medium build.
- (7) b6 MGB informant, residing in DRESDEN, approximately thirty (30) years of age, 5'8" tall, 145 lbs, light blonde hair, medium build.
- (8) b6 MGB agent, residing in DRESDEN, Radebergerstrasse, twenty-three (23) years of age, 5'4" tall, 150 lbs, black hair, medium build, SED member.
- (9) Source further related that every day between 2000 and 2100 hours, an unidentified MGB agent meets one b6 MGB informant, at the point marked on EXHIBIT 11 as F. During the aforementioned period of time, b6 arrives at this point in his privately owned, maroon colored DKW four-passenger sedan, which bears German license plates. Upon stopping at the corner, an MGB agent, reportedly an officer, emerges from the MGB headquarters and joins b6 in his automobile, whereupon they drive away to an unknown destination, presumably into the woods at the outskirts of the city.
- (a) The personal data of b6 is as follows: approximately forty-seven (47) years of age, 5'3" tall, auburn hair, bald in rear, tanned complexion, haggard, sunken cheeks, slender build, false teeth. He is married and has two (2) children. He usually wears a black imitation leather coat and grey felt hat. Source stated that she has found b6 to be a heavy drinker, indulging in hard liquor only, of which it requires one (1) bottle to intoxicate him. He is reportedly a ladies' man despite his ugly appearance, and boasts of his work upon overindulging in alcoholic beverages, the latter being the reason for his constant lack of funds. His manners are brutal and his conduct unrestrained. Following a period of residence in the 18th Bezirk (District) of DRESDEN, b6 moved to a villa on an unknown street in the suburban HELLARAU (nca) where he is presently residing.
- (b) b6 is a devout Communist of long standing, and fought with the Communist rebels in the Spanish Civil War, following

which he was interned in a Nazi concentration camp. After the end of World War II, b6 services were immediately enlisted by the MGB who provided him with the aforementioned DKW for which the MGB is paying the tax. Source believes that this vehicle was given to b6 as a premium. b6 was formerly carried on the MSS payroll as a VP-rat, drawing a monthly salary of 900 DM East, aside from bounties he was awarded by the MGB. Lately b6 was dropped from the MSS (German Ministry for State Security) payroll because of his moral turpitude, but has been retained by the MGB as a full-time informant. He is reportedly provided with various identification and a Criminal Police badge, and also a pistol which he carries on his hip. Aside from his undercover missions b6 appears at searches and arrests as a disinterested party, though actually being the instigator of the search or arrest. In the study on the first floor of his present private residence, b6 has a copy of each report forwarded to the MGB. These reports are secreted in an ancient writing desk which is apparently devoid of burglar alarms.

- (c) In an undercover office, opposite the former "Pionier Kaserne" in DRESDEN, b6 employs two (2) female MSS agents as secretaries. b6 modus operandi is as follows: Usually at some time around 1000 hours, b6 searches the home of a suspect while the suspect is at work. A block away, two (2) MGB agents wait for b6 in a vehicle, whom he rejoins at the completion of his search. They then proceed to the suspect's place of work, from which the vehicle is parked approximately one (1) block away. While the MGB agents remain in the vehicle, b6 contacts the chief of the SED Betriebsgruppe (SED organization at plant level), and upon identifying himself as a criminal policeman, has the suspect brought before him. Under the pretense of being in need of some insignificant information, b6 coaxes the suspect to the waiting vehicle, and drives off in the direction of the criminal police headquarters. This vehicle is always furnished by the MGB and bears Soviet license tags. While under way, the suspect is officially placed under arrest and taken to a secluded cemetery, where he is subjected to the first interrogation sitting on a grave. b6 has the opinion that these environments tend considerably to evoke a confession, upon which the suspect is hurried to the MGB headquarters.

The first floor houses a laboratory of an unknown type, offices and a receptionist. The room Source was interrogated in by MGB agents is situated on the second floor (EXHIBIT IV). Entrance can be gained from the parking lot on Bautzenerstrasse, opposite the MGB headquarters. The garden in which this building is situated is interspersed with trees and surrounded by a board fence. (F-6)
- (5) The structure shown on EXHIBIT IV and marked on EXHIBIT IV as "D," is also requisitioned by the MGB, but has never been entered by Source. This light grey stucco villa consists of two (2) stories, and has a grey slate roof. The premises are surrounded by a board fence. Entrance can be gained from Bautzenerstrasse. (F-6)

MGB contacts, [b1] was requested to render service as an informant for the MGB in HALLE by ascertaining the political views of the German authorities in HALLE. TAUBE's alleged refusal to comply with this order was met with threats of retaliatory action and a warning not to attempt to flee to West Germany, because they (the MGB) would soon be there (West Germany).

6. MGB Headquarters in HALLE is located at Luisenstrasse 8. Neighboring buildings are all requisitioned by the Soviets. See EXHIBIT I. The three (3) storied white stucco building housing the MGB was formerly the Landratsamt. It has a grey slate roof and is about ninety (90) feet long by forty-five (45) feet wide. There is a semi cyclindric protrusion from the center of the front of the building which contains the double main entrance doors. A few concrete steps lead to these doors, which are glass paneled. Only windows on the ground floor are barred. The structure itself presents the appearance of a modern office building. See EXHIBIT II.

7. The following personnel were observed at MGB Headquarters:

a. Unknown Soviet Major, about forty-five (45) years old, 5'7" tall, brown hair, slavic features, posture slumped forward, and speaks strongly accented German.

b. Unknown Soviet Lieutenant, about thirty (30) years old, 5'5" tall, dark blond hair, slender build, comes from Siberia, speaks accented German, and has been seen in civilian clothes.

8. [b1] claims to have been personally acquainted with the following MGB informants:

NR a. Walter SCHOENBRODT, permanent residence in HALLE, Lettinerstrasse, about forty-eight (48) years old, 5'7" tall, dark blond hair combed to the rear of the head, oval face with protruding face bones (can be described as a Mongoloid

facial type, although the man is German), and slender build. In 1932, SCHOENBRODT shot a bank messenger in HALLE and robbed him of 35,000 Reichmarks. Sentenced to twenty-five (25) years prison, his sentence was remitted after serving two (2) years on the basis of his pro-Nazi ideologies. Until 1945, SCHOENBRODT worked for various firms as a common laborer. Following the occupation of Saxony-Anhalt by the Soviets, SCHOENBRODT was appointed as a Communist Party Land functionary. During the early part of 1950, SCHOENBRODT wounded a police official, in BITTERFELD (M52/EL4) where he (SCHOENBRODT) sought refuge after committing a theft in HALLE. Eventually captured and imprisoned in HALLE, SCHOENBRODT was released by the MGB after a few days. Following a few weeks stay at the MGB Headquarters for special training, he went to West Germany to perform the following missions:

- (1) To collect signatures of West German citizens against the re-armament of Germany.
- (2) To compile a list of persons in West Germany who have anti-Soviet views.
- (3) Ascertain locations and other data on US and British Military installations.

SCHOENBRODT's assignments took him to MUNICH (M49/Y85), AUGSBURG (M49/Y37), REGENSBURG (M50/O15), DUESSELDORF (K52/F39) and WUPPERTHAL (K52/F69), where he is believed to be residing at the present time. Approximately every three (3) months, he spends about a week in HALLE and then returns to West Germany. During

b1 saw SCHOENBRODT with a suitcase which contained lists of West Germans not in favor of remilitarization of Germany. SCHOENBRODT crosses the border illegally near MARIENBORN (M53/Y20). While a resident in West Germany, SCHOENBRODT communicates with his friend b6 of HALLE who is working for the used car dealer (Fnu) b6. SCHOENBRODT is alleged to be in charge of about 100 agents (informants) of the MGB (in West Germany).

NR b. Friedrich SCHIRIOTH, about fifty (50) years old, 5'5" tall, grey hair, full face, and slightly corpulent. Born in HALLE, until 1933 he was known as one (1) of the most notorious pimps there. Under the Nazi regime, he became a furniture dealer. However, the bulk of his income was derived from fencing (dealing in stolen property); for which he was never brought to justice because of strong Nazi protection in return for his services as an informant. Prior to 1945, he was appointed chief of the office for requisitions, for Soviet and Nazi persecutees. Aside from the aforementioned office, he held several other positions of influence. During early 1950, he was accessory to a theft of gold from the Soviets, which was

master minded by SCHOENBRODT. A few days following his arrest, he was released by order of the MGB and kept at MGB Headquarters in HALLE for several weeks. He was sent to West Germany in middle summer of 1950 and at the present time is said to be residing in HAMBURG (L54/S55) where he is alleged to be active as a real estate dealer.

c. Richard WINKELMANN, residing in HALLE, Lilienstrasse 4, about fifty (50) years old, 5'9" tall, dark blond hair, slavic features, and is employed by the city sanitation office of HALLE. His mission for the MGB, and also for the MSS, consists of informing on youths who entered West BERLIN while attending the Communist Youth meetings in Soviet BERLIN. b1

9. The only vehicle which was observed by b1 was a four (4) passenger Opel Olympia of a weatherbeaten grey green color bearing a Soviet plate beginning with the numerals B-40-.

10. An MGB interrogation office is located on the third floor of Sophienstrasse 10 in HALLE. This is a residential type structure of four (4) stories, is of dirty grey stucco, and is evidenced to be rather ancient. Apart from the MGB interrogation office, the balance of the building is occupied by German families. Next to the entrance door is a small stationery shop. Behind a curtained door in the interrogation room is concealed a person who apparently witnesses all interrogations. See EXHIBIT III (F-6)

11. On 26 March 1952, the records of the Regional Registry, Region X, 66th CIC Detachment, BAD WILDUNGEN, Germany, were checked and revealed no record on personalities mentioned in this report. (B-2)

2. Source was raised and attended school in

b1

3. During b1 Source was taken by a German policeman to the WEIMAR police headquarters where she was interrogated by a Soviet Captain and an interpreter, concerning her past history. Upon refusal to perform duty as an informant Source was given two (2) weeks to think it over and then report to a private dwelling on Liststrasse. b1

b1

4. During b1 a Soviet officer deserted, whereupon, all personnel working for, or on, the railroad were interrogated by the MGB. Source was also interrogated and being unable to furnish information was again requested to work as an informant. Despite her refusal, Source was required to report to the MGB interrogation office in WEIMAR on Mozartstrasse b1

Source allegedly appeared at this office b1 but states that she supplied no information and did not work as an informant. To avoid further MGB contact, Source crossed the border near SCHIERSCHNITZ (M51/049) on b1 Source reported to the GIESSEN (L51/G62) Zonal Refugee Lager. (Continued)

SUMMARY OF INFORMATION

1. The following information is submitted for identification purposes of Source:

b1

2.

b1

3. On b1 Source was drafted into the German Army and served until the end of the war with the b1 Divisions. After the capitulation, Source returned home immediately to avoid capture by the Allies.

4. Following employment as

b1

5. Refusing attempts of the MGB to recruit him as an informant, Source fled to West Germany, illegally crossing the zonal border on b1 near SONNEBERG (M51/J40). He reported to the GIESSEN (L51/G62) Zonal Refugee Lager on b1

6. The MGB garage and motor pool in WEIMAR are located at Friedrich Engels-ring 181. Facing the street are two (2) grey stucco buildings with a drive and gate in the center. Both buildings are used as dayrooms and quarters for the drivers. The yard at the rear of the buildings is bounded by thirty-nine (39) garages.

2. The MGB headquarters in WEIMAR is located in the former Amtsgericht (Lower Court) building on Roehrstrasse. The structure is a three (3) story, red sandstone building of approximately 300 feet in length and 120 feet in width. At the rear of the MGB headquarters is the MGB jail, which is about 150 feet in length and sixty (60) feet in width. The area of the MGB headquarters is bounded by Pabststrasse, Etterburgerstrasse, Roehrstrasse and Kohlstrasse, and surrounded by a board fence approximately six (6) feet high topped by barbed wire. The fence contains two (2) gates, one (1) fronting on Roehrstrasse and the other fronting on Kohlstrasse. Both gates have road barriers and are heavily guarded.

3. The quarters for the guard detail are located in the same block at the corner of Kohl and Pabst Strassen. The building housing the guard detail is about twenty-four (24) feet long and thirty (30) feet wide, and has a grey stucco exterior. (See EXHIBIT I) (F-6)

SUMMARY OF INFORMATION

On 18 February 1952, SUBJECT, an illegal border crosser and smuggler, voluntarily appeared and was interviewed at CIC HOF (M51/099). b6 stated in substance the following information:

a. SUBJECT stated that he had been to PLAUEN on 9, 11 and 13 February 1952. On each trip, between 1400 and 1500 hours, SUBJECT walked on Neudorfer Street, Rosa Luxemburg Square, Mommsen Street to Antifa Street, and returned by way of Antifa Street. On these trips, SUBJECT noted the following: (See Exhibit I sketch drawn by SUBJECT).

(1) There were 5 villa type, 2-story buildings on the northeast side of Mommsen Street between Antifa and Am Eichhaeuschen Streets.

(2) The villa on the corner of Mommsen and Am Eichhaeuschen Streets is painted yellow. Posted on this structure is a 3 foot square sign printed in Russian. This sign is made of wood and hangs flat against the west side of the building between the first and second floor windows.

b. On the corner of Mommsen and Antifa Streets is a grey-colored villa which is guarded by an armed Soviet soldier. This guard stays in a booth located near the building. SUBJECT was unable to notice the shoulder boards of the guard because he (the guard) stood in the booth and wore winter type clothing, overcoat and fur cap. On 13 February 1952, SUBJECT observed in the driveway of this house a blue-colored passenger car bearing black license plate with white number /1-44-45.

c. The following cars were observed in front of the villa mentioned in subparagraph (b).

(1) One blue "BMW", two door sedan, white license plate with black numbers P56-97, observed 9 February 1952.

(2) One blue "BMW", two door sedan, white license plate with black numbers P44-38, observed 9 February 1952.

(3) One blue "Opel", small car, black license plate with white numbers P10-54, observed 11 February 1952.

d. SUBJECT observed no other activities on this street or any persons entering or leaving any of the buildings.

e. SUBJECT added that observing from Rosa Luxemburg Square, adjacent to Mommsen Street, he could see that Neundorfer Street was blocked off and served as an entrance and driveway to a number of buildings occupied by Soviet soldiers. This installation is surrounded by a tight wooden fence approximately 6 feet high. The majority of the Soviet soldiers observed in the vicinity wore red shoulder boards; the officers had a red band on their caps. Several soldiers wore black shoulder boards. SUBJECT could not tell what sort of arms were carried by the soldiers. (F-6)

SUMMARY OF INFORMATION

1. The following information is submitted for identification purposes of

[REDACTED] having been contacted
[REDACTED] for purposes of recruitment as an informant. On [REDACTED] b1
[REDACTED] Source crossed the border illegally near UNTERWEID (nca), and re-
ported to the GIESSEN Zonal Refugee Lager (L51/G62) on [REDACTED] b1

3. On [REDACTED] b1 Source received a telephone call at her place of
employment and was ordered to report to the People's Police Headquarters (VP-
HQ) in ERFURT. There she was questioned by a Soviet, concerning her friends
in the Western Zones of Germany, and concerning her other friends and relations
in the Soviet Zone. Source was then required to sign a statement that she would
hold information concerning the interview, secret. Source received an appoint-
ment to return on [REDACTED] b1 to the People's Police Headquarters (VP-HQ).
Source was informed that she was to perform a mission for the MGB in West Ger-
many. She was told that as a woman, it would be easy for her to make the ac-
quaintance of state employees in West Germany, who were working with Americans.
The reason for this being that such persons allegedly would know the names of
"spies" in the Soviet Zone. Such a man from the West must be chosen by Source,
and this man was then to be lured to the Soviet Zone. Source then was required
to sign a statement to preserve silence concerning her mission, also stating
therein that she would work for the MGB. Source was also to write to FRANKFURT/M
(L51/M67) and ask for permission of residence there.

Source was unable to describe the interior of the building, claiming that when she was there, she was afflicted with a bad case of "nerves". She did, however, state that the interrogation room of the MGB had the number 142, and she first saw Soviet Number 1. See EXHIBIT II.

SUMMARY OF INFORMATION

1. An interrogation office of the MGB in CHEMNITZ is located on the top floor of the Police (VP) Headquarters on Dresdenerstrasse. (See EXHIBITS I to II). The building is of rectangular shape with an interior court of cobble stone, and the exterior is grey stucco of modern appearance. The side of the building containing the MGB office is four (4) or five (5) stories in height and also contains the administrative sections of the police headquarters. The other sections of the building are two (2) or three (3) storied, and apparently contain only prison cells. The entire structure is set back about twenty-five (25) feet from the street. Windows on the ground floor of the administration section are barred, while windows in the prison section of the building are small, and all are barred. The ground on the Dresdenerstrasse side of the building is fenced in with chicken wire, with a gate for vehicles and pedestrians. The main entrance faces Dresdenerstrasse, and consists of a passageway through the building to an interior court. Upon entering this passageway, the entrance and reception room is found at the right, and the latter is always occupied by two (2) police matrons. Over the passageway at the entrance from the street is a large sign in capital letters with the designation "Police Headquarters". In addition, this sign has over it, a white cloth banner, reading "Wer die Heimat Liebt, geht mit der Soviet Union" (Who loves the homeland, goes with the Soviet Union). In addition there are small red cloth flags with the banner. Entrances to the administrative section of the building are on the right of the interior court upon entering, and the entrance leading to the office of the MGB is the last one, of three (3) on the right. The rear of police headquarters is faced by a park, and the left by a small creek. At the front, across the street are many private apartment houses. Along Dresdenerstrasse at this point, run the street car lines five (5), six (6), seven (7) and eight (8). (F-6)

2. Personnel at this office of the MGB are as follows:

a. Unknown Soviet male who is addressed as Major, wears civilian clothes, about forty-five (45) years old, 5'11" tall, slender build, blond hair combed straight to the rear of the head, high forehead, receding hairline, narrow face, and blue eyes. His office phone number is 44328.

b. Unknown Soviet male who is addressed as Captain, wears civilian clothes, about thirty-eight (38) years old, 5'5" tall, dark brown hair combed to the rear of the head, gray brown eyes, corpulent build, and fat face. His office phone number is 44724.

3. Security is afforded by two (2) guards of the VP (People's Police) armed with pistols. Upon entering the passageway through the building, persons report to the reception room and surrender their identity document in return for a pass authorizing them to go to a particular room. When Source asked for room 132 (MGB Interrogation Room) it was first necessary to report to a room on either the third or fourth floor which was occupied by four (4) German civilians. Source was then taken by one (1) of these men to the next floor, (up a stairway) and was there directed left, to the end of the hall, and told to enter the last room at the right. Meanwhile, while approaching the room of the MGB, the Soviet Major in civilian clothes approached and directed Source into the room, which was locked before and after entering.

(F-6)

4. Instructions were issued to Source never to leave anything in the room as it was cleaned by German personnel. Other phone numbers were given to Source for emergency contact, i.e., the Major's number was 84432 and the captain's 44472, which were described as being office phones of the aforementioned Soviets. Instructions were issued never to call the MGB from ANNABERG (N51/K73).

b1

(F-6)

5. The method of approach to Source, was as follows: Source was summoned to the Criminal Police in ANNABERG, located in the VPKA (People's Police County Office) on Klosterstrasse. There, instructions were issued to report to room 132 in the Police Headquarters in CHEMNITZ. Having entered the interrogation room of the MGB, Source noted that the Soviet's had personal records, including employment records, and that they were used in questioning about background, life history, relatives, etc. The Major appeared pleased to hear all relatives of Source were residents of Western Germany, and queried extensively concerning them. During later appointments, Source had to wait outside of the building, and the Soviet Major always wearing a striped gray suit with a red necktie, came out and spoke a few words to the VP guard at the entrance. Source was instructed not to recognize or speak to the Major, and to stay about fifty (50) feet behind him when following. Source then passed through the entranceway, without notice by the VP guard. SUMMARY OF INFORMATION

1. The following information is submitted for identification purposes of a one-time Source:

b1

(F-6)

2. The MGB interrogation office in GERA is located on the fifth floor (attic) of Police Headquarters on Zeppelinstrasse. See EXHIBITS I, II and III. It is the first or second room on the lefthand side when mounting the stairs at the northern end of the building. The state courthouse is on the south, and the north side is occupied by a privately-owned department store. Directly across the street is a park, at the rear of which is an exhibition hall.

(F-6)

3. The building, itself, is of light grey stucco, of five (5) stories, and is about 150 feet square. It has a flat roof upon which is mounted a fan type aerial, about twenty (20) feet high. Windows are white framed, and those in the front of the building are unbarred, while those at the rear of the building are secured with iron or steel bars. The entrance door is a double, wooden type, and is kept open during daylight hours. Above the door is a floodlight which is kept on during all hours of darkness. This light illuminates the entire area in front of the building. Just to the right of the main entrance door is a sign inscribed "Police Headquarters, Section K".

4. A VP (People's Policeman) Guard is posted just in front of the main entrance door, and is armed with a carbine. Upon entering the building, visitors report to a VP who is behind a bank-teller type window on the right side of the hall. Identification is surrendered for a paper pass, authorizing the visitor to proceed to whatever office that he has business. Just past this window, before entrance into the hall proper, a female VP Guard, armed with a pistol, checks all passes to see that they are in order. (F-6)

5. The method of approach used upon Source was a mailed summons to report to Police Headquarters, without stating any reason for the request. Source was sent to an office on the first floor of Police Headquarters, in the northern part of the building. After a brief wait, Source was met by a Soviet civilian (male), and his interpreter (female), and told to accompany them to the fifth floor, where the interrogation office of the MGB was located. The Soviet civilian unlocked the door, and Source was seated, and queried concerning his entire background. Source was then told that he was to attempt to overhear all patrons of his place of employment and report on any persons speaking in a derogatory manner about the USSR or the GDR (German Democratic Republic). Source was then required to sign a hand written statement, in Russian, which was translated by the translator to be a statement of obligation, to hold the details about Source's interrogation secret, on pain of appearance before a Soviet Military Court. Between this time

b1

Source claims that he never submitted a derogatory report, he claims that the Soviet civilian was always affable. (F-6)

6. Personnel of the MGB observed were as follows:

a. Soviet male civilian, name unknown, about forty (40) years old, 5'8" tall, dark hair balding in front, face has bloated appearance, corpulent build, and was seen with a dark, tweed overcoat, and both a dark blue suit and a light grey suit. Is an Agent of the MGB.

b. Soviet civilian female, name unknown, about twenty-five (25) years old, working as interpreter for the MGB, 5'9" tall, wavy blond hair, slender build, speaks broken German, and was wearing a light, winter coat, and a dress. (F-6)

the following information:

a. MVD Headquarters, Field Post No. 30543, is located in the former Amtsgericht (District Court) building, northeast corner of Ernst Thaelmann Strasse and Watzdorf Strasse, WEIMAR. MVD billets are located in 8, three story grey stone buildings, 36 feet long and 30 feet wide, on the east side of Ernst Thaelmann Strasse between Watzdorf Strasse and Meyer Strasse. A board fence 6 feet high, topped with 2 feet of barbed wire completely surrounds the area. There are two entrances to the area, with guards armed with rifles or sub-machine guns on duty continuously. A motor maintenance shop is located at Friedrich Ingelsring 179 and a garage which houses 39 vehicles is located at Friedrich Ingelsring 181. Guards armed with rifles or sub-machine guns patrol the area daily from 1600 to 0700 hours. Another garage which houses 22 vehicles is located on the west side of Bertuch Strasse between Roehrstr and Friedrich Naumann Strasse. An armed guard is on duty at the entrance of the building continuously. (See Exhibit "I") (F-3)

b. The estimated strength is 70 officers and 60 enlisted men, with a Colonel (name unknown) commanding. (F-6)

c. The Motor Officer is 1st Lt. (fmr) b6 approximately 42 years old, 5'7" tall, weights 134 lbs, build slender, hair blond and speaks fluent German. (F-6)

d. Duties of unit consist of guarding installation and performing security checks on other units in WEIMAR area. (F-6)

e. Vehicles assigned and license numbers are as follows:

(1) 2 Studebaker 6x6, 2½ ton trucks, dark green, license Nos. M-46-45 and M-46-41.

(2) 1 Opel truck, light grey, license No. M-45-44.

SUMMARY OF INFORMATION

✓ 1. MGB SCHWERIN (N54/T46):

a. Location: The MGB SCHWERIN is located on Demmlerplatz (number unknown). The structure itself comprises four (4) stories, and is coated with a dirty grey plaster. The north and south wing are comprised of approximately thirty-two (32) prison cells. In the middle of each wing, between two (2) rows of cells, runs the hallway which is covered with a skylight. The rear section of the building, located on the western side, is also comprised of an unknown number of cells. In the center of this U shaped building is a court yard. The entire dimensions of the building are 200 feet to 225 feet in length, and approximately 160 feet in width. At the rear of the building is another yard of which the northern part is covered with a glass roof. This rear yard is hemmed in by a brick wall twelve (12) feet high. The entire top of the wall is impregnated with pieces of broken glass to prevent possible escape of prisoners, who take their daily exercise in this yard. In the center of the exercise yard is a wooden guard tower, equipped with a spotlight and occupied by a Soviet guard, equipped with a sub-machine gun. (See EXHIBIT I) (P-6)

✓ b. Personnel:

NR (1) (Fm) b6 Soviet Major, approximately thirty-five (35) years of age, 5'5" tall, weight 140 pounds, dark blond hair combed straight back, dark eyes, medium build, married and has two (2) children, presently residing in b6

C1 (2) (Fm) b6 Soviet Lt. Colonel, approximately twenty-eight (28) years of age, 5'9" tall, weight 145 pounds, blond hair, slender build, married and his quarters were formerly located on the corner of Mozartstrasse and Demmlerstrasse. Up to his transfer to BERLIN (N53/Z75) in July 1950, b6 was in charge of the MGB SCHWERIN.

(3) Female interpreter by the cover name of "ERIKA", a Soviet national, twenty-six (26) years of age, 5'5" tall, weight 155 pounds, heavy build, brown hair slightly waved.

c. Vehicles: One (1) American late model Ford sedan, black in color, equipped with radio, license number unknown. Approximately twelve (12) BMW sedans, model 340, manufactured in EISENACH (L51/H76), all four-door sedans, (Continued)

tion:

a. The ^{MGB}MVD office in WEIMAR is located in a three story, gray stone building located on Thalmann Strasse between Kohl Strasse and Watz Dorf Strasse with an entrance at the rear of the area on Meyer Strasse. (See Exhibit "I"-sketch of building and location). The building is the former Amtsgericht (District Court Building). The building is enclosed by a wood fence which is approximately 8 feet high. These gates are guarded continuously by a soviet soldier armed with a machine pistol.

b. The estimated strength of the installation is thirty officers and one hundred enlisted men. Some of the enlisted men wear green shoulder boards and carry machine pistols.

c. No personalities of the installation were known by source.

d. No duties of personalities of the installation were known by source.

e. A few Opel, BMW, and Mercedes Benz passenger type vehicles have been seen entering and leaving the area. The license numbers were prefixed with either a "C" or an "M".

f. This installation was identified with the MVD by German City officials in WEIMAR.

g. Source could give no further information concerning this installation. (F-6)

2. Source obtained the information contained in this report through ^{b1} by casual observation of the installation when he passed it frequently

1. REASON FOR INVESTIGATION:

Reference is made to paragraph 65 a, Section III, Consolidated Orientation and Guidance Report, 7970th CIC Group, dated 9 July 1948, as currently amended.

2. SYNOPSIS OF PREVIOUS INVESTIGATION:

None

3. PRESENT INVESTIGATION:

a. Background data on principal personality (Source of Information):

b1

4. The MGB unit that operated the farm b1 is located in a large building in the 600 block of Luisenstrasse, HALLE. The building is about 250 meters from Steintor Platz. On the base b1

b1 appeared the APO number of the unit, which is APO 30055. b1 noticed, when in the building, that there were also cells for detaining people. German employees informed b1 that HALLE was the main office for the MGB in Land Saxony-Anhalt.

5. The MGB officers reside in a Casino across Luisenstrasse from the MGB offices. b1 did not know how many officers were stationed in HALLE, as the strength varies daily. German employees of the Casino told b1 that the MGB officers come and go to MAGDEBURG (M53/Y60) and LEIPZIG (N52/E21).

6. b1 stated that the farm had three (3) trucks and that the license number M-67-76 was used on all of them. On passenger cars of the unit b1 observed license numbers from M-67-350 to M-67-400. b1 did not observe all these numbers, but the ones he saw were between these limits.

7. In a large villa on Magdeburg Landstrasse, in Grube Ferdinand (which is four (4) kilometers west of the center of HALLE), is a twenty-eight (28) man communications unit. This unit is building new telephone lines from HALLE to MAGDEBURG. Work on this project began in July 1949 and is still continuing. The sixteen (16) line telephone connection follows the Hauptland Strasse from HALLE to MAGDEBURG. The wires are strung on wood poles, about twelve (12) meters high, which have four (4) cross arms.

8. [b1] knew the following personalities to be connected with the MGB in HALLE:

a. [b1] [b6] a Soviet Major. Chief of the MGB unit in HALLE from 1948 to December 1949. [b1] [b6] was recalled to the USSR after it was discovered that he sold products of the farm for his personal use and shipped some mechanic's tools to his home in the USSR.

b. [b1] [b6] who has been Chief of the MGB in HALLE since December 1949. [b1] [b6] is about thirty-six (36) years of age, 5'7" tall and is slim. He has a thin face and blond hair which is parted on the side. He was addressed as "Colonel" by the German employees, but wore strange shoulder boards. (See EXHIBIT "A").
~~He is reportedly misappropriating funds.~~

c. [b1] [b6] a former Lieutenant (and possibly still an officer) in the MGB. [b1] He wears solid green shoulder boards with no other insignias or decorations. [b1] [b6] told [b1] that he was formerly with the MGB in DRESDEN (N52/F29), but was demoted because he misappropriated funds. [b1] [b6] is twenty-nine (29) years of age, 5'6" tall, and very sturdily built. He has blond hair combed straight back and a round face. [b1]

b1

[b1] [b6] was a policeman in MOSCOW, USSR, during the period when he was eighteen (18) to twenty-one (21) years old, and has been in the MGB since. [b1] said that [b1] often complained that he knows that [b1] [b6] is misappropriating money for his own use.

b1

The following
information is dated 1 May 1950 and is evaluated F-6.

a. At the Reilstrasse Kaserne in HALLE, approximately 500 young Soviet soldiers are being trained for MVD duty. About thirty (30) officers, assisted by an unknown number of NCO's, are supervising this instruction. The personnel living in this Kaserne, with the exception of officers, are segregated completely from the German population. They are never permitted to leave the confines of the Kaserne. Training in the use of watch dogs appears to be part of the curriculum since about fifty (50) to sixty (60) police dogs are kept in the Kaserne kennels. The kaserne authorities are very security conscious and continual guard posts are maintained. No Germans, other than employees, are permitted to enter the Kaserne, and recently a double set of gates was installed at the entrance.

b1

1. [redacted] was interrogated at CIC COBURG on 24 September 1951, and volunteered the following information:

a. The MVD in WEIMAR (H51/J57) is located in a grey stone, three story building located on Meyerstr. between Kohlstr. and Thaelmannstr. in the former "Amtsgericht" (District Court) building. (See Inclosure "I") The building is surrounded by a wood fence approximately 8 feet tall. There are two gates in the fence, one on Meyerstr. near Thaelmannstr. and the other on Fabstr. near Kohlstr. These gates are guarded 24 hours daily by two Soviet soldiers on each gate, armed with machine pistols. The enlisted men do not wear shoulder boards, but have a green band around their field caps. (F-6)

b. Strength of the installation is estimated, by Source, at 10 officers and 100 enlisted men. (F-6)

c. No personalities are known to Source. (F-6)

d. Duties consist of area coverage and patrols. (F-6)

e. Source has no knowledge of vehicles assigned to the installation. (F-6)

f. Source knows that this is a MVD installation by conversation with other residents of WEIMAR. (F-6)

2. [redacted] b1 obtained the information contained in this report by observation and conversations with other residents of WEIMAR from [redacted] b1 [redacted] during which time he was a resident of WEIMAR. (F-6)

1. Location of UKR Offices and Cover Installations:

- a. The headquarters of the UKR is located at POTSDAM (W53/Z63) Albrechtstr in the immediate vicinity of Leistikowstr. (See sketch attached as Exhibit "I"). All of the buildings in the area are part of a restricted area; the access to which is allowed only upon presentation of a special pass. Guards are stationed at all of the entrances of the various buildings. The main building is a three storied house comprising a guard room on the main floor, next to the entrance. The second floor comprises the offices of the main officials of the UKR. Including that of General SHELESNYAK, chief of the UKR for Germany. The telephone exchange for the UKR is POTSDAM 6524, under which all officers can be reached. Additional known numbers are: 02-1597, 02-1598, 02-508, 02-823 and 02-1497.
- b. The UKR jail is located in the same compound, on Leistikowstr. It is comprised of two separate buildings, one of these being situated slightly away from the street (See sketch). The entrance to the latter building is gained through access to a small courtyard. The larger building contains all the cells and the smaller one, a two-storied house, contains various interrogation rooms, guard rooms, and the tribunal room.
- c. A small one-storied villa on Albrechtstr, included in the compound, is used as a meeting place between UKR officers and their agents. (See sketch attached, house No. 5).
- d. The last house on the left-hand side of Kapellenbergstr, at the corner of Kapellenberg, is used as a cover house for meeting with informants of the UKR. The first room on the left-hand side is used as the meeting place. The rest of the house is occupied by German persons whose names are not known to Source.
- e. An office of the UKR is located in a house next to a Soviet Kommandatura on Papellallee. The meeting place is on the first floor of that house.
- f. The house at Jaegerallee 26, which was formerly used as the personnel office for German employees of the Supply section of the UKR is used as a meeting place for informants.
- g. The house at the corner of Karlstr and Hegelallee, next to the EDGE Headquarters, was previously used as private quarters for various officers of the UKR. A Captain b6 and Captain b6 lived there. It is now used as a cover house for the meeting of informants.
- h. The house at the end of Papellallee, near the Officers' Club, a white one-storied structure, has been used at numerous times, as a meeting place for informants. The telephone number of the house is 02-1691.
- i. The house located at Karlstr 7, residence of an b6 has been used on numerous occasions as a meeting place for informants.
- j. The house located at Waldemarstr 14, residence of a b6 has been used as a billet for various UKR officers.
- k. The house at Marienstr 9, formerly used as quarters for various UKR officers, is often used as a meeting place for informants. The ground floor is used as an automobile repair shop. While one of the upstairs rooms is occupied by a People's Policeman, whose name is not known.
- l. Feuerbachstr 24, residence of b6 has often been used as a meeting place of Soviet intelligence officers, UKR and MGB.

m. Feuerbachstr 5 was used until 1948 as a meeting place for info and Soviet intelligence officers of the UKR and MGB.

n. Zeppelinstr 9, former quarters of a b6 alleged UKR agent, is used as a cover meeting place for informants.

2. Principal Mission and Operational Function of the UKR.

a. One of the main missions of the UKR in Germany is the safeguarding and security of the GOFU (Group of Occupation Forces, Germany). The loyalty of all members of the Soviet armed forces, in Germany, with special emphasis on the Staff members is closely watched.

b. The UKR is also charged with the security of all Soviet installations in regard to German workers employed by various Soviet military organizations. It is responsible for the clearance of all such employees prior to their being employed and keeps a close watch on them by maintaining a wide net of informants within the ranks of the workers themselves.

c. The UKR is also charged with the detection of espionage carried out by the Western powers or anti-Soviet organizations. To counteract such sections, it employs a net of agents and informants within all levels of the Soviet armed forces. Source did not know exactly whether every unit including those of company size have official representatives of the UKR assigned, but she knew for a fact that agents of the UKR were assigned to units of battalion size at least.

d. The UKR employs wide nets of informants to gather information of interest to the Soviet Intelligence Service, as pertains to the points covered in sub-paragraphs "a", "b" and "c", above. These agents and informants often operate in the western zones of Germany and the Western Sectors of Berlin. They are also charged with the detection and location of persons wanted by the UKR, such as defectors and deserters of the armed forces.

e. The UKR is responsible for the control of anti-Soviet propaganda such as the distribution of leaflets and newspapers in Soviet installations. Violators, when detected, are promptly dealt with and draw heavy sentences.

3. Relationship between the UKR and the MGB and with other Soviet Agencies:

a. In theory, the MGB and the UKR are closely cooperating with each other in cases involving the German population; however, the source of this report cites a number of cases when a complete distrust of the MGB existed on the part of UKR officers. Numerous cases were related in which the MGB sent their agents to Source, then employed in her official capacity of personnel chief for the German employees, in order to gather information from her concerning subjects under MGB investigation and at the same time employed by the Soviets. Source was under strict orders of the UKR not to divulge to others than UKR members anything about her work, relations with any other agencies and about any German employees of the Soviets. There were several instances when the MGB attempted to gain employment for their own informants and, in spite of the pressure applied by the MGB, the UKR steadfastly refused to employ such individuals in Soviet Army installations. In the Spring of 1950, a great number of MGB officers were transferred to the Soviet Union. Since that time, according to Source, the UKR has taken a leading position in the POTSDAM area. Several informants and agents, who up to that time were handled solely by the MGB, have now been transferred to the UKR control. A concrete example was given by Source, when she related that an acquaintance of hers b6 employed in the PK Department of the Headquarters of the

Police for Land Brandenburg, stated to her that the MGB officers, who were in contact with her, had left and their targets had been taken over by a [b6] of the UKR. The latter informed [b6] that she would continue to gather and submit information of intelligence value as previously.

b. The UKR maintains close official liaison with the Soviet units because of its function of being charged with the security of the Soviet armed forces.

c. The UKR maintains close liaison with representatives of the MID (Ministerstvo Inostrannikh Del-Ministry for Foreign Affairs) and in particular the Soviet Consulates in Germany. Thus, it is charged with investigating Soviet citizens who have supplied for entry into the Soviet Union from various Western European countries. A number of such former Russian emigres, who had lived the greater part of their life in France and had acquired Soviet citizenship, were detained in POTSDAM on their way to the Soviet Union, pending investigation and clearance from the UKR.

d. The UKR maintains close liaison with (German) Ministry of State Security (MSS), which sometimes is charged with preliminary investigations of certain individuals as requested by the UKR. Thus, in the case of prospective German employees for Soviet installations, the MSS conducts certain investigations prior to their actual employment and submits the findings to the UKR which, in turn, makes its own checks, prior to giving the approval for employment.

e. Liaison is maintained with other law enforcement agencies, such as the regular police and the judiciary. Suspects and prospective informants often are brought to police precincts where they are turned over to UKR representatives for further interview.

f. A close check is kept on Soviet owned industries and some essential people's owned factories. In January 1951, a secret meeting of the principal Soviet managers of various plants was called at the UKR Headquarters at which instructions were given to them to closely watch their Soviet subordinates and the FDGB representatives in their factories for any possible disloyal acts. Reports on those checks have to be submitted to the UKR at regular intervals.

4. Operational Procedure and Informant Handling:

a. The official working day of the UKR Headquarters is from 10:00 AM to 10:00 PM and 20:00 PM to 01:00 AM. On Saturdays, instructions and lectures are held from 10:00 AM to 13:00 PM on political subjects, current events, and latest operational procedures. Entertainment, such as film or theater presentations, are held weekly within the compound on Albrechtstr. All personnel of the UKR eat in their own mess (Jasno No 6), also located on Albrechtstr. Meeting of informants occur mostly at night or in the evening. Interrogations of prisoners in the UKR jail take place either early in the morning or late at night.

b. Informants are recruited among individuals from all walks of life who have a wide circle of acquaintances in important places, such as the western sectors of BERLIN or in a specific organization, such as a particular section of the Police or political parties. They are also recruited among persons who have, in their past, committed some minor crime or who, due to their former political activities, are under suspicion and surveillance; threats are made against such individuals to make them cooperate and furnish the required information. Once the person has been recruited as an informant or agent, he has to sign a Declaration certifying that he will work and not divulge his activities

c. Once an informant has been given a specific task, such as a person surveillance, he is usually sent to make actual contact with the person concerned and find out all he possibly can about him. Specific targets are sometimes given to informants, such as the Russian Orthodox Church in POTSDAM, where the agent is told to actually become a member of the congregation and report on all its personnel and activities.

d. Meetings with informants are held at night, following prior arrangements with their handling officers or after appointments by telephone. Wide use is made of cover houses and vehicles. Informants submit their handwritten reports, signed with their cover names. Only one copy of each report is written and it is strictly forbidden to make additional copies. Informants are often met at widely separated places so as not to make them known in any specific neighborhood. Handling officers meet their informants either in civilian clothing or in uniform; there seems to be no definite policy concerning the type of clothes worn. Informants are not allowed to divulge their real names to any persons they may encounter in the course of their work.

e. Vehicles used by the UKR in POTSDAM are mostly large MERCEDES sedans, with separate compartments for the driver. They are painted black. The license numbers start with the letter "Q" (Russian/)

5. Typical Cases of the UKR: Source of this report had knowledge of a great number of cases in which she participated as an agent or as a court interpreter. The following is an account of some of the more important cases related by Source:

a. The first case assigned to Source was that of [b6] who was interpreter with the [b6]. The latter was well known to Source as she (Source) was working then as inspector of all German employees of the above-mentioned units. [b6] was suspected by the UKR of being an agent for the western powers, as she had received numerous visits from her brother, [b6] who had been employed in a British army unit in HAMBURG and Western BERLIN. Source was told to make contact with [b6] and report on all her contacts and activities. She had to submit weekly reports to her handling agent at that time a [b6]. The allegations made about the suspect could not be substantiated by Source.

b. In Autumn, 1947, Source was told by [b6] to go to the Russian Orthodox Church in POTSDAM, on Kapellenbergstr. She was to take notice of all happenings there, and especially watch for Soviet citizens attending the church services. She was also told to note all the Russian emigres coming to church from the Western Sectors of BERLIN, and whether the latter [b6] had any contacts with the Soviet citizens they met. Thus, a lat [b6] who attended weekly services in civilian clothes was noticed. Source was told to especially watch the activities of [b6] and with whom he had contacts. [b6] as was found out by Source, was an officer assigned to the Opersector of the MGB in POTSDAM. He disappeared in late 1947 and Source was told he had been returned to Soviet Union in disgrace.

c. In the middle of 1947, Source was told to make contact with a [b6]. The latter was then in charge of a supply office for the Soviet control Commission (SUC) Land Brandenburg. He was being watched by the UKR as a suspected black marketer. [b6] had worked for the BERLIN city government in 1945-46 and it was thought that he maintained close connections with some contacts in Western Sectors of the city, for black market purposes. [b6] was eventually discharged from his position and his present whereabouts are unknown.

d. In Autumn 1947, Source was assigned the task of contacting a German National, formerly of Russian nationality, [b6] N. (last name

unknown). The latter was residing then at [b6] and often came to POTSDAM. It had been alleged that [b6] listed in sub-paragraph "b", above, had contacted her several times. After the latter had been transferred to the Soviet Union, it was the Source's main task to concentrate on [b6]. The latter was thought to be a western espionage agent as she came to POTSDAM almost every week and contacted several Soviet nationals, ostensibly for black market purposes. Source had to report all of Maria M.'s movements and acquaintances. Finally, the latter was arrested in September 1948, as she left the POTSDAM railway station. It was thought by the UER that [b6] was carrying her alleged espionage activities upon the orders of a firm [b6] a German baroness, residing also at [b6] who was known to have contacts with American officers. Source was told to go to [b6] in the British Sector of BERLIN, and try to find out all she could about her. Source went there and told [b6] she wanted to take English lessons with her. [b6] agreed and Source went to see her several times after that first meeting. They soon became friends and [b6] confided to Source that she was indeed in contact with an American intelligence officer, a [b6] and, thinking Source would be able to provide some information or interest to [b6] the latter offered to introduce Source to [b6] and to some other acquaintances of hers. White Russian refugees and displaced persons. The UER was extremely interested in the case and [b6] the assistant chief in UER HQ, POTSDAM, talked to Source personally and discussed with her the possibility that she might be sent to a displaced persons' camp in Western BERLIN as an alleged stateless refugee; her first task, was, however, to find out more about [b6] circles of acquaintances. Source remained in contact with [b6] and the latter introduced her to several displaced persons and Russian emigres. She was also introduced once to [b6] but the latter did not talk to her at any length. Source always submitted reports of all her visits with [b6] to the UER. In September 1948, Source was asked whether [b6] ever travelled to POTSDAM or the Soviet Sector of BERLIN, which she answered in the affirmative. She was told to make a definite appointment at the POTSDAM S-Bahn station, however, one day prior to the appointed date, Source was told to cancel the appointment as the matter had already been settled satisfactorily. Source never heard of [b6] after that date.

e. In the spring of 1949, Source was told to closely watch a firm [b6] residing at POTSDAM, Lindenstr., the latter was a German jeweler who was known to have close connections with the French Military Mission in POTSDAM and, for that reason, was suspected of espionage for the French intelligence service. Source was unable to gather any positive evidence against [b6] and she was then told to discontinue her attempts in this case. Present situation or whereabouts of [b6] are unknown.

f. In the summer of 1949, a group of Soviet repatriates coming from France, arrived in POTSDAM after having spent some time in a repatriation camp in MAGDENBURG (M53/260). SOURCE was assigned to the task of making friends with several of those repatriates and ascertain their true political leanings, activities, opinions and acquaintances. Thus, she had to check on a [b6] family, then residing at POTSDAM, Jannetallee, and an [b6] then residing at [b6]. The latter subsequently fled with Source to Western BERLIN in May 1951.

g. In January 1950, a [b6] a deaf mute German national, then [b6] working as a shoe repairman for the Soviet stores in POTSDAM, was accused by the UER of having connections with Western Germany and having intended to flee there. He allegedly is of Russian descent and has some relatives in the Soviet Union. Source was told to become friendly with [b6] and report on all his activities.

b6 was finally arrested in May 1951 by the German Criminal Police on orders of the UKR and deported to the Soviet Union, allegedly to work in a forced labor camp.

h. In the summer of 1949, Scurse was sent to TELTOW, Soviet Zone, on the border of BERLIN-Zehlendorf (BS Sector). A Soviet national, employed by the supply section of the GORP had been caught there, as he was fleeing the Soviet Zone. The UKR conducted the investigation of the case. All acquaintances, Germans and Soviets, of the would-be deserter were rounded up by the UKR and questioned; a number of them were later arrested or transferred to the Soviet Union. Scurse acted as interpreter for the UKR.

i. In the middle of 1950, a number of Soviet citizens, employed by various Soviet restaurants in POTSDAM, were investigated by the UKR for alleged black market activities. They were soon arrested and tried by a military tribunal of the UKR. Fnu b6 and fnu b6 were sentenced to 25 years at forced labor. fnu b6 and fnu b6 were sentenced to 15 years, fnu b6 was sentenced to 5 years and fnu b6 to 2 years. Source served as interpreter at the trial.

1. An MGB installation is located on Saarbrueckerstrasse in HALLE. Sketches of this installation as furnished by Source are attached as EXHIBITS "A" through "D". Source cited the following named Soviet military personnel as, within her knowledge, residents of the installation described:

- a. Captain (Fnu) [b6] interrogates German employees of 17th Armored unit, is forty-three (43) years old, 5'10" tall, has black hair, a stocky build, and is married. [b6] is living with his wife in HALLE. He speaks good German. [b6] has a scaly neck on which he uses a green salve.
- b. Captain (Fnu) [b6] interrogator of German and Soviet arrestees, is thirty-seven (37) years old, 5'11" tall, has medium blond hair, is slender, and is single. [b6] speaks poor German; he is very reserved.
- c. Sergeant (Fnu) [b6] correlates interrogation reports for office, is twenty-four (24) years old, 5'7" tall, has dark hair, is very slender, and lives in Haus II (see EXHIBITS).
- d. Lieutenant (Fnu) [b6] interrogator, is thirty (30) years old, 5'9" tall, has light blond hair, is very slender, and speaks 80% German. His wife lives at #4 or #5 Heiderand in HALLE. [b6] travels frequently in a green car, hates Germans, and is a "woman chaser".
- e. "Polkownik" (Fnu) ANDROUBA, political chief attached to 17th Armored unit, is forty-eight (48) years old, 5'7" tall, has dark hair, is slender, and goes with a Czech woman, [b6] who is a waitress for UGB since September 1950. ANDROUBA doesn't speak German; he came from the USSR in 1950.

MGB (Ministry of State Security)
for
Hq, Opersector (Land) Saxony
DRESDEN/NEUSTADT

FORWORD

The following report lists the static locations and their descriptions, the cover locations, the strength, the personalities and the vehicle numbers of MGB Hq for Land Saxony as reported in the past year.

In addition, information from the Dresden Area is given on the recruitment of German informers, the missions assigned to German informers, and the MGB technique of handling German informers.

INTRODUCTION

MGB Opersector Hq for Saxony is one of six similar MGB installations in the Soviet Zone of Germany (one for each Land and one for BERLIN - all of which are under the command of MGB, Germany).

The mission of MGB, Opersector Saxony, is counterintelligence with regard to all installations and persons in Saxony both Soviet and German except for Soviet Army units.

With regard to positive intelligence operations, although opersector Hq collects data on Germans resident in the Western Zones from their acquaintances in Saxony, there is no evidence that it utilizes such personality knowledge itself. Rather, such information is believed to be passed to Hq, MGB, Germany in BERLIN.

It is interesting to note that Opersector Hq in Saxony did, however dispatch a German informant to the Western Sectors of BERLIN with the (counterintelligence) mission of enticing a refugee to the Soviet Sector of BERLIN where he was to be arrested, presumably through the BERLIN Opersector.

There is evidence, although slight, of collaboration between Opersector Hq and the local German Ministry of State Security (MSS) office. For example, both agencies use the same prison van. It is certain, however, that MGB still bases its operations on extensive use of German informants reporting directly to an MGB officer.

It is worthwhile to point out that MVD troops are used for physical security and are not engaged in intelligence or counter-intelligence. It must be realized, however, that in addition to posting uniformed MVD guards about MGB premises among others, the MGB officers make use at times of the MVD uniform as cover. For these reasons German informants habitually refer to MVD, NKVD or GPU when MGB is meant.

METHODS OF INFORMANT RECRUITMENT

a. Recruitment under duress. A large portion of the persons employed by the SED as informants are so intimidated by arrests, extensive interrogations, accusations and threats of banishment to Siberia that they finally accept the Soviet offer of recruitment as an informant as a line of least resistance. Informants recruited in this manner are obliged to name their acquaintances who in turn are interrogated concerning the prospective informant. In this way the SED is able to effect a background investigation of the individual recruited in a relatively short period of time, in addition to obtaining other informants in an endless cycle.

1061

NOTE: This document contains information affecting the national defense of the United States within the meaning of the Espionage Act, 50 U.S.C. 31 and 32, as amended. Its transmission or the revelation of its contents

in any manner to an unauthorized person is prohibited by law.

At the time of their recruitment as well as periodically during the course of their informant activity, all individuals recruited in this manner are required to submit complete life histories. (This is a standard Soviet technique also used on POWs, on civil prisoners and on members of the intelligence services.) At the same time each agent required to sign a statement to the effect that he will carry out to the best of his ability all missions assigned him under his cover name, that he will speak to no one concerning his activities and missions and will consider himself subject to Soviet military law. He is required to sign this statement with both his real name and his cover name. (Doc 50 F-2)

b. Ideological recruitment. This method is employed with individuals who had received political training as PWs in the USSR. Some of these PWs were already recruited as agents for the KGB before they were released.

This method is also used with KGB members (Doc 50 F-2)

MISSIONS OF GERMAN INFORMANTS

1. Reports on friends and acquaintances in Western zones of Germany and Western sectors of B.M.F. (This is an excellent indication of KGB positive intelligence interest beyond Soviet zone).
2. Surveillance of other specified Germans such as those who have relatives, acquaintances and connections in the West. The friends of such persons are also subject to surveillance.
3. Reports on political attitude of Soviet officers and their dependents. (One case only - the German informant in question handled business transactions with Soviets).
4. Surveillance of German women who consort with Soviet personnel.
5. Detailed character reports on personalities in public service, political parties, in industry and on the police force.
6. Reports on persons who make frequent trips to the West.
7. Reports on strangers and people who come from the West.
8. Reports on German employees of the Soviets.
9. Reports on Germans who have close contact with the Soviets such as linguists and musicians.

PAYMENT OF GERMAN INFORMANTS

There is no universal method of payment used by the KGB to reward informants. Depending on the informant and on the value of the information received, payment may be made in money, in food parcels, by a higher category ration, by a more remunerative job or conversely by promising nothing but implying a threat for failure.

4. REPORT OF FINDINGS

1. [b1] born [b1] in [b1] illegal border crosser, defector from [b1] reported to the Bavarian Border Police in COBURG (N51/028) on [b1]

2. [b1] was interrogated on 30 April 1951, by the undersigned Agent in the CIC Office, COBURG, and volunteered the following information:

a. The MVD Office in AUE (N51/K53) is located on Bismarckstrasse in a former German school (name unknown) (See EXHIBIT "A"). The building is a four story stone structure, approximately 250 feet long by 100 feet wide. Offices of the MVD are on the third floor of the building, while the first and second floors are occupied by the German People's Police. Entrance is guarded continuously by a German People's Policeman armed with a carbine. The building is surrounded by a wooden fence approximately six feet high.

b. There are 8-10 Soviet civilians and 30-40 Soviet officers and soldiers stationed at this installation. The soldiers wear green shoulder boards.

c. The duties of the personnel of this installation consist of interrogating suspected political unreliaables and investigation of German workers of the Wismuth A.G.

d. [b1] identified this installation as MVD through conversations with residents of AUE. (F-6)

AGENT'S NOTES:

a. A Region VII Registry check revealed no record of Source.

b. [b1] obtained the information in this report through personal observation and hearsay from local residents during visits to AUE from his place of residence in [b1]. The situation as described in this report existed as of 15 April 1951.

c. A check of the MVD Workbook, Hqs, 66th CIC Detachment, dated 5 October 1950, confirmed the location of the MVD Offices on Bismarckstrasse; however, strength as reported by [b1] is greater than listed.

4. REPORT OF FINDINGS

1. [b1] born [b1] in [b1] illegal border crosser, was apprehended by the Bavarian Border Police near NEUSTADT (M51/049) on [b1]

2. [b1] was interrogated on 19 April 1951 by the undersigned Agent and volunteered the following information:

a. A Soviet MVD Office is located on the corner of Klara Zetkinstrasse and Haackelstrasse in ALTENBURG (N51/K27), in a three (3) story rectangular stone building approximately 200 feet long and 125 feet wide. This building was formerly used as a childrens hospital by the Germans. A Soviet soldier, armed with a machine gun, is on guard continuously at the entrance on Haackelstrasse. The entrance on Klara Zetlinstrasse is not used.

b. There are 20-25 Soviets, officers and enlisted men, stationed at this installation. These men have green shoulder boards.

c. The personnel of this office interrogate political unreliaables and persons suspected of working for the Western Powers. Source stated that he had heard that there is a prison in the basement of this building; however, he had never seen it.

d. Source identified this as an MVD unit by the green shoulder boards, stating that he knew that the MVD wore green shoulder boards. (F-6)

AGENT'S NOTES:

a. A Region VII Registry check revealed no record of Source.

b. [b1] obtained the information contained in this report through personal observation and conversations with residents of ALTENBURG between [b1] [b1] when he made frequent trips to ALTENBURG from his place of residence [b1]. The situation as described in this report existed as of 29 March 1951.

c. A check of the Devotion Target Book, Hqs, 66th CIC Det, dated 5 October 1950, revealed that the installation described in this report is listed as target # 11 in ALTENBURG,; however, the strength as shown in this report is greater than listed in the target book.

4. REPORT OF FINDINGS			
<p>1. b1 in b1 b1 illegal border crosser, was apprehended by the Bavarian Border Police on b1 at MUENCHENREUTH (M51/P26). <i>See Annex</i></p> <p>2. SUBJECT was interrogated by the undersigned Agent on 6 April 1951, at CIC HOF (M51/099) and volunteered the following information:</p> <p>a. In November 1950, the former FDJ clubhouse on Ernst Thaelmannstrasse in the AUERHAMMER suburb was occupied by the MGB. AUERHAMMER is located approximately two miles south of AUE. (F-6)</p> <p>b. The building is three stories high, about 40 feet wide, and 60 feet long. It is located directly across the street from a large factory type building. A wooden tower about 6 feet high is built on the flat roof of the clubhouse. A guard armed with a machine gun is posted in this tower. (F-6)</p> <p>c. The garden around the house is enclosed by a steel rod fence approximately 6 feet high. The building comes up to the sidewalk on the street side. Wooden barriers are set up in front of the house to inclose all the sidewalk and half the street. (F-6)</p> <p>d. There is a walking guard armed with a sub-machine gun with drum type magazine. The guard wears an olive drab uniform. The shoulder boards of the uniform are basically lilac or brown. The lower half of the shoulder board is covered by a piece of black cloth. The ends of vertical silver strips are visible under the edge of this piece of cloth. The guard usually wears a steel helmet and low-cut shoes. Visitors are checked by a guard stationed just inside the door of the building. (F-6)</p> <p>e. Vehicles bearing the following license numbers were observed at this building:</p> <p>(1) 18 March 1951 - / 08-18-36 / 08-77-77</p> <p>(2) 1 April 1951 - / 08-32-65 (F-6)</p> <p>f. Source had no knowledge of the strength of Soviet personnel operating from this building. (F-6)</p> <p>3. AGENT'S NOTES:</p> <p>a. b. Source obtained this information b1

b1 The information was current as of the date of his desertion. He frequently went past this installation. Source believed that the guard mentioned in paragraph 2d was an officer because of the attempt made to conceal the insignia of the shoulder boards and because the guard wore low-cut shoes instead of boots.

c. A check of the MGB Workbook, Hqs 66th CIC Detachment, indicates that the MGB AUE is located on Niederschlemaerstrasse, on the northern side of AUE. The MVD Workbook, Hqs 66th CIC Detachment, lists MVD AUE on Bismarckstrasse, also on the north side of AUE.

d. Source was returned to German refugee channels.

1. With reference to Target List, dated 20 Jul 50, Hqs, 66th CIC Detachment, Par D, Section XI, this report concerns MGB offices in the Soviet Zone, Germany.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: This is one report in a series of reports covering the organization, personalities, and activities of the MGB in the Soviet Zone, Germany. The latest report in the series is AR, Subject and file as above, dtd 27 Feb 51.

3. PRESENT INVESTIGATION: The following information was obtained concerning the offices and informants of the MGB in Land Mecklenburg:

a. GUESTROW (M54/T 98):

- (1) In the middle of [b1] sub-source was taken by a member of the Soviet Zone criminal police to an MGB office at Domstrasse 6, 1st floor. There he was interrogated by two MGB officers in civilian clothes and a female interpreter. He was charged with espionage because he was exchanging letters with friends in Western Germany and in the USA. One of the letters to the USA had been seized by the Soviets. After several hours of interrogation sub-source was recruited as an MGB informant and was given the cover name of [b1]
- (2) In early [b1] sub-source was visited at [b1] by one of the Soviet civilians and the interpreter, who told him that he would soon be contacted again by one of the officers, whom he would have to follow to the Soviet quartermaster depot. In the middle of [b1] one of the officers appeared at [b1] and sub-source followed him to the depot. There they got into a car and drove to a location on the outskirts of GUESTROW. Sub-source was ordered to submit a list of his acquaintances and to establish contacts with persons in Western Germany, especially with former wartime comrades. In addition, he had to report all anti-communistic remarks [b1]
[b1]
- (3) After a second meeting, at which sub-source was threatened by the MGB officer because he did not have any information, sub-source fled to West BERLIN.

b. The following persons work as informants for the MGB in Land Mecklenburg:

4. REPORT OF

1. [b1] born [b1] in [b1] illegal border crosser, reported to the Bavarian Border Police in RODACH (M51/019) on [b1]

2. [b1] was interrogated on [b1] by the undersigned Agent and volunteered the following information:

a. Your attention is invited to Exhibit "A", which shows the location of a MVD unit in MEININGEN. The name of the street on which this unit is located was unknown by Source who was a resident of MEININGEN for only three months. (F-6)

b. This unit performs routine patrols in MEININGEN, apparently checking on Soviet soldiers within the city. Each patrol consists of one (1) officer and two (2) enlisted men. Members of this organization also work in close liaison with the German Minister of State Security (MSS) in MEININGEN. (F-6)

c. There are approximately 50 Soviet soldiers (green shoulder boards) and 20-25 Soviet officers stationed at this installation. The men are armed with sub-machining guns. Two guards are on duty continuously at the entrances to these buildings. (F-6)

d. [b1] identified this installation as MVD through conversations with local residents. (F-6)

3. AGENT'S NOTES:

a. A Region VII Registry check revealed no record of Source.

b. [b1] obtained the information contained in this report through personal observation and conversations with residents of MEININGEN between [b1] when he was a resident of MEININGEN.

c. A check of the MVD Workbook, Hqs 66th CIC Detachment, dated 5 October 1950, revealed that MVD offices in MEININGEN are located as follows:

(1) Thaelmannstrasse, 2 Officers, 8 EM

(2) Adelheidstrasse, Saarbruckenstrasse and Neun Kirchnerstrasse, 7 Officers, 2 Interpreters.

4. REPORT OF FINDINGS

1. [b1] born [b1] in [b1]
illegal border crosser, reported to the CIC Office COBURG (M51/028) on
[b1]

2. [b1] was interrogated on [b1] by the undersigned
Agent and volunteered the following information:

a. MVD Offices and billets in LEIPZIG are located on Windscheidstrasse between Scheffelstrasse and Selneckerstrasse (See Exhibit "A"). This is a three story, stone structure approximately 250 feet long and 100 feet wide. A Soviet soldier armed with a machine pistol is on continuous guard duty at the entrance of this building. (F-6)

b. There are 40 - 50 Soviet Officers and 100 - 120 Soviet soldiers (green shoulder boards) stationed at this installation. (F-6)

c. The duties of the men of this installation consist of patrolling the city of LEIPZIG. Each patrol is made up of one officer and two enlisted men. Each member of these patrols wears a red arm band which has Russian printing on it. These patrols perform routine Military Police duties. Some personnel of this unit also work in conjunction with the German MSS (Ministry of State Security). (F-6)

d. [b1] identified this installation as MVD through hearsay from residents of LEIPZIG, and from his own knowledge of the Soviet MVD, i.e., green shoulder boards. [b1] is of the opinion that members of the GPU (MGB) use this installation also; however he did not have any information to substantiate this. (F-6)

AGENT'S NOTES:

a. A check of Region VII Registry revealed no record of Source.

b. [b1] obtained the information contained in this report through personal observation and hearsay from residents of LEIPZIG, between 15 December 1950 and 20 February 1951, during which time he was a resident of LEIPZIG.

c. A check of the MVD workbook, Hq 66th CIC Det, dated 5 October 1950, disclosed the following:

(1) Location of MVD unit on northeast corner Selneckerstrasse and Windscheidstrasse in the former recruiting District Headquarters.

4. REPORT OF FINDINGS

End. by cou. H.R.

1. b1 truck driver, born b1 in b1 b1 illegal border crosser, crossed the border from the Soviet into the U.S. Zone of Germany near Post 10, HOF/Gutenfuerst (M51/J90) on b1 and reported to the HOF (M51/099) Border Police Headquarters.

2. b1 was interrogated by the undersigned Agent at CIC HOF on 13 February 1951, and volunteered the following information:

✓ a. The MVD in BAERENSTEIN, Germany, is located in the forest area approximately 1 mile southwest of BAERENSTEIN on a forest road. The MVD occupies a single kaserne type brick building. It is about 50 yards long, 25 yards wide and one story high. This building was constructed in June or July of 1949. The roof is covered with a gray-black weather proofing material. The building is surrounded by a wooden fence, about 8 feet high and 18 inches of barbed wire on top. This building is also about 1 mile northwest of NIEDERSCHLAG (N51/K72) (See Exhibit "A").

b. Source states that it is common knowledge to the residents of BAERENSTEIN that this is an MVD installation. They have nicknamed it the "Halsabschneider Kaserne" (Kaserne of Cut-throats). The MVD uniform is olive-drab with green shoulder boards. There are about 30 MVD officers and between 400-500 MVD troops stationed at this kaserne. Source stated that he knew this was a battalion with three companies because the MVD marches to the BAERENSTEIN theater every Sunday in three companies to attend Russian films. This is the only recreation the MVD troops are allowed in BAERENSTEIN. They are not allowed to mix with other Russian troops in BAERENSTEIN.

c. Source stated to the undersigned Agent that he had never heard of the MGB, but that there are a few Russian civilians who live in various private residences on Stalinstrasse in BAERENSTEIN. These Russians are, however, called "MVD" by the local BAERENSTEIN population. Source did not know how many of these persons are there.

d. The duties of the MVD unit in BAERENSTEIN consists of checking on illegal border crossers coming from CSR into their Zone of Germany. Two MVD soldiers are generally paired off with two People's Policemen. These teams are stationed all along the BAERENSTEIN border area. The MVD troops are used as guards to the entrances of mine shafts on Objekt No. 7 of Wismuth A.G. in the BAERENSTEIN area. They also act as special night guards and are generally responsible for the security of the mining area. They are often seen by the local population engaged in exercises involving the firing of machine-guns.

e. The weapons of the MVD in BAERENSTEIN consist of Russian type carbines, machine-pistols with drum magazines, and light machine-guns with long clip-type magazines. Source did not know the size or type of these weapons.

born 10 March 1930, in

b1 find with cov. Htr.

b1 illegal border crosser, entered the US Zone from the Soviet Zone near HOF/GUTTENFUERST (M51/J90) on b1 and reported to HOF (M51/099) Border Police Headquarters.

2. b1 was interrogated by the undersigned Agent at CIC HOF on 13 February 1951, and volunteered the following information:

a. Soviet MVD troops occupy a kaserne located approximately 1 mile west of FROHNAU (See Exhibit "A"). The kaserne was built in 1948-1949, (size unknown to Source) and is surrounded by a wooden fence, approximately 8 feet high, with barbed wire on top. The kaserne consists of eight (8) or ten (10) two story brick buildings. The main gate is approximately 800 yards north of the road leading to shaft Number 33b, Objekt No. 7, Wismuth A.G., and is guarded by a Soviet soldier armed with a machine pistol or carbine. (F-6)

b. Approximately 500 to 600 Soviet MVD troops, wearing green shoulder boards, are stationed in this kaserne. (F-6)

c. The Soviet troops stationed in the FROHNAU Kaserne are armed with light and heavy machine guns, machine pistols, rifles and carbines. Source observed six (6) 2½ ton trucks, US make, being used by these troops. (F-6)

d. The duties of the MVD troops consist of guarding installations in the ANNABERG (N51/K73) area, mine shafts of Objekt No. 7, and the uranium ore transported by trucks from the mine shafts to the washing plant located adjacent to the rail road station in ANNABERG. (F-6)

e. These MVD troops are referred to as GPU or NKVD troops by the local population and the employees of Objekt No. 7. (F-6)

3. AGENT'S NOTES:

a. A Region VII Registry check revealed the following:

(1) No record of Source.

(2) Reference is made to the MVD Workbook, Headquarters 66th CIC Detachment dated 5 October 1950, Part I, page 6. The information listed in the Workbook differs from the information contained in this report on description of this installation.

2. Source was interrogated by the undersigned Agent at CIC COBURG
on 23 January 1951 and volunteered the following information:

a. The MVD unit in SUHL (M51/J02) is located at No. 19 Bahnhof-
strasse, two houses east of the SUHL Labor Office, in a three story red
brick building 150 feet long and 40 feet wide. This building is enclosed
by a iron picket fence six feet high. Two MVD soldiers wearing green
shoulder boards, armed with machine pistols, guard the only entrance to
the installation at all times.

b. The strength of the MVD unit in SUHL is approximately 15
officers and ten enlisted men.

c. The function of the MVD unit is to interrogate political
prisoners and provide security for the installations located in SUHL.

d. Source recognized this installation as a MVD unit because
of the green shoulder boards worn by the soldiers stationed there and
through conversation with the local population.

e. The unit is equipped with two vehicles, a US 1/4 ton truck
and a US 3/4 ton truck. Source did not know the license numbers. (F-6)

4. REPORT OF FINDINGS

1. UA b1 born b1 in b1
b1 an illegal border crosser, was expelled by the Volkspolizei (People's Police) on b1 from the Soviet Zone to the US Zone of Germany near TROGEN (M51/J90), where he was apprehended by the TROGEN Bavarian Border Police.

2. b1 was interrogated by the undersigned Agent b1
b1 and volunteered the following information:

a. The MVD headquarters in BAUTZEN (052/A60), Germany, is located at Kant Kaserne Platz, at the northern end of Kantstrasse, in a three-story building about 100 feet long and 70 feet wide. The other buildings near the MVD building are approximately the same size. (See Exhibit "A" - sketch of location of MVD headquarters in BAUTZEN.)

b. The estimated strength is about 40 persons, of whom about 15 are in civilian clothing, and the remainder in MVD uniform. Source named the following officers and employees: (See Personality Annex.) Major fnu KORIKOV, Major fnu SUCHOV, 1st Lt fnu BRATIKOV, 1st Lt fnu CORNELIUS, German interpreter fnu MEISSNER, informant b6, and secretary fnu b6 (F-6)

3. The MVD officers wore an olive drab uniform with black shoulder boards. The guards at the entrance to the building wore armbands with the letters "MVD," and were armed with Russian type machine pistols. Some of the uniformed personnel were armed with the German infantry (M1938) K 98 type rifles. (F-6)

4. Two black Opel "Admiral" automobiles, four black Opel "Cadet" automobiles, and one black DKW automobile were observed parked near the MVD building. (F-6)

5. Source believes the MVD in BAUTZEN to be primarily concerned with espionage, political, and economic and industrial sabotage cases involving German nationals. (F-6)

AGENT'S NOTES:

a. A check of Region VII Registry revealed no information concerning the personalities mentioned in this report.

b. A check of the MVD Workbook, Hq 66th CIC Det, dated 5 October 1950, page 7, under the title: BAUTZEN, revealed that the address of the MVD installation in BAUTZEN as given by Source does not coincide with the addresses given in the Workbook.

RE: Soviet Intelligence Service, Soviet Zone, Germany

4. REPORT OF FINDINGS

1. REASON FOR INVESTIGATION: With reference to Target List, dated 20 Jul 50, Hqs 66th CIC Det, Para D, Section XI, this report concerns MGB offices in the Soviet Zone, Germany.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: This is one report in a series of reports covering the organization, personalities, and activities of the MGB in the Soviet Zone, Germany. The latest prior report was AR, dated 18 Dec 50, file as above, Subj: Organization, Activities, and Personalities of the MGB Offices at DRESDEN, Land Saxony.

3. PRESENT INVESTIGATION: The following information was obtained concerning the MGB offices in LEIPZIG (N52/E 21):

a. An MGB office is located at LEIPZIG-Ronnewitz, Winscheidtstrasse, in the building of the former German army prison. This office has branch offices at:

- (1) The Soviet Kommandatura, LEIPZIG N 22, Doellnitzstrasse 25, room 16;
- (2) The SAG-Grosskraftwerk (power plant) LEIPZIG-Boehlen, administration building, rooms 44 and 56;
- (3) The offices of the Transportation Police at the LEIPZIG main railroad station;
- (4) The German police precinct at Hugo Hase Platz (former Yorkplatz).

b. b1 Sub-source was summoned to the special police precinct in LEIPZIG, Ehrensteinstrasse, and taken to the Kommandatura where she was recruited as an informant and assigned the cover name b1 Later she also met her case officers at the police precinct at Hugo Hase Platz, at the main railroad station, and at the SCC (Soviet Control Commission) Publishing House on Dietrich Ring in LEIPZIG. Her assignments were the surveillance of her fellow workers, the reporting of all anti-communists and anti-Soviets, and ascertaining the names of Soviet officers having connections with German civilians. Sub-source had to report to the MGB every two weeks.

c. The following MGB officers of the LEIPZIG MGB were identified by sub-source:

- (1) Captain Fmu b6: About 32 yrs old, 5'7" tall, dark hair, scarred face.
- (2) Lt Fmu b6: 28-30 yrs old, 5'5" tall, stout.
- (3) Captain Fmu b6: About 25 yrs old, 5'11" tall, slender build, light blond hair.

4. REPORT OF FINDINGS

1. [b1] born [b1] in [b1] was apprehended by the Bavarian Border Police as an illegal border crosser near MELDBURG (M51/019) on [b1]

2. Source was interrogated by the undersigned Agent at CIC office COBURG (M51/028) on 11 January 1951, and volunteered the following information:

a. At WEIMAR (M51/J57) a MVD unit is located in the old State Courthouse (Landgericht) building on the northeast corner of the intersection of Watzdorfstrasse and Ernst Thaelmannstrasse. The strength of the unit is approximately 100 soldiers, the majority of which are officer personnel. Green shoulder boards are worn by the guards, soldiers and officers which are stationed here. (See Agent's Notes) Source stated that he personally does not know any individual stationed at this installation, however, a Colonel who enters and leaves the building regularly is accorded the courtesy that would ordinarily be extended to the Commanding Officer. (F-3)

b. The building itself is an L-shaped construction, 4 stories high, 200 feet long on the south side, 150 feet long on the west side, and is 100 feet wide from the southwest corner to the north east corner. The building is surrounded by a board fence 10 feet high, with electric wires on the top. All windows have been covered with sheet metal. There is one entrance in the fence in the front (south) side of the installation and one entrance in the fence in the rear (north) side, this rear entrance being large enough to allow vehicles to drive through into a driveway located in the rear of the building. The fence entrances are guarded by two MVD soldiers armed with sub-machine pistols, and the inner side of the fence is patrolled at all times. (F-3)

AGENT'S NOTES:

a. A Region VII Registry check revealed no record of the above named Source.

b. Reference is made to Devotion Target Book, Hq 66th CIC Det, 8th Gds Army in WEIMAR, which lists the unit mentioned in this report as target #20.

COMMENTS: Evaluation from ID regarding MVD in this report places this installation in priority II because of the uncertainty of MVD troops actually having AA or any other heavy gun equipment. With data available it is not believed that MVD troops do have heavy gun equipment. The MVD barracks mentioned in paragraph 2 are reported for the first time.

The foll. evaluation applies to the portion relative to the AA emplacements.

1. Needed information is the spacing of guns with distances (sketch), use and identity of any range finding or fire control equipment and gas - electrical - generators.
2. Report is evaluated fair because of lack of completeness.

4. REPORT OF FINDINGS

1. The permanent Soviet anti-aircraft artillery positions located approximately 3 kilometers east-northeast of AUE were observed by Subsource on 24 and 25 November 1950. No changes were noted from information submitted in Agent Report, this office, sub: ~~PERMANENT ANTI-AIRCRAFT POSITION~~ in AUE/ZELLE, and file as above, dated 24 May 1950, except that the four guns mentioned therein are believed to be of the 76MM M-1938 type rather than the previously reported 85MM M-1939 type. The entire area is now inclosed by a high wooden fence. Approximately sixty enlisted men and two officers were observed in the area. On both days of observation alert practice drills were observed being held. The following vehicles were observed leaving the area and driving in the direction of the city center:

69 Γ9 - 85 - 85 Truck, Zis-5, with one red star.

69 Γ9 - 85 - 64 Passenger car, Mercedes.

1 Γ7 - 58 - 39 Truck, new model Zis, with one white star.

1 Γ7 - 58 - 59 Truck, Zis-5, with one red star.

2. Between AUE and NIEDER SCHLEMA (N51/K43), approximately 200 meters west of the main rail line and the Zwickauer Mulde River, Subsource observed two newly constructed Soviet occupied kasernes. It was learned from relatives of Subsource that these kasernes were completed and occupied sometime in the early part of October 1950. It was further learned that the occupation personnel are MVD/400 troops. The kaserne is extremely heavily guarded and all persons approaching the area are stopped and questioned by the guards. An estimate of present occupation strength could not be given, however, all windows in enlisted men's billets were lighted after dark. All observed enlisted men wore green shoulder boards, and it is believed that these troops are stationed here for the purpose of guarding of the uranium mines in the area.

3. The key to the attached sketch of the two kasernes is as follows: (This is only a rough sketch which was made from observations noted while passing through on a train)

- 1 - Three story brick building, approximately 70 meters in length.
- 2 - Three story brick building, approximately 70 meters in length.
- 3 - Recreational area.
- 4 - Small brick building, purpose undetermined.
- 5 - Three story brick building, approximately 70 meters in length.

1. Reference is made to ICM 46-50.

2. The following eye witness information concerning Soviet MVD installations in Germany, partially answers ICM 46-50. A Devotion source reported the information in early December 1950; the date of the information is 28 November to 5 December 1950, and the evaluation is C-3.

a. The Reil Kaserne, located on the east side of Reilstrasse and north of Schopenhauerstrasse in HALLE (D92), continues to be occupied by approximately 100 to 150 MVD troops who wear green shoulder boards. Troops are between twenty (20) and twenty-five (25) years of age and are armed with carbines and rifles. The following activities were observed on the dates and times indicated:

- (1) 28 November: At 1600 hours a truck, /8-59-91 with three (3) men entered the kaserne.
- (2) 29 November: At 1000 hours a group of thirty (30) men armed with rifles with mounted bayonets was assembled in the kaserne yard. At 1630 hours a truck, /8-59-90, carrying sixteen (16) men wearing green shoulder boards, and eight (8) dogs, left the kaserne and proceeded to the airfield.
- (3) 5 December: At 1500 hours a truck, /8-60-04, loaded with chairs and tables,

entered the kaserne. Source counted thirty-six (36) men looking out of the Kaserne windows at this time.

b. The Soviet installation on Margarethenstrasse is now occupied by approximately 100 men, between the ages of nineteen (19) and twenty-four (24), who wear green shoulder boards. On 5 December Margarethenstrasse was blocked off to all civilian traffic by the erection of three-meter high walls at Margarethenstrasse and Hedwigstrasse.

3. No other distribution of this information is being made by this headquarters.

Collection emphasis is marked II because of the uncertainty of MVD troops actually having AA or any other heavy gun equipment. (With data available it is not believed that MVD troops do have heavy gun equipment.) The MVD barracks mentioned in par 2 b. are reported for first time.

1. Reference is made to ICM 46-50.
2. The following eye witness and hearsay information, concerning Soviet MVD installations, is forwarded for your information. A Devotion source reported the information on 1 December 1950, the date of the information is 25 November 1950, and the evaluation is C-3 unless otherwise noted.

a. The permanent Soviet anti-aircraft artillery positions located approximately three (3) kilometers east-northeast of AUE (K53) were observed by source on 24 and 25 November. There are four (4) 76 mm M-1938 guns in the area which is enclosed by a high wooden fence. Approximately sixty (60) enlisted men and two (2) officers were observed in the area, and on both days of observation alert practice drills were held. The following vehicles left the area and drove in the direction of the city center:

✓7-58-39 Truck, new model Zis
✓7-58-59 Truck, Zis-5
✓9-85-64 Passenger car, Mercedes
✓9-85-85 Truck, Zis-5.

b. Between AUE and NIEDER-SCHLEMA (K43), approximately 200 meters west of the main rail line and the Zwickauer Mulde River, source observed two (2) newly constructed Soviet occupied kasernes. The kasernes are heavily guarded and all persons approaching the area are stopped and questioned by the guards. An estimate of the present

occupation strength could not be given, but all windows in enlisted men's billets were lighted after dark. All enlisted men wore green shoulder boards, and it is believed that these troops are stationed here for the purpose of guarding the uranium mines in the area. (It was learned from relatives of source that these kasernes were completed in the early part of October 1950. It was further learned that the occupation personnel are MVD troops. (F-6))

c. The key to the attached sketch of the two (2) kasernes is as follows (this is only a rough sketch which was made from observations noted while passing through on a train):

- 1 - 2 - 5 - 6 - Three-story brick buildings, approximately seventy (70) meters in length.
- 3 - Recreational area.
- 4 - Small brick building, purpose unknown.
- 7 - 8 - Entrances.

3. Although the above report fails to answer all of the requirements of ICM 46-50, it is felt that because of the vehicle numbers and uniform description, the report warranted forwarding.

4. A copy of this report, with inclosed sketch of the two (2) kasernes mentioned in paragraph 2-b and -c, is being forwarded directly to 7880 Military Intelligence Detachment through the CIG courier to BERLIN.

Source, b6, PIR 186, a former captain in the Soviet Army, was reinterviewed on several points in RI-907-50 (CI-181).

Source clarifies to whom and what he reported as an informer of the OGR. Source's comment on their being no difference between OGR and UGR; Germany are in conflict with most previous sources on this subject.

Source clarifies his statements on UVD and CVD elements within a kommandatura, stating that the mission of such elements is control of German police. Very little information has been received on this subject. (compare RI-891-50 (CI 954), source URG-REV, PIR 130)

1. Question: To whom did source report when he was an informer at the Burg Kommandatura?

Answer: During the period that source served as an informer for the MGB at the Burg Kommandatura (April 1949 to March 1950) he reported to two MGB officers. From April 1949 to December 1949, he reported to Capt [b6] who was the operative representative (Operativnomochnyy) for the MGB in BURG (M53/Y81)* and also the assistant to the chief of the Operations Section (Operatsiya) of the Soviet Military Administration - M. (Sovetskaya Voennoye Administratsiya - M.). The chief of the Operations Section was a major whose name is unknown and who is mentioned in SCIC report AT-907-50 (SI-181), paragraph 7b, page 15, dated 24 August 1950. In December 1949 all Kommandaturas in Germany were relieved from military government duties and placed under the control of tactical military units. The Burg Kommandatura was placed under the control of the 304th Artillery Brigade whose headquarters was in BURG. Source does not know what became of Capt [b6].

In December 1949 source was contacted by another MGB representative of the 304th Artillery Brigade and henceforth, until March 1950, made all of his informer reports to this representative who was also a captain but whose name source has forgotten. The two above mentioned MGB representatives were the only ones to whom source reported during his informer work at the Burg Kommandatura.

*Three-character coordinates refer to Map Series G.C. 4546, 1:250,000

2. Question: Did source report to both OMR (army) and the Burg MGB?

Answer: Source states that the OMR and MGB are synonymous terms. One officer at the Burg Kommandatura conducted all of the activities of the OMR and MGB. This was the same officer to whom source made his reports.

3. Question: What did source have occasion to report in the year he was in BURG?

Answer: Source states that he made reports which contained only the morale of the unit and the political views of the officer and personnel. These reports were required by the MGB officer. Reports which source made on individual officers always contained the full name, rank, and military duty of the officer. Source also gave in his reports a brief summary of the political activity and character of the officer. There was no scheduled time for submitting reports nor was source required to submit any certain number of reports. Normally, source submitted written reports once a month. He stated that he never turned in detrimental reports on any individual, although he heard many officers and personnel express unfavorable opinions. Source further stated that he submitted only the reports required by the MGB officer.

4. Correction of statement in SCIC report AT-907-50, page 12, paragraph 6

Source states that the activities of the MGB are more active than the activities of the MVD and it is correct, therefore, to say that the MGB is a "covert" organization. The statement made in AT-907-50 is incorrect and should be changed to read: "the operations of the MGB are 'covert' and, in comparison, the activities of the MVD are 'overt'."

NOTE: This document contains information affecting the national defense of the United States within the meaning of the Espionage Act, 50 U.S.C. 81 and 82, or amended, its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.

5. UVD and OVD Elements Within a Kommandatura

Source has some knowledge of the UVD-OVD organization down to and including the Kommandatura. Source knows that an Internal Affairs Section (Otdel Vnutrennykh Del - OVD) existed in the city of HALLE (M52/D92), Land Saxony-Anhalt (Zemlya Sakseniya-Anhalt). The Halle OVD was under the control of the Directorate of Internal Affairs (Upravlenie Vnutrennykh Del - UVD) in KARLSHAGEN (Berlin) (M53/194). In 1949 the UVD was given the duty of establishing the Volkspolizei in Germany. The Halle OVD had control of the German police in Land Saxony-Anhalt. There was no actual OVD officer in the Burg Kommandatura; however, the Public Safety Officer (Maj b6) was responsible for forwarding to the Halle OVD reports on local German police activities. He, in part, had control over the German police in BURC and put into effect directives and instructions received from the Halle OVD concerning control and operation of the German police.

The OVD in HALLE is located in the headquarters building of the Soviet Military Administration - LMA (Sovetskaya Voennoye Administratsiya - SVA). Source states that in the OVD office there were three or four Soviet officers who were assigned to clerical jobs. Source knows neither the ranks of these officers nor the specific duties performed by them. The mission of the OVD in HALLE included the organization, training, and control of all German police in Land Saxony-Anhalt. Source is primarily within the borders of the U.S.S.R. with the chief mission being police control, criminal investigation, and security for government projects and government installations. The UVD and the OVD were established specifically for the purpose of training and controlling the German police in the Soviet zone.

4. REPORT OF FINDINGS

1. With reference to Target List, dated 20 July 50, Hqs, 66th CIC Detachment, Par D, Section XI, this report concerns MGB offices in the Soviet Zone, Germany.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: This is one report in a series of reports covering the organization, personalities, and activities of the MGB in the Soviet Zone, Germany. The latest report in the series is AR, Subject and file as above, dtd 19 Oct 50.

3. The following information was obtained concerning the offices of the MGB in Land Mecklenburg:

a. WISMAR (M54/T 49):

(1) Sub-source was recruited as an informant for the WISMAR MGB office, located at the "Haus der Marine" at Schminsbueckerstrasse, and received the cover name of b1. A major of the MGB, whose name is not known to sub-source and who is about 45 yrs old, 5' 9" tall, and blond, contacted sub-source b1. Sub-source was ordered to b1. b1 to observe and report all anti-Soviets and anti-communists. He was offered 100 DM (East) at the first meeting with his case officer, who occasionally wears civilian clothes.

b. SCHWERIN (M54/T 46):

(1) Sub-source was recruited as an informant for the SCHWERIN MGB. The interrogation and recruitment was conducted by a MGB officer whose name is unknown to sub-source and took place at the SCHWERIN Land Police Headquarters, Arsenal, in a room on the ground floor. Sub-source, a former German officer, was told that he and a person to whom he would be introduced in due time b1.

Sub-source was told by the MGB officer that his services were needed for work on military and espionage assignments.

COMMENTS: ID states: "This is an outstanding report confirming many items previously known and adding several others. The particular vehicle numbers reported are not, however, known to be in an MVD series. The personalities reported are not confirmed with the exception of Lt Col b1 and Maj b1"

b1

If the source is still operative it would appear that he could offer further information. With reference to Lt Col b6 in paragraph 6-e, does the MVD have an intelligence function in the Sov Zone; who does b6 interrogate, on what subjects. Who apprehends people for him to interrogate; what disposition is made of interrogatees? With reference to paragraph 8, what specific installations do the MVD soldiers guard? Is this their sole mission? What is the relationship of the MVD offices on Planitzstrasse to the MVD troop installations on Viertels Weg; to whom are these installations subordinate?

What specifically does "KEYSON" mean? Only the MVD portions of this report were sent forward. The SOG information did not meet the requirements of IOM 44-50 in that the means of identification as such was not included nor was a strength estimate.

4. REPORT OF FINDINGS

1. REASON FOR INVESTIGATION:

The information reported herein pertains to the security and/or intelligence agencies of the Soviet occupation forces in the East Zone of Germany, a target of this Region, as directed by paragraph 65a, Section III, Consolidated Orientation and Guidance Report, Hqs., 7970th CIC Group, dated 9 July 1948, as currently amended.

2. SYNOPSIS OF PREVIOUS INVESTIGATION:

Reference is made to the continuing series of reports submitted by this Headquarters regarding Soviet Zone Intelligence and Security Agencies.

3. PRESENT INVESTIGATION:

MGB Headquarters in ERFURT (M51/J36) are located at Am Anger, east of Parkplatz and directly south of "Ursulinenkloster" (Ursulinen Nunnery) and church which are at the corner of Fromsdorfstrasse and Anger (EXHIBIT "A"). The building housing the MGB is a large residential type house without fencing. No guards were observed by Source, either at the building entrance or around its perimeter. The above MGB Headquarters was formerly located at ERFURT Regierungsstrasse 73 im Regierungsgebäude, rooms twenty-four (24) to thirty (30) having moved to its present address around July 1950, according to Source. For personalities of this installation, see attached ANNEX "A".

4. A branch MGB Headquarters is located in ERFURT on Cyriaksburg between Hauptweg der Gartenschau and Cykiakstrasse, across from Bergstromweg (EXHIBIT "B"). The building housing this branch was described by Source as being very tall, bounded on its perimeter by a wooden fence two (2) meters high, topped by three (3) strands of barbed wire strung at an outward angle of forty-five (45) degrees, and having its main entrance facing southeast. Source alleged that the MGB units housed in aforesaid building, were engaged in counter intelligence ("Abwehr"), counter espionage ("Spionage-Abwehr") and counter sabotage ("Sabotage-Abwehr").

REMARKS			

SOURCE An untested source.

1. On 23 October 1950, an MVD unit was observed to be quartered in a six-house compound on an unnamed street located about 500 meters northwest of the railroad station of Siegmars-Schoenau near Chemnitz (N 51/K 66). The MVD compound was situated within a residential area occupied by German civilians. The street section running through the compound was blocked by wooden gates and guarded by personnel wearing red-bordered green epaulets. In the evening the windows of all six houses of the compound were lighted. The houses seemed to have two apartments each. Trucks C 5-78-36, C 5-79-11 and C 5-79-20 were identified there. *

* Field Comment. The report confirms an MVD compound which, in a report of the summer of 1949, was described as being located on Rosmarinstrasse, between Rathausstrasse and Limbachstrasse. See (Gen Proj) MGL-2048. Since it appears doubtful that an MVD unit should have been quartered in the small six-house compound, it is believed that an MVD guard detail or an MVD office, possibly of the Wismuth Corporation, may be located there. One of the trucks identified there belonged to an MVD unit which is quartered in the Artillerie Kaserne, Chemnitz. For location sketch see Annex.

2. The following eye witness and hearsay information and the inclosures, concerning a Soviet MVD installation in ADORF (M51/K20), are forwarded for your information. A casual source of this organization, who was formerly a resident of ADORF, reported the information on 30 October 1950. The date of the information is from 13 October to 25 October 1950 and the evaluation is F-6.

a. The MVD (Soviet Ministry of Internal Affairs) Headquarters for ADORF is located in the former City Finance Office Building at Bismarkstrasse 9. The offices of the MVD are located on the first floor of this building and the second story is used as living quarters. The use of the third story is unknown to source. The building is about forty (40) meters long, fifteen (15) meters high, and about fifteen (15) meters wide. It has a basement and stands three (3) stories high. There is a parking space in the rear. (See Exhibits "A", a sketch of the MVD headquarters building, and "B", a sketch showing the location of the MVD headquarters building in ADORF.)

b. The strength of the MVD in ADORF is fourteen (14) to fifteen (15) men. Five (5) or six (6) of these are in uniform and the remainder are in civilian clothing. They are the only Soviets stationed in ADORF.

c. The MVD in ADORF arrests anti-Communists condemned by the local SED. These people are then transferred to the next higher headquarters of the MVD in OELSNITZ (M51/K11) for detailed interrogation. Two (2) local SED figures were recently arrested by the MVD, namely: Kurt ROTTMANN and Robert ROSSBACH (see Personality Annex).

d. Source could give no names or personalities of the MVD in ADORF.

e. The Soviets in the MVD in ADORF carry 7.65 Walter pistols when in uniform. They also have machine-pistols, which have drum type magazines (caliber unknown), when they are posted on guard duty. There is one (1) guard on duty just inside the entrance to the MVD building at all times.

f. This MVD office has about five (5) or six (6) civilian type automobiles. Source stated that they have one (1) large "Merch" automobile, but could not give further details on any of the other vehicles. He stated that they have no military vehicles.

g. The Commandant of the MVD in ADORF is a Soviet Lieutenant. Source could not give any information or description of the officer.

h. The uniform of the MVD in ADORF has black shoulder boards with red piping and the hat is green with a black shield. The jacket is a neat, well-cut long blouse with breast pockets and is dyed a dark-reddish brown; the collar is straight and reddish in color and the ends of the jacket sleeves have a red patch with a gold button. There are about eight (8) gold buttons on the jacket, closely spaced. The trousers are either black or brown. The black trousers have a red stripe on the outside of the leg. The pistol is worn on the right side of the body on either a black or brown belt. The boots are black and reach about half-way to the knee. A heavy brown leather overcoat for winter wear is worn with the brown or black belt. The overcoat is long, reaching below the knees when worn.

i. The MVD troops in town are entertained by an [b6] nee [b6] residence is located on Bismarkstrasse next to the MVD office, the building being separated by the MVD's driveway. Descriptions of other individuals in the Personality Annex were obtained through life-long association with these people since ADORF is source's home town.

4. It is realized that the uniform description fails to definitely identify the unit as MVD as required by IOM 46-50; however, because of the effort to fill as many of the required EEI as possible, the report is considered worthy of being forwarded. This headquarters has a minimum of information on any such installation in ADORF.

4. REPORT OF FINDINGS

1. REASON FOR INVESTIGATION: With reference to Target List, dated 20 July 50, Hqs, 66th CIC Detachment, Para D, Section XI, this report concerns MGB offices in the Soviet Zone, Germany.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: This is one report in a series of reports covering the organization, personalities, and activities of the MGB in the Soviet Zone, Germany. The latest report in the series is AR, Subject: MGB Informants, Land Saxony-Anhalt, file as above, dated 2 November 1950.

3. PRESENT INVESTIGATION: The following information was obtained concerning the MGB office at OSTERBURG (M53/Y 77):

a. The OSTERBURG MGB office is located in a single house on Bahnhofstrasse which formerly contained an insurance agency. The members of the above office drive a dark green "Opel" passenger car with license No M 1089.

b. Sub-source was recruited as an informant for the OSTERBURG MGB office and was ordered to observe certain persons and to report all anti-communistic activities. He usually met his case officer, a lieutenant whose name he didn't know, in the forest near GENZIN-ARENDSEE.

c. The following persons allegedly work for the MGB in OSTERBURG:

(1) b6 ^{NR} Head of a DDR trade organization in ARENDSEE; resides in ARENDSEE, Schulstrasse.

(2) b6 ^{NR} SED Chairman and school headmaster in ARENDSEE (M53/Y 58).

(3) b6 ^{NR} Resides at ARENDSEE.

3. REMARKS:

If possible reinterrogate source to determine the following:

(a) does the "large building on the 600 block of Luisenstr" correspond to school building located on city map of HALLE in area bounded by Luisenstr, Sophienstr, Hedwigstr, and Margareten Str.

(b) The APO number 30055 is not listed in any reference material on hand at this headquarters. Is source sure of it?

(c) Can source identify shoulder boards and insignia worn by the personnel other than Exhibit "A" attached to subject report?

(d) Did ☐ b6 say he worked for GPU or MGB in DRESSEN (W52/F 29)?

(e) Can source remember any other vehicle numbers beginning with B, C, E, / followed by five (5) digits?

It appears somewhat dangerous to this headquarters to assume that what such a low-level source as ☐ b1 calls GPU is MGB, as was done in this report. If the installation is anything, it is probably MVD.

It is suggested that a Y-type informant check subject installation next time HALLE is visited.

4. REPORT OF FINDINGS

1. AK
b1 born b1 in b1
b1 an illegal border crosser, was expelled from the Soviet Zone on b1
b1 by the Volkspolizei (Soviet Zone People's Police) near HEINERSGRUEN (M51/K00).
b1 reported to the HOF (M51/099) City Police and was referred to CIC HOF on 30 October 1950.

2. Source was interrogated by the undersigned Agent at CIC HOF on 30 October 1950, and volunteered the following information:

✓ a. The MVD (Soviet Ministry of Internal Affairs) Headquarters for ADORF Germany is located in the former City Finance Office Building at Bismarkstrasse 9. The offices of the MVD are located on the first floor of this building. ~~It is used by MVD personnel only.~~ (The building is about 40 meters long, 15 meters high, and about 15 meters wide. It has a basement and stands 3 stories high.) The second story is used as living quarters. Use of the third story was unknown to Source. There is ~~a space for parking~~ in the rear of the building. (See Exhibit "A" - sketch of MVD Hqs building in ADORF, Germany; also, See Exhibit "B" - sketch showing location of MVD Hqs building in ADORF, Germany.).

3. b1 stated that the strength of the MVD in ADORF is 14 to 15 men. Five or six of these are in uniform, and the others are in civilian clothing. They are the only Soviets stationed in ADORF.

4. The MVD in ADORF arrests anti-Communists condemned by the local SED. These people are then transferred to the next higher headquarters of the MVD in OELSNITZ (M51/K11), for detailed interrogation. Two local SED figures were recently arrested by the MVD, namely: Kurt ROTMANN and Robert ROSSBACH (See Personality Annex).

5. Source could give no names or personalities of the MVD in ADORF.

6. The Soviets in the MVD in ADORF carry 7.65 Walter pistols when in uniform. They also have machine-pistols with drum type magazine (caliber unknown) when they are posted on guard duty. There is one guard on duty, just inside the entrance to the MVD building, at all times.

7. The MVD in ADORF has about 5 or 6 civilian type automobiles. Source stated that they have one large "Horch" automobile, but could not give further details of any other vehicles. He stated that they have no military vehicles.

8. The Commandant of the MVD in ADORF is a Soviet Lieutenant. Source could not give any information or description of him.

9. The uniform of the MVD in ADORF has black shoulder boards with red piping. The hat is green with a black shield. The jacket is a neat, well-cut long blouse with breast pockets and is dyed a dark, reddish brown. The trousers are either black or brown. The black trousers have a red stripe on the outside of the leg. The pistol is worn on the right side of the body on a black or brown belt. The boots are black and reach about half-way to the knee. The collar is straight and reddish in color. The ends of the jacket sleeves have a red patch with a gold button. There are about 8 gold buttons on the jacket, closely spaced. A brown leather overcoat (heavy) for winter wear is worn with the brown or black belt. The overcoat is long, reaching below the knees when worn.

10. The MVD troops in ADORF are entertained by an [b6] nee [b6] residence is located on Bismarkstrasse next to the MVD office, the buildings being separated by MVD's driveway. She has three friends who come to her room when the Soviets are entertained, namely: [b6] nee [b6] and her sister [b6] father is Stadtsbaumeister (City Construction Engineer) for ADORF, one Frau [b6] (See Personality Annex).

11. AGENT'S NOTES:

a. A Region VII Registry check revealed the following information:

(1) [b1] is mentioned in ARS, Region VII, file VII-1434, dated 2 November 1950, SUBJECT: URANIUM MINES AND MINING, SOVIET ZONE (GENERAL).

(2) Robert ROSSBACH is mentioned in ARS, Region VII, file VII-1784, dated 14 March 1950, SUBJECT: SOVIET ZONE OB, MVD UNITS AT OELSNITZ. WF by bu-4316 D 248704 31 MAR 50.

b. Reference is made to the MVD Soviet Zone Workbook, Hqs, 66th CIC Det, dated 6 October 1950. A check of page 6, gives the strength of the MVD at ADORF at about 20 persons, with an evaluation of F-6.

c. Comments: Source obtained the information in this report through observation and conversations [b1]

b1

d. Source was referred to the HOF City Police Headquarters on 30 October 1950, for further disposition through normal German refugee channels.

Reference is made to par b of the report which deals with the well known Viertels Weg installation. "Soldiers of the MVD unit are used as guards for MVD and other Soviet installations". What specific installations? Is this their sole mission? What is the relationship of the MVD offices on Planetzstr to the MVD troop installation on Viertels Weg. To whom are these installations subordinate?

- (10) Capt (Fnu) [b6] exact position unknown, forty (40) years of age, 5'7" tall, black hair.

b. Source stated that the block encompassed by Viertels Weg, Jonny Schehr Strasse, Fritz Reuter Strasse, and Olbricht Strasse contains several large buildings that were formerly a German Army Kaserne. The area is divided into three (3) sections (see inclosed map of LEIPZIG; coordinates E-2). One (1) section is occupied by Soviet MVD units, another section is occupied by German police, and the third section is a firing range. The last two (2) entrances on Viertels Weg are used as entrances to the MVD compound. A large wooden fence has been constructed at the point of the intersection of Viertels Weg and Olbricht Strasse, thereby making it impossible to gain entrance to the MVD building except by going down Jonny Schehr Strasse and turning left into Viertels Weg. The following vehicles were observed leaving the MVD compound:

SL 33-23-83 Truck (not listed in the Vehicle Numbering Digest).

N 40-55 Sedan (not listed in the Vehicle Numbering Digest).

Soldiers of the MVD unit are used as guards for MGB and other Soviet installations.

3. None of the personalities mentioned above is included in any reference material on hand.

4. Although it is realized that the above information neglects to specify the means of identifying the units as MVD as directed by ICM 46-50, it is felt that the accuracy of location of the installations warrants the forwarding of the information.

5. It is requested that the attached map of LEIPZIG be returned to this headquarters upon completion of your evaluation. This headquarters is in receipt of only one (1) copy. As soon as another is received, it will be forwarded to you.

6. A copy of this report, less inclosure, is being forwarded directly to the 7880th Military Intelligence Detachment through the CIC courier to BERLIN.

1. Forwarded for your information is the following eyewitness report and inclosure concerning the MVD unit in the Reil Strasse Kaserne, HALLE (KS2/D 92). The information is the result of further interrogation of b1 the source of a CIC report forwarded to your headquarters on 16 October 1950, subject and file number as above. The information is dated 1 May 1950, was reported 17 October 1950, and is evaluated F-6.

a. The personnel now undergoing training in the Reil Strasse Kaserne are all replacement personnel, who arrived in HALLE during the months of May through August 1950. The previously assigned personnel were returned to the USSR on rotation during the same months, since their tours of duty had started immediately after the occupation was begun in 1945.

b. The uniforms worn by all personnel in this unit were regulation Soviet army uniforms, the only difference being that personnel performing administrative duties in the unit wore silver stars on green shoulder boards with silver piping and the personnel involved in training the new recruits wore gold stars on green shoulder boards with gold piping.

c. Source did not know of any personnel in this unit who were dressed in civilian clothes, although she had heard that the unit maintained surveillance over politically unreliable personalities in high governmental positions. Source, however, could offer no actual details of such activities.

d. The actual training in the kaserne area was of a purely military nature, e.g., basic military drill, weapons drill, etc. In addition, there was some training with dogs; however, this was all carried on in training areas which had been set up outside the city limits. The training teams would leave the kaserne in the morning with the dogs and would not return until the evening. In the opinion of source, these men were being

trained for permanent duty in the unit itself, and during the time that she was there, the only personnel who left the kaserne went to EISLEBEN (M52/D 63). There seemed to be a constant rotation between the kaserne and a unit, designation unknown, in EISLEBEN. A few personnel, possibly twenty-five (25) go to EISLEBEN, and twenty-five (25) others return. Source thinks that they are all permanent members of the HALLÉ unit.

e. Source was not in possession of any information relative to use of German civilians as informants, the higher headquarters of the unit, the unit designation, license numbers, APO, or the exact purpose of the unit. Source did state that there were approximately six (6) automobiles and four (4) small trucks in the unit motor pool.

f. Attached herewith as Exhibit "A" is a sketch of the entire kaserne area as described by source.

2. It is difficult to understand how source, who was supposedly employed in the Reil Kaserne from November 1947 until the end of April 1950, could provide the information indicated on the attached Exhibit "A", which is so at variance with city maps of HALLÉ on file at this headquarters. According to the maps, Messauer Strasse and Ludwig Wucherer Strasse are blocks removed from the Reil Strasse Kaserne. However, this report is forwarded for your information.

3. Request an evaluation sheet from your headquarters on the two (2) reports furnished by source concerning the Reil Strasse Kaserne.

1. The eyewitness and hearsay information concerning a so-called GPU unit in HALLE (M52/D 92) and contained in the following paragraphs is forwarded for your information. The information was furnished by

b1

a. The GPU unit that operated the farm on [b1] is located in a large building in the 600 block of Luisenstrasse, HALLE. The building is about 250 meters from Steintor Platz.

b1

when in the building, that there were also cells for detaining people. German employees informed [b1] that HALLE was the main office for the GPU in Land Saxony-Anhalt.

b. The GPU officers reside in a Casino across Luisenstrasse from the the GPU offices. [b1] did not know how many officers were stationed in HALLE, as the strength varies daily. German employees of the Casino told [b1] that the GPU officers come and go to MAGDEBURG (M53/Y 60) and LEIPZIG (M52/Z 21).

c. [b1] stated that the farm had three (3) trucks and that the license number M 67-76 was used on all of them. On passenger cars of the unit [b1] observed license numbers ranging from M 67-350 to M 67-400. (None of these license numbers are listed in the Vehicle Numbering Digest.)

d. [b1] knew the following personalities to be connected with the GPU in HALLE:

- (1) [b6] a Soviet Major, Chief of the GPU unit in HALLE from 1948 to December 1949. [b6] was recalled to the USSR after it was discovered that he sold products of the farm for his personal use and shipped some mechanic's tools to his home in the USSR.
- (2) [b6] who has been Chief of the GPU in HALLE since December 1949. [b6] is about thirty-six (36) years of age, 5'7" tall, and is slim. He has a thin face and blond hair which is parted on the side. He was addressed as "Colonel" by the German employees, but wore strange shoulder boards. (See Exhibit "A".)
- (3) [b6] a former lieutenant (and possibly still an officer) is the GPU. He wears solid green shoulder boards with no other insignia or decorations. [b6] told [b1] that he was formerly with the GPU in DRESDEN (NS2/P 29), but was demoted because he misappropriated funds. [b6] is twenty-nine (29) years of age, 5'6" tall, and very sturdily built. He has blond hair combed straight back and a round face. [b6] was a policeman in MOSCOW, USSR, during the period when he was eighteen (18) to twenty-one (21) years old, and has been in the GPU since.

e. In a large villa on Magdeburg Landstrasse, in Grube Ferdinand (which is four (4) kilometers west of the center of HALLE), is a twenty-eight (28) man communications unit. This unit is building new telephone lines from HALLE to MAGDEBURG. Work on this project began in July 1949 and is still continuing. The sixteen (16) line telephone connection follows the Hauptland Strasse from HALLE to MAGDEBURG. The wires are strung on wood poles, about twelve (12) meters high, which have four (4) cross arms.

2. According to reference material on hand in this headquarters there is an MGB installation in HALLE located at Luisenstrasse 5, 6, and 7. There is also an MVD unit on the same street in a school building located in the area bounded by Luisenstrasse, Sophienstrasse, Hedwigstrasse and Margaretenstrasse. None of the above personalities are included in any reference material available at this headquarters. Further interrogation of source has been requested in order to establish if possible whether this unit is MGB or MVD.

4. REPORT OF FINDINGS

1. REASON FOR INVESTIGATION:

b1 while processing through the GIESSEN (151/G62) Refugee Center, offered information relative to the MGB Kaserne, HALLE (M52/D92), Reilstrasse. Further details on the original information were requested by Lt. b6 in TWX #F-5306, Headquarters, 66th CIC Detachment, USAREUR, dated 13 October 1950. The following investigation was initiated to complete this information and obtain further details.

2. SYNOPSIS OF PREVIOUS INVESTIGATION:

Reference is made to Agent Report, this Headquarters, Subject: MGB Training Kaserne in HALLE, File Number as above, dated 9 October 1950. b1

b1

b1 indicated that training of MGB personnel was being carried on in this Kaserne. Personalities assigned to the unit in this Kaserne were also identified by b1 and information given in relation to their positions within the unit.

3. PRESENT INVESTIGATION:

Background data on Source of this information was submitted in previous above cited report, this Headquarters.

4. The personnel now undergoing training in the Reil^Sstrasse Kaserne are all replacement personnel, who arrived in HALLE during the months of May through August 1950. The previous assigned personnel were returned to the USSR on rotation during the same months, since their tours of duty had started immediately after the occupation was begun in 1945.
5. The uniforms worn by all personnel in this unit were regulation Soviet army uniforms, the only difference being that personnel performing administrative duties in the unit wore silver stars on green shoulder boards with silver piping and the personnel involved in training the new recruits wore gold stars on green boards with gold piping.
6. Source did not know of any personnel in this unit who were dressed in civilian clothes, although she had heard that the unit maintained surveillance over politically unreliable personalities in main governmental positions. Source, however, could offer no actual details of such activities.

7. The actual training in the Kaserne area was of a purely military nature, e.g., basic military drill, weapons drill, etc. In addition, there was some training with dogs; however, this was all carried on in training areas which had been set up outside the city limits. The training teams would leave the Kaserne in the morning with the dogs and would not return until the evening. In the opinion of Source, these men were being trained for permanent duty in the unit itself, and during the time that she was there, the only personnel who left the Kaserne went to EISLEBEN (M52/D63). There seemed to be a constant rotation between the Kaserne and a unit, designation unknown, in EISLEBEN. A few personnel, possibly twenty-five (25), go to EISLEBEN, and twenty-five (25) others return. Source thinks that they are all permanent members of the HALLE unit.
8. Source was not in possession of any information relative to use of German civilians as informants, the higher headquarters of the unit, the unit designation, license numbers, APO, or the exact purpose of the unit. Source did state that there were approximately six (6) automobiles and four (4) small trucks in the unit motor pool.
9. Attached herewith as EXHIBIT "A" is a sketch of the entire Kaserne area as described by Source.
10. Source also gave the following locations of Soviet units in the HALLE area:
 - a. ~~The main SKK office for Stadt HALLE is located at the corner of Berlinerstrasse and Hindenburgstrasse, facing on Am Steintor Platz. The personnel in these offices wear red shoulder boards and, according to Source, perform all the duties relative to the economic regulations for the city.~~
 - b. ~~Another SKK office is located on Neuwerk and Robert Franz Strasses. Source knew nothing of this office other than that there were a great number of Soviet personnel there. Directly across the street from this headquarters is a Politische Lehrgang Schule (Political Training School) which is run by the Soviets. Instructors in this school are allegedly extremely reliable Germans; reliability being construed to mean politically.~~
 - c. ~~The airfield on the north side of Eisleber Chaussee at the edge of HALLE is also manned by Soviet air troops. The only information Source could give on this unit was that the shoulder boards worn by the troops were black.~~
11. UNDEVELOPED LEADS AND FUTURE ACTION:

None.

4. REPORT OF FINDINGS

1. With reference to Target List, dated 20 July 50, Hqs 66th CIC Detachment, Par D, Section XI, this report concerns MGB offices in the Soviet Zone, Germany.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: This is one report in a series of reports covering the organization, personalities, and activities of the MGB in the Soviet Zone, Germany. The latest report in the series is AR, Subj: and file as above, dtd 18 Sep 50

3. The following information was obtained concerning MGB offices in Land Mecklenburg:

a. SCHWERIN (M54/T 36):

(1) Sub-source was recruited as an informant and given the cover name of [b1]. He was interrogated by an MGB major at the SCHWERIN Police Praesidium at Schweriner Arsenal. Sub-source had been recruited previously in 1948 but was not contacted by the MGB again [b1]

[b1]

[b1]

(2) Sub-source was ordered to report all anti-communists and any remarks directed against the German/Polish Oder-Neisse border. Later he was to receive assignments in West-BERLIN but evidently was not considered trustworthy enough to do such work. He was promised 200-300 DM (East) for each item of valuable information.

b. ROSTOCK (M55/O 81):

(1) On [b1] sub-source was taken by a German criminal police officer to the criminal police office ROSTOCK, on Ulmenstrasse, where he was interrogated and recruited as an informant by an MGB officer. This officer, whose name and rank are unknown, is about 25 yrs old, 5' 9" tall, of slender build, has short blond bushy hair, pock-marked face; is very intelligent; understands German but does not speak it; usually wears civilian clothes.

(2) In order to deliver his reports, sub-source had to telephone the above mentioned MGB officer from the criminal police office and arrange for a meeting.

7. Source stated that the block encompassed by Viertels Weg, Jonny Schehr Strasse, Fritz Reuter Strasse, and Olbricht Strasse contains several large buildings that were formerly a German Army kaserne. The area is divided into three sections (See Exhibit "A" co-ordinates E-2). One section is occupied by Soviet MVD units, another section is occupied by German Police, and the third section is a firing range. The last two entrances on Viertels Weg are used as entrances to the MVD compound. A large wooden fence has been constructed at the point of intersection of Viertels Weg and Olbricht Strasse thereby making it impossible to gain entrance to the MVD building except by going down Jonny Schehr Strasse and turning left into Viertels Weg. The following vehicles were observed leaving the MVD compound:

M-40-55 sedan (not listed etc.)

OL 23-23-83 truck (not listed etc.)

8. There are approximately 400 Soviet MVD troops billeted in the compound mentioned in para 7. The exact location of this unit is on Olbrichtstrasse 1-3. The APO number of this unit is 41 510. (not listed etc.) The commanding officer of this MVD unit is Lt Col fnu b6 he is approximately 37 yrs old; heavy build, bald. Soldiers of the MVD unit are used as guards for NGE and other Soviet installations.

9. Soviet officers control the IEIPZIG railroad station platform for possible Soviet deserters.

4. REPORT OF FINDINGS

1. With reference to Target List, dated 20 July 50, Hqs, 66th CIC Detachment, Par D, Section XI, this report concerns MGB offices in the Soviet Zone, Germany.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: This is one report in a series of reports covering the organizations, personalities, and activities of the MGB in the Soviet Zone, Germany. The latest report in the series is AR, Subject and file as above, dtd 6 Sept 50.

3. PRESENT INVESTIGATION: The following information on MGB offices and personalities, as well as missions, was obtained by this office.

a. SCHWERIN (M54/T 46):

(1) Sub-source, a former German officer, was contacted by the MGB in 1947 and 1948 [b1]

[b1] in SCHWERIN. He was recruited as an informant and ordered to take up connections with former fellow officers and to obtain information concerning any military activities by the West German government and the Western Occupation Forces. Sub-source consequently obtained a transfer to a rural district and remained unmolested until the spring of 1950, when he was again approached with new assignments by two MGB officers who were supervised by a certain 1st Lt. [b6]. Sub-source subsequently fled from the Soviet Zone.

(2) 1st Lt. Fnn [b6] of the SCHWERIN MGB is about 30-35 yrs old, of slender build, medium height, has a thin face, speaks German with a Russian accent; he has been seen wearing a uniform as well as civilian clothes; he is Jewish. (According to AR, file as above, 1 Mar 50, [b6] was to be transferred from SCHWERIN to the USSR.)

✓(3) Another alleged MGB officer, Major Fnn MATUSOV, is assigned to the SCHWERIN Kommandatura as supervisor for the schools of Kreis SCHWERIN; he is about 45 yrs old, short, stocky build, has smooth dark blond hair, speaks some German; usually wears a uniform.

b. FUERSTENBERG (M54/U 52):

(1) The FUERSTENBERG MGB office is located on Gartenstrasse. The building and the nearby Wallstrasse are surrounded by a fence.

- ✓ (2) Sub-source was recruited as an informant with the cover-name of [b1] and was ordered to make reports on the political attitude and conversations of all persons frequenting the Gaststaeite of KNOBEL on Thaelmannstrasse. The Soviets were especially interested in members of the LDP and NDP and the members of private athletic or sport clubs. Sub-source was promised financial support.
- ✓ (3) Sub-source was met once weekly at the restaurant by his case officer, Major Fnu [b6] who is about 38 yrs old, of stocky build, has reddish hair, and usually wore civilian clothes.
- ✓ (4) Another officer of the FUERSTENBERG MGB office, whose name and rank are unknown, is about 30 yrs old, 162-165 cm tall, slightly corpulent, has dark hair, and speaks German with a Russian accent.

4. The following MGB informants or possible MGB contacts were identified in Land Mecklenburg:

a. ROSTOCK (M55/O 81):

- (1) The ROSTOCK MGB uses new BMW passenger cars with the license numbers M 81 82 up to M 81 89 at their weekly meetings with the MGB informants. These cars were frequently seen at the residences of the following persons:
 - ✓ (a) Fnu [b6] Officer of the Criminal Police; resides at Dornbeuthstrasse 9.
 - ✓ (b) Frau Fnu [b6] Formerly lived at Dornbeuthstrasse 9; present address unknown.
 - ✓ (c) Fnu [b6] Merchant; resides on Dethardingerstrasse.
 - ✓ (d) Fnu [b6] Owner of a cigar store on Massmannstrasse.
- ✓ (2) Fnu [b6] Originates from the Baltic region; previously he was chief interpreter at the Kommandatura and has now a leading position at the ROSTOCK magistrate.

b. LOETZ:

- ✓ (1) [b6] Until 1948 he was Chief of Police in LOETZ; he is now a laborer; about 40 yrs old.

CIC Region VIII 7 September 50

✓(2) Wilhelm SEIDEL: Former mayor of LOETZ; he works now as a stone-mason; about 43 yrs old. _____

(3) Both of the above persons caused the arrests in 1945 of more than 100 persons who were subsequently placed in concentration camps. Recently they fled to West-BERLIN (N53/Z 75) where they intend to register as political refugees.

c. DEMMIN (N54/P 50):

✓(1) [b6] SED member; he is a shoemaker by occupation; resides on August Bebel Strasse; has connections with the MGB.

✓(2) [b6] Operates a clothing business.

✓(3) Fnn [b6] Member of the DEMMIN Office of the Ministry for State Security; previously was assigned to the International Pass Section of the People's Police where he worked on assignments by the MGB.

✓(4) Fnn [b6] Photographer; ardent communist; it is believed that he has connections with the MGB; active denunciator.

Report No: 331

- (1) Target: Soviet Occupation
- (2) Location: MEININGEN (M51/H32)
- (3) Date of Information: 1 to 5 August 1950
- (4) Information Obtained by Participation Eye Witness X Hearsay X
- (5) REPORT:

a. The former Barbara Kaserne (Target # 8): This kaserne is located in the north east section of the town on the north side of Utenderferstrasse. Subject kaserne was constructed in 1935 and is presently in very good condition. Soviet troops from this kaserne are presently participating in maneuvers in the OERDHOFF area (M51/J15), leaving behind only a small guard unit.

b. The former Haupt Kaserne (Target # 6): Subject Kaserne is located north of the city center and bordered on the east by the railroad to EISENHACH (L51/H76), on the south by Knochenhauer strasse and on the west by Leipzigerstrasse. This kaserne is presently occupied by 750 Volkspolizei who are armed with hand weapons.

c. Firing Range (Target # 2): Subject range is located north east of the town center approximately 500 meters east of the Drachenberg Kaserne (Target # 1). Subject range is presently used as a hand weapon firing range for Soviet troops and Volkspolizei.

d. Training Area: Subject area is located south west of MEININGEN on the south side of the road leading from DREISSIGACKER (M51/H32) to GLEIMERSHAUSEN (L51/H31). This area is used mostly for night problems by troops in the MEININGEN area.

e. MVD/MQB (Target #11): Subject installation consists of three buildings located on Adelheidstrasse at the junction of Saarbrueckenerstrasse in MEININGEN. See attached sketch for exact location and approximate size of area. The main headquarters of Subject unit are located in WEIMAR (M51/J37). The strength of this unit varies but at time of observation it was estimated to be about 10 men, who are believed to be billeted in buildings marked # 2 and # 3 on attached sketch. The personnel chief of this unit is a Captain b6 (German spelling) who is approximately 30 years of age, 5'7" and weighs about 190 lbs. This captain uses a Mercedes 2 liter passenger car with the license number T48 - 36. No German civilians are employed by this unit. An interrogation room is located in a room on the ground floor of the building marked #2. The MVD/MQB jail is located in the cellar of the same building. All apprehended illegal border crossers are taken to the arrest house known as Oberes Tor, which is located at the end of Anton Ulrichstrasse (Target # 15). When they come under suspicion of the MVD/MQB, the

illegal border crossers are interrogated by the NVD/MGB chief through a woman interpreter named [b6] who is a Polish national. This woman recently acquired the rank of police sergeant and she is said to be quite influential in the NVD/MGB organization in MEININGEN even to the extent of formulating plans for NVD/MGB agents operating in the American Zone of occupied Germany. The following two men are suspected of being NVD/MGB agents:

- (1) [b6] German citizen living at Freitagsgasse, MEININGEN.
- (2) [b6] living in OBERMASSFELD (M51/BB2) which is located south of MEININGEN. [b6] is employed as a laboratory technician by the Santhof Molkerei.

f. The following is the key to attached sketch:

- (1) - Brick building, presently unused.
- (2) - Brick building, presently used as offices, billets, interrogation room and jail.
- (3) - Brick building presently used as offices and billets.
- (4) - Guard post.

has given this office a large amount of information during interrogation. Most of the information would appear to be accurate from the reports of other sources which are on file at this office.

3. An examination of the MGB Workbook, dated 15 December 1949, and the Devotion Target Book show that the two do not agree on the location and other descriptive data concerning the MVD/MGB office in MEININGEN. The information in this report, as stated, is almost identical with that contained in the letter reference. This tends to show that the MGB Workbook is outdated. It is recommended that the appropriate changes to the MGB Workbook be disseminated to other regions who would not be able to obtain the corrections by contact with illegal border crossers and other means.

Re: Soviet MGB/MVD Office in MEININGEN (M51/H88)

4. REPORT OF FINDINGS

1. The following information was submitted by [b1] born [b1] in [b1] who crossed the US-Soviet border illegally on 24 July 1950 near FLADUNGEN (L51/H71).

2. The location of the MVD/MGB office in MEININGEN, as shown in Exhibit "A", is on the corner of Neun Kirchnerstrasse and Saarbrueckenerstrasse. 1st Lt. [b6] family resides next to the MVD office on the Neun Kirchnerstrasse. (F-3)

3. The MVD/MGB office building is approximately 10 meters wide on the side facing Saarbrueckenerstrasse and approximately 15 meters long on the side facing Neun Kirchnerstrasse. It is two stories high. Cells in the cellar of this building are sometimes used to hold suspects who are subjected to day and night interrogations. The cellar windows are the only windows on the office building which are barred. The entrance to the office building is on Neun Kirchnerstrasse. (F-6)

4. The office building and [b6] residence are enclosed by a single fence. The fence on the Saarbrueckenerstrasse side is approximately 20 Meters wide and on the Neun Kirchnerstrasse side is approximately 100 meters long. The fence is constructed from woven wire and is approximately 4 feet high.

5. The office building is guarded by two Soviet enlisted men who stand at the building entrance in the daytime. During the hours of darkness one Soviet enlisted man stands at the entrance of the office building and the other maintains a walking post around the fenced enclosure. Sentry duty is continuous day and night. (F-3)

6. To gain entrance to the MVD/MGB building one states one's business to the guards at the door. The guards in turn ring a bell which calls a Soviet officer who answers the door. One again states one's business and/or whom one wishes to see. The Soviet officer then takes the visitor to the base of the stairs on the first floor and telephones the officer to whom the visitor wishes to speak or who is to take care of the visitor's business. The officer who is called comes down the stairs from the second floor and escorts the visitor to his office. (F-3)

7. Exhibit "B" is a plan of the second floor of the MVD/MGB office in MEININGEN. The two rooms shown with chairs, file cabinet, and desks were actually seen by source. The contents of the other rooms on the second floor and the plan of the first floor is unknown to source. (F-6)

8. The approximate strength of the MVD/MGB in MEININGEN is 12-15 enlisted men and 3 officers. (F-6)

9. The enlisted men guarding the MVD office building wear the Soviet Army summer dress uniform. The shoulder boards are green without piping. The cap is green with a brown band and a black visor. The officers usually wear civilian

clothes. Source claims to have seen some of the officers in uniform but claims not to have paid attention to the shoulder boards. (F-3)

10. 1st Lt. fnu [b6] is C.O. of the MVD/MGB in MEININGEN. (F-6) It seems apparent to source that the officers are permanent, but it is unknown to source if the enlisted men are permanent or not. (F-3)

11. The only duties of the enlisted men are to guard the MVD/MGB building. The Soviet officers perform interrogations and investigations. Approximately once a week the enlisted men and officers go on the range and fire the machine pistol. This machine pistol holds 72 rounds of ammunition in its drum, but the caliber is unknown to source. (F-3)

12. Source claims that the higher MVD/MGB headquarters are located in WEIMAR (MS1/J57) (F-1)

13. The only vehicle known to source that belongs to the MKD is a black, two-door Mercedes sedan with license No. B-37-77. (F-3)

14. AGENT'S NOTES:

a. [b1] continually referred to the installation in question as a MKD installation. [b1] could not amplify on the meaning of this term.

b. An examination of the MGB Workbook and the Devotion Target Book shows that the information in this report is at a variance with the first, but agrees almost exactly with the second reference. This is probably the installation referred to in the MGB Workbook as being located at Saarbrueckenerstrasse 10. If the MGB Workbook is to be regarded as out-of-date, the information contained in this report would indicate that the strength of the MGB in MEININGEN has been decreased from seven officers to three. It is believed more probable that the source failed to have contact with more than three of the assigned officers.

c. [b1] has stated on one hand that [b6] is the commanding officer of the MVD/MGB in MEININGEN and on the other hand reports that he is active in interrogation of illegal border crossers and that his interrogations are subject to review by other officers who serve as a summary court. It is difficult to believe that both of these statements can be correct. It is believed that [b6] is more probably the head of the operations under Sections I and II or the consolidation thereof. [b6] may have authority over other Soviet officers which gives the impression that he is the commanding officer of the unit.

d. [b1] had no knowledge of a MVD/MGB installation located at Marienstrasse (which [b1] refers to as Puschkinstrasse) and Ernst Thaelmannstrasse. This is not regarded as conclusive by this agent that the office does not exist.

4. REPORT OF FINDINGS

1. [b1] saleswoman, born [b1] at [b1] an illegal border crosser, was apprehended by the Bavarian Border Police near MUENCHENREUTH (M51/J90) on [b1]

2. [b1] was interrogated by the undersigned Agent on 10 August 1950 at the HOF CIC office and volunteered the following information:

a. The MGB offices, cells, and EM billets in WEIMAR (M51/J57) are located on the corner of Meyerstrasse and Kohlstrasse. The entrance to the building is on Meyerstrasse. (See Exhibit "A".) This building, the former Amtsgericht (court house), is approximately 150 feet long, 60 feet wide, and is five stories high. A wooden fence completely surrounds the building. Two sentries are continuously on duty at the entrance to the building.

b. The strength of this installation is approximately 10 officers and 40 enlisted men. The highest ranking officer observed by Source was a Lt Colonel. Source did not know the names nor could she describe any of the personnel.

c. [b1] identified the installation as MGB, as she was ordered to report to this office on Meyerstrasse [b1]
[b1]

d. The duties performed by members of this unit are to apprehend persons making statements against the present form of government, apprehend espionage suspects, and to guard the MGB installation.

e. This unit has approximately 10 large Soviet type trucks and five German civilian cars (make and models unknown by Source). The license numbers observed by Source were prefixed with the letter "C". Enlisted guards are armed with sub-machine guns having the drum type magazine (caliber of the weapon is unknown). Seven artillery pieces were also observed by Source (type and caliber unknown).

3. AGENT'S NOTES:

a. Region VII Registry check on personalities mentioned above was made with negative results.

b. The MGB Workbook, Hqs 66th CIC Det, dated 15 December 1949, revealed that MGB Headquarters for Sector Thuringia is located on Meyerstrasse in WEIMAR.

4. REPORT OF FINDINGS

1. The following information was obtained concerning MGB offices and Operations in Land Mecklenburg.

a. SCHWERIN (M54/T 46):

(1) An MGB office is located in SCHWERIN, Paeckerstrasse 20, on the ground floor; it was formerly located at Mozartstrasse 22.

(2) Sub-source was recruited as an informant and given the cover-name of "Hans" in late September 49 after having been confined for four weeks. He was ordered to try to form an organization of former Trotzkyites who are now SPD members, and to establish contact with Western German Trotzkyite groups, especially at HAMBURG (L54/S 55).

The following persons were suggested to sub-source as possible contacts:

(a) [b6] SED member; Director of Cultural Affairs in Land Mecklenburg; resides in [b6]

(b) [b6] Former Trotzkyite who fled to Western Germany; previously lived in [b6] (Possibly identical with [b6] former official of Dept "KD" SCHWERIN; see AR, 3 Nov 49, VIII-12376).

(c) [b6] Former Trotzkyite; resides at [b6]

(d) [b6] He allegedly has connections with Trotzkyites in Western Germany; recently fled from the Soviet Zone; previously lived in STRALENDORF (M54/T 35).

(3) Sub-source was required to report to the MGB office at intervals of one to two weeks. He received his assignments from an MGB officer, name unknown, who is about 35-40 yrs old, tall, broad-shouldered, heavy-set, usually wears civilian clothes, speaks faulty German.

b. GRIMMEN (N55/P 42):

(1) The GRIMMEN MGB office is located on the 1st floor of a building near the railroad station, opposite the People's Police Hqs.

VIII-138/C. MGB Offices, and Activities, Land Mecklenburg, 27 July 50, Region VIII

- (2) Sub-source was recruited as an informant and given the cover-name of [b1]. He was ordered to report all anti-Communist and anti-Soviet Activities and all visitors from West-BERLIN (N53/Z 75).

Sub-source was required to deliver his reports twice a month at the MGB office. His case officer was a major, name unknown, who is about 40 yrs old, medium height, slightly corpulent, has round face, black hair, usually wears a uniform, speaks faulty German.

c. DEMMIN (N54/P 50):

- (1) The DEMMIN MGB office is located at the corner of Ernst Thaelmann Strasse and Bahnhofstrasse, about 200-300 meters from the railroad station. A low fence has been erected in front of the building. The office is situated on the first floor.

- (2) Sub-source, who had already been recruited as an informant [b1] was again forced to work on MGB assignments [b1]. His new assignment was the surveillance of the employees and officers of the People's Police. In 1949 he was ordered to report all connections of returning PW's with Western Germany. His cover-name was [b1].

- (3) Sub-source received his assignments from Major Fnn SARANOV, who is about 52-54 yrs old; has a medium build, blond hair, bushy eyebrows; usually wears civilian clothes. This officer contacted sub-source three or four times at the latter's shop. Subsequently, sub-source had to report to the MGB office in person, but the last meetings took place at the former narrow gauge railroad station on the outskirts of DEMMIN, in a room at the rear of the building.

4. REPORT OF FINDINGS

1. The following MGB offices in Land Mecklenburg were reported:

a. SCHWERIN (M54/T 46):

(1) The SCHWERIN MGB headquarters is located at the former building of justice on Demmlerplatz; a branch office for interrogations is located at a private apartment at Mozartstrasse 24, near the Soviet Kommandatura. (A sketch of the localities is attached as Exhibit "A"). (Confirms previous reports. In past AR's, Mozart Strasse 24 was listed as being the number of the MGB Hqs SCHWERIN in the Justice Building).

(2) Sub-source was usually summoned to the MGB office through the local police precinct, in some cases by the MGB officer Fnu b6 (see his description below). His interrogations took place at the building of justice, ground floor, room 26 or 27, or at Mozartstrasse 24. He had to sign a statement that he would work for the Soviet Control Commission.

(3) The Soviets were particularly interested in the following persons:

- (a) b6 and Frau Fnu b6 residing at b6 both receive food parcels from the US.
- (b) Praesident Fnu b6 Oberkirchenrat at SCHWERIN,
- (c) Dr. Fnu b6 Land Bishop; resides at SCHWERIN, Schleiermühlenweg.
- (d) Fnu b6 Former colonel of the German army; Chief clerk of the Innere Mission; resides at b6
- (e) Fnu b6 Treasurer at the Innere Mission, SCHWERIN.
- (f) Dr. Fnu b6 Vicar

(4) Sub-source was usually met by Fnu b6 rank unknown, who is 30-35 years old, short, and has dark hair and eyes; he always came in a Mercedes passenger car with Soviet license plates. (Reference is made to AR, file number as above, dtd 7 June 50 in which b6 was reported as Major and to MGB Work Book, in which he was listed as 1st Lt.) Meeting places were:

✓ 1. MVD Hq in MUELT (J36)

a. Origin of Source's Knowledge on This Unit

Source acquired his information on the MVD unit (designation unknown) in MUELT through personal contact with the MVD in mid-1947, when he was told to report to the MVD Hq to state the reasons for a production blunder in the clothing plant in which he worked.

b. Location of the Unit

The MVD Hq was located on the corner of Strasse der Einheit (formerly Hohenzollern Str) and Friedrich Str. Information which is more detailed is given in Annex 1.

c. Strength, Personalities and Vehicle Numbers

Source is not knowledgeable on these three topics.

d. Uniforms

Source states that officers of the MVD unit wore civilian clothes. He wore army uniforms with green collar tabs and shoulder-boards, and caps with green piping. He has no further details on uniforms.

2. MVD Unit in ZWICKAU (K34)

a. Origin of Source's Knowledge on This Unit

Source worked in ZWICKAU from July 1947 to August 1949, and states that he personally observed the locations of the MVD unit (designation unknown) and other installations (shown on Annex 2) in the town.

b. Movement of Unit

In 1949 (source is unable to give a more exact date), the MVD unit moved from ZWICKAU to a new location. Source states that the new location of the unit was "in a small village located in a wooded area"; he cannot be more precise on this point.

c. Detachment with the Kommandantura

A five-man detachment from the MVD unit was assigned to the Zwickau Kommandantura. Source has no additional information on this detachment.

d. Strength, Personalities and Vehicle Numbers

Source is not knowledgeable on these three topics.

3. Functions of the MVD in the SovZone of Germany

Source states that the MVD in Germany was composed of two branches: the CI Section, and the Operations Group. The CI Section, according to source, dealt only with the activities in the SovZone of foreign countries (such as the infiltration of foreign agents). The Operations Group dealt with the native German population, and had the duty of protecting the aims and activities of the Soviet occupation of Germany. Source has no further details on the functions of the MVD in the SovZone. Source is not knowledgeable on the distinction between MVD and MGB functions.

4. New Uniform for MVD Troops: Source is not knowledgeable on this topic.

It is believed that sources comments on functions of the MVD (Sov Zone) are antedated. At the present time the MGB is charged with the missions described in paragraph 3. The MVD apparently serves as cover for MGB and renders such assistance as is ordered by MGB. Little current information is available on the specific functions of MVD, Sov Zone.

RE: MGB PARCHIM

4. REPORT OF FINDINGS

1. Reference is made to Section Three, par. 50, Orientation and Guidance Report. Source, b1 submitted to this agent information contained herein regarding MGB PARCHIM personnel, installations and safehouses.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: None.

3. PRESENT INVESTIGATION:

According to Source, from 1945 to 1947 the office of MGB PARCHIM was located in Schwerinerstr.; however, since 1947 the MGB office has occupied the entire left wing of the Kommandatura Building, Wallhotel, Platz der Arbeit (formerly Moltkeplatz). The SMA and MGB garages are located in the Wallhotel; MGB utilizes four cars bearing Soviet license plates and three bearing German license plates. Gasoline, tools and oil are kept in the gasoline-storage depot, Buchholzpark, together with gasoline supplies for SMA vehicles. The MGB office employs six to eight German drivers. The MGB prison, located in the Court Building, Floerkestr., usually contains about 10 to 12 prisoners and is guarded solely by policemen of the PARCHIM People's Police Detachment.

4. According to Source, the following personnel were active

b1

✓ a. Major (fnu) SMIERNIKOW, commanding officer of the MGB PARCHIM, doctor of law, native of MOSCOW, USSR, 43 to 45 years old, stout build, speaks broken German. SMIERNIKOW resides with his family in the villa of the former Nazi mayor, PARCHIM, Dammerweg; this villa is used as a safehouse. SMIERNIKOW drives a German automobile bearing Soviet license plates.

✓ b. Lt. b6 native of LENINGRAD or surroundings, about 26 years old, medium build, black hair, speaks broken German. b6 resides in PARCHIM, Ludwigslusterstr.; this residence is used as a safehouse. b6 who drives a German vehicle bearing Soviet license plates, is in charge of investigations concerning agricultural matters, such as failure to deliver set quotas of agricultural products; socialization of landed estates and resistance against measures initiated by the socialization boards; boarding of food, meat and grain; and other violations of current Soviet Zone agricultural regulations and policies.

✓ c. Captain (fnu) NAZAREV, Soviet national, 45 years old, speaks broken German. NAZAREV resides at PARCHIM, Buchholzallee; this residence is used as a safehouse. NAZAREV, who drives a German vehicle bearing Soviet license plates, is in charge of investigations concerning the German police; political parties, other than SED; opposition against the SED and its front organizations; investigations of political subversion; party meetings and gatherings other than SED; and personalities within parties other than SED.

✓ d. Captain b6 about 37 years old, large build, athletic type, unmarried, associates with Soviet female employees of SMA. b6 who drives a

German vehicle bearing German license plates, is in charge of investigations concerning industrial establishments; alleged sabotage in factories; breakdowns caused by negligence; failure to deliver production quotas; feelings among workers regarding various political issues; supervision of "Betriebsraete"; coverage of mercantile establishments; H-O stores; and independent retailers. [b6] is alleged to have a sizeable informant network. He lives at the Bucholzallee residence of [b6] and uses that residence as a meeting place for informants.

1e. Sergeant (fnu) [b6] about 29 years old, black hair; 5' 8" tall, Jewish, speaks perfect German Polish and Czech; was assigned to the office in spring of 1948 as interpreter from headquarters in SCHWERIN (M54/T46).

5. Source stated the working hours of the MGB PARCHIM are from 0930 to 1400 and 1700 to 0100 or 0200 hours. Training is carried out through headquarters in SCHWERIN, where personnel report on the average of once a week on a scheduled basis. The agents refer to their headquarters as "Operativnaja chaisst" (Operative Office) and to headquarters SCHWERIN as "upravlienjie" (Headquarters). Arrests are usually carried out by Soviet enlisted personnel of the guard detail on duty in the Kommandatura building on telephonic contact; written warrants allegedly are not required. Occasionally operative personnel also carry out arrests. As far as Source is informed, no informants ever were dispatched to the Western Zones; however, the informant network within the area is said to be considerable. Several agents often will use the same informant. Courier service to SCHWERIN is accomplished through Soviet enlisted men.

6. According to Source, in spring of 1948 the following Soviet Army personnel deserted from MGB presumably with the intention of entering the Western Zones:

1a. Sgt. "Willi" alias "Gregory", last name unknown, 23 years old, 5' 6" tall, freckled face, slim build, speaks fluent German with a Mecklenburg accent, assignment at MGB PARCHIM was interpreter. "Willi" deserted for political reasons, since he was scheduled to be returned to the USSR for anti-Soviet statements made while under the influence of alcohol.

b. Lt. [b6] or [b6] 5' 7" tall, dark blond hair, full face, heavy build, bullet scar on left or right upper leg, about 27 years old, native of MOSCOW, USSR. [b6] assignment in PARCHIM was that of lumber and metal transport officer with SMA. [b6] was not an MGB officer. [b6] and "Willi" deserted together; both allegedly took office files with them on leaving.

Immediately after the disappearance of "Willi" and [b6] was noted, a commission, consisting of field-grade officers, arrived from SCHWERIN. All personnel, including Source, were interrogated as to circumstances of the incident, and a number of enlisted personnel were transferred.

7. Source stated that personalities interrogated at MGB PARCHIM usually are handled with threats, promises and physical pressure, such as long waiting periods, deprivation of food and sleep and prolonged cellar confinement without sanitary facilities. The MGB prison in PARCHIM consists of a windowless large cell, with slanted floor and is divided into cubicles. The only sanitary facility therein is a canal running lengthwise along the cell without water drainage. As the sewage accumulates, ammonia and excrement fumes are so powerful that a prisoner becomes

unconscious in eight or 10 hours. Prisoners never are beaten by operative personnel but are maltreated by enlisted men during and after the arrest.

8. UNDEVELOPED LEADS AND FUTURE ACTION: None.

9. AGENT'S NOTES:

a. Background information: A Regional Registry check and MGB Work Book check on the personalities listed in this report proved negative, except that the MGB Work Book lists a Lt. (fnu) [b6] stationed in WANZLEBEN (M53/D59). It is possible that Lt. [b6] par. 4b above, is the same person.

4. REPORT OF FINDINGS

1. The following Soviet officers have been identified as assigned to the Kommandatura located on Mart Platz in KYRITZ (see Exhibit "A"):

a. Major Fnu [b6] Commandant of the Kommandatura, approximately forty (40) years old, 170 cm tall, about 70 kg, has a two or three-inch scar on the right side of his cheek from the right corner of his mouth to his right eye; wears dark horned-rimmed glasses; resides at the corner of Mart Platz and Friedrichstrasse in a private house. Source also stated that [b6] has a wound scar on either his left or right breast.

b. Major Fnu [b6] about thirty-eight (38) years old, 162 cm tall, 80 kg, of Jewish origin; is the local MGB Officer; wears a wide green band around his uniform cap; resides with [b6]

2. An MGB cover house and prison is located at KYRITZ, Schultzeckenstr. 4. The local SED party headquarters is located on the same street at number 2.

3. About forty (40) Soviet officers--married and single--and about eighty (80) enlisted men are billeted in twelve (12) private houses on Witstockerstrasse in KYRITZ. The enlisted men wear dark brown epaulets with gold trim.

4. Approximately 250 artillery soldiers are located in a kaserne on Peleberstrasse in KYRITZ. These troops wear red epaulets with gold trim. Until about two (2) weeks ago, there were about 180 large caliber artillery pieces located in the kaserne; however, 120 of these artillery pieces were sent to LUCKENWALDE (N53/Z70).

5. A large starch producing factory is located on Pelebergerstrasse in KYRITZ. This factory requisitioned approximately two million (2,000,000) tons of potatoes during 1949 for production of cereals, puddings, etc., which were sent to the USSR as reparations. The director of this factory is [b6] an SED functionary in KYRITZ. The factory employs approximately 400 workers.

6. The following German Nationals have been identified as informers for the MGB in KYRITZ:

a. [b6] employed by the Criminal Police, about forty-two (42) years old, 172 cm tall, heavy build, blond hair, resides in HOLZHAUSEN (N53/Z19).

1. b1 an illegal border crosser from the Soviet Zone, born b1 was apprehended by the Bavarian Border Police near TROGEN (M51/J90) on b1

2. b1 stated to CIC Field Office at MCF (M51/099) that the Soviet authorities have completely taken over the ownership of all Fichtel and Sachs factories in the Soviet Zone. The three Fichtel and Sachs factories in REICHENBACH manufacture light motorcycles, bicycles, tank tracks, tank bearings, and tank seats. With the exception of tank tracks and bearings, none of the products are finished completely in REICHENBACH. The unfinished products are sent to other factories in the Soviet Zone of Germany to be further processed and then shipped to the USSR. The tank tracks are approximately the same size as those used on the German "Tiger" tanks, and approximately 30 to 40 tracks are manufactured daily. The tank bearings are manufactured at the main factory (Karl Werner factory) in REICHENBACH. This factory is guarded continuously by eight Soviet soldiers. The head of the factory is a Soviet national who lives on Goethestrasse in REICHENBACH. (F-6)

REPORT NO. H-117-49
PAGE NO. 2

1. PETROZAVODSK 7-6, is the capital of the Soviet Republic of KARELIA and is located about 180 km. northeast of L. PINGGAD, about 70 km. east of the Finnish border, and about 500 km. south of MURMANSK.

2. Informant stayed in the city from the summer of 1945 until December 1948.

3. During this time he worked with PW groups in the city, on the MGB building from summer 1945 until September 1946 and on the construction and repair of private buildings from September 1946 until April 1948. From April 1948 until December 1948 he stayed at the PW camp (Valdlager Section) about 1 km. west of the city border.

4. PETROZAVODSK is located on the western side of Lake ONEGA. The main street is covered with asphalt; the other streets are covered with stone. The main street (name unknown) is in the center of the city, is about 800 m. long and about 15 m. wide, has two sidewalks, and begins at KIMOV Square and ends at LITVIN Square. Most side streets are about 10 m. wide. The system of numbering houses is the same as in other Russian towns: all houses with even numbers are on one side and those with odd numbers are on the other side. Only the main street and the public buildings are well lighted. The street lamps on the main street are spaced about 50 m. apart, are about 5 m. high, and have three bulbs each. The side streets are very poorly lighted and have lamps only at the corners.

5. Public buildings and official installations are of stone construction and are usually three or four stories high. The MGB Ministry is dark grey; the other official buildings, and also the homes of ministry employees, party leaders, and VD officials, are painted yellow, white, or in a few cases, blue. Roofs are of wood covered with tar board; very few are covered with sheet metal.

6. Construction of the MGB building was started in the summer of 1945 and completed in September 1946. The actual work was performed by 150 German PW's and 200 Soviet forced laborers. The previous building had been destroyed by the Soviets during the war. The new building is made of brick and has four floors: the first floor has ten rooms; the second floor, 14 rooms; the third floor, ten rooms, a conference room, and the office of the Chief of the MGB; the fourth floor has a movie picture room, a dance floor, and eight ordinary rooms of about 3 m. x 5 m. Most of the rooms are used as offices or as interrogating rooms. In the basement there are a kitchen, document section, and cells for prisoners.

7. On the main street (name unknown) are the theater, post office, telephone exchange office, a restaurant and a newspaper printing office. A building for the VD is now under construction. There are no stores located on the main street. On KIMOV and LITVIN Squares there are stone buildings three stories high, which have various offices (details unknown). These buildings were constructed during the Soviet days and were not destroyed during the war. The Communist Party building is also located on KIMOV Square and was built by the Soviets; it is a yellowish white building, three stories high.

8. More than 50% of the town was destroyed during the war. Most of the damage has now been repaired, and many new houses have been built. At present there are no houses and wooden barracks than before the war. For the building and reconstruction work old material was used. Part of the building material was brought into PETROZAVODSK from GULAY (by way of L. PINGGAD)--for example, Portland cement. Bricks came from the factory located in L. PINGGAD.

9. There is a monument of Lenin on LITVIN Square on one of KIMOV in LITVIN Square. Both are about 5 m. high, including the base, and are made of marble. There are no monuments built under the Soviet government. A public park (about 300 sqm.) is located near Lake Onega.

10. There are about 30,000 inhabitants, mostly Karelian prisoners of war. There are also some Finnish prisoners of war. There are also some Soviet prisoners of war. There are also some Soviet prisoners of war.

them are Ukrainians and Russians who worked in GULAG during the war; there are also some criminals interned in the camp.

11. During the war the population was evacuated. When informant came to the city in 1945 there were only 5,000 inhabitants there. The increase in population after the war was caused by returning evacuees and forced laborers sent from different parts of the USSR.

12. A few foreign nationals live here in the same circumstances as regular Soviet citizens. They are people who came to the USSR before the war and received Soviet citizenship. Informant states that some of them are former Americans or British Communists who came to the SOVIET UNION in order to study the Communist system and now cannot get permission to leave. They work on different jobs according to their qualifications, mostly as skilled laborers, e.g., carpenters, masons, or as office employees.

13. The MVD are billeted in various buildings. Informant knows of one building located next to the MGB; it was built after the war and is of stone three stories high, and unguarded from the outside. The militia members, male and female, are billeted in various private houses; the militia staff are quartered near the city boundary in a building that is of wood and two stories high. There are two prison buildings, one belonging to the MGB; the other is located in the center of city, is enclosed by a stone wall 3 1/2 m. high, and is guarded from the outside. The forced labor camps located in the city area have wooden barracks, usually one story high. They are enclosed by wooden fences about 4 m. high and are heavily guarded by guards who are armed with tommy guns. Inside the labor camps there are watchtowers and powerful searchlights.

14. During the day and at night the city area is constantly patrolled by militia patrols (single guards armed with pistols) and by Soviet soldiers of the local Kommandatura (two guards armed with tommy guns). Regular document checks of the town inhabitants are not carried out; however, all citizens must carry their identification cards with them at all times in case of a check. Very strict control is exercised in the areas near the forced labor camps.

15. Near the outskirts of the city, in the direction of the Finnish border, there are about seven wooden buildings, two stories high, where Staff Officers of MVD border units are billeted.

16. PETROZAVODSK has two railroad stations; the main station is located in the northern part of the city. There are about 15-16 tracks. It is an old building that was constructed during the Czarist days; it is of stone and one story high. The other station is called Golikovka and is located in the southern part of the city; there are about six tracks here. The station is a small building built of stone, one story high, and was constructed during the Czarist days. The railroad area is not fenced in or guarded.

17. Railroad lines connect with MURMANSK, LENINGRAD, and the Finnish border. All three lines are single-tracked; they were double-tracked before the war but the second track was dismantled by the Germans. Every 24 hours one passenger train arrives at and one leaves PETROZAVODSK on each of these lines. The daily average of freight arrivals and departures is about nine to ten trains.

18. There are no deep water ports and the inland lake port is not fenced off or guarded; no foreign ships arrive at the port.

19. The lake port is a small one used by steamers located on Lake ONEGA. During the winter the lake is frozen and the port cannot be used. About three passenger or steamers work on Lake ONEGA. The harbor is also used by freighters for shipping coal, wood, building materials, and food supplies to different places in the Finnish Republic. Wood from the sawmills located at PETROZAVODSK and not used locally is shipped to Leningrad by way of the Volga-Cana.

20. There are two airfields:

a. A seaplane base is located on Lake ONGA, where there are 20-30 single-engined bi-planes of an old type used for the transport of passengers, mail and different kinds of freight. The seaplane base is not used for military purposes. The base area is surrounded by a wooden fence about 2 1/2 m. high and guarded by one guard, who stays in a wooden guardhouse and checks the people entering and leaving the seaplane base.

b. The other airfield located here was used by the Soviet Air Force until the end of the war, but it is now reserved for civilian air lines. No Soviet troops or army planes are stationed there. The section of the airfield where the planes land and take off is exposed and is located near Lake ONGA; the rest of the field is completely surrounded by woods. The airfield is about 1 km. long and about 400 m. wide with a gravel runway. The area is not enclosed and is guarded only by two civilian guards armed with tommy guns. There are about 4-5 wooden barracks, two stories high, where the pilots, ground crew, and administrative personnel are billeted. They are all Soviet civilians. Five or six twin-engined planes (type unknown, but look like the German JU-52) and about 15 bi-planes of an old type are based there. Sometimes Soviet YAK fighters land on the field and stay there for a few hours.

21. Local transportation consists of about 30 buses of the type "Zis". The number of bus lines is not known. Tickets are sold on a kilometer basis; prices range between 20 Kopeks and one Ruble but the rate for one kilometer is not known. There are no taxicabs available.

22. The population is employed at the following enterprises:

a. The shipyard located on Lake ONGA and called Savod Zverovaya Muzke employs about 2,000 persons. Formerly about 50 PT's were used; informant worked there from April 1948 till December 1948. The PT's made tugboats, about 20 m. long and 5 m. wide; capacity is not known. When informant left, 35 boats had been completed; they were equipped with American motors (type unknown) which were brought to PETROZAVODSK from KURILSK. No navy boats were built there. This work was supervised by GRIERLING (Jewish). The machinery of the shipyard is of American and German makes (details not known). The area is about 1 km. long and about 400 m. wide, enclosed by a wooden fence 3 m. high with barbed wire, and guarded by yard police armed with rifles.

b. The ship repair shop employs about 600 naval personnel and about 100 Soviet civilians. Navy personnel (mostly 18-22 years old) are billeted in wooden barracks located about 500 m. from the dock's area.

c. About 1,500 civilians and about 1,000 PT's (now replaced by civilian workers) work in the sawmills. About six small and one large sawmill with modern American, German, and Swedish equipment are located here. The products (capacity unknown) are used for building construction in PETROZAVODSK, and what is not used is sent to other towns in the Republic of Karelia.

d. The bakery located on Lake ONGA employs about 400 persons.

e. A brandy distillery employs about 100 persons.

f. A brewery is under construction when informant left; about 250 informants were engaged on the construction work.

g. A shoe factory employs about 200 persons; they make all sorts of shoes.

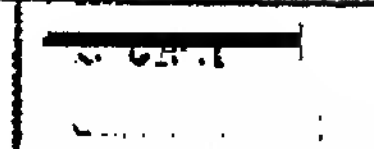

h. A textile factory employs about 300 persons; they make underwear, and other goods. The raw material is delivered from other towns.

i. A paper factory employs about 300 persons.

j. A railroad repair shop is located on the city boundary and employs about 1,000 persons.

k. Some 1,000 inhabitants work on the repair of buildings destroyed during the war and on the construction of new buildings and wooden barracks in various parts of the city.

l. About 150 inhabitants work in a quarry located in the city.

m. About 2,000 people work on the reconstruction of the Onega Savod located near the main street. This was a tractor plant and was destroyed during the war. The plant area is enclosed by a wooden fence and is heavily guarded by civilian guards. Size of the area is about 1,100 m. x 800 m. The present buildings are of stone and are one story high.

n. About 300 inhabitants work on the construction of a plant located in Lake ONEGA area which will probably be used for the production of prefabricated houses (Details unknown).

o. The Central Store (called "OVS") is located in the railway station area near P. TROPOVSK. It consists of wooden barracks where all types of supplies for civilian and military purposes (mostly textile items and food) are stored. It is a supply distribution point for P. TROPOVSK and the Karelian territory. The OVS area is about 1.2 km. long and 1 km. wide, enclosed by barbed wire, and guarded by Soviet border troops. Number of employees is unknown.

p. A gasoline dump (called Nefto Baza) is located in the Lake ONEGA area. The gasoline is stored in three stone buildings one story high. The large plants (like the Onega Savod) have their own gasoline stations but all other agencies (including the MVD and MGB) draw their gasoline from the Nefto Baza.

23. Ammunition dumps are located on the outskirts of the city. No buildings and plants located at P. TROPOVSK are camouflaged.

24. P. TROPOVSK has five small electric plants. One of them was built after the war by German PW's under the supervision of a German PW engineer. Direct and alternating currents are generated; alternating currents are of 220, 380, and 500 volts; direct current is 110 volts. Electricity is not rationed but the amount available is limited in order to guarantee a permanent and sufficient power supply.

25. There is no rationing but only bread is always available; other food is difficult to get and very expensive. As a rule the inhabitants are not able to buy enough food and other necessary supplies, because of their low wages.

26. All types of food, textile items and shoes are available on the black market. When possible, workers and even influential employees steal food and other goods in order to sell them or to exchange them for other necessities on the black market. Black market transactions are forbidden and persons caught are arrested and sent to forced labor camps.

27. The Kholhoz farmers usually come into the city on Sundays and sell agricultural products and buy textiles, shoes, etc. They come into town with horse or cattle drawn carriages, and the sales take place in the market located in the city center. After they have sold their products they go to restaurants and drink. The sale of agricultural products by the Kholhoz workers is permitted by the Soviet authorities. The Kholhoz workers usually stay in town for only one day.

28. Daily newspapers printed in P. TROPOVSK area: Leninskaya Energiya, Kolodny, Kolshevsk, Pravda, Komsomol, and a Finnish newspaper, name unknown. The names of two or three magazines published here are not known either.

29. Private radio sets are available only to influential party members, high ranking officials, and to MVD and MGB officials; other inhabitants listen to community loudspeakers and therefore hear the programs which the officials want them to.

Owners of private radio sets are forbidden to listen to foreign radio stations.

30. The majority of the inhabitants do not believe what is printed in official publications, but because of the well organized system of agents and informants of the MVD, people are afraid to criticize official news.

31. Only the directors of various firms and agencies are authorized to hire and to release personnel. To change employment the laborer or employee has to get his labor book from the personnel office, where it is kept during the employment period and only when the labor book is signed and stamped by the director can he get a new job. The wage and labor conditions are determined by the Soviet Government. Informant states that the USSR is separated into labor districts for North, South, and Central Russia, and the salaries and food supply for the workers are about the same in the three districts (details unknown). Within each of these districts the wages and labor conditions are uniform and cannot be changed by local authorities or firms. The wages are so low that workers have a very low standard of living. On the average the worker and his family have only one room, one or two suits, and one or two pairs of shoes. Unskilled laborers received between 450 and 600 Rubles per month; skilled workers (specialists) receive 600 to 1,000 Rubles per month. Prices are as follows: 1 kg. black bread, 2.50 to 2.70 Rubles; 1 kg. butter, 64 Rubles; 1 kg. noodles, 7 Rubles; 1 kg. grain, 2.50 - 3.00 Rubles; a cheap suit, 300 Rubles; one pair of shoes, about 300 Rubles; one pair of workers' shoes, about 120 Rubles.

32. New arrivals in the city have to report to the police station for identification and registration. After they receive employment permanent permission is granted to live in the city. In small towns and villages new arrivals or visitors cannot stay for even one day without proper documentation and permission from the local police. New arrivals require personal documents; however, they do not have to state the reason why they wish to live in the city. This procedure is not the same in all cities and towns in the USSR, but since ZAKILL is largely inhabited by forced laborers and displaced persons, the procedure for new arrivals is easier here than in other districts in the USSR.

33. The largest hotel is called the Severnaya Gostinniza and is located in the center of the city. It was reconstructed after the war by Soviet laborers and German POWs. It is a stone building, four stories high, and painted a yellowish-white color. The Omega Restaurant is a bar and hotel which is frequented by the upper social class. Taverns of the European type do not exist. Cake and pastries are sold only in the restaurant's and in the Gastronom store.

34. Unskilled workers are billeted in wooden houses and have only one room each, about 4 m. long and 3 m. wide. Sometimes goats and chickens are kept in the same room. No furniture is available and only one or two wooden cots are allotted for the whole family. Skilled workers (specialists) generally have one room and a kitchen. Their rooms look clean and are furnished with one or two small cabinets, one or two iron cots, a table covered with a table cloth, and curtains on the windows. (Foremen have billets of about the same type.) The kitchens in these buildings are used on a collective basis by all families residing on the same floor. Influential party members, high officials of the MVD and the MGB have on the average apartments of two or three rooms (bed room, dining room, living room) and a kitchen. Their furniture is of European style, but in the bedrooms they have iron cots. Most of the furniture was made by German POWs.

35. Telephones are available only to influential employees and in offices and public installations. There are no public telephone booths available besides the one located in the post office. All telephone calls can be checked by the MVD. All mail can be censored by the MVD.

36. There are three hospitals and a polyclinic in the city. There are no private hospitals. All persons working are insured and receive hospitalization when they show their insurance papers. The unemployed are not insured and cannot receive hospitalization.

37. In the city there are one high school and one technical school.

38. Besides a theater, there is one movie house called the Sargo, which show propaganda films.

39. Everyone in the city has to have an identification card or his employment certificate on his person at all times. The identification cards must be stamped by the local police periodically. Russians have to get a new stamp very ten years; Ukrainians and other nationalities have to get the police stamp renewed every 1-5 months. The identification card is a small booklet about 5 cm. x 5 cm., is light blue in color, and inside there is a photo of the owner and several pages for stamps and official remarks.

40. For a large sum of money it is possible to stay in private rooms without having to be registered with the police. There are no periodic checks of documents; however, a person may be stopped at will by the militia for a check. No special documents are required at night, except the standard identification card. Military personnel are checked only by military police; soldiers carrying rifles are not checked. To buy a railway ticket the identification card is required, but no documents are necessary in order to buy a bus ticket. For long trips crossing the provincial line of the LRA a written authorization from the MVD is necessary, which is available only if one is travelling on official business. For non-official trips permission will be granted only in case of emergency and to persons who are considered trustworthy. Passengers travelling on trains to the Finnish border or to LENINGRAD are checked by militia patrols.

41. No specific cases of bribery are known to source, but he states that railroad employees and militia members can usually be bribed with money or alcohol; it is easier to bribe male personnel. For example, in September/October 1947 two German POWs escaped from the POW camp at PETROZAVODSK by rail and bribed the locomotive driver with 500 Rubles.

42. Attached is sketch map of PETROZAVODSK.

ID COMMENT: Reconstruction in this town has evidently proceeded at a much faster pace than in other parts of Russia. Whether this has any symptomatic significance (for northern region, neighborhood of Finland?) is impossible to say at this stage. Of interest is the statement in Paragraph 30, according to which "the majority of the inhabitants do not believe what is printed in official publications."

EVALUATION: C-3	DATE OF INFORMATION: December 1948	DATE OF REPORT: 12 December 1949
PREPARED BY: b6		SOURCE: Soviet defector b1
SUMMARY OR SUB REPORT: The following information was submitted by source (CI-1212-49 (Pth-108) b1		
In December 1948 an MGB agent informed source's husband that MGB headquarters on Wasser Street, ABZ, had moved to SCHENKE.		
The MGB operated safe houses in two private homes in OBERSCHLENA where Russian and German informers and suspects were interrogated.		
About 120 border guards were quartered in the Dienertshof, OBERSCHLENA. Some of the guards were stationed in the Oberschlena and Mellerschlena shafts and some maintained control over the main road leading to and from OBERSCHLENA and SCHENKE as well as over the restricted areas of MIDDLESCHLENA, OBERSCHLENA and SCHENKE.		
The prison in ABZ, which was guarded by soldiers wearing the green insignia of the border guards, was referred to as the MGB prison by the residents.		
Four employees of Shift No. 13 in OBERSCHLENA were suspected of being MGB informers because they were regularly absent from work two or three days a month and because these absences were carried as excused absences in the mine log.		
NOTE: This document contains information affecting the national defense of the United States within the meaning of the Espionage Act, 18 U.S.C. Chap. 32, as amended, its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.

3. The following information was obtained on the Headquarters of the
MGB in DRESDEN, located at Bautzenerstr. 116, in the former "Heidehof"
building. (Sketches of the localities are attached as Exhibits "A" and
"B").

a. Basement: The basement contains the heating plant, coal
storage room, disinfecting room with showers, as well as 9-10 prison
cells for approximately 30 prisoners; the prisoners' kitchen with
storeroom, bathroom, and beer cellar.

b. 2nd Floor: Contains the general's room, with modern interior
design, adjoining a recreation room which has an entrance to the
toilet and bathroom. On the opposite side is the reception room and
office of the adjutant. The adjutant's room has no direct connection
with the general's room and is the worst room of the entire building.

c. 1st floor: Contains a small parlor, opening into the large
dining-room and the general's dining room. Adjoining are the library,
the reading and writing rooms, and on the garden front the movie and
theater room. There are also a large kitchen with modern equipment
and 2-3 rooms for the cashiers office, the windows of which are secured
by iron rails.

The 2nd, 3rd and 4th floors contain ordinary offices. The
first floor also contains ordinary offices. The building was made
sound-proof and is surrounded by a stone wall of 180 cm height.

4. The following Soviet personalities at the MGB headquarters in
DRESDEN were identified:

Colonel [b6] (perhaps a general by now), Chief of the DRESDEN
MGB, lives very retired, is feared by his subordinates; is not
personally known to the informant.

1	CIC Reg XI	7970th CIC Gp (ATTN: Capt. b6	18 Aug 1949	<p>1. In accordance with the verbal request made by Captain b6 your office, when acting as inspecting officer during a recent inspection of this Region, the following additions and corrections to the MGB Workbook which have come to the attention of this office are reported</p> <p>2. In reference to Part V, page 9, "Group LEIPZIG"; the "Leipziger Industrie" published in 1946 by the Traffic Office of the City of LEIPZIG lists the address of the Energie A.G., reported as the office of Group Leipzig, as MARKLEEBURG 1, Friedrich Ebertstrasse 26.</p> <p>3. Reference is made to Part V, page 8, "Sub-sector LEIPZIG", listing of jails, quarters and cover offices.</p> <p>a. All streets formerly named MOLTKESTRASSE in LEIPZIG have had their names changed. The MOLTKESTRASSE running at the rear of the Justice Building (correctly listed as facing on ARNDTSTRASSE) has been changed to ALFRED KASTNERSTRASSE. The various MOLTKESTRASSES located in the districts of EHRENBURG, GOHLIS, MARKLEEBERG and WIEDERITSCH have all had their names changed to FRITZ REUTERSTRASSE. The FRITZ REUTERSTRASSE in MARKLEEBERG lies only two blocks from the Energie A.G. One of the jails listed may possibly lie on this street or more probably they are both located on the street lying behind the Justice Building.</p> <p>b. There is no DOELLNITZSTRASSE in LEIPZIG, as listed under both jails and quarters, but a DOELLNITZSTRASSE does exist. An unconfirmed report (See Agent Report, this office, Subject MGB Headquarters, LEIPZIG, file: XI-1785.203, dated 15 August 1949) received by this office states that it is common knowledge in LEIPZIG that the quarters are on the latter named street.</p> <p>c. There is no AUENSTRASSE in LEIPZIG, as listed under cover offices, but two AUENSTRASSE do exist. One, in the middle of the city, lies about ten blocks from the south end of DOELLNITZSTRASSE where the MGB quarters have been reported. The other, located in MARKLEEBERG, lies eight blocks from the Energie A.G. plant. This office has no information available which would indicate which of either, AUENSTRASSE would be the correct address for the cover office listed.</p> <p>d. There is no LIVIISTRASSE in LEIPZIG, as listed under cover offices, but a LIVIISTRASSE runs along the stream bordering the south side of the ROSENTHAL, a park in the central part of LEIPZIG. From the location it is deemed probable that the cover office is located on this LIVIISTRASSE</p>

SUBJECT: MGB ~~Offices in~~ LEIPZIG

TO : XI

1. Reference is made to report, your Region, File XI-1785.203,
Subject as above, dated 15 August 1949.

2. At the end of the War when Genral b6 first intitiated the
MGB Sectors, ~~and~~ Sub Sectors and Groups in the Soviet Zone of Germany,
~~he~~ established a Sub Sector office ~~xx~~ ^{was} on Alfred Kastner Strasse, LEIPZIG
and a Group office in the Energie AG Plant in the LEIPZIG suburb called
MARKLEEBURG. In February 1948 the Subsector office moved from Alfred
Kastner strasse to a large building used during the war as a Wehrmacht
Command Group headquarters. This building is located on the corner of
Windsheid and Schnecke Strasses. The main entrance of the building
is numbered 42. There is ^{or was} an additional office maintained at Waldstrasse
64. This office was reported closed in October 1948. A small prison
is maintained in the basement of Winscheid strasse 42 and a larger prison
is maintained at Moltkestrasse 47. The MGB officers utilize the local
SMA offices as a meeting place for informants, just as they do their
homes. These are not considered actual offices. The MGB is not to be
considered identical to the MVD in LEIPZIG. The MVD is presently using
a German Kaserne located on Danziger Str at Heeres Strasse for billets
of the two MVD Battalions in LEIPZIG and maintain their administrative
offices at Querstrasse 32. These MVD Troops are used to guard the MGB,
SMA and other Soviet controlled installations in LEIPZIG.

3. At the present time it is reported that the MGB is undergoing
another reorgaxnzation. If such is effected, it is contemplated that
all Sub Sectors will be eliminated and Group offices will report directly

to Sector headqu . When and if such a change : place, it is *only* logical to assume that some offices will be closed and that the best of those being used will be utilized as the new Group headquarters. It is not impossible that the change is now taking place, that Sub Sector Leipzig has been dissolved and that Group Leipzig is moving in from the outskirts of the city and occupying the better ~~that~~ billet.

4. It is desired that ~~if~~ any information confirming or denying the above mentioned alleged reorganization be brought to the attention of this headquarters as received.

4. REPORT OF FINDINGS

1. On 30 June 1949, the MGB headquarters for the LEIPZIG (N52/521) area moved from its former location in the "KOCHSTEDLING" LEIPZIG (a suburb of the city) to the caserne at WINDSCHEIDSTRASSE 12, LEIPZIG. This building is the former headquarters of the German Army Wehrkreis, commanded by General von RICHMANAU. The families of the Soviet officers, stationed at MGB headquarters, live together on the entire length of the Doellnitzerstrasse, LEIPZIG. All houses along this street have been requisitioned.

2. The anti-Soviet underground movement in LEIPZIG plan to assassinate the Soviet MGB staff and the troop commander in LEIPZIG when the Soviet Zone is declared the 17th USSR. According to source, this is to take place soon after the West German Government is chosen and begins to function.

4. REPORT OF FINDINGS			
<p>4. A large building at the corner of Muehlgartenstrasse and Muehlgraben in HETTSTEDT (M52/D64) is completely occupied by an MVD unit. This building was formerly the headquarters for the HETTSTEDT Kreispolizei, but in May, 1949, the Kreispolizei were moved out and replaced by an MVD unit which had formerly been stationed in BERNBURG (M52/D76). The building is of brick construction, two (2) floors high, and contains about fifteen (15) offices. It is surrounded by an unpainted wooden fence, about eight (8) feet high, with barbed wire on top. A Soviet guard is constantly on duty at the gate. Approximately twenty (20) personnel, including guards, are employed in the building. It is noted that several women are employed there in an intelligence capacity. (F-6)</p>

4. REPORT OF FINDINGS

4. A major office of the MVD for the DRESDEN area is located on Bautznerstrasse in DRESDEN-WALDSCHLOESSCHEN (N52/F29). A settlement composed of several villas surrounded by a high unpainted wooden fence, and entirely occupied by MVD elements is located at this address. A large gate, guarded by two (2) Soviet soldiers, is the only entrance to the settlement. (F-3)
5. Soviet Major [b6] has an office within this settlement. [b6] a Jew, about 37 years old, is about 163 cm (5'4") tall, about 60 kg (132 lbs) in weight, has brown eyes and black hair, and has a slim build. [b6] maintains private quarters on Charlottestrasse, nearby, where he lives with his wife. He is apparently in charge of supply for the settlement. It is noted that [b6] wears pink shoulder-boards and not the characteristic green of the MVD. [b6] has a great weakness for women. On one occasion, in April 1949, [b6] made an attempt to rape a woman who was delivering a new suit to his home. (F-3)

4. REPORT OF FINDINGS

1. Reference is made to AR, this office, Subj: MGB POTSDAM (N53/Z 63), file as above, dtd 2 Feb 49.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: The MGB in Germany is one of the targets of the Counter Espionage Section, this Region. Results of the coverage of this target are submitted in a series of reports, the last of which was submitted on 27 May 49 under Subj: Soviet Personalities and Germans employed by the Soviets at BERLIN, file VIII-138/A. Referenced AR in para 1 above contained initial information furnished by an informant of the particular MGB office at POTSDAM. Source originally reported on MGB officers, informants, offices, meeting places, and assignments, as well as the manner in which he was recruited and supervised.

3. PRESENT INVESTIGATION: Source continued to work as informant for the MGB at POTSDAM (N53/Z 63), contacted this Agent and furnished the following additional information on the MGB at POTSDAM:

4. The new Officer in charge of the MGB office, [b1]

[b1]
is a certain [b1] rank unknown. He relieved Major [b1] He was first seen at the office in [b1]

5. Source claims that on one occasion when he was briefed at POTSDAM, his case officer answered the telephone in his presence identifying his office as the "Vor Otdel" (Most likely a covername for this particular section or house of the MGB). Source's last case officer, Capt. [b6] (not [b6] as reported previously), turned source over to his successor, MGB Agent [b6] or [b6]. [b6] has the telephone number 220 at POTSDAM. Source does not know whether Major [b6] or Capt. [b6] have been transferred from the particular MGB office or whether they remain at POTSDAM.

6. Source met [b1]

[b1]
[b1] As long as source had to report to the MGB office on [b1]
[b1] occupied the center room on the ground floor, in which his predecessor [b1] had also worked. There are 2 telephones in that office which have the numbers 1741 and 225, respectively, according to source.

7. Sometime in [b1] source's former case officer, Capt. [b6] returned to POTSDAM and worked for several weeks with Capt. [b6] and later with [b6] in the center room on the ground floor. In addition to [b6] and [b6] another MGB agent or interpreter whose name is not known, works in the center room. He wears horn-rimmed glasses, is about 30-32 years old, 180 cm tall, slender, has dark blond hair, a pale complexion, and has an upper gold tooth on the left side. They were assisted by the male interpreter Sgt. [b6] who usually occupied the 3rd room on the right side of the ground floor. Sgt.

b6 [] also interpreted for a new MGB officer, rank unknown, named b6 [] who arrived at the Zeppelin Strasse MGB office in the early part of June 49. According to source b6 [] is working mainly on espionage cases.

8. The 1st room on the right side of the 1st floor at the MGB office is usually occupied by a new MGB officer, a major, whose name is not known to source. He arrived in POTSDAM sometime in the middle of June 49. He is about 35 years old, 175 cm tall, of stocky build, weighing about 75 kg, has grey hair, a dark complexion, an oval face and a large nose. Source observed another male interpreter at the MGB office who wears civilian clothes at all times and works in the 1st room right side 1st floor. He does not seem to be very intelligent, is about 160 cm tall, is stocky, has black smooth hair combed back, dark brown eyes and a dark complexion. Sometime in May or June 49 a new MGB officer, Major b6 [] started to work in the MGB office on Zeppelin Strasse, and a new female interpreter was assigned to that office. She is about 24 years old, 160 to 170 cm tall, slender, has blond hair, blue eyes, oval face, and a dark complexion.

9. Source observed while meeting his case officers b1 [] that the officers start to work usually between 1900 and 2000 hours daily, that the doors are sealed as long as the respective rooms are not being used. During b1 [] source observed on one occasion that the small corpulent major, who was a deputy to Major b6 [] (reported in preceding AR) went from Zeppelin Strasse along the street Am Bogen to the last building on the right side and the corner of Jahn Strasse. The major was accompanied by another Russian, who had blond hair and wore a light raincoat. The major entered the house and his companion remained outside and waited. Subsequently, source noticed on a number of occasions that this particular house on the corner of Am Bogen and Jahn Strasse was used to meet MGB contacts and informants. Another meeting between source and Capt.

b6 []

b1 []

b1 []

10. Source continued to check on the activities of b1 [] residing on b1 [] (which was reported in the PR, dtd 1 Feb 49, VIII-8301, Subj: b1 []). He established contact with b1 [] and became friendly with him. b1 [] however, remained suspicious of b1 [] intentions and feared a possible abduction. b1 []

b1 []

b1 [] Source had on his person a number of reports he had written for the MGB and had signed as b6 []. These reports contained the following information for the Soviets:

a. b1 [] residing b1 [] a sub-source, informed source that one of the released juvenile prisoners from the Sachsenhausen concentration camp, a certain b6 [] had been going to the meetings of the SPD-sponsored youth group "Falken" in the Soviet Sector. Source describes b6 [] as being 17 years old, having curly dark brown hair and brown eyes, and also being

~~CONFIDENTIAL~~

a member of the Falken. [b6] an informant in Sachsenhausen, a driver by profession, resides on Oppenstr. 80, was born 1930, is 176 cm tall, slender, weighs about 60 kg, has dark blond hair, blue-grey eyes, and has an oval face.

b. Source reported that he was told by a certain [b6] that [b6] had worked for the Western Allies as interpreter and now works in the Soviet Kommandatura SCHOENEWEIDE. [b6] resides [b6] He is 20 to 22 years old, 176 to 180 cm tall, has long dark hair and blue-grey eyes. [b6] is one of the most active FDJ members and is quite popular in the FDJ. His father was formerly a high police official.

c. Source reported that he had met a certain [b6] several times and had told him that he would also like to go to the Falken but he could not go alone and wanted [b6] to introduce him. [b6] did not keep his promise but when they met later, [b6] had told him that in the district Friedrichshain the Falken had been prohibited by the SMA to hold meetings, allegedly because they had prepared acts of sabotage against the Soviets.

11. The MGB officer briefing source in POTSDAM expressed repeatedly a strong interest in all activities and members of the Falken movement. The Soviets consider the Falken a dangerous organization in which the potential opposition among the youth of the Soviet Zone against the Soviet and SED regime is being concentrated. For this reason, source was instructed to make all efforts to penetrate the Falken movement in BERLIN and particularly in the US Sector at BERLIN-Steglitz. He was further instructed not to check on [b6] any longer. Source claims that the leader of the Falken section in BERLIN-Schoeneweide, Soviet Sector, has to report once weekly to the Kommandatura regarding new members recruited and his activities. He also has to present a list of all those who participated at the meeting. He usually reports to a 1st Lt. [b6]

12. Since about Jan-Feb 49 source had the following assignments to check on personalities of interest to the Soviets:

a. Assignments by Capt. [b6]

(1) to contact and ascertain [b1]

[b1]

[b1]

(2) to contact and become friendly with [b1]

cases; arrived in beginning of June. Works in second room, right side, ground floor, tel No. 8039. He is 35 years old, 176 cm tall, stocky build, corpulent, smooth dark hair, round face, has a wart on the right eyebrow. Usually wears a double-breasted dark blue suit.

c. b6 rank unknown. Arrived beginning of June, counter espionage officer, is 30 years old, 160 cm tall, small build, slender, weighs approximately 60 kg, dark brown hair, brown eyes, oval face, pale complexion.

d. b6 MGB officer, rank unknown, exact date of arrival unknown, 36 to 38 years old, 168 cm tall, stocky build, dark blond hair, blue eyes, oval face.

14. UNDEVELOPED LEADS AND FUTURE ACTION: Contact will be maintained with source who was instructed to obtain further details regarding his contact with the MGB and new Soviet intelligence officers. Checks will be made to determine, if possible, the Soviet interest in the personalities listed under Subject's assignments.

15. AGENT'S NOTES:

a. It was emphasized repeatedly by the Soviets that they have a very strong interest in ascertaining details on personalities and activities of the Falken Youth Organization in BERLIN. The Falken movement is one of the most active groups in the distribution of anti-Soviet literature and pamphlets in the Soviet Zone and in furthering the anti-communist factions. It is, therefore, quite natural that the Soviet Intelligence would be interested in that organization.

This building is located directly across the street from the Soviet Kommandantura, which is in the former ARNSTADT Girl's School (Mädchen Schule). The MVD building is two (2) stories high and has a prison in the cellar. Approximately twenty (20) uniformed Soviet officers have offices there. There is no barbed wire or wall around the building, but two (2) Soviet soldiers are constantly on guard before the building. The street running between the orphanage and the girl's school is closed to traffic. (F-3)

the most recent information contained in reference report and is the source of all data contained in this report.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: None.

3. PRESENT INVESTIGATION: b1

b1

b1

The estate had been taken over by the MGB for special purposes and is located about 10 km from PRENZLAU, approximately two (2) km to the left of the road to PRENZLAU when coming from BERLIN. The mansion is located in a forest, and a barbed wire fence about 4 km in length was erected surrounding the entire area. b1

b1

4. In the cellar underneath the large hall or lobby of the mansion, six (6) to eight (8) large shelters were constructed. The rooms were all fitted out with one desk, one couch, a book-case, and chairs each. A chart of the mansion of the b6 estate is attached as Exhibit "A". The shelters were placed in such manner that they could be provided with fresh water from a subterranean small stream leading to a near-by lake.

5. An MGB Detachment, of about 30 - 40 non-commissioned officers and soldiers, is permanently assigned to this mansion and is under the supervision of one officer, who wears civilian clothes. His deputy is a Capt. SAROTKIN, formerly in the MGB at Hohenschoenhausen. All members of this MGB Detachment speak excellent or fluent English. Source has seen several members of this MGB Detachment in Hqs. MGB BERLIN Sector at Hohenschoenhausen, where they had their cars repainted, altered, and provided with different license plates. Source believes that this MGB Detachment is engaged in abducting persons from the Western Sector of BERLIN or the Western Zone, and that the mansion has been rebuilt to provide cells and interrogation facilities for the abducted persons, and possibly for any Western Allied individuals should the MGB be given permission by higher headquarters to abduct the Americans and British as well.

6. Captain SAROTKIN is described by source as being about 45 years old, 1.70 m tall, having an oval face, black hair, dark eyes, a small beard, and a dark complexion. He was reported to this office independently by another source, who furnished an identical description of him. Captain SAROTKIN is frequently in the SMA KARLSHORST, where he visits other MGB officers. Colonel b6 the present acting Commanding Officer of the MGB BERLIN Sector at Hohenschoenhausen, and Colonel b6 of the same organization, were both seen by source at the

7. UNDEVELOPED LEADS AND FUTURE ACTION: The exact purpose for the MGB installation at the b6 estate and possibly any operations carried out by the MGB there have to be ascertained as yet. A check of the information in this report by an informant of this office who resides in the Soviet Zone is contemplated to determine the veracity of the data. Source was instructed to attempt to obtain additional details on subject matter.

8. AGENT'S NOTES:

a. Source has furnished this office with information before and was found to be reliable. A separate Personality Report will be submitted on him.

b. It is believed by this agent that the MGB installation at the b6 mansion was built for special interrogation and detention purposes and especially for high-level cases to be handled by the Hqs. MGB BERLIN Sector.

4. REPORT OF FINDINGS

1. Reference is made to the TOP SECRET Personality Report, subject b6 b6 file number as above, dated 1 February 1949. Information on an MGB office on Zeppelinstrasse, POTSDAM, was furnished by an informant of that organization.

2. SYNOPSIS OF PREVIOUS INVESTIGATION: Reference is made to TOP SECRET B/L CIC Region VIII, subj: b6 file number as above, dtd 21 July 1947. Information on the organization of the MGB in Germany, with specific details as to the organization and structure of the MGB in Brandenburg Sector, on the methods and technique of the MGB recruitment of German nationals as MGB agents, regarding the location of MGB offices in and near BERLIN, concerning Soviet officers and interpreters assigned to the different MGB Sectors of the Soviet zone, as well as about the activities of German nationals acting as MGB agents, was submitted in the Annexes of TOP SECRET Report, this region, subj: b6 file number as above, dtd 7 July 1947. Investigation of the MGB organization and activities in Land Brandenburg and at POTSDAM was continued by following up leads obtained from reference TOP SECRET report. In addition incidental information from defective MGB interpreters and German informants was collected, checked and submitted in subsequent reports.

3. PRESENT INVESTIGATION: The following information on the MGB POTSDAM was obtained:

a. The MGB office, known to source, is located in Zeppelin Strasse, POTSDAM, opposite to Nr. 84, which is an apartment building. The MGB office is in a private house from which the street number has been removed. The telephone number is: POTSDAM 1741. The building is surrounded by a garden and a wooden fence. Source and other informants of the MGB were instructed to use the side entrance located along a foot path to reach the office. Usually a passenger vehicle, believed by source to be a blue Opel/Sedan with Soviet license number 1723 or 1327, was observed near the side entrance. The car is used mostly by Maj. b6 believed to be the chief of that office. The office is guarded by MVD soldiers at both entrances. *WC*

b. Many of the officers of the MGB office, with whom subject had contact, have their billets in a requisitioned building on the corner of Ingenheimer Strasse and Zeppelin Strasse, directly opposite to Villa Ingenheim. Some others reside in Zeppelinstrasse in the vicinity of the MGB office or, if married, in private quarters. According to source there are two majors, two captains, one lieutenant, two interpreters and a secretary at the MGB office. In addition there are a number of guards and drivers assigned to the office also. All of the higher ranking MGB officers in POTSDAM, including those not at the Zeppelinstrasse office, seen by source since he started to work for the Soviets, have been members of review boards or commissions which checked the sentences of inmates at the Sachsenhausen concentration camp. Some of the new MGB officers at POTSDAM were formerly working in the MGB of the Sachsenhausen concentration camp (or MVD Operative Group). Many of the inmates were recruited as informants and legmen for the MGB at POTSDAM prior to being released.

4. The following MGB personalities were described by source:

✓ *we* a. Major fnu b6 believed to be the Commanding Officer; 1.75m tall, broad shouldered, about 35 years old, has very dark fairly smooth hair, brown eyes, walks slightly stooped (possibly has flat feet), usually wears civilian clothes, speaks some German; he stated to source that he has been in intelligence work for the last ten (10) years; believed to reside at Ingenheimer Strasse.

we b. Captain fnu b6 (referred to in Personality Report, listed in para 1 above, as Captain fnu b6) has recently (December 48/January 49) replaced Captain fnu b6 1.78m tall, dark blond, with dark eyes, about 28 years old; he has long and pointed nose; mostly wears a dark blue overcoat with yellow/blue scarf over a uniform, sometime is seen in civilian clothes; he speaks fair German.

we c. Captain fnu b6 Left POTSDAM sometime between December 48 and January 49; 1.70m tall, dark blond, with blue eyes, about 26 - 28 years old; he usually wore civilian clothes; is a friendly person; speaks German poorly; resides at Ingenheimer Strasse 2 or 3.

we d. b6 interpreter: Soviet civilian; about 1.80m tall; dark brown smooth long hair, about 26 years old; he has many pimples in his face; wears glasses with dark horn rims; usually has on a grey former German army overcoat with rubber lining; he had formerly worked at the Sachsenhausen concentration camp with the MGB and left there in August 1948.

X e. Nina (last name unknown), secretary: about 1.65m tall, with long dark blond hair, brown eyes, very buxom, approximately 24 years old.

✓ f. Major (name unknown): deputy to Major b6 about 1.65m tall, rather corpulent, weighing about 200 lbs; has wavy dark hair; brown eyes; about 33 years old; he is quite nervous, has a loud voice; he is very critical and not well liked by some of his co-workers and the guards. He wears civilian clothes only occasionally; speaks poor German.

g. Female interpreter for Major b6 name unknown: Very tall, about 28 years old; blond, with blue eyes, rather corpulent.

h. Captain, name unknown: About 1.60 - 1.63 m tall, with black hair and dark eyes, about 30 years old.

5. Source listed the following German nationals as possible informants of the MGB POTSDAM:

✓ a. b6 Band leader at POTSDAM in the Restaurant Muehlenberg Grotte; b6 was most likely recruited prior to being released from the Sachsenhausen concentration camp, where he was a political prisoner; in his band he has several former fellow inmates from Sachsenhausen; b6 allegedly resides in BERLIN, is married and has a daughter. He is of medium height, slender, has dark brown hair and is very young.

b. b6 Resides at POTSDAM; described as 1.70m tall, about 36 years old; has dark brown hair, a round face, is slightly stout.

6. UNDEVELOPED LEADS AND FUTURE ACTION:

a. The exact designation and operational jurisdiction (pertaining to its place and function in the organization of the Brandenburg MGB Sector) of the MGB office at POTSDAM, described in this report has to be established.

b. Information on the chain of command and the function of each of the officers and other personnel at reference MGB office, as well as additional personal data on them, is needed.

c. The addresses, operational assignments and case officers of b6 and b6 as well as the names and functions of other informants of the MGB have to be ascertained.

d. Source was instructed to maintain constant contact with the undersigned agents, obtain additional details and the information still needed to have better coverage of subject MGB office. He was given instructions and general EET's to complete this assignment. The information contained in this report will be checked by other contacts of this office at POTSDAM to determine exactly the reliability of source.

7. AGENT'S NOTES:

a. Source made the impression of a sincere person and the reasons for his desire to work for this office appear plausible to this Agent.

b. The information contained in this report was checked with another source of data on MGB personalities in the Land Brandenburg and POTSDAM and it was found that Captain b6 mentioned in para 4 b of this report, may be identical with Captain b6 (almost identical description) who until recently was assigned to the SMA office at FRANKFURT/Oder (053/V63) and left for POTSDAM; and that Captain b6 mentioned in para 4 c of this report, may be identical with a Captain b6 (similar personal description) who was recently assigned to the Kommandatura at FUERSTENWALDE (053/V57), Brandenburg.

c. On the basis of previous reports on the MGB and MVD installations in POTSDAM (see b6 Report and Annexes) it is known that the corner of Ingenheimer Strasse and Zeppelin Strasse, as described by source, may most probably be MGB officer's billets as stated in this report.

d. As soon as the results of checks on the information in this report have been received, they will be forwarded together with any additional data furnished by source.

4. REPORT OF FINDINGS

1. Reference is made to Par 51, Section III, of Consolidated O & G Report. The following information concerning the MVD in DESSAU was voluntarily submitted to this office by [b6] former chauffeur of the MVD: (See Personality Report, file No. VIII-11167, dated 30 November 1948.)

2. The MVD and SMA are located in the Georgium Schloss. The rooms on the first and second floors of the building are used for offices. A part of the basement is used for the Officers Mess Hall. The entrance of the building is guarded by an armed Soviet soldier. Immediately inside the entrance is the Auskunftstelle (information desk). All Germans, whether summoned or making inquiry, must report to the information desk from where they are accompanied by a Soviet soldier to the proper room.

a. The Commanding Officer of the MVD is Major [b6]

parents live in ODESSA on the Black Sea.

[b6] has been stationed in DESSAU since May 1946. On 23 June 1948 he left DESSAU for what is believed to have been a furlough, returning the latter part of October 1948. His private quarters are located at DESSAU, Friederigen Platz 5b.

b. [b6] makes frequent courier trips to MVD Headquarters at PLAUEN (M51/K12) on Ernest Telleman Str., LEIPZIG (M52/D92), LEIPZIG (N52/E21), and to BERLIN-Karlshorst. On such occasions when [b6] does not deliver the courier pouch personally, a Soviet soldier is sent.

c. The following is a description of the courier pouch: Brown leather bag, fifteen (15) inches high, eighteen (18) inches long. A metal strip is fastened on one side of the bag running over the top to the other side, where a lock is attached. Covering this metal strip is a leather strip, somewhat wider, which is locked with a second lock with a wire seal running through the lock so that neither of the locks can be opened without breaking the wire seal.

1. Reference is made to Agent Report, subject, MGB Activity at WEIMAR, file IV-5759/IV-A-193.1, dated 15 October 1948, regarding the escape of [b1] and [b1] former agents.

a. It is noted that both individuals are seemingly short on memory regarding their employment with MGB WEIMAR during the past eleven (11) months. It is possible that they did not learn the names of the MGB officials for whom they worked since such persons usually use code or cover names, however addresses, descriptions, etc., should still be fresh in their minds.

2. It is desired that [b1] and [b1] be re-interrogated regarding their employment with the MGB in WEIMAR (M51/J57), the organizational structure of the MGB, all known personalities, and/or descriptions of persons connected with or a part of the MGB. It is desired that street addresses, strength of units, ~~modus operandi~~, zones of jurisdiction, etc., be gained, and such information be forwarded to this headquarters.

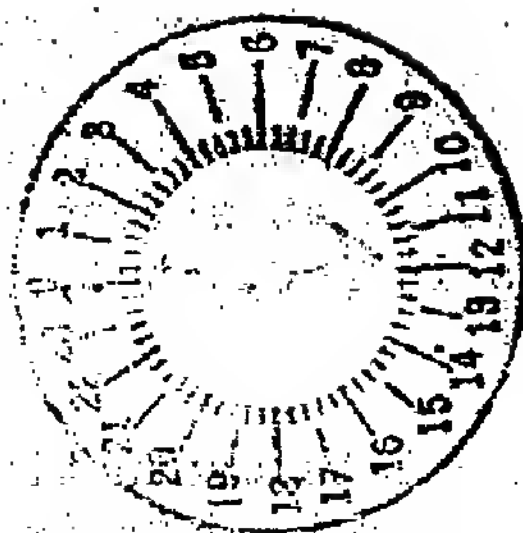

3. As an aid to interrogation and your immediate evaluation of information gained, the following information is offered. This data is to be used to check the statements of [b1] and [b1] and it is desired that same is not given to subjects.

a. There are five (5) operative sectors of the MGB (Ministertvo Gosudarstvennoi Bezopasnosti) in the Soviet Zone of Germany. One of these sectors, covering the majority of Land Thuringia, has its headquarters located in WEIMAR. Under this sector headquarters, (comparable to a CIC Region) are three (3) operative districts with headquarters located in GERA (M51/KO6), GOTH (M51/JO6) and ERFURT (M51/J36). variable number of operative groups. These groups, as known at this time, are as follows: GERA: Weimar, Stadtroda, Gera, Greiz, Schliez, Saalfeld and Rudolstadt Landkreise; GOTHÄ: Gotha, Arnstadt, Sonneberg, Hildeburghausen, Schleusingen, Meiningen and Eisenach Landkreise; and ERFURT: Heiligenstadt, Worbis, Hohenstein, Sonderhausen, Weissensee, Langsalza and Muehlhausen Landkreise. In the normal sector headquarters, there are 30-45 officers (MGB) 25 interpreters and 150 to 200 MVD troops. In the normal district headquarters, there are 15 to 20 MGB officers, 10-12 interpreters and a platoon of MVD troops. In a normal group headquarters, there are 4-8 MGB officers, 6 interpreters and about 10 MVD troops. In many cases the MGB and the MVD personnel work from the same office and live in the same quarters. Each headquarters is separated into five sections: (1) Intelligence, (2) Counter espionage, (3) Political parties, (4) Denazification and (5) Files.

b. The Weimar Operative Sector is commanded by General Major [b6] (may have recently been replaced by Colonel fnu [b6] Lt. Col. fnu [b6] is the 1st Deputy, Lt. Col. [b6] is the 2nd Deputy and Major fnu [b6] is the 3rd Deputy and Adjutant. The 1st section is headed by Major [b6] who is assisted by Lieutenants [b6] and [b6]. The 2nd section is headed by Captain [b6]. The 3rd section is headed by Captain [b6] who is assisted by Lieutenants [b6] and [b6]. The 4th section is headed by Captain [b6] and assisted by Captain [b6] and Lieutenants [b6] [b6] and [b6]. The 5th section is headed by Captain [b6] who is assisted by Captain [b6].

c. The Gera operative district has its headquarters located at Zeppelinstrasse 4, GERA (M51/K06) and is commanded by Major [b6]. The Gotha operative district has its headquarters located at Steinmuehlen Allee 2, GOTHÄ (M51/J06) and is commanded by Lt. Col. [b6]. The Erfurt operative district has its headquarters located on Hohenyollernstrasse in ERFURT (M51/J36) and is commanded by Col. [b6] or Major [b6].

d. Under the administration of the Gera district is the operative group Weimar which covers the Stadts WEIMAR and APOLDA and the Landkreise WEIMAR. In the city of WEIMAR, the group office is separate from the sector office and is believed to be commanded by a Major [b6] who is assisted by 1st Lt. [b6]. The following persons, Soviet citizens, status undetermined, are employed to work within the city of WEIMAR: [b6] fnu [b6] fnu [b6] fnu [b6] and [b6]. [b6] This group operates out of the former courthouse on Ernst Thaelmannstrasse and uses the prison which is located in the basement of the same building. It has recently been reported that this group has been taken over by a Lt. Col. [b6], but it is believed that he is identical to 1st Lt. [b6]. The MGB also shares an office at Meierstrasse 15 or 17 with the local MVD.

4. REPORT OF FINDINGS

1. The following information on the MVD in WISMAR (M54/T49) Mecklenburg was obtained by Source through a contact in that city during the course of a recent trip into the Soviet Zone by Source.

2. The WISMAR office of the MVD is accommodated in two houses in the street "am Vogelsang". One of the houses is owned by a fnu **b6** contractor, and the other by fnu **b6** bookprinter. A town office is located at Schwerinerstrasse 3, in the apartment of a **b6**. Here meetings take place between German informants and MVD agents.

3. Department K5 of the local Criminal Police, which constitutes the liaison between the Kripo and MVD is housed in the Kreispolizei-amt on the Marktplatz. The entire WISMAR Kripo, together with Dept. K5, is under the direct control of the Kripo in SCHWERIN (M54/T46).

4. The chief informer of the MVD in WISMAR is a fnu **b6** living at Klosterdamm 60. **b6** has a direct line to the MVD which does not go through the German post office. Most of the time **b6** is occupied in SCHWERIN where the regional offices of the MVD in Mecklenburg are located.

Instructions for Case Officer:

Paragraph 1 contains a brief but complete synopsis of the case, its source and evaluation, and the reason for investigation.

Paragraph 2 contains specific and detailed instructions on what is desired to complete the case.

1. The attached lead sheet with diagram was submitted by S/A b6 of the Visa Section. The info is apparently outdated and may be of no value.

2. Request that you check area and police of that town to learn if that building is actually there and if it were ever used by any persons. If it has been used attempt to learn who lived there, their occupation and associates.

Check the radio aerial story and the murder angle that is contained in the report. Possibly the 702nd there has more info and may have cleared up this case before.

SUBJECT: POSSIBLE LOCATION OF WIGIB! ASSEMBLY AREA

RE : Espionage

2. On 2 Aug 48 Special Agent [b6] of the 702 CIC Det from Neubiberg contacted this Agent to disclose the following:

a. During November 1947 an Informant of [b6] told him it was believed that a small hut near the AES Station in Freising was maintained as an assembly point for Russian Intelligence Agents operating in Bavaria. The informant gave Special Agent [b6] a sketch of the location, and described the location as being an isolated house on a small island in the middle of the Isar River. Informant stated he had heard rumors to the effect that Russian Agents maintained a two way radioset in the house, that the island was well guarded by several persons, who during the summer months had posed as sun bathers lying around on the grass and in the shrubbery on the island.

b.

b1

Informant

had seen several people go into the house, but had never noticed any visible means of support by any of them.

c. Informant had seen a woman go to and from the house, and stated that she had remarked she feared she and her husband would be killed due to internal differences within the gang. Informant knew that during the Fall of 1946 two Russians, living in the house, were tried in Court for the murder of one HULUTSCHENKO who was brutally murdered and thrown into the Isar River near Freising, and that these two persons were released for lack of evidence. Informant believed Hulutschenko to have been a member of the group, that the woman living there, whose name he did not know, knows the full story behind the matter and feared that she and her husband would be murdered by the same persons.

d. Special Agent [b6] crossed the River near Freising, one night in November 1947, to observe the house from a clump of trees. He noticed a radio antenna on the small house, but believed it to be

to small and not powerful enough to carry more than a few miles.

b6 wrote an MOIC on the matter, but discontinued the investigation upon being advised by his Detachment Commander that the matter fell within the jurisdiction of the 970th CIC. As far as b6 knows a report was never forwarded to EUCCOM Hqs. . .

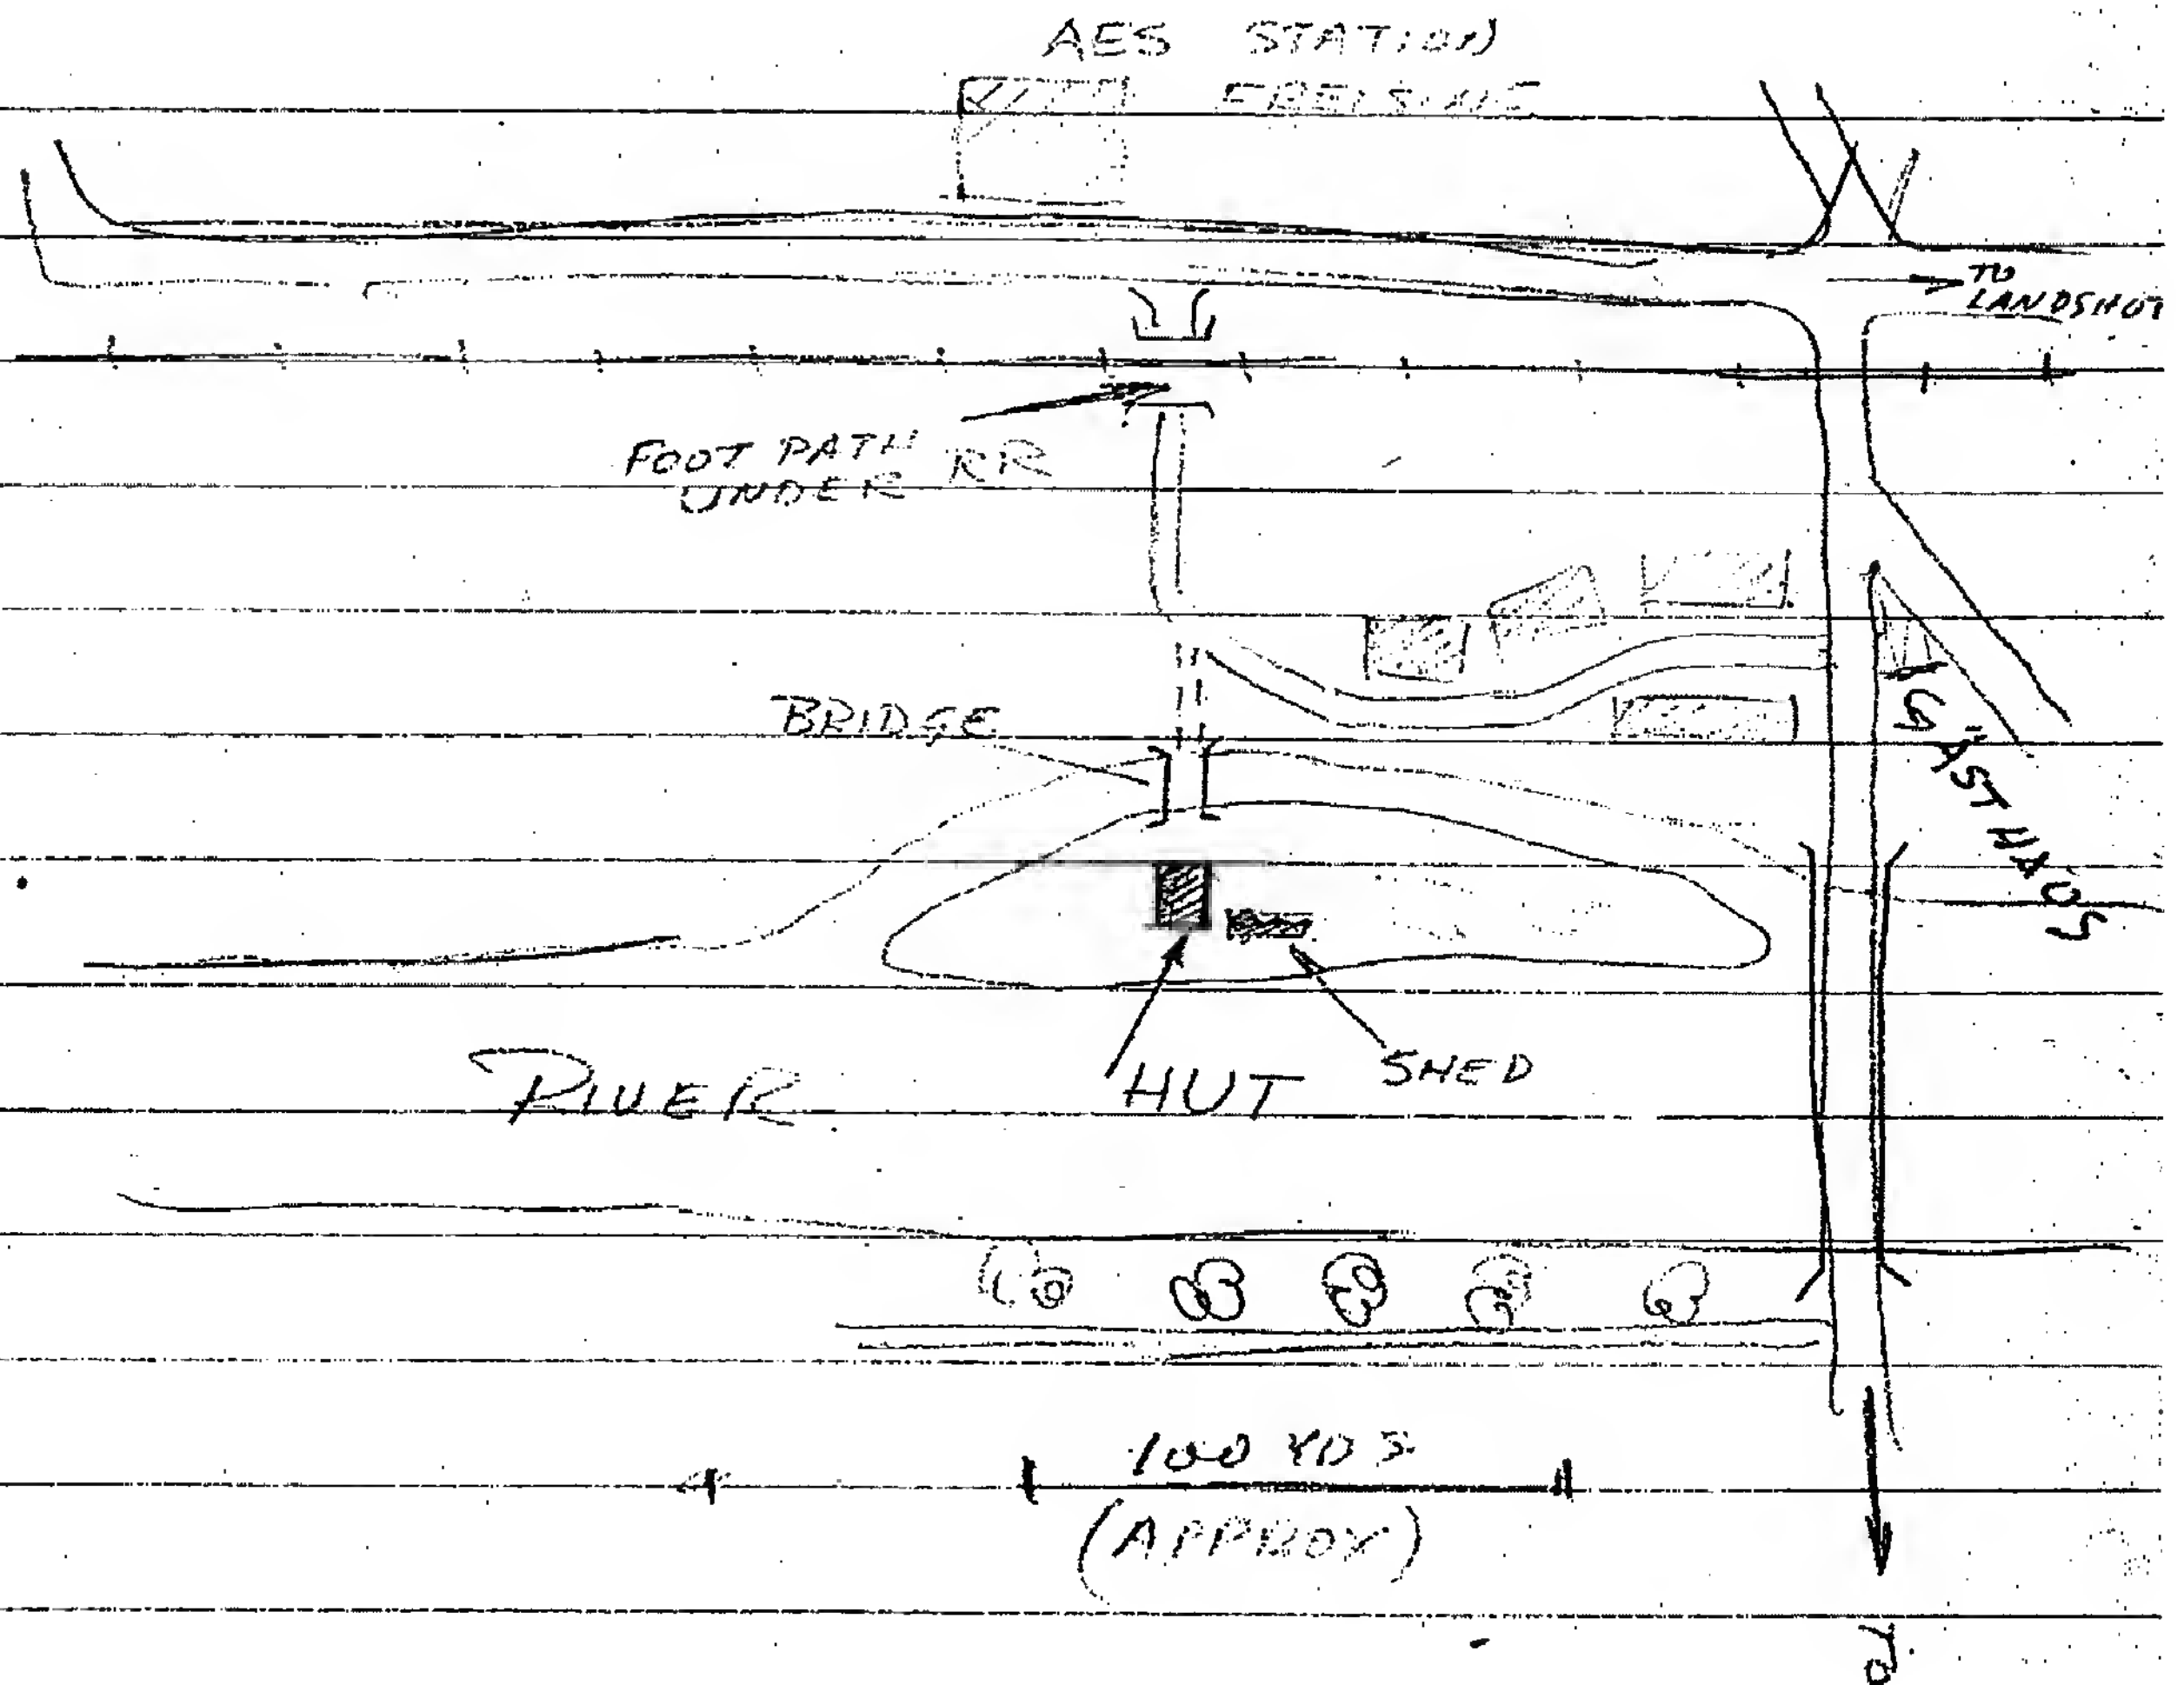

AGENTS NOTES

Information is a little old to be of too much value at the present, for even though it may have been true eight months ago, it is quite possible the entire group has changed its address, however if any further investigation is contemplated this Agent is most interested in doing same.....

A sketch, drawn by b6 is attached, showing the exact location of the hunt on the island near Freising.

(2) The building is guarded day and night by two (2) Soviet guards and is lighted at night by floodlights. During off-duty hours the charge of quarters is the only person in the building. He is always of officer grade.

(3) The office is occupied by approximately fifteen (15) personnel. Available information pertaining to them is as follows:

- (a) Fm b6 Lt. - interrogator-agent
- (b) Fm b6 Lt., " "
- (c) Commanding Officer, Major, name unknown
- (d) Politofficer and Adjutant, 1st Lt., name unknown
- (e) S-1 and S-4, 1st Lt., name unknown
- (f) Interpreter, Soviet EM or civilian.

(4) Frequent visitors from other ~~NKWD~~ offices, as well as couriers, were observed entering the office. Couriers seem to operate irregularly and are dependent upon that office for transportation to their next point of call. Couriers seem to originate from separate points, not from the same main office.

(5) Attached as Exhibits to this report are a floor-plan of the building housing the headquarters of the NKWD in WERNIGERODE and a sketch-map of the location of the building, both drawn by source.

SUMMARY REPORT OF INVESTIGATION

SUBJECT: Soviet Intelligence (MVD)

APD 171
Copy forwarded to
Rq-A D-18 834
by Buckslip 29 July 48

Cross Reference: Order of Battle of MVD in
GREIFSWALD (N55/P74)

Case Classification: Positive Intelligence

1. Reason for Investigation: Pursuant to instructions contained in Section Four, Part I, pars 107 and 108, Orientation and Guidance Report No. 7, Hqs 970th CIC Det., EUCOM, dated 28 February 1948, the following information is submitted.

2. Synopsis of Previous Investigation: None.

3. Synopsis of Present Investigation: The following information was received from an uncarded source of this detachment. On 5 May 1948, the aforementioned source was interviewed concerning the Subject of this report due to the fact that source had lived in the city of GREIFSWALD from [b1]. The reason that source left this city was because the MVD demanded that he work for them as an informant. Following is a summary of information as received from this interview.

a. The MVD in GREIFSWALD is broken down into the MVD for the Kreiskommandatur and the MVD for the Stadtkommandatur with their next high echelon of command in SCHWERIN (M54/T46). A colonel, name unknown to source, is in command in SCHWERIN. The chief of the Stadtkommandatur MVD for GREIFSWALD is [b6] (Lt Colonel) Fnu [b6] who has been with the MVD of GREIFSWALD since 1945. [b6] resides on Muhlentorstrasse, in the house standing on the right side of the Greifenhaus (a famous restaurant in GREIFSWALD) as one faces the Greifenhaus. [b6] is in direct control of the political section assisted by a Captain Fnu [b6] is allegedly a German Jew who in 1936 fled to Russia to escape persecution by the Nazis. [b6] formerly lived in [b6] under the name of [b6] which he changed to his present name of [b6] after he emigrated to Russia.

b. A Captain [b6] is in command of the Kreiskommandatur MVD and has been in GREIFSWALD since the summer of 1946. [b6] resides at Langestrasse 86. The latter address is within the compound into which most of the Russian MVD personnel have moved. In early autumn 1947, the Stadt and Kreis MVD moved their offices within the compound, (See Exhibit 1).

c. The MVD center of activity in GREIFSWALD is Domstrasse 6 & 7. This address is quite well known and although prisoners are interned here, their stay is of a comparatively short period. Intensive interrogations are made here and if a prisoner is to be incarcerated for an indefinite period, he is moved to the prison located in NEU-BRANDENBURG (N54/U66) near BERLIN (N53/Z75), after he has been thoroughly interrogated. After being preliminary questioned at Loensstrasse 4, suspects are removed to Domstrasse 6 & 7 for further interrogations and confinement. The MVD personnel of the Stadtkommandatur and Kreiskommandatur total approximately fifty officers and sixty enlisted men. Only the officers are engaged operationally and the enlisted men act as guards and orderlys. The officers are sometimes in civilian clothing.

d. The MVD of GREIFSWALD operate almost exclusively through German informants, most of whom are forced to inform in order to protect their own lives. However, there are some who are willing informants. The following are three brothers known to source to be willing informants:

- | | | |
|-----|------|--------------------------|
| (1) | [b6] | Brinkstrasse, GREIFSWALD |
| (2) | [b6] | Langereihe, GREIFSWALD |
| (3) | [b6] | SCHWERIN |

Another informant of the MVD in GREIFSWALD known to source to be a forced agent is [b6] living at [b6]

4. Undeveloped Leads: None.

EXCLUDED FROM GENT
DECLASSIFICATION

5. Agent's Comments and Conclusions: The names of the MVD personnel mentioned in this report came into source's possession [b6]

[b6] 5 USC 552 (b)(1)
The MVD officers patronized source's business due to the proximity of his shop. It was during these occasions that source came to know these personalities. Whether these personalities are still serving in GREIFSWALD or not, is not known by source, however the above information is correct (according to source) as of Autumn 1947.

BORDER REPORT FOR 7 MAY 1948

LEIPZIG(N52/E21) SCHONEAU(M52/E11)

There was an MGB Headquarters organized in LEIPZIG during March 1948. It is located on the corner of Windscheid and Schnecke streets in the S-3 area of LEIPZIG. This building was formerly the headquarters for the German Wehrmacht Gruppen Kommando (Army Group Headquarters) in LEIPZIG. According to rumor this MGB organization is designed to carry out intelligence activities in Allied Occupied Zones of Germany. In the past few weeks Soviet Armored Regiments, two in number, equipped with T-34 Tanks moved into the former German anti-aircraft barracks located at LEIPZIG-SCHONEAU. An artillery and an engineer battalion moved into LEIPZIG during April. Present Soviet troop strength in the LEIPZIG area was estimated to be 6,000 - 7,000 whereas two months ago it was 2,000-3,000. The majority of the troops are very young and mostly Mongolians.

SUBJECT: MVD Headquarters in RADEBEUL (N52/F19)

Re: b1

1. Reference paras 107, 108, O & G Report #7, dated 28 February 1948, the following information concerning MVD headquarters in RADEBEUL, near DRESDEN (N52/F29), is submitted.

2. In the course of interrogation of an illegal border crosser, b1 the following data concerning the MVD was obtained. b1

b1

b1

a/ b1 born b1 in b1 formerly lived with b1

b1

b. According to b1 RADEBEUL is about eight (8) km from DRESDEN, and has a population of about 50,000 persons, including from 6 to 10,000 Soviet military personnel. Many Soviet headquarters have been moved there from DRESDEN because it is secluded, yet close to the autobahn and DRESDEN and there is ample housing available.

c. [b1] said that the "GPU", the only name he apparently knew the organization by, had its offices on Augustusweg, in a former Wehrmacht sanatorium, and is commonly known in the town as the "GPU-Buero." The building has three (3) stories, is fairly extensive in size, is of a light-tan color and has a red roof. The entire area is surrounded by barbed wire, and a villa, located within the area, serves as a prison. The villa is surrounded by a high-board fence so that it is impossible to see in. Germans are strictly forbidden to enter any of the area. (See par A and B, Annex 1).

d. About forty (40) officers, some in civilian clothes, work in this building. Some of the officers wear the cap with red band, while others wear the cap with green band. About 100 other persons, including Soviet army EM and civilians, also work in this compound. Transportation used by this group include German-made cars, U.S. jeeps and 2½ ton trucks, and a few officers have pre-war Fords and Chevrolets. [b1]

[b1] used a HORCH 4-door sedan, 1936 or 1938 model, 12 cyl., black, license number C-1775, for duty trips and an OPEL Olympia, 1939 model, dark blue with Soviet papers, license CM-7400, for private use. Gas and oil for official trips was obtained through POL chits (see Annex 1, par V), while fuel for private driving was obtained by the driver from black market sources.

e. Major [b6] often made official trips to KARLSHORST (N53/Z75), RIESA (N52/E81), CHEMNITZ (N51/K66), and DRESDEN. His destination in KARLSHORST was usually the TASS Nachrichten Agentur; in RIESA it was the "GPU" office, said to be a sub-office of RADEBEUL. In CHEMNITZ, [b6] had his driver park outside the main rail station while he disappeared into a "restricted zone" nearby. In DRESDEN, [b6] visited various headquarters offices, including the SMA and the former NKVD prison, on Muenchnerplatz, now housing the Soviet War Crimes tribunal. At other times [b6] made business trips using a Soviet military driver.

EXCLUDED FROM GENERAL
DECLASSIFICATION SCHEDULE

f. [b1] [b1] stated that personnel of the RADEBEUL "GPU" office took frequent trips to KARLSHORST; POTSDAM (N53/P68), FRANKFURT/Oder (O53/V63), KOTTBUS (N52/A57), STRALSUND (N55/P44), and other major cities of the Soviet Zone. According to [b1] the the RADEBEUL "GPU" office deals with desertions of Soviet military personnel, sabotage, espionage, cases of political unreliability and criminal offenses of Soviet and indigenous persons. [b1] claims that he had seen prisoners in Soviet army uniform under guard by Soviet soldiers.

g. The Soviet drivers said that dependent wives, under 35 years and childless, are permitted to remain in the Soviet Zone and work for the SMA beyond the 1 June deadline, when all other

1529

~~CONFIDENTIAL~~

dependents are supposed to have left the theater. [b1] said that Soviet personnel deal extensively in the black market and are seldom prosecuted. They usually deal in small items which they can take back to the USSR. Dependents and military personnel returning to the USSR clear through a camp at MEISSEN (N52/P09), [b1] said.

h. [b1] noted that morale of Soviet EM is very low and that desertions are frequent in spite of severe penalties. There is a general fear of Americans, and war, although regarded as inevitable, is dreaded, especially among Soviet veterans of the recent war. [b6] never tried to instill Communism in his driver, but remarked at one time that "Germany under Communism, would have won the war against the USSR." [b6] did not elaborate on this statement. [b1] said that he was not required to join the SED and was not even a member of the FDGB.

i. The German population in the DRESDEN area is said to be apprehensive over the prospect of war and are generally anti-Soviet. The reported Allied search of SED headquarters in BERLIN (N53/Z75), as well as the US cordon thrown around the Soviet railroad administration in BERLIN recently, were taken by the population to mean immediate conflict.

j. [b1] said he left RADEBEUL [b1] and was picked up by German police in WIESBADEN (K51/M36) about three days later. He says that he wants to become a miner in the RUHR, and had left RADEBEUL because he had learned through a friend that 10,000 men were to have been called up for mine labor in the Soviet Zone.

3. The RADEBEUL "GPU" office may be DRESDEN Opersektor office of the MVD. The large staff, ample transport and prevalence of high-ranking officers seems to indicate a major headquarters.

a. It is recommended that this information be forwarded for evaluation.

SUBJECT: MVD Locations and Employees in Kreis MALCHIN,
Land Mecklenburg

RE : D-154012

Copy forwarded to

Rq A D-185835

by B. 19 Apr 48

1. Reason for Investigation.

The following information was submitted to this agent on 22 March 1948 by an illegal border crosser from the Russian zone.

2. Results of Investigation.

a. Location of MVD offices in STAVENHAGEN (N54/U47), Kreis MALCHIN, are in the Fritz-Reutter Strasse in the residence of a painter, fnu b6 and in the Klockoverchaussee in the residence of a merchant, fnu b6

b. Kreis Malchin headquarters of the MVD was moved several months ago from STAVENHAGEN to MALCHIN. Address is unknown. There are purportedly two (2) Russian MVD agents at this office, names unknown.

c. Names of German informants of the MVD STAVENHAGEN are as follows: b6 pre-1933 KPD member; fnu b6 city policeman; fnu b6 Ukrainian; b6 eighteen (18)-year old girl; fnu b6 tailor; fnu b6 interpreter at the city hall. The last two (2) individuals were purportedly Russian prisoners of the Germans in World War I, who remained in Germany after the war and married German nationals.

3. Agent's Comments and Recommendations.

Information comprising this report is evaluated F-3. The illegal border crosser who volunteered above information to this agent stated that her husband was arrested by the Russians while in BERLIN. For this reason, informant joined her brother who is a resident of FUERTINGEN (L49/S10). A discreet background check of the casual informant's brother revealed no political affiliations. The casual informant made a good impression on this agent.

MEMORANDUM FOR THE OFFICER IN CHARGE

SUBJECT: MVD Radio Station in the LERCH/BIRKENHUEGEL Area

RE : MVD Activities on the US-Soviet Border

1. Reference is made to the Orientation and Guidance Report, Number 5, Headquarters, Counter Intelligence Corps Detachment, European Command, APO 757, US Army, dated 31 October 1947. Attention is invited to Section IV, Part I, page 55, paragraph 151.

2. Information pertaining to the MVD Radio Station in the LERCH/BIRKENHUEGEL (M51/J81) area, submitted by O-157-VI, is as follows:

a. A new radio station, under MVD control, has been placed into operation in the town of LERCH/BIRKENHUEGEL. All events that occur in the immediate area are radioed to the MVD SCHLEIZ (M51/J82) office. It has been stated that as soon as an American patrol or an American vehicle appears on the US-Soviet Border, word of same is immediately flashed to SCHLEIZ. Any signs of unusual activity are also relayed to the SCHLEIZ office.

b. The cover name of the radio station is "ELLI 1". The size, type and kind of radio station could not be determined to date. The operators of the LERCH radio station are three Soviet civilians. They are members of the MVD-I.D.A.--Home Service, Division SCHLEIZ.

c. The following are the physical descriptions of the LERCH radio operators:

(1) Name:	b6
Present Address:	SCHLEIZ (M51/J82)
Occupation:	Radio Operator
Hair:	Black
Eyes:	Black
Height:	5' 7"
Remarks:	About 25 years of age. Speaks German and Russian. Long face, slender build.

MEMORANDUM FOR THE OFFICER IN CHARGE:

SUBJECT: Conditions in Russian occupied areas

RE : D-154010

1. Reason for investigation:

a. Information listed in paragraph two (2) below was brought back from the Russian Zone of Germany, this date, by a sub-informant of O-711-I-W and concerns conditions in that area.

2. Results of investigative activity:

a. During the past six (6) weeks numerous small MVD offices in the towns surrounding GERA (M51/K06) have been abolished and have been consolidated into one (1) main headquarters at GERA, Zeppelinstrasse, (in the house of the former district court). Simultaneously with this move went a consolidation of the offices of the German Criminal police. Headquarters of the Criminal police was moved to GERA, Victoria Hotel, near the railroad station. This office is responsible for the new Criminal police district "Thueringen Ost" and the newly appointed chief is German Kriminalrat [b6] fnu. Shortly after the arrival of this new official a wave of arrests of former Nazi party members commenced. This action has allegedly taken place over the protest of the GERA police chief, who was however over-ruled by the Russian authorities. The arrested persons, (several hundred) have been kept in confinement under German guard, and have all been interrogated by Russian MVD officers at the German Criminal police offices.

b. Notes covering one such interrogation are being obtained.

3. Agent's Notes, Comments and Recommendations:

a. Evaluation of this report: B-2.

The undersigned concurs in
the above evaluation.

I. Counterintelligence School in DRESDEN

A school of the Soviet Counterintelligence Service is located in DRESDEN (N 52/P 29). At this school, mainly repatriated Russians are trained as agents for the Western zones by the Soviet Counterintelligence Service.

II. Officers of the Soviet Counterintelligence Service in the US Zone

Major [b6] is the head of the Soviet Counterintelligence Service for a large area of the US zone (supposedly for Bavaria). Maj. [b6] is assigned to the Soviet Mission in REGENSBURG (N 50/U 15). To carry out his missions, Maj. [b6] is authorized to issue orders to Lt. Col. [b6] the head of the REGENSBURG Soviet Mission.

III. Soviet Counterintelligence Net in the Western Zones

In order to carry out missions, the Soviet Counterintelligence Service established a large agent net in the US and British zones which is directed from agencies in the Soviet zone. Most agents of this counterintelligence net formerly lived in their present operational area. They were trained at an agents' school in DRESDEN and then given missions in groups.

MEMORANDUM FOR THE OFFICER IN CHARGE

SUBJECT: MVD in EIBENSTOCK, near AUE.

RE: b6

1. Reason for Investigation: Information received through informant P-2-I-S indicated that a resident of STUTTGART, in possession of a regular Interzonal pass, was arrested by a Russian agency and interrogated for five days. Investigation shows that one b6 STUTTGART was arrested by German Police and turned over to MVD authorities on the 29th April 1947. Interrogation of b6 revealed the following information.

2. Results of Investigative activity: A. b6 left STUTTGART after he had received an interzonal pass to look after his father's property at EIBSTOCK (N51/K54) near AUE. After arrival there he reported to the police and was sent by them to the Russian Commandatura where he obtained a permit to stay in EIBENSTOCK for one week. He was told that the AUE EINBENSTOCK region was closed/territory that he would have to report to the Commandatura before leaving. Not being able to finish his business in the allotted time b6 applied for an extension of his stay. On the same evening, at 0100 hours he was arrested and lodged in the German police jail, where he was held for two days. He was then transferred to a room in the Commandatura where he was under guard for 24 hours. A team of interrogators arrived then to investigate him. The interrogator, a 1st Lt of the Red Army was accompanied by an interpreter of Mongolian origin who spoke fair German. The interrogator was described as being 25 years old with blond hair, stocky build, and a scar on his forehead. The Interpreter was about 30, stocky build, black hair and also had a scar on his forehead. Both persons are attached to a MVD headquarters in AUE and come to EIBENSTOCK on Tuesdays and Thursdays.

B. b6 was questioned as to his motives for the trip into the Russian zone but none of his answers were accepted. He was shouted at and threatened with severe physical punishment if he would not divulge the identity of the person who had sent him into the AUE region. Interviews lasting from three to four hours consisted mostly of b6 repeating his story, and the Interrogator shouting at him in Russian, which the interpreter translated as: "You lie" ad infinitum. After five days he was released and told to get out of the Zone. No papers or valuables were taken away from him. COL b6 BY b6

3. Agent's Comments and Recommendations: It is well known that in the vicinity of AUE old silver mines have been reopened and that through-out the area very severe security measures have been taken. Several sources state that SMA is extracting uranium bearing ore from these abandoned pits. Frequent road blocks intercept all traffic in that vicinity and extraordinary security measures have been taken to prevent the infiltration of outsiders. It is stated that a special stamp is necessary on the Kennkarten of residents of that area in order to permit their movement.
